Exhaustion.

HORSFORD'S
ACID PHOSPHATE.

A wonderful remedy, of the highest value in mental and nervous exhaustion.

Overworked men and women, the nervous, weak, and debilitated, will find in the Acid Phosphate a most agreeable, grateful, and harmless stimulant, giving renewed strength and vigor to the entire system.

Dr. Edwin F. Vose, Portland, Me., says: "I have used it in my own case when suffering from nervous exhaustion, with gratifying results. I have prescribed it for many of the various forms of nervous debility, and it has never failed to do good."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION: Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

The Nation.

NEW YORK, THURSDAY, JUNE 2, 1892.

The Week.

THE Senate is endeavoring to enact a law which will give the Federal authorities specific jurisdiction over criminal attacks by citizens of the States on the subjects of foreign nations with whom we have treaty agreements. The necessity for such a law became apparent through the massacre of Italians at New Orleans. The proposed law, which has been reported by the Committee on Foreign Affairs, is in these terms:

"That any act committed in any State or Territory of the United States in violation of the rights of a citizen or subject of a foreign country secured to such citizen or subject by treaty between the United States and such foreign country, which act constitutes a crime under the laws of such State or Territory, shall constitute a like crime against the peace and dignity of the United States, punishable in like manner as in the courts of said States or Territories, and within the period limited by the laws of such State or Territory, and may be prosecuted in the courts of the United States, and, upon conviction, the sentence executed in like manner as sentences upon convictions for crimes under the laws of the United States."

The opposition to this measure in the debates last week was so strenuous that the Senate showed a disposition to let it lie over until December. Mr. Gray (Dem., Del.) opposed it on the ground that "it transfers the administration of the criminal laws of the forty-four States to the Federal tribunals." Mr. Palmer (Dem., Ill.) questioned the power of the United States "to pass a law that shall operate differently in forty-four different districts of the same country," and declared that the act was unnecessary and mischievous. Mr. Vilas (Dem., Wis.) declared the legislation unnecessary, and said: "Every citizen of Italy, every citizen of any foreign Government, enjoys now in each of the States of the Union the same measure of protection, the same rights and privileges, that are enjoyed by the citizens of that State, so far as its criminal laws are concerned."

Without discussing the merits of this act in its form as under discussion, it is well to point out that the framers of our system of government saw clearly the necessity of giving the Federal authorities jurisdiction in the line which the Senate Committee recommends. Arguing in this direction, Madison says ('Federalist,' No. xliii):

"As the constitutions of the States differ much from one another, it might happen that a treaty, or a national law, of great and equal importance to the States, would interfere with some and not with other constitutions, and would consequently be valid in some of the States at the same time that it would have no effect in others. In fine, the world would have seen for the first time a system of government founded on an inversion of the fundamental principles of all government; it would have seen the authority of the whole society everywhere subordinate to the authority of the parts; it would have seen a monster, in which the head was under the direction of the members."

Hamilton, in paper No. lxxx., arguing that "the judiciary authority of the Union ought to extend to these several descriptions of cases; . . . (4) to all those which involve the peace of the confederacy, whether they relate to the intercourse between the United States and foreign nations, or to that between the States themselves," said:

"The fourth point rests on the plain proposition that the peace of the *whole* ought not to be left at the disposal of a *part*. The Union will undoubtedly be answerable to foreign Powers for the conduct of its members. And the responsibility for an injury ought ever to be accompanied by the faculty of preventing it. As the denial or perversion of justice by the sentences of courts, as well as in any other manner, is with reason classed among the first causes of war, it will follow that the Federal judiciary ought to have cognizance of all causes in which the citizens of other countries are concerned. This is not less essential to the preservation of the public faith than to the security of the public tranquillity."

The secret shivering of the Administration over the black outlook for the Treasury is put in evidence by the instructions sent out by Commissioner Mason to all collectors of internal revenue. His letter to Collector Wenker of St. Louis has been made public, and reads as follows:

"SIR: If possible, you will please collect so that you may report during the month of June on special taxes due for the year commencing July, 1892. You will please have your Deputy Collector notify taxpayers that they will be expected to pay the same before the beginning of the fiscal year, and report all money thus collected so that it may enter into the report of the present fiscal year. You will please make whatever arrangements are necessary to let the public know that taxes are expected to be paid in before the 1st day of July, and offer such facilities as may enable them to do so."

This letter speaks for itself, and shows how much dread exists at Washington lest June 30 should come with a deficit for the fiscal year and a powerful argument against Republican financiering. If these instructions of Commissioner Mason do not bring in funds enough to make up an artificial surplus, we advise him to offer a discount of 10 per cent. on all taxes paid in advance.

The silver-men in Washington are so considerate as to say that they do not expect to pass the Stewart Bill until after the two national conventions are held. It would certainly be embarrassing if *both* conventions should pass resolutions condemning that measure, either directly or by inference. Yet that is most likely to be the outcome, since Missouri and Tennessee, hitherto supposed to be the most fanatical pro-silver States in the Union that are not actually engaged in the production of that metal, have, in their Democratic Conventions, suggested a change in the legal ratio to correspond with the market ratio. There is nothing that the Stewart faction detest so much as a change in the ratio. What they want is a law compelling every creditor to accept 67 cents in silver as equal to 100 cents in gold. Debtors would thus have the strongest inducement to buy silver, and thus the silver-producers would "have the whip-hand" until business was completely readjusted on the new basis. After all preëxisting debts had been paid off there would be no advantage for silver-miners over other people, but in the period of transition there would probably be a considerable advantage. At all events they think so, and this is the reason why the Nevada Democrats in their State Convention added to the usual free-silver platform a protest against any change in the ratio, this being, we believe, the first time that such words have been used in any political platform whatsoever.

While only experts can judge of the wisdom of appropriating great sums for Mississippi River improvement, yet the laical mind can at least measure the size which those sums are reaching. This year's River and Harbor Bill—we take the figures from it after it reached the Senate—gives to the Mississippi River Commission for "improving" that stream "from Head of the Passes to the mouth of the Ohio River," the sum of $2,500,000. But, besides that sum, additional contracts can be made for carrying on the work from July, 1893, and three years succeeding, at a rate not to exceed $2,500,000 a year. Special and local improvements of the lower river call for $355,000 more. Then above the Ohio there is $1,500,000 for improvement, and contract power for three years at the same figure per year. Finally, there is $900,000 for the Missouri River. Thus there is apparently set apart for the Mississippi and its great tributary the sum of $5,255,000 directly, and what may be considered a Federal pledge of about $12,000,000 more. Most of these great sums are to be expended for works the permanent value of which cannot be demonstrated for many years, while some of them may be proved valueless by the next great flood.

Two points on this subject call at this time for special attention. One is the fact that the floods on the upper river and on the Missouri have wrought probably even greater havoc than on the lower waters. What, therefore, has popularly been considered a "problem" limited chiefly to the Mississippi below the Ohio, becomes a larger and more costly problem, reaching to the headwaters of the erratic stream and combining both its vagaries of drought and its wild moods of overflow. A second point is, that each Congress, before it gives these huge sums, should inform itself carefully how the works for which earlier sums

have been spent have stood the floods. For example, before the Senate Committee on Commerce in 1890 it was stated as proof of the excellence of the levee system that the great flood of that year broke through only 4¼ miles of the 1,100 miles of levees, while the flood of 1884 broke through 106.4 miles, the flood of 1883 341.1 miles, and the flood of 1882 589 miles. It surely ought to be within the power of the same Committee, when it passes upon the next River and Harbor Bill, to find out how many miles of levees have been swept away in the present flood. It may not be more than the four and a quarter miles of 1890, though the reports from the lower Mississippi indicate otherwise. But, whatever the figures, Congress ought to know them, and not pour out money without finding out results, and watching sharply the "improvement" as it goes on. It is not in the common mortal to plan and build a Mississippi levee, but he can tell when one is washed away.

In reversing its first action on the question of closing the World's Fair on Sunday, and in limiting its decision to voting that the Government exhibit should not be open to the public on that day, the House on Thursday went as far as its legitimate authority in the matter extends. The directors of the Fair should be left to settle this and all other matters of administrative detail. The excitement over the question in certain quarters seems to us to have been artificial and uncalled for. As one of the Illinois Congressmen explained the other day, it has never been proposed to have the machinery in operation on Sunday, or to compel the attendants to be on duty seven days in the week. The proposition is simply to have the grounds and buildings open, with the particular aim of giving many people an opportunity to see the gathered products of the world's industry and art who otherwise would be unable to do so. That this aim answers to a real desire of some workingmen is well shown by the attitude of the American Federation of Labor, the President of which has addressed a circular to all the trades unions in the country, "urging them to use all possible influence to secure the opening of the Fair on Sunday, as the only day on which the large majority of workingmen can visit it."

The Government has for many years encouraged the building up and development of the Smithsonian collections into a national museum, and has annually provided for the care and maintenance of collections partly derived from various expeditions sent out for other purposes, but largely procured through the Institution under whose care what is now the National Museum has been placed. The officers of the Institution have on the whole used wisely the funds placed at their disposal, and have called to their assistance, from other positions, men influenced less by the meagre compensation given than by pride in administering collections which appealed to their tastes. The Government has morally pledged itself to the continuance without abatement of the appropriation hitherto made. The officers of the Museum put in their last regular estimates on the basis of simple maintenance on the scale of the past, but these have been cut down to such an extent by the House as to inflict a lasting injury. Not only will the collections suffer greatly by neglect in various ways, but a still greater and irreparable loss will be sustained by forfeiting the services of officers who have slowly learned the special demands of a peculiar service, and who cannot be replaced like an ordinary clerical force. Looking only at the donors, it may be affirmed that by accepting the numerous gifts of which it has been the recipient, the Government has assumed the moral obligation of caring for them; and the collection consists only too largely of gifts. Whereas the British Government provides for the extension of its great Museum in all directions, and makes liberal appropriations consistently year after year, not only for the conservation of objects given, but for fresh and extensive acquisitions by purchase, our own Museum is not thus provided for. It is rich in objects obtainable in this country, and it has many derived from abroad; but it is, after all, a provincial museum, as for instance in the domain of natural history. It is less than second-class compared with the British, French, German, and Austrian museums, and it is even inferior to that of the little Danish monarchy. Such a condition is discreditable, and calls for anything but the diminution of appropriations.

Mr. Roosevelt has done a public service in showing up Postmaster-General Wanamaker as the falsifier that he is. It will be remembered that the Postmaster-General submitted to the House Committee on the Civil Service the report of two post-office inspectors on the Baltimore Post-office scandal, stating that Mr. Roosevelt's investigation was "unfair and partial in the extreme"; that his questions were "calculated to deceive and mislead, such as no committee of investigation, hunting for nothing but the truth and desirous of doing exact justice, would practise or allow," and that his report on the Postmaster's conduct was not only unjustifiable, but "malicious." Mr. Roosevelt very properly called Wanamaker's attention to the gross impertinence and impropriety of such reflections on the actions and motives of the head of one department of the Government by the subordinates of another, and proceeded:

> "But I have nothing to do with these subordinates. It is with you, the official head, responsible for their action, that I have to deal. By submitting this report without expressly disclaiming any personal responsibility for it, you seem to assume that responsibility and make it your own. I can hardly suppose that this was your intention, but I shall be obliged to treat these statements which in any way reflect upon my acts and motives as yours, unless you disavow them with the same publicity with which they were made to the Committee. I therefore respectfully ask whether you will or will not make such disavowal, so that I may govern myself accordingly, and not be guilty of any injustice."

Mr. Roosevelt sent this communication by registered mail to the Postmaster-General on May 16, and, having received no answer up to May 25, he went before the Committee and made the most complete and damaging exposure of Wanamaker's hypocrisy and double-dealing in this whole matter, pronouncing the statements of the inspectors which Wanamaker had endorsed, "slanderous falsehoods," and proving incontestably the truth of his own original report on the scandal.

Mr. Roosevelt went still further. Now that the Baltimore Postmaster and the inspectors of the Post-office Department have lied about the facts, and their lies have been endorsed by the head of the Department, he withdraws his former suggestion of leniency in the matter, and recommends the removal of the Postmaster and the two inspectors. This recommendation ought to be followed by the President without delay, though we presume nobody expects that it will be. Mr. Roosevelt made a further statement, which should have the widest possible publicity:

> "He declared that he wanted it distinctly understood that in the coming campaign he intended to do all he could legitimately, as a member of the Republican party, to assist in electing the Republican ticket; but he should also investigate every case brought to his notice by any responsible person of alleged political assessments or collections for campaign purposes, in the Democratic, Republican, or any other party, and should do everything in his power to break up this abuse, no matter where it hit."

We believe that Mr. Roosevelt is sincere in this position, and we trust that every body who learns of any attempt at extortion of the sort described will immediately bring it to his notice.

Undiluted McKinleyism is by no means likely to be the battle-cry of the Republican party in the approaching campaign. If it were to be, why should not McKinley himself be chosen to proclaim it? He could sound it forth on the truest pitch, and is entirely willing to do so; yet, with all the talk of "booms," scarcely a word is said about one for McKinley. Moreover, the cry now is all about our "enormous foreign trade" of the past year, and it is well known that McKinley thinks imports of foreign goods to be about as deadly as imports of foreign cholera or yellow fever. Then, Chairman Clarkson is giving it out that the tariff issue alone is not going to awaken unbounded enthusiasm among the Republicans of Iowa and the Northwest. Altogether, it would not be strange to find in the Republican platform the old-style plank promising a revision of the tariff by its "friends."

President Harrison's talk with the *World's* Washington correspondent on Thursday was dignified and sensible. The Blaine men will be quick to see his meaning when he said: "I do not hesitate to say that certain things have happened that I feel deeply, especially when any one has belittled some of the great public measures that have been carried out, or tried to place the credit upon others." It is to be said, however, that the President has taken great pains latterly to let the public know who is doing the work of the Department of State. All the later correspondence with Lord Salisbury was signed by the "Acting Secretary of State," although Mr. Blaine was in Washington at the time. And no sooner did the latter come to New York "to consult an oculist," than Mr. Harrison slipped in with a proclamation announcing "reciprocity" with Austria, again with Mr. Blaine's name left off the document.

The Tennessee Democratic Convention, coming immediately after that of New Jersey and adopting instructions for Cleveland in the same terms as those of New Jersey—instructions "to vote as a unit for his nomination at the Chicago Convention, which assembles June 21 prox., as long as his name shall be before the Convention"—must have an almost decisive effect upon delegates who are uncommitted, and especially on those of the neighboring State of Kentucky. It is interesting to note that the Tennessee Convention modified its free-silver resolutions by a declaration that the continued coinage of both silver and gold bullion should be so regulated "that every dollar so coined should be equal to every other dollar."

The turn given the Briggs controversy by the final action of the Presbyterian Assembly will have the effect of putting the case back just where it was last November, before the temporarily successful attempt to hush it up. The argument which carried the day in the New York Presbytery, that the further agitation of the question would be harmful to the church, was brought out in all its pathetic variations at Portland, but fell upon deaf ears. By a repeated display of their overwhelming majority, the conservatives made it evident that their blood is up, and that they are ready to push the case through to the end. It is probable that the voting was entirely unaffected by the elaborate arguments on points of ecclesiastical law which preceded it. The Presbyterian theory is that the General Assembly is a Supreme Court, where an entirely dispassionate exposition of the law of the church is given; but the absurdity of supposing that the action of a body of 600 members in exciting controversies will be marked by judicial fairness, was never more clearly shown than in the debates and majorities in this case. Prof. Briggs is left with still a year between him and the final decision, if he chooses to carry his case through all the church courts. This he will doubtless do, not so much on the ground of personal interest, as for the sake of his friends and the liberals in general, who are entitled to know what are the limits of toleration within the denomination. He has the element of time in his favor, but it must be clear to him that one year will not be time enough to overcome the present strong sentiment of his church against his theological views.

This sentiment had a very pronounced and menacing exhibition in the decision of the Assembly on Monday in the Union Seminary matter. The petition of the trustees of that institution to be allowed to withdraw from their relations to the Assembly was denied, the interpretation put upon the compact between the two by the Assembly of last year was affirmed to be the only possible one, and a boycotting resolution was adopted looking to the serious crippling of the seminary. This resolution provides, in effect, that a student in Union Seminary can receive no financial aid from the church, and will be refused ordination when he graduates. After such action, the appointment of another committee to confer with the seminary directors seems indeed a mockery, and was well described by one delegate as coming "with a flag of truce in one hand, and a club in the other to beat out the brains of the institution." The total result will undoubtedly be a troublous year for Union Seminary and for the whole Presbyterian Church.

The real significance of the demand for a universal eight hours' day is very well shown in a letter addressed to the London *Times* by Mr. Champion, the Socialist leader. His letter is perfectly temperate in tone and entirely clear in its statements. Some politicians, he declares, who desire to gain the votes of laborers without losing those of their employers, proclaim that if the eight hours' day is adopted the worker will earn his present wages by increased intensity of application to his work. If this were so, he argues, employers would not oppose the eight hours' day, nor would workmen demand it. On the contrary, the man who now works twelve hours has no idea of taking one-third less wages, or of working 50 per cent. harder, if his day is made eight hours. He is firmly of the opinion that it is desirable to have two masters running after one man, and believes that if the hours of labor were shortened the masters would have to hire more workmen to do the same amount of work as in the longer day. In short, the cry for an eight hours' day on the part of the workmen is not due to a desire for more leisure; their motive is to force up the price of labor by restricting its supply. What the movement really means is, therefore, a higher cost of production for the same amount of product owing to a larger expenditure for wages. As this might cause some establishments now pressed hard by foreign competition to close, thus throwing workmen out of employment, Mr. Champion very consistently suggests a return to the protective system of tariffs. It is scarcely surprising that with this clear exposition of the "true inwardness" of the eight-hours' movement, neither Mr. Gladstone nor Lord Salisbury felt able to offer any encouragement to its supporters.

M. Leroy-Beaulieu presents to *L'Économiste* some startling figures showing the rate of increase in the expenditure of the French communes. He complains that it is impossible to ascertain from any of the publications of the Government the amount of the loans made by these bodies, or of their debts, their accounts being "shrouded in the thickest darkness." Nevertheless, he is able by examining the product of certain fixed taxes for a long term of years to make an approximate estimate of the expenditure. Beginning with 1838, he shows that these taxes furnished to the national revenue 293,000,000 francs, to that of the departments 60,000,000, to that of the communes 33,000,000. In 1860 the share of the National Government had only slightly increased, that of the departments was over 100 millions, while that of the communes was 73 millions. In 1875 the figures were respectively 395 million francs, 144 million francs, and 143 million francs, and in 1891 they amounted to 448 million francs for the nation, 170 million francs for the departments, and 186 million francs for the communes. In other words, while the revenue derived from these taxes devoted to national expenses has increased 53 per cent., that applied to the departments has increased 181 per cent., while that expended by the communes has increased 467 per cent. These figures, it is to be borne in mind, show only the expenditure of revenue derived from certain direct taxes, but the revenue of the communes from other sources is greater than from this. The *octrois* produced 77 million francs in 1838, and in 1890 295 million francs. From other statistics it appears that the total receipts of the communes from all sources in the year 1885, the last for which the figures are returned, were 1,019,000,000 francs. These receipts exceed those for 1877, the only year available for comparison, by only 10,000,000 francs, while the total expenditures, amounting in 1885 to 1,060,000,000 francs, showed an increase of 62,000,000 francs. As M. Leroy-Beaulieu observes, the official explanation of these figures as "the result of social evolution," may be accepted in part, but the increase has been quite too great to be satisfactorily accounted for by this convenient phrase.

THE VOICE OF NEW JERSEY.

In many respects the action of the New Jersey Democratic Convention last week is the most significant event of the present popular movement for Mr. Cleveland's nomination. New Jersey is the one certain Northern Democratic State, having given its electoral vote for every Democratic Presidential candidate in twenty years. It is always included with Indiana, New York, and Connecticut as a State essential for Democratic success in the election. This year a fresh significance was given to its conduct by the confident prediction which the Hillites put forth at the time of their mid-winter convention. They declared then that the New York Convention had merely taken the lead in a general Hill movement in all the States which, in conjunction with the solid South, would be necessary to Democratic success in November, and that in due time Indiana, Connecticut, and New Jersey would follow suit. It was proposed also to make a break in the South by getting a solid Hill delegation from Georgia.

In every particular this scheme has been a failure. Indiana and Connecticut elected Cleveland delegations some weeks ago, Georgia took similar action soon afterwards, and now comes New Jersey with the most emphatic Cleveland victory of all the series. Not only were the anti-Cleveland forces completely routed in the Convention, but such of their representatives as were allowed to get upon the delegation will go to Chicago under iron-clad instructions to vote for Cleveland, so that any opposition by them to his nomination will be futile. All the well-laid plans of the Abbett-Hill Machine to prevent instructions, and to allow only a perfunctory mention of Mr. Cleveland to appear in the platform, were swept away by the popular demand for Mr. Cleveland's nomination. From the moment the delegates got on the ground they took matters into their own hands, set the Machine and its leaders aside as of no account, and, refusing to trust the tardy conversion of the anti-Cleveland men who desired to go as delegates to Chicago, declared that they would let them go only under such conditions as would make impossible any betrayal of the people's desire.

This action is all the more significant from the fact that it is practically against all precedent. In 1888 the New Jersey Democrats did instruct their delegation for Cleveland, but in that year Cleveland was the only candidate before his party, and every State convention gave instructions for him as a matter of course. But in all other years the New Jersey Democrats have held that instructions were not advisable and have declined to give any. In view of these facts, the Convention's resolution, which is a model of its kind, is most noteworthy. It assumes in its opening sentence that there is something of larger import in this year's situation than mere State interests, by saying: "With a full recognition of the responsibility of the Democracy of New Jersey towards the national Democracy, we name as our candidate for the Presidency the statesman who boldly took the decisive step in the way of tariff reform." That is the spirit which was shown in Massachusetts, Pennsylvania, and Indiana when the "favorite son" nonsense was forced into the background in order to show the National Convention that the Democrats of those States were able to take a national rather than a local view of the situation. Coming from New Jersey, it amounts to a notification to the National Convention that the Democratic voters of that Democratic State look upon Mr. Cleveland as the strongest possible candidate. That there might be no doubt about their meaning, they instructed their delegates to vote for him "as long as his name is before the Convention."

After this demonstration, it will be worse than folly for the anti-Cleveland Democrats to continue their opposition to his nomination. Every successive State Convention has emphasized the fact that that opposition would never have existed at all but for the absurd ambition of Mr. Hill to make himself a candidate. There has never been in any State the slightest popular support for it. It has been entirely machine-made, and in every State in which it has come in collision with the popular sentiment of the party it has been defeated. We do not count the personal success of Gov. Boies in Iowa, or of Mr. Watterson in Kentucky, or the soft-money triumph of the Farmers' Alliance in South Carolina and the free-silver heresy in Colorado, as in any sense Hill victories. They may be in some ways a rebuff for Mr. Cleveland, but they are not favorable to Hill's claims. There is no argument against Cleveland's candidacy except that he may fail to carry New York through the treachery of the Hill faction. Nobody denies that he is the choice of an overwhelming majority of Democratic voters, and there is nothing between him and a nomination now except the remote possibility that his opponents may be able under the two-thirds rule to prevent it. It is not necessary to point out the position in which the party would put itself were its most popular candidate to be denied nomination in that way.

THE SILVER DEBATE IN THE SENATE.

The debate on the silver question, which was started by Senator Morgan and has been moving in a languid way for several weeks, had some life put into it on May 25 by Senator Sherman, who made a speech abounding in sound doctrine, and with perhaps the very minimum of unsoundness as a salve to the unconverted. We will merely glance at the latter, by way of showing why we cannot agree with all of his positions. He said that he voted with great reluctance for the present silver law—the act of July 14, 1890; that he accepted it as a compromise, hoping that it would cause silver to advance to parity with gold, as Senator Jones predicted that it would. It had not had that effect. On the contrary, silver had gone lower, as compared with gold, than it had been for ages. "Still, there was this about it," he continued: "there was behind every dollar of Treasury notes issued under the act of July, 1890, a dollar's worth of silver, measured by the gold standard, so that the Government of the United States could not lose very largely in the purchase of silver under that law." The Secretary of the Treasury, a few days since, reported that there had already been a loss of more than $11,000,000 on the purchases of silver under the Coinage Act of 1890, if we take as a measurement of loss the price at which the silver was bought and the present market price—that is, if we assume that all the silver bought could be sold at the present market price. But we know that it could not be so sold, the mere offering of ninety-four million ounces being sufficient to knock the price down ten points at least. But in fact none of this silver can be sold under present laws at any price. All that can be done is to go on buying. Therefore, speculations as to the amount of "silver behind" are useless as they are gratuitous.

This, however, is but a small blot on the otherwise vigorous discourse of the Ohio Senator. He exposed the folly and wickedness of the free coinage of silver in this country with an unsparing hand, showing how it would cut down wages, reduce pensions, take 33 per cent. off the value of savings, and throw all business into confusion and hotch-potch. All this was proposed to be done, too, while an international conference was in prospect "to bring about a proper parity between the two metals." This phrase stirred up Senator Stewart of Nevada to remark that the conference looked to a change in the ratio of gold to silver by international agreement, and that he hoped no such agreement would be made. Indeed, he was opposed to the conference any way, and he did not expect anything to come out of it.

We will now glance at the resolutions of Senator Morgan, upon which this debate is made to hang. They direct the Committee on Finance to report, first, the effect of the Bullion Purchasing Act of 1890 on the price of silver bullion. This is an extremely foolish question. Everybody knows, or can easily find out, what the price of silver bullion has been since the passage of that act. In other words, the effect of various contributing causes can be ascertained by reference to the commercial columns of the newspapers, but nobody can say how much of it was due to the act of 1890. Nobody can do more than give his private opinion.

The second query is "whether the Treasury notes issued under that act had been sufficient to maintain the two metals on a parity." This is more foolish than the other question. Since the two metals have not been on a parity, according to

our ratio, it needs no ghost come from the grave to tell us that neither have the Treasury notes, nor the sun spots, nor the rain-making experiments of Dyrenforth been sufficient for that purpose.

Third question: "Whether the notes had ever been at a discount, and whether they had not averted a dangerous financial crisis." That the notes have not been at a discount up to this time, having been kept at par by the Secretary of the Treasury in pursuance of the law itself, is too well known to need an official report to sustain it. Whether they have averted a dangerous financial crisis is a matter of opinion altogether.

Questions four, five, and six may be grouped together thus:

(4.) Whether there was any law now existing authorizing the coinage of any dollar, either of gold or silver.
(5.) Whether it was just to the people to put less silver in proportion into the subsidiary coinage than into the silver dollar.
(6.) What is the proportion of gold and silver coin actual in European countries and in China, Japan, India, etc.

The question whether there is any law now existing which authorizes the coinage of any dollar, either of silver or gold, might be answered either way without altering by a hair any business interests in the wide world, since we already have hundreds of millions of silver dollars more than we need, and since gold will take care of itself whether coined or not, and will answer all purposes of trade, even if Government keeps hands off.

One other question—perhaps the main one, although not printed—was answered also, viz.: "Will David B. Hill vote on these resolutions either way?" This question was answered in the negative by Mr. Hill himself, who sat silent in his chair while the roll was called.

THE EXPERIENCE OF ITALY WITH "NATIONALISM."

THE leading exponent of "nationalism" in this country, Mr. Edward Bellamy, has really rendered the public an important service by his writings, although perhaps not precisely the service that he intended. He has shown that communism is the logical outcome of most of the changes advocated by the modern sentimental school of political economists, and has thus put it in the power of the public to accept or reject these proposals intelligently. As he points out in the current number of the *North American Review*, hundreds of pulpits throughout the land are preaching every Sunday the "solidarity" of nations, adding, with a very characteristic identification of material and spiritual elements, the statement that "to be able to present this theme effectively has become the best passport of the clergyman to popular success, the secret of full houses." The new school of political economy, "with its socialistic method and sympathies, is the school to which nearly all the young and rising professors of political economy belong." These young men are not yet prepared for the full programme of nationalism, "the entire substitution of public for private conduct of business," but they have started on a road from which they cannot deviate. They have got so far as to recommend that our legislators should undertake the management of "natural monopolies," and as pretty nearly every business that is not a natural monopoly may be made an artificial one by combination, the prospect of legislative activity is most cheeringly extended. Mr. Bellamy concludes:

"If the economists of the 'natural-monopoly' school should follow the logic of their method, they are bound, in proportion as the progress of artificial monopolization abolishes their distinction, to become full-fledged nationalists. I have no doubt they will soon be wholly with us, as in spirit and tendency they now are."

Mr. Bellamy's reasoning in this passage seems to be perfectly sound; and if the "young and rising professors" do not wish to be identified with the nationalists, they will have to establish some rather fine distinctions. Upon many accounts it is desirable that they should come frankly forward and accept Mr. Bellamy's claim of brotherhood. Their hearers would then be in a position to understand what the "new political economy" means in its final result, and would not be confused by the recommendation of a number of schemes that can have no merit unless the "nationalist" aim is really a desirable one. If, taking human nature as it is known by experience to be, the evidence proves that boards of aldermen, or State Legislatures, or national Congresses can conduct business enterprises with profit, why should we stop short with half-way measures affecting only "natural" monopolies, instead of having one grand and simple system under which every American heart would be made glad with an office? But if there is no evidence that proves anything of this kind, would it not be well for the young and rising professors to give up the idea that legislative bodies will make good business managers, and devote their attention to the discovery of other remedies for the evils of monopoly? Mr. Bellamy, we observe, does not give the names of the young and rising professors whom he has in his mind. So they cannot deny the soft impeachment.

In the hope that some of this class who have not quite surrendered their intelligence to the socialistic craze, may feel an interest in inquiring whether any lessons upon this subject have been taught in the school of experience, we would call attention to the example of Italy. In a recent issue of the London *Speaker*—a journal, by the way, by no means hostile to socialistic tendencies—there appeared a letter from an Italian correspondent, giving a graphic account of the results hitherto attained by the application of the principles of "nationalism" in that kingdom. He declares that Italy is rapidly transforming itself into a State in which all action is entirely absorbed by the Government. Very naturally, politicians, "in the American sense of the word," are greatly multiplied, and "the mischief they work is nowhere so great as in Italy." In the United States and in Australia the activity of the politician is limited partly by the energy and spirit of the Anglo-Saxon races, which do not allow the politicians to get the upper hand, but still more by the fact that in these countries "the greater number of the citizens are entirely independent of the Government as regards their fortunes and their future, whereas in Italy the hopes and fears of all men, almost without exception, are concentrated on the action of the State."

Thus, the proprietors of land look to the Government to legislate with a view to raising the price of grain, rice, oil, etc.; manufacturers count upon being "fostered" by protective duties; capitalists know that banks of issue and all public works are wholly dependent on the State, which can ruin an enterprise or make it prosper according as it is directed by supporters or opponents of the Government. Even the wine-growers must be careful not to put themselves in a hostile attitude, for their interests may be easily sacrificed in the negotiation of commercial treaties. Under these conditions there has been produced a fraternity of politicians drawing its members from every social class. At the head of this "ring," as we should call it, are the deputies, whose business is to procure favors of the Government for its supporters. Then come the influential electors whose duty it is to secure the return of their deputy, and so on down by a gradation familiar in this country. A vote favorable to the Government by the deputies from a certain district is repaid by the expenditure of Government money for the enterprises in which those deputies are interested, and as a result the public business is perfectly honeycombed with jobbery; many of the railroads and public works pay no return on their cost, the public debt has grown at a frightful rate, taxation is becoming unbearable, and the condition of the working class is miserable in the extreme. Moreover, the traditions of despotic rule in Italy have not quite been forgotten, as is shown by the fact that Signor Pantaleone, a professor in one of the public institutions of learning, has just been compelled to resign for having published an article exposing some of the economic malpractices of the Government.

The picture drawn by this correspondent is not too dark in its colors. We have abundant confirmation of its truthfulness from other quarters, and it could easily have been made even more impressive. In Italy, as elsewhere, experience proves that the management of business enterprises by governing bodies, whether State or municipal, is subject to very grave difficulties. No one being interested directly to make these enterprises produce a profit to the public, there is a constant tendency to waste and extravagance, while

the necessity for legislative direction and supervision affords a constant opportunity for jobbery, and results in frequent changes of management. In a small municipality, and sometimes in a large one where universal suffrage does not prevail, it may be possible for the public authorities to conduct business enterprises upon business principles, but the evidence is overwhelming that this is not possible except under these conditions. If some of our economists were to devote themselves to a systematic presentation of this evidence, they would render a great service to the public and would furnish a sufficient practical refutation of the fallacies of "nationalism."

THE REVOLT OF CONDÉ.—II.

PARIS, May 11, 1892.

WE left Turenne and Condé after the battle of the Faubourg St.-Antoine (Napoleon himself gave the name of battle to this bloody struggle conducted on both sides with the greatest skill). If the gates of Paris had not been opened to Condé, if the Bastille had not fired on the royal troops, Condé would have been lost. Everything was ready at Saint Denis for a triumphal entry of the King into his capital; but Paris was still in the hands of the Frondeurs. The Parlement, the rebel princes, the city councillors had different objects; the populace took advantage of the situation, and great disorders ensued. Condé has sometimes been held responsible for what are called the "massacres of the Hôtel de Ville." The Duc d'Aumale tries to clear him of this accusation, and enters into a minute account of all the circumstances of this "journée," very similar to some of the "journées" of the great Revolution. There are, in all civil commotions, moments when authority is nowhere, when responsibility is no longer to be found, when the bloody and cruel instincts of humanity find free play and meet with no resistance. Anonymous crimes are committed, and they are generally attributed to those who profit by them. Had Condé anything to gain from the massacre of the Hôtel de Ville? He has been accused of having set the mob on the Hôtel de Ville in order to force the City Council to sign the "Act of Union" with the rebel princes. During the battle of the Faubourg St.-Antoine, the soldiers of the princes had put straw on their hats so as to recognize each other; on the day of the attack on the Hôtel de Ville, there was not a hat which did not have straw on it—the sedition was called "la sédition de la paille." The Hôtel de Ville was invaded by the mob; a rage for destruction seized the populace; several deputies were murdered, others concealed themselves in the cellars.

"Between eleven and twelve at night Mademoiselle, who found some difficulty in opening a passage for herself, arrived on the Place de Grève. M. de Beaufort left a mercer's shop to accompany her. Both entered the Hôtel de Ville and covered the retreat of the Maréchal de l'Hôpital, of the Prévost des Marchands, and of the few others who had escaped the searches of the rebels. In the early morning all was calm again; the place was covered with smoke; through the broken window one saw the great hall devastated, burnt in many places; the façade, blackened by the flames, showed its open doors and the image of King Henry riddled with balls."

The Duc d'Aumale maintains that Condé was not the author of the sedition. "Everything," he says, "had been prepared outside of him, against him; everything had been accomplished without him." The sedition certainly did not help his cause; he had lost the sympathies of Paris. He fell into a state of apathy; the King refused to open a letter which he sent to him. He wrote to his friend the Maréchal de Gramont, "Have you not discovered a new island for me?" His allies, the Spaniards, had sent an army into the valley of the Oise, immediately after the combat of the Faubourg St.-Antoine. Condé, though he secretly longed for peace, had to prepare for war; Turenne also was making his preparations with Mazarin. Condé effected a junction with the Duke of Lorraine, and Turenne found himself in great danger. At that very moment Condé fell ill, and had to be brought back to Paris. He had a return of the malarial trouble of which he had caught the germ in Roussillon. He was bled a number of times, after the fashion of the seventeenth century. One evening he sat behind Mademoiselle. "Do take me for your captain of guards," he said to her; "I am good for nothing else any more, for I am very ill and old, oh, so old!" (He was then hardly thirty-one years old.)

Paris was transforming itself under his eyes; the "straw" of the rebels had been replaced by "paper," the royalist emblem. Negotiations were conducted in a hundred directions in the dark. Paris really wished for peace; the Duke of Lorraine, the mercenary Prince who made a living by civil wars, could hardly show himself in the streets. On the 13th of October Condé crossed the barriers of Paris on horseback; he was not to see them again for a long time. On the 19th of October the Parisian militia went to St. Germain and conducted young Louis XIV. back to Paris. The King's entry was triumphal. His brother had gone already to Blois, where he concealed his treachery. Mademoiselle, who had given at the Bastille the signal for firing, left for one of her châteaux, Saint-Fargeau. On the 27th of October Louis XIV. held his *lit de justice*, and Condé and the other rebel princes were declared guilty of high treason.

Condé was already with his little army in the north of France; and now began the real war, the long struggle between Turenne and the man who was no longer a common rebel, a Frenchman fighting with French arms on French soil. No, Condé is now "a soldier of fortune, homeless, no longer belonging to France. Memories of the companions of Wallenstein, of King Gustavus, haunt his mind; he goes back to the dreams of his youth. . . . His ulcerated heart longed for vengeance; excited by fever, the imagination of the erring hero anticipates the great fortune of the captains who carve for themselves a sovereignty from the frontiers of the old States." The details of the campaign of 1653 are given with great minuteness by the Duc d'Aumale. The wars of the time consisted chiefly in sieges and in battles fought in order to relieve the garrisons of the besieged places. They resembled somewhat a game of chess; the armies were small, and there were few decisive actions. We are more interested in the history of the relations of Condé with the Spanish Government and with his life in exile. His style, his tone often gave offence to the proud and slow Spaniards. "His letters," writes Saint-Agoulin, one of his agents, "resemble orders of war." "It is thus that he generally behaves, even with wife, brother, and sister," answers Lenet, his confidant and factotum.

The Memoirs of Lenet are extremely interesting; they have been largely used by the Duc d'Aumale, and no better document can be found for the history of Condé. Lenet, during that period, represented Condé in the south of France; he formed a sort of Ministry with Watteville, another of the numerous agents of the Prince, and with Marchin, who was at the head of the army of the princes in Guienne. The Vice-Admiral of France, Du Daugnon, kept the fleet in the Charente; he was a real filibuster, and was bound to Condé by a treaty. An English fleet was not far off, and the agents of Condé tried in England to revive the memory of La Rochelle and the war of religion. They already announced the junction of Blake, the English Admiral, with the Vice-Admiral of France, the rising of the Huguenots, the establishment of a Protestant republic in the west of France, founded by Condé, with the help of England. Condé writes on this subject to Lenet: "You tell me that the cabal of the Huguenots leads right to the republic; that is not so bad. Certainly things will never come to this end; but by keeping up this idea of a republic, it will hinder the others from thinking of the republic and from suing for peace." The Vice-Admiral of France, Du Daugnon, knocked this scheme on the head by abandoning the cause of Condé and selling himself to Mazarin. A year afterwards, under the name of Marshal Foucaut, he took his place in Parlement and signed the condemnation of Condé.

Marchin governed in Bordeaux for the Prince with Lenet; they had to deal with the Prince de Conti and with Madame de Longueville, with the population of Bordeaux, divided into two camps, the aristocratic Parlement and the *jurats* on one side and the "Ormée" (the mob) on the other. Bordeaux was blockaded, and Conti made his peace with Mazarin. On the 3d of August, 1653, the Dukes of Vendôme and of Candale entered the town; thus ended the inglorious war of Guienne. Condé could have no more illusions; he was now completely in the hands of the Spaniards. Marchin and Lenet joined him in Brussels, as well as the Princess, his wife, who received in the Netherlands the treatment of a queen and the greatest hospitality. Accompanied by her young son she went to Valenciennes, where she established herself with her numerous suite. The politeness of the Archduke was in striking contrast with the coldness of the Prince.

"After so many trials, the courageous and devoted wife, who, always ill, and having just lost a child, conducted by fortune to the arms of her husband, had to wait a week for a single visit. . . . The Prince, in the heat of business, found no time to bring her a single word of consolation and of tenderness. At last, Claire-Clémence was summoned to Mons, where her husband on his part arrived. They spent an evening together at an inn, and the next day she returned to Valenciennes, and he left for Brussels and for the army."

Ought we to see in this singular conduct an indifference verging on contempt—a cruel punishment of some unknown fault? The Duc d'Aumale thinks that Condé wished to prove that he had nothing to do with a negotiation which was going on at that moment between the Princess and the French Court. She had addressed a request to the Parlement asking for the restitution of her property and for permission to go back to France. The permission was not granted, and the Princess remained several years at Malines, in solitude, with two or three ladies only and a few servants, seldom seeing her son, who was kept by his father, and receiving from time to time visits from her husband. Her diamonds had to be sold, as well as her horses and carriages; sometimes the necessaries of life were wanting, and she

found no credit with her butcher and baker. She became, during these years spent at Malines, the mother of a princess who was called Mlle. de Bourbon. Condé occupied himself with the education of his son, called M. le Duc, first at Namur, afterwards with the Jesuits of Antwerp. In the midst of the greatest financial difficulties he always gave him the best masters he could find.

Condé had a certain rank to keep up; to appear in public ceremonies with brilliant carriages, to give dinners, even balls; he had to return as well as he could the splendid hospitality of the Belgian nobility. He fixed his residence in Brussels, and spent there all the time which he did not give to his duties of general and of father. He was invited everywhere; the ladies were charmed by his martial and elegant bearing, his brilliant wit, his glory. He had to sit several times for his portrait; Teniers, the famous painter of the "Kermesses," transformed by the will of the Archduke into a painter of historical scenes, made a charming portrait of Condé, which is now in the galleries of Chantilly. The Prince was popular with the "Gilden," accepted their diplomas and their honors; he became very popular, more than the little court of émigrés who lived around him, who all regretted France and did not conceal their regrets.

The Duc d'Aumale describes very accurately this little court, and draws good portraits of its members. He shows us a Condé fond of literature, of art, even of philosophy. This brilliant cavalier, this patron of artists and man of letters, often had to leave Brussels and to conceal his misery at Malines with his wife, at Namur with his son. He was always tormented more or less by fever or by gout, his moral sufferings were intense. He had to carry the burden of an immense correspondence, to prepare plans of campaign; everything fell on his shoulders. This picture of Condé during the intervals of his yearly campaigns is very new and very graphic. It will be read with much interest by all who are not content with the account of battles and sieges, and who look for the man in the general.

THE CHINESE PHILOSOPHY IN JAPAN.

TOKIO, April 15, 1892.

"THE Confucian code of ethics," says the author of 'Things Japanese,' "has for ages satisfied the Far-Easterns of China, Korea, and Japan"; and Dr. Legge, in his preface to the 'Chinese Classics,' speaks of it as the material which "the minds of this many-millioned people have had to live upon for thousands of years." Such assertions are at once as true and false as it would be to declare that the Synoptic Gospels have been the sole intellectual and moral nourishment of the Christian Church for eighteen centuries. If we cannot ignore the ideas which were received at the hands of Clement and Augustine, Aquinas and Butler, Lessing and Maurice, to supply the new needs of new generations, so we must remember that China and Japan in modern times demanded new inspiration and found it abundantly in the men of later generations. To have emphasized the importance of these later developments, and for the first time to have made clear by translations some of the doctrines which have formed the accepted philosophy of modern times, is to have performed a great service; and that is what Dr. George William Knox is now doing in his essay on 'A Japanese Philosopher,' soon to be published by the Asiatic Society, and the more extensive studies of which it is the probable forerunner.

The particular interest which the student of Japan finds in this philosophy lies in the revelation which it affords as to the philosophical foundation of chivalry and its notions. Feudalism found in this philosophy a powerful ally, and every samurai drank from this fountain. A few words, then, as to the fundamentals of this philosophy and its translation to Japan, with some selections from one of its representative Japanese disciples.

Shushi, by far the greatest writer and thinker in the dominant or orthodox philosophy, lived in China 1130-1200 A. D. His commentary is to-day the orthodox exposition, his system the accepted metaphysic. Shushi was a pantheist. Nature was to him a living, breathing organism. He taught the existence of both *ki* and *ri*, spirit and law. This spirit or breath of nature corresponded to the Stoic doctrine of *pneuma*. "Between heaven and earth there is nothing so important, so almighty and omnipresent as this breath of nature. Through it heaven and earth and every creature live and move and have their being." *Ki* is not spiritual in our modern sense. It is identified with the air. It exists in all things, the grass, the trees, the human body. Man's heart is also *ki*, and shows its nature when the passions are aroused. Over against *ki* is *ri*—the law, the principle of nature. *Ri* is invisible, and is the same as the Way, or Reason. But it is an entity as real as *ki*, indeed, even more truly so, since theoretically it preceded *ki* and *ki* depends upon it. Still, in the actual world there is no *ki* without *ri*, and no *ri* without *ki*. Ethically it is necessary to study and know the *ri*, which controls and refines man's heart, his *ki*; and, without such knowledge, the best action will not avail. The fundamental proposition is that righteousness is life. A scholarship that is apart from morals, that is not expressed in action, that does not govern life, is to be contemned. Man's deepest self lies far below the changing self of act and thought and desire and will. Let the truer, deeper self be nourished, and from that strength true life will come.

This philosophy Japan accepted upon faith. Surprisingly enough, Japanese scholars attempted no systematic exposition either of the dominant school or of its heterodox rivals (to which we cannot here refer). There is not, Dr. Knox asserts, an original and valuable commentary by a Japanese writer, nothing beyond a vigorous power of adoption and assimilation. But there is a difference between the original and the transplanted system. In the latter the samurai takes to himself the place reserved in China for the literati. Loyalty takes precedence of filial obedience; and with this loyalty, in harmony with the feudal and impetuous character of the people, is an undue exaltation of the disregard of life.

The spirit and thought of old Japan are best represented in the writings of Muro Naokiyo, known as Kyuso, who died in 1734, and it is the translation of one of his miscellanies that Dr. Knox is to publish. Kyuso received the highest honors from the Tokugawa Government, and rose to great influence and authority. It was during his life that the famous Forty-seven Ronin performed their exploit, and Kyuso gave them the name by which they are still remembered—*Gishi*, or the Faithful Samurai. The following passage serves to show how he expounded Shushi's metaphysical doctrines in their Japanese home:

"Of course I cannot pretend to settle the mysterious question of the priority of *ki* or *ri* at a sitting, but I will talk a while, taking an illustration from Laotze. 'Reckoning up the wheel, there is no wheel; reckoning up the year, there is no year.' Let us see: this is the rim, this the hub, this the axle, this the spoke; but the rim is not the wheel, nor the hub, nor the axle, nor the spokes. Yet if we cast these away the wheel goes too. But the law (*ri*) of the wheel preceded it, and before the wheel was made the principle was determined. And because the law is imperishable, the carpenter follows it and makes the wheel. See then! Does the wheel come from the spokes and rim, or do these come from the wheel? If we say the wheel comes from the parts, we know its form but not its law.

"This is the meaning of the expression: 'Reckoning up the wheel, there is no wheel, and reckoning up the year, there is no year.'"

One of the constant themes of Kyuso is the duty of a samurai. Not that virtue is reserved for knights alone; but each man in his station has his destiny in life, and it was the duties of the samurai that were the chief concern of those who met to learn from him. It is in these passages that we find the precepts which ruled the life of the chivalry of Japan.

"An old samurai thus taught his pupils: 'Be not samurai through the wearing of two swords, but day and night have a care to bring no reproach on the name. When you cross your threshold and pass out through the gate, go as men who shall never return again. Thus shall you be ready for every adventure you may meet.'

"To forsake parent and lord that one may save himself by becoming a priest is indeed to forsake the world; but it is not to forsake one's self. Unless we forsake ourself we forsake not the world. The desire for fame and gain in the world, and the forsaking of the world in the hope of paradise—these differ as the pure and the impure, yet both alike come from the desire for one's own happiness. Buddhism regards our human relationships as 'borrowed,' and so teaches that parent and lord may be forsaken. Not so! If we are to desert anything, first cast away reputation, gain, and pleasure! Then there will be no need to flee the world."

"When I was in Kaga I heard a man remark: 'All sins, great and small, may be forgiven on repentance, and no scars remain, except two: the flight of a samurai from the post where he should die, and theft. These leave a lifelong wound which never heals. All born as samurai, men and women, are taught from childhood that fidelity must never be forgotten.'"

Here is the inculcation of a principle of which Japan to-day bears the indelible impression—the conventional contempt for mercantile gain and the ignorance of money matters:

"To the samurai first of all is righteousness, next life, then silver and gold. These last are of value, but some put them in the place of righteousness! But to the samurai even life is as dirt compared to righteousness. Until the middle part of the middle ages customs were comparatively pure, though not really righteous. Corruption has come only during this period of government by the samurai. A maid servant in China was made ill with astonishment and fled home in dismay when she saw her mistress, soroban in hand, arguing prices and values. So was it once with the samurai. They knew nothing of trade; they were economical and content."

There was once an American Minister in Japan who publicly said that he considered the story of the Forty-seven Ronin nothing more than a vicious tale of bloody and shameful murder. There are no doubt those who could never understand the ethical code of the samurai. But to those who have eyes to see and minds to understand something more than is given them by the narrow experience of their own time and community, the book of Kyuso will reveal abundantly the meaning of that standard of honor which so dominates Japanese traditions. I conclude with an illustrative story, a typical one, and yet the most striking in the whole book.

"In Kaga I had a friend, a samurai of low rank, named Sugimoto. While he was absent

in Adzuma with his lord, his son Kujuro, who was fifteen years old, quarrelled with a neighbor's son of the same age over a game of checkers, lost his self-control, and, before he could be seized, drew his sword and cut the boy down. While the wounded boy was under the surgeon's care, Kujuro was in custody, but he showed no fear, and his words and acts were calm beyond his years. After some days the boy died, and Kujuro was condemned to *hara-kiri*. The officer in charge gave him a farewell feast the night before he died. He calmly wrote to his mother, took ceremonious farewell of his keeper and all in the house, and then said to the guests: 'I regret to leave you all, and should like to stay and talk till day-break; but I must not be sleepy when I commit *hara-kiri* to-morrow, so I'll go to bed at once. Do you stay at your ease and keep on drinking.' So he went to his room and fell asleep, and all were filled with admiration as they heard him snore. On the morrow he arose early, bathed, dressed himself with care, made all his preparations with perfect calmness, and then, quiet and composed, killed himself. No old, trained, self-possessed samurai could have excelled him. No one who saw it could speak of it for years without tears.

"At the beginning of the affair I wrote to his father: 'Though Kujuro commit *hara-kiri*, he is so calm and collected there need be no fear as to his behavior under the ordeal. Be at peace.' But as Sugimoto read the letter he remarked: 'A child often will be brave enough as others encourage it before the cautery is applied, and yet burst into tears when it feels the heat. My child is so young that I cannot be at peace until I hear that he has done the deed with bravery.' As the proverb says, 'Only such fathers have such sons.' I have told you this that Kujuro may be remembered. It would be shameful were it to be forgotten that so young a boy performed such a deed."

J. H. W.

Correspondence.

MILTON AND PLAUTUS.

To the Editor of The Nation:

Sir: It would seem that Milton, in his advice to Salmasius to go and hang himself ("nihil tibi prius faciendum erit, quam ut pro libro tam longo unam tantummodo literam adhuc longam ex te facies," *Pro Populo Anglicano Defensio*, Thatcher's edition, London, 1836, p. 705), was thinking of *Staphyla's* words in Plautus's "Aulularia" I. i, ("neque quidquam meliust mihi, ut unam faciam literam longam, meum laqueo collum quando obstrinxero"). The early translation, ascribed by Toland to "Mr. Washington, a gentleman of the Temple," follows Plautus even more closely: "I think the best course that you can take will be, for this long book that you have writ, to take a halter, and make one long letter of yourself" (St. John's edition, vol. i., p. 211).

Is the idea expressed elsewhere in literature?

George Hempl.

University of Michigan, May 25, 1892.

COMENIUS ON THE EDUCATION OF WOMEN.

To the Editor of The Nation:

Sir: In the *Nation* of March 24, on page 231, you say: "Female education in common schools, this crowning keystone in the arch of culture—this new thing under the sun—we may claim as a Yankee notion, pure and simple."

The fact is, that female education in common schools was *not* a Yankee notion merely. It was recognized, preached, and practised in continental Europe even before the landing of the Pilgrims. It was championed by that distinguished Bohemian pedagogue, Comenius (properly Komensky'), whom Michelet calls *le premier évangéliste de la pédagogie moderne*. Comenius became school superintendent and teacher as early as 1617 at Fulnek, in Moravia. This is what he says about female education in the ninth chapter of his 'Great Didactics' (in Bohemian), written A. D. 1628-1632.

"And the schools should be open not only to those youths that are rich and more favored, but to all the young folks of *both sexes*, whether noble or ignoble, rich or poor. And this because:

"(1.) The aim of all men that are born into this world is one and the same, that is, to be men, rational beings, masters of nature, images of God. All, therefore, should be instructed in arts, ethics, and piety. . . .

"(4.) There can be no reason shown why *women* (to speak of them particularly) should be kept away from the study of languages and of wisdom. For they are human beings, images of God, just as we are, equally endowed with minds apt to understand words of wisdom, nay, oftentimes honored with a greater fineness of wit; Providence equally employs them sometimes in great things (as in governing men, districts, domains, even entire kingdoms; also in counselling kings and princes; also in the art of medicine, etc.). Why, then, should we merely teach them an A B C and then drive them away from the books? Do we fear their fickleness? The more we shall engage their minds in work, the less fickleness (which originates in an idle mind) we shall find in them. But we must not put into their hands such a medley of books as is given to male pupils (which has been a deplorable fact heretofore), but only such books as would be a real help and means towards reasonably viewing the acts of God and hence acquiring the true wisdom and virtue."

It will be seen that Comenius advocates not only the common school, but also a higher education for women. The 'Great Didactics' was translated into Latin in 1653 for the Hungarian schools and printed at Amsterdam in 1657. It is a remarkable fact that in 1654 Comenius was offered the Presidency of Harvard College.

I hope this explanation will suffice.

Yours, etc., Josef J. Král.

Ann Arbor, Mich., May 20, 1892.

[The extract proves that "female education in common schools was early preached in Europe" by one man; but not "before the landing of the Pilgrims," which was eight years before the work of Comenius began to be published. But nothing in the quotation of Mr. Král shows that such education was "practised" as well as preached at that early period. Comenius speaks of what "should be"—he does not appear to state a practice as actually existing. He argues in favor of female education as if he were introducing a novelty which those he addressed were disinclined to admit.—Ed. Nation.]

QUESTIONS FOR PROF. McMASTER.

To the Editor of The Nation:

Sir: In the year 1798 a well-meaning gentleman of Philadelphia, George Logan, undertook of his own motion to remove the misunderstandings between this country and the French Republic. He was politely received in France, and came home bearing verbal assurances that that country was most favorably disposed towards America. He was not so well received by the public men of his own country. In fact, he was most decidedly snubbed by the President and Secretary of State (McMaster, 'History of the People of the United States,' vol. ii, p. 409 *et seq.*), and Congress passed the act of January 30, 1799, known as the "Logan Act." This act (quoting it as it stands in the Revised Statutes, sec. 5335) provides that:

"Every citizen of the United States, whether actually resident or abiding within the same or in any foreign country, who, without the permission or authority of the Government, directly or indirectly, commences or carries on any verbal or written correspondence or intercourse with any foreign government, or any officer or agent thereof, with an intent to influence the measures or conduct of any foreign government, or of any officer or agent thereof, in relation to any disputes or controversies with the United States, or to defeat the measures of the Government of the United States; and every person, being a citizen of, or resident within, the United States, and not duly authorized, who counsels, advises or assists in any such correspondence, with such intent, shall be punished," etc., etc.

On page 35 of the third volume of Prof. McMaster's History is an account of a transaction in which Don Carlos de Yrujo, the then Spanish Minister to the United States, was a principal. Prof. McMaster says:

"Not long after the convention of 1802 [between the United States and Spain] reached the United States, Yrujo, well knowing that the omission of the French claims would lead to trouble, submitted the question of their justness to five lawyers of high standing. Two of them were Jared Ingersoll and William Rawle, leaders of the Philadelphia bar. A third was Joseph B. McKean, son of the Governor of Pennsylvania and brother-in-law of Yrujo. The fourth was Peter Stephen Du Ponceau; the fifth was Edward Livingston. Concealing the names of the Powers, Yrujo stated the case in these words."

Then follows a hypothetical question, framed by the Spanish Minister to cover the assumed state of facts relating to the three Powers. The answer of all five was to the effect that "the Power B" (the United States) had, under the facts as stated, no claim upon "the Power A" (Spain). The opinion of these lawyers appears to have been greatly relied upon by Spain in the subsequent correspondence. Prof. McMaster expresses no opinion as to their conduct at this point.

On page 284, however, he treats of the treasonable correspondence begun by Timothy Pickering, the New England Federalist, with the British envoy, Rose. He points out how Pickering, who had been Secretary of State, and had procured the passage of the "Logan Act" in 1799, himself violated its every provision in 1808. Then he tells us in a note: "The first violation of this statute was in 1804 [1803?], when the Republican [?] lawyers Rawle, McKean, Ingersoll and Duponceau gave an opinion to Yrujo." For this statement he gives as his authority Wharton, 'International Law Digest,' sec. 109. In the section quoted we find that Dr. Wharton gives, without comment, the following:

"'It was probably unknown to the Spanish Government that the lawyers, in giving the opinion to which it attaches so much value (advising action adverse to the United States), violated a positive statute of their own country forbidding communications of any sort with foreign governments or agents on subjects to which their own Government is a party' (Mr. Madison, Sec. of State, to Mr. C. Pinckney, Feb. 6, 1804. MSS. Inst., Ministers)."

This section of Dr. Wharton's 'Digest' is headed "Self-Constituted Missions Illegal."

These long quotations are necessary to an understanding of the matter. I can find no record of a proceeding under the "Logan Act" involving its interpretation by the courts. References to it are made as illustrating the assertion by this Government of the right of extra-territorial jurisdiction (Whar-

ton, 'Criminal Law,' sec. 274; United States vs. Craig, 28 Fed. Rep., 801). It was clearly violated in 1848 by Nicholas P. Trist, who, refusing to recognize his recall by this Government, persisted in negotiating a treaty with Mexico. But I have not been able to find any authoritative exposition of it. The allusion to it on the part of the Secretary of State, Mr. Madison, was evidently to call Mr. Pinckney's attention to something which might be used with rhetorical effect in support of a bad case against the Spanish Government. It could have had no serious bearing upon the question at issue whether, in giving the advice alleged to have been given, these lawyers were guilty of an offence against the law of their own country or not, and the Secretary can scarcely be said, solely upon the authority of the passage quoted, to have passed upon this question. It might be added that some later experiences have not disposed us to regard the utterances of a Secretary of State as necessarily final authority on legal questions.

The "Logan Act" has been quoted. Does it in terms, or in spirit, apply to such an incident as that of 1803? If so, where is the line to be drawn? Mr. Joseph H. Choate, for example, appeared as counsel in the *Sayward* case. Surely his action was not a violation of this act. Of course it is easy to point out a distinction between the cases, but it is far easier still to point out a distinction between the cases of Logan, Pickering, and Trist, and any case in which a lawyer gives advice at the request of a foreign Government upon a point of law, whether national or international. I submit that Prof. McMaster, so far as the authorities he has cited enable us to judge, has been unduly severe.

The charge is no light one, and if it is unwarranted by the facts, it should not be allowed to pass unchallenged. If there is better warrant for it than a rhetorical sentence in a communication between the Secretary of State and an American minister, Prof. McMaster ought to show it. Dr. Wharton was himself a distinguished member of the Philadelphia bar; one of the four gentlemen named was a relation of his; certainly three of them were men whose memory he, in common with every other Philadelphia lawyer, held in the highest reverence, and had he supposed such a deduction would be drawn from his quotation of the passage of Mr. Madison's letter, we may reasonably think he would not have omitted a note of protest or explanation.

Three other questions of interest are suggested: first, What were the extenuating circumstances in the case of Mr. Livingston which induced Prof. McMaster to except him from the condemnation of his Philadelphia colleagues? second, Is the note due to the fact that the Federalist wrong-doing had to be excused by allegations of equal wickedness of the Republicans? and third, If this be so, what is Prof. McMaster's authority for classing the men he names with the latter party?

Yours truly, J. D. B., Jr.

PHILADELPHIA, March 11, 1892.

Notes.

Apropos of Prof. Wright's recent letter in these columns on "An English Glacial Myth," we are informed that the late Prof. Carvill Lewis's large collection of manuscripts and drawings embodying in detail his studies of the glacial phenomena of Great Britain and Ireland has been admirably arranged and completed by the Rev. Dr. Crossley of Birmingham, one of the leading glacial geologists of England, and now awaits publication. Two appendices have been prepared—one a critical examination of Prof. Lewis's investigations in the light of more recent knowledge, by Prof. Povey F. Kendall; the other consisting of abstracts from Prof. Lewis's studies of the living and extinct glaciers of Switzerland in the summer of 1886-'87, as bearing upon the glacial deposits of Great Britain.

Nature for April 28 announces that Dr. A. C. Oudemans, Director of the Zoölogical Gardens at The Hague, is about to issue, in English, an historical and critical treatise on 'The Great Sea-Serpent,' in which the reports of 166 appearances will be examined and largely illustrated.

A new and revised edition of Prof. Goodwin's 'Greek Grammar' will be ready in June of this year (Boston: Ginn & Co.). It has been rewritten in many parts, and profits by the improvements contained in the new edition of 'Moods and Tenses.'

Upon the completion of "The Naulahka" in the *Century*, this novel by Kipling and Balestier will be brought out in book form by Macmillan & Co.

Harper & Brothers will publish immediately 'The Puritan in Holland, England, and America,' by Douglas Campbell; 'How Women Should Ride,' by "C. de Hurst"; and 'Diego Pinzon, and the Fearful Voyage he took into the Unknown Ocean, A.D. 1492,' by John Russell Coryell.

'American Ideas for English Readers,' which J. G. Cupples Co., Boston, have in press, is a new collection of the late J. R. Lowell's speeches and addresses delivered abroad, embellished with a portrait from the bust by Partridge. Mr. Henry Stone furnishes an introduction.

Thomas Whittaker will publish shortly Canon Farrar's sermons on the Ten Commandments under the title, 'The Voice from Sinai.'

The Proceedings of the first annual meeting of the National Conference on University Extension held in Philadelphia last December have been compiled by George Francis James and published in a volume of nearly 300 pages by J. B. Lippincott Co. One-half of the contents consists of interesting reports of progress from the several States and from the American Society.

The introduction of manual training in our common schools prepares a welcome for the handbook on 'Woodwork' by S. Barter, an instructor and organizer of large experience in London (Macmillan). The book is printed in a very handsome and workmanlike manner, and very many of the 302 illustrations are photographs of hands, tools, and workmen caught in the act. It merits the attention of teachers.

The late Prof. Joseph Payne of the London College of Preceptors could not at his best have been a writer to be read with gusto; but his natural dryness is enhanced in the edition of his 'Lectures on the History of Education,' forming vol. ii. of his Works (Longmans), by the fact that we have not finished discourses, but rather notes. These, although frequently rewritten, were supplemented by extemporaneous illustration which is now lost. We have, therefore, a book of reference rather than an historical essay for consecutive reading and enjoyment. There is an interesting series of portraits of educational reformers, from old prints. The author's 'Visit to German Schools,' notes of a professional tour in 1874, is appended to the Lectures in what is virtually a third edition. It is especially occupied with observations on the kindergarten.

'The Irish Peasant' (London: Swan Sonnenschein; New York: Scribners) is a plain and straightforward record of the life of a middle-class resident of Ireland. The author relates his experience without political or religious bias, and his observations have therefore an exceptional value. He describes the country and the people not graphically, but with details which those who are interested in the subject will find instructive.

Mr. Curtis's Brooklyn Institute address on James Russell Lowell makes an attractive little volume in Harper's "Black and White Series." It is accompanied by no fewer than six portraits of Lowell, some very rare, a view of Elmwood, and a facsimile of Lowell's handwriting; and is altogether a charming souvenir.

A third edition of Clerk Maxwell's 'Treatise on Electricity and Magnetism' (the second posthumous edition) has issued from the Clarendon Press (New York: Macmillan), in two volumes. It is in the main a reprint of the second edition of 1881, for Mr. J. J. Thomson has concluded not to encumber it with footnotes marking the progress of the science, but to add a volume of notes, to which something like a consecutive form has been given. This volume should appear shortly.

If any field of bibliography is trying, it is that ventured upon by Mr. I. Garland Penn in his volume 'The Afro-American Press, and its Editors' (Springfield, Mass.: Willey & Co.). To trace with particularity the origin and fortunes of journals conducted by colored men in this country is a task which a young man born since the war and bred in Virginia is hardly competent to execute. Mr. Penn's effort is praiseworthy, but it is only a beginning. His work does, however, both name and approximately fix in time and place a large number of newspapers, and give a full series of sketches of colored journalists of both sexes, with portraits. It deserves a niche in anti-slavery collections, with all its imperfections and errors, among which we will instance the strange statement (p. 57) that Dr. Delaney "was among the first Afro-Americans to graduate from Harvard College."

A publication of very great utility has been begun in No. 52 of the Harvard University Bulletins, viz., "Notes on Special Collections to be found in the United States." The Library issued three years ago a circular addressed to the principal libraries of the country, asking for information as to the character and extent of their special collections, and this (geographically alphabetical) list is the result. The first instalment breaks off in New York, and the index, which is the key to the topics of the notes, is yet to come. It should then appear how many foreign (particularly Continental) private libraries have been transferred *en bloc* to our public collections, like Scherer's at Adelbert College, Van der Meulen's at the University of Wisconsin, Beck's at the Hartford Theological Seminary, Rinck's at the Yale Divinity School, etc. Such a list as this, of which we may expect new editions from time to time, will be an invaluable guide not only to students, but to donors. For example, shall one add to the Birney slavery collection at Johns Hopkins (1,000 titles), the May collection at Cornell (1,000 volumes and 2,000 pamphlets), the Sumner-Higginson collection at Harvard (869 volumes, 2,300 titles)? There may be judgment even in giving away old directories. The Directory Library of Boston "aims to get every directory and gazetteer published in this country."

The Report of the State Librarian to the New Hampshire Legislature for the year ending October 1, 1891, forms a volume of 344 pages of considerable value. The appendices consist of a list of the State's official publications for the year in question; an index list of reports of departments, etc., 1822–1869; a check list of laws, 1789–1891; a table of sessions of the Legislature, 1776–1891; a sketch of the history of the State Library; statistics of public libraries of 300 volumes and upwards; a descriptive list of the State's historical and statistical publications prior to 1860; and an index to the historical matter contained in the New Hampshire Registers, 1772–1892, the Political Manuals, 1857–1872, and the People Handbooks, 1874, 1876, 1877, with biographical sketches of the several compilers.

The first report of the United States Board on Geographic Names, 1890–1891 (Washington), is a thin volume briefly rehearsing the origin of the Board and its achievements, and adding a "list of decisions" as to the orthography of a large number of names, and a list of counties in the United States. The Board has had more than 2,000 questions submitted to it by the Light-House Board, the Coast and Geodetic Survey, the Census Office, etc., and is now engaged in bringing order out of the Alaskan chaos. It has adopted certain principles which will guide it hereafter, *e. g.*, to spell Center in the Websterian fashion, usage being about equally divided; to use boro for borough, burg for burgh, etc.

Mr. J. H. Hickcox contributes to the Bulletin of the American Geographical Society for March 31 a list of all the topographical Atlas sheets published by the United States Geographical Survey from the beginning to June 30, 1890, arranged by States. It is a service as great as it must have been laborious. The scale, contour interval, and bounding parallel and meridian of each sheet are indicated.

The *Scottish Geographical Magazine* for May contains an interesting but not especially noteworthy description of the Yellowstone Park by Mr. Henry M. Cadell, a member of the International Geological Congress held in Washington last summer. This is followed by an account of the results of the work of the Indian Meteorological Department, by Mr. H. N. Dickson. He affirms that, for both practical and scientific purposes, it is "the most complete and efficient in existence," and that, such is the endless variety of weather and climate in India, combined with the regularity of the annual changes, it is possible to state many of the problems of meteorological science "with a definiteness and precision impossible either in temperate climates, where the conditions are too irregular, or in tropical climates, strictly so called, where they are too uniform." In the observations of the intensity of insolation alone can the work of the department be regarded as fruitless. After an immense outlay of time and money in this direction, the conclusion reached is that a proper instrument for estimating the power of solar radiation remains to be invented. Marked success has attended for years the forecasting the date of arrival and strength of the monsoon, though the sudden outburst of rain with its coming is as yet unexplained. The latter part of the paper is devoted to the investigations of cyclones, in one of which, the False Point cyclone of 1885, the minimum reading of the barometer was "27.1 inches, the lowest ever recorded."

The *Academy* of May 7, in a notice of Mr. Fitz-Patrick's 'A Transatlantic Holiday,' says that American railway authorities have invented the term "heterophemy" to designate a condition more or less prevalent, which is defined to be "thinking one thing while saying, hearing, or reading another." Had Dr. Murray's Dictionary reached the letter H, the reviewer would or should have known that "heterophemy" was the creation, in self-defence, of the late Richard Grant White.

Alfred Grévin, the well-known caricaturist and designer, whose work has enlivened many of the French journals *pour rire* during the last twenty-five years, died at Saint-Mandé on the 5th of May. Besides his sketches in these journals, he published a number of little albums in water-color or India-ink. He devoted himself especially to observation of the Parisienne, of all sorts and conditions; and he reproduced his subjects, who were not invariably, perhaps not commonly or preferably, *grandes dames*, with astonishing cleverness. He had a light, romantic touch, great wit, much grace, much originality. He was not, perhaps, a great artist. Forain, in comparison with him, is, it may be, as Zola is to Daudet, or possibly as Zola is to Catulle Mendès. But he was indefinitely more pleasing than Forain. Grévin had been paralyzed for two years, and died of a sudden stroke of apoplexy.

More than one hundred replies having been received in response to a preliminary circular proposing the organization of a society for the preservation and publication of data having reference to the settlement and history of Jews on the American continent, it has been decided to call a meeting in the city of New York, at the Jewish Theological Seminary, No. 736 Lexington Avenue, on June 6, 1892, at four P. M., to be followed by an evening session, commencing at eight P. M.

—The publishing house of Ollendorff is just bringing out a collection of the newspaper articles of Edmond About, under the title of the 'Dix-neuvième Siècle.' What may well be the most interesting part of the book is a long appreciation of About as a journalist which M. Joseph Reinach contributes by way of preface. The *Temps* of May 13 gives nearly three columns of extracts from this "charming and substantial" study of About, from which it appears that M. Reinach has really made a luminous and complete history of him. For About was primordially and essentially a journalist. He decried his work, but he always came back to it: the passion for it was stronger than he. And, somewhat oddly, he never seemed to get much beyond what he himself described as the earliest attitude of the newspaper writer. "A man uses his first newspaper," he said in his 'Lettres d'un bon jeune homme à sa cousine Madeleine,' "as he does his first gun. Have you never met, my cousin, a twelve-year-old youngster to whom somebody has given a gun for a Christmas gift? He has powder, shot, caps: the universe is his! No human force can restrain him. He overruns the fields, the gardens, the house itself, with his new gun. He intoxicates himself with the noise of its explosions, with the smell of powder, with the delight of killing something. He fires at sparrows, at squirrels, at pigeons, at fowls in the barn-yard, at the family cat, at papa or mamma, if he chances upon no other game." If this is not an absolutely accurate description of About himself, it comes close enough to him to be amusing. It describes the sort of running-fire that he kept up for years in the *Figaro*, the *Opinion Nationale*, the *Gaulois*, the *Soir*, the *XIX^e^ Siècle*, which he created, and in many places besides.

—It is a pleasure to learn that Karl Hillebrand's 'Aus und über England,' forming the third volume of his "Zeiten, Völker und Menschen," has met with sufficient success to induce the publisher (Karl Trübner, Strassburg) to issue a second edition of these delightful and instructive essays. Hillebrand's position among German writers of the present generation is unique. Although by natural bent and early training inclined to the æsthetic ideals of Kant and Goethe, he came to be at the same time an ardent admirer of Bismarck. In his instincts and affections as German as a German well could be, he lived throughout the years of his manhood outside of the German boundaries, and spent the best of his energies in preaching cosmopolitan doctrines. Belonging to an age of specialization, himself a punctilious scholar and painstaking critic, he was wholly himself only in striving after broad and universal views, and far above the learned recluse he placed the cultured man of the world. To hear such a man give his impressions about English life and literature is indeed an uncommon privilege, and no one interested in the subject should fail to read the volume in question if he is not already familiar with it from its first edition. It is a pity that Hillebrand's widow should have considered it an act of piety to add to the present edition a posthumous essay which Hillebrand himself, we are sure, would never have allowed to go to press. It is a paper on "Defoe und Robinson Crusoe," written originally in French for a popular occasion, wholly without originality, and abounding in most un-German and even positively ungrammatical sentences.

—Dr. Scartazzini's 'Dante-Handbuch' (Leipzig: Brockhaus), though bearing the closest relations to his two similar works, should be carefully distinguished from them. His 'Dante' (Milan, 1883), occupying two volumes of Hoepli's well-known series of manuals, translated into English in 1887 by Dr. Davidson, became at once the most used handbook on the subject. Scartazzini's second work of the kind, which we noticed on its appearance, was his 'Prolegomeni' (Leipzig: Brockhaus); it formed the fourth volume of his edition of the 'Divine Comedy.' With this the present work is almost identical in subject-matter; the difference between them being that the later volume omits a section on the Italian language and literature in the century of Dante, adds a chronological summary of the history of the times, brings the bibliographies up to date, and corrects a few important errors. The structure of the two books is also very much the same. The second is, however, in no sense a translation of the first, but a reworking and adaptation of his material to the needs of German students. The tone, too, of the second is one much more characteristic of the author, to whom the sceptical mood of the Italian version, with its close adherence to Bartoli's opinions, was not altogether becoming. It is a pleasure, moreover, to find him doing honor to the memory of Witte, whom he had before somewhat slighted, and to the valuable work which has been done in America during the last decade. Mr. Lane's 'The Dante Collections in Harvard College and Boston Public Libraries' he calls "sehr brauchbar und absolut zuverlässig." Of Dr. Fay's 'Concordance' he says: "Dieses Werk . . . wird . . . ohne allen Zweifel nach und nach als eins der unentbehrlichsten Hülfsmittel für das Studium der *Divina Commedia* anerkannt werden." In short, the 'Dante-Handbuch' seems in many ways a better book than the 'Prolegomeni.' In one form or the other Scartazzini's work is

the best of its kind existing, but in both instances we must deplore the absence of an index.

—A description of the ruins of Mashonaland occupies the larger part of the May Proceedings of the Royal Geographical Society. To Mr. Bent's report reference has already been made, and it is only necessary to add here that the occupation of the gold districts by the Arabians, of a pre-Mohammedan era, or possibly Phœnicians, apparently lasted through centuries and ceased in some overwhelming calamity. The probability is that they were destroyed by some great irruption from the north of the ancestors of the present Bantû races. The remarkable round tower which appears in more than one of the Zimbabwe ruins "doubtless corresponded to the sacred tower of the Midianites called Penuel, or 'the Face of God,' which Gideon destroyed." Mr. Robert M. W. Swan, the companion of Mr. Bent in his researches, contributes some purely scientific notes, in which he says that though the ancient diggers must have obtained a great quantity of gold, "there is no reason to suppose that they have exhausted the reefs; indeed, I have seen at the bottom of old workings the reef continuing and carrying visible gold." He draws attention especially to the orientation of the buildings, in which the instances to the setting sun at the solstices are more numerous than those to the rising sun. In one part of the great wall of the fortress there is a very narrow doorway, not running at right angles with the wall, but north and south. This arrangement occasioned much perplexity as to the reason, until investigation proved that the line of sight to a person standing at the altar was through the main doorway of the great temple and then through this slit in the wall. It was "probably used to observe the transit of stars over the meridian, and thus to mark the time at night." These temples are of peculiar interest, as they are the only known instance of orientation in the southern hemisphere. In the discussion which followed the reading of these papers before the Society, Mr. H. H. Howorth, author of the 'History of the Mongols,' called attention to the fact that the specimens of Chinese celadon and Persian porcelain found at Zimbabwe dated from the ninth or tenth century, thus determining approximatively the later date of the history of the ruins.

DR. JOHNSON'S LETTERS.

Letters of Samuel Johnson, LL.D. Collected and edited by George Birkbeck Hill, D.C.L. Harper & Bros. 1892.

Dr. Birkbeck Hill may now be almost said to have made Dr. Johnson his own. His edition of Boswell's biography, which was reviewed in these columns five years ago, it may be presuming too much upon the gift of prophecy to declare definitive; but it is certainly safe to say that many years will pass before there is even an attempt to supersede it. Since that time, other works bearing on the same general subject or period have come out under his editorial supervision. To the previous obligations to his labors under which students of the eighteenth century lie, there is now to be added this first collection ever made of Johnson's correspondence.

It is not a complete collection in itself, for these volumes are in a measure supplemental to those containing Boswell's Life; and the letters printed in Mr. Hill's edition of that work, though recorded here, are not reproduced. Moreover, it is plainly intimated in the preface that certain correspondence which is known to be in existence could not be secured, through the refusal of its owner or owners to have it printed. But in all other particulars the work is as complete as could now be made by the most unwearied industry in collection and wide knowledge of the period in elucidation. Nothing that came from Johnson's pen has been omitted as too unimportant. All known possible sources of material have been carefully searched. Even the information contained in auctioneers' catalogues of autograph letters finds itself carefully gathered. Whenever, in such cases, extracts appear which have been given to whet the appetite of buyers, these are duly set down in their proper place, and it is not unreasonable to expect that in some instances their mention here will lead eventually to the recovery and publication of the whole text. Other unknown letters undoubtedly still continue to exist in the desks of collectors and will from time to time be brought to light; but in these two great works connected with Johnson Mr. Hill has a right to congratulate himself that he has succeeded in printing about ninety letters previously unknown to the general public. The whole number of all sorts, it may be added, which he has collected from various quarters and inserted in these two volumes, or the existence of which he has indicated, amounts to over eleven hundred.

The work is further enriched by a wealth of annotation which differs from most annotation in being exceedingly readable—in some instances, it must be said, much more readable than the matter it sets out to explain. Mr. Hill, as in duty bound, is an ardent admirer of Johnson, but this does not lead him to be unjust to adversaries. Only once have we detected in him any sign of falling from grace on that score. This occurs in his mention of Anna Seward. Her he speaks of as "an affected, tiresome, spiteful, and mendacious creature, who wrote bad verses and disgraced Walter Scott by being one of his correspondents." As if this were not sufficient to denote the degraded level to which she dragged down the great novelist, he adds that Scott even "went so far as to write a preface to what was called her Poetical Works." We are not particularly interested in championing the cause of an authoress who, in her dislike and depreciation of Johnson, often displayed a petty feminine spitefulness, but in the characterization which she receives here the sense of proportion has been lost. The measure that is meted out to her is of a much harder kind than that dealt out to far greater offenders against truth and justice. It contrasts curiously with the comparatively tender way in which mention is made of Baretti, who, though he escaped hanging for the death of a man he killed in a brawl, deserved that fate half-a-dozen times for the assassinations of private character he attempted.

The letters themselves, as has been intimated, yield frequently in interest to the annotation. Important, too, as they are to the study of the man and of the period, they cannot be said to contribute much that is new to the knowledge we already possess. The addition upon which the editor justly prides himself the most is the letter written by Johnson to his wife in 1740. In this the husband, then thirty-one years of age, addresses the wife of fifty-one as "my dear girl," and indulges in other expressions of tenderness which will excite respect in some minds and amusement in others. But about the first half of his career there exists a blank in our knowledge which the matter, whether old or new, contained in these volumes, does practically nothing to remove. The struggle and suffering which marked Johnson's early London life leave scarcely a record of themselves in any correspondence that has come down. From that source, indeed, no further light is ever likely to be thrown upon those weary years in which he was fighting that long battle with hunger and hardship and disease which he had plainly in mind when, at the age of sixty-four, he wrote to Mrs. Thrale that all he could look back upon was "a life diversified by misery, spent part in the sluggishness of penury, and part under the violence of pain, in gloomy discontent or importunate distress."

Letters covering this period and giving information as to his actions and sufferings are in truth never likely to be discovered, for the very good reason that they are likely never to have been written. He who found it so easy to talk, rarely took of his own accord to the task of composition. Nor will Johnson, in spite of the plea set up for him by the present editor, be ever known as a great letter-writer, hardly even as a good one. This is not saying that in these two volumes there is not much weighty observation, much acute comment, much that would be found interesting in itself, even did it not have the additional interest of having been written by the most famous literary man that England then possessed. But the indefinable charm of unconscious self-revelation which sets off the hastiest productions of the born letter-writer, is not to be found either among the valuable reflections or the dry details that make up no small share of this correspondence.

If any exception is to be made to this view, it is in the letters written to Mrs. Thrale, published by her in 1788, and finding, of course, their due place in this work. In them Johnson is certainly at his best, and fortunately they take up a very large share of his correspondence. To them in this edition are appended the marginal notes written by Baretti in a copy of the original work which is now in the British Museum. Brief as these are, they have all the delightful qualities which are imparted to expression when unscrupulous mendacity acts under the inspiration of bitter hatred. They are therefore almost invariably entertaining. The editor remarks that Baretti's statements are to be received with caution. This is putting the fact very mildly in regard to this Italian bravo.

The truth is that in this work there lingers a faint but still perceptible echo of the violent social convulsion which shook the literary circles of London towards the end of the last century. The public sentiment of Great Britain has never got over the sense of outrage it experienced when it was discovered that the widow of an English brewer had actually had the audacity to take for her second husband an Italian music master. The feeling does not, of course, exhibit itself here in the foul-mouthed way in which it found expression at the time. It does not take on the form of slanderous misstatement to which, at a later period, Macaulay gave wide currency in his review of Croker's edition of Boswell's Life. Still it is here; and if it can be traced in an editor so scrupulously accurate and fair-minded as Mr. Hill undoubtedly is, we can feel reasonably confident that the feeling has assumed the character of an inborn national grudge and is now transmitted in the blood. Yet there has never been any pretence, outside of unfounded and malicious gossip, that the marriage of Mrs. Thrale and Piozzi was an unhappy one. There is no question that the person principally con-

cerned never regretted it and never had reason to regret it. There is no question that she lived a much happier life with her second husband than she did with her first. Thrale was far from being the intellectual equal of his wife, nor was he always considerate of her feelings. It is accordingly easy to comprehend and to sympathize with the sense of relief that must have been hers after his death, when, to adopt the lofty language of Boswell in describing the state of things then existing, "the manly authority of the husband no longer curbed the lively exuberance of the lady."

A foreigner might well suppose that an Englishman of the present day would be glad to have forgotten the senseless howl with which the most cultured society of the land greeted at the time the second marriage of Mrs. Thrale, as, in addition to the vulgarity of its course, the act was one which did not concern it in the least. Apparently it is something that continues to be regarded with pride. The present publication of the correspondence renders it therefore appropriate to say that amid all the ribaldry which found vent on that occasion, the letter of Johnson (vol. ii., p. 405) to the woman to whom he owed so much bears easily the palm in brutality. Rough in its language and coarse in its suggestion, it is from any and every point of view utterly indefensible. The dignified reply which the recipient of this choice epistle made to the insults it contained has been preserved, and in this instance there is no possibility of resorting to the insinuation that it has been either forged or worked over. It gives the reader a high idea of her character and spirit, and of her superiority in sentiment and feeling to the crowd of reputable and disreputable busybodies by whom she was hounded. In fact, the only persons who now appear to any advantage in this sorry business are the two who were then assailed with the coarsest terms of abuse.

The letters to Mrs. Thrale in this volume are more than three hundred in number, and, as a whole, are far the most important and interesting of any that Johnson ever wrote. They have required, as the editor tells us, and as we can well believe, much the greatest amount of labor in annotation. While deprecating his doubtless unconscious tendency to put the worst construction upon her acts and motives, we have no words save those of praise for the manner in which he has performed his task here as in all other cases. These volumes, in fact, are throughout models of conscientious editing. Mr. Hill, at the close of his preface, expresses the hope that the same generous treatment will be accorded to the present work dealing with Johnson which the previous one obtained. There can be no question as to the reception that it will meet with from all students familiar with the time of which it treats. His edition of the 'Life of Johnson' received the generous treatment of which he speaks, for the very adequate reason that it fully deserved it. To the same treatment for the same reason this edition of Johnson's letters is entitled. It would indeed be a matter of discredit to contemporary criticism if the painstaking labor, the wide-embracing research, and the extensive and accurate knowledge which have been brought to bear upon the illustration of this work did not meet with the ample recognition and hearty welcome which they fully merit.

THE LETTERS OF WILLIAM LEE.

Letters of William Lee, Sheriff and Alderman of London, Commercial Agent of the Continental Congress in France, and Minister to the Courts of Vienna and Berlin, 1766–1783. Collected and edited by Worthington Chauncey Ford. 3 vols. Brooklyn, N. Y.: Historical Printing Club. 1891.

We are in no danger of lacking material for the study of the diplomatic relations of our country with the continent of Europe in the period of the Revolutionary War. During the last ten years much has been published: the four large quartos of Doniol, the twelve folio cases of facsimiles of Stevens, not to speak of such minor works as Durand's 'New Materials' and the chapter of Mr. Jay on the negotiations for peace, published in the seventh volume of Mr. Winsor's 'Narrative and Critical History.' Nor do we seem likely soon to see a cessation of activity in this rather small field. Mr. Isham promises us two volumes on Silas Deane, Mr. Stevens announces thirty-eight more of his folio cases, and Mr. Ford, while he bestows on the weary student three volumes on the trivial subject of William Lee, tells us that his brother, Mr. Paul Leicester Ford, is collecting the writings of William Lee's brother Arthur. And, after all is said and done, when the reader of American history has plodded through this enormous mass of material, how much better off will he be than his more fortunate elder brother, who relied on the researches of Sparks and Bancroft? How much did those early investigators leave to be gleaned after them? Something undoubtedly, but not a very great deal: a little more sympathy with the trials and troubles of Silas Deane, a little clearer view of the negotiations for peace, a little more gratitude for the services of Adams and Jay, a little more contempt for Arthur Lee, and a little firmer conviction that William Lee, the writer of these letters, was of no importance whatever.

The name of William Lee is not unfamiliar to the readers of our Revolutionary history. To most of them, however, it is little more than a name. They know that Arthur Lee had a brother who was an alderman of London, and that the brother did some commercial or diplomatic work on the Continent. That is all they know, and it would be as well for the reputation of William Lee that they should know no more. The editor of these letters tells us that both William and Arthur have "suffered greatly at the hands of their biographer." He refers, we suppose, to Mr. Richard H. Lee of Leesburg, Virginia, who in 1825 published a memoir of his grandfather, Richard Henry Lee, and in 1829 a Life of Arthur Lee. Let us see how William fares at his own hands and at the hands of his present editor.

We learn from Mr. Ford's introduction that late in 1766, or early in 1767, William Lee accompanied his brother Arthur to England, to engage in mercantile pursuits. In these he would appear to have met with some success, but his most marked activity was of a political character. He became a thorough-going partisan of John Wilkes, and in July, 1773, was elected a Sheriff of London. Of his conduct in that office we are given but one important example:

"In November occurred an election for a Member of Parliament, in which the contest of faction ran high. The 'ministerial' candidate was John Roberts, and against him Wilkes pitted the Lord Mayor, Frederick Bull, whose advancement had been due entirely to his wealth and his unbounded admiration for 'Squinting Jack,' as the political 'boss' of the city was familiarly called. Poor Roberts was unmercifully treated during the poll, and his descent from the hustings was marked by an outbreak in which he was jostled, trod on, his shins broken, and he was generally ill-treated. That the election was an honest one can hardly be asserted with confidence, for tricks that are still employed in political elections were fully resorted to—charges of bribery, scurrilous paragraphs, forged utterances, personal intimidation, and colonization of voters. The Sheriffs presided, and were supposed to preserve order, but in this case their partisanship appeared to have got the better of their discretion. One Hunt, who claimed to be a member of the Armourers and Braziers' Company, had cast his vote for Bull, when he was charged with being no livery-man—a charge that was true. Sheriff Lee, however, settled the matter by seizing the challenger by the collar, putting him in charge of the constables, and detaining him for some hours, while the dishonest voter went free. The injured freeholder advertised Lee in the papers as one 'whose personal capacity I despise and hold in the utmost contempt.'"

So much for the writer of these letters as a municipal officer. Presently the troubles between Great Britain and her colonies became more acute. Lee was forward in promoting the preparation and delivery of petitions in favor of the American cause to the King and the House of Commons. His election as an alderman from the Aldgate Ward showed him to be a person of influence. His advice to his own countrymen in America might, therefore, be supposed to be weighty. It was proposed in the colonies to bring the British merchants to a sense of the folly of quarrelling with their countrymen beyond seas, by stopping the exportation of tobacco from Virginia and Maryland. Lee approved of the plan and encouraged its execution, but at the same time instructed his correspondents to forward to him a large quantity of the article before the trade was stopped. It does not seem to have occurred to this perfervid patriot that every pound thus sent would tend to make the coercive measures of his friends in America less operative in England; his care in the matter was chiefly for his own pocket.

The progress of political events seems to have put an end to William Lee's commercial business in England, for in October, 1776, we find him hinting to his brother Richard Henry that "the prospect of starving is by no means agreeable," and that he would like an appointment as mercantile agent somewhere on the Continent. And the hint was taken. In April, 1777, Lee received word that he had been made commercial agent at Nantes, in conjunction with one Thomas Morris, a half-brother of Robert Morris, the financier of the American Confederation. Lee therefore proceeded to France, and immediately began to take part in the violent quarrels which divided the small set of Americans in that country. The commissioners, or diplomatic agents, of Congress were Benjamin Franklin, Silas Deane, and Arthur Lee. The last of these was bickering openly with the second, and more covertly with the first. Thomas Morris, who had had sole charge of the commercial agency at Nantes, was a hopeless drunkard. At the time of William Lee's arrival, Morris's conduct was under investigation at the hands of one John Ross, a friend of his elder brother and patron, Robert Morris. A nephew of Franklin, named Jonathan Williams, had been charged by Deane with the sale of prizes brought into French ports by American privateers. This had been done before the news of Lee's appointment as commercial agent had reached France, and was a consequence of Morris's incapacity. Lee, however, chose to take it in dudgeon. He could do nothing with Morris himself, but he did not want anybody else to do anything. He did not long retain the agency. In October he received a commission

as Minister of the United States at the courts of Berlin and Vienna. He remained in Paris, however, for some months. At the end of January, 1778, Thomas Morris died. After a squabble with Ross, William Lee seized his papers and carried them off to Paris, and thus ended the affairs of the agency at Nantes.

In Austria, Lee accomplished absolutely nothing, and he did not go to Prussia. His one diplomatic achievement was the concoction of the draft of a treaty with a Dutchman named De Neufville, representing the Grand Pensionary of Amsterdam. This draft was never adopted by any person or corporation empowered to make treaties, and would be utterly unimportant were it not that a copy of it was found in the papers of John Laurens when the latter was captured at sea by the British in October, 1780, and formed the excuse for the outbreak of hostilities between Great Britain and Holland. William Lee's commission was recalled on the 8th of June, 1779, and he sank from comparative into positive insignificance. His chief characteristics were restless activity and suspicion of those about him. His sense of personal honor is shown by the attempt, which he made while waiting in Paris to go on his diplomatic mission, to use the early intelligence he was likely to receive as minister in stock-jobbing operations in London.

The volumes which contain this collection are very handsome in appearance. Mr. Ford has performed his task with industry and care. If the letters of William Lee were to be published at all, we could hardly ask that they should be better published. The editor's notes are painstaking and appear to be accurate. It is clear that he has not printed nearly the whole of the letters which have been before him. It is possible that a different selection might have given us more of the human and social side of William Lee and his correspondents; but we fancy that the fault here lies with the writer and not with the editor. There was not much in William Lee, and what there was was not very good.

Moral Teachings of Science. By Arabella B. Buckley. D. Appleton & Co. 1892.

ANOTHER subject so important, vast, and difficult it would be hard to name—a subject which not every philosopher of the first rank would be competent adequately to treat. Not mere clear insight into one aspect of philosophy is sufficient; a full appreciation of what belongs to the spirit of all the different leading schools of thought is required. To say that the subject is far beyond the powers of the authoress is no disparagement. Nor has she attempted any thorough or philosophical discussion. It is not science which has dictated her teachings, but traditional ideas, for which she ingeniously finds considerable countenance in facts of natural history. But these facts are somewhat isolated and sporadic; they are not the leading facts of any current scientific theory. That they play so little part in science perhaps indicates a defect in scientific theories.

Two widely different things might be understood by the "moral teachings of science." In the first place, the prosecution of scientific research necessarily requires and strengthens certain moral qualities, quite independently of what the results of that research may be, and the moral teachings involved must undeniably be good so far as they go, although they may be one-sided, fortifying only a part of the moral nature, and leaving another part neglected. The first of these teachings is perfect fairness and moral indifference as to the outcome of any inquiry. Suppose, for instance, the inquiry be as to the correct reading of a text of Scripture, "Thou shalt not steal," or "Thou shalt steal." (We purposely select an impossible case, in order to free the example from perplexities.) There is a conclusive argument to be drawn from the moral nature of man that the former and not the latter must be the correct reading. Nevertheless, in estimating the force of the purely historical evidence—in order to be scientific, in order to be logical—we must for the time being remove, if we can, all such prepossessions from our mind, and look upon the two commandments with an indifferent eye; not rejecting any considerations, but putting them aside for the time being. Many great scientists go to church, and are there very unlike what they are in their laboratories. At one time they are studying one aspect of truth, at another time another. To regard either aspect fairly and honestly, the other must for the time be excluded. If they conflict, the presumption, the faith of the scientific man is, that it is because the last word has not been said, on one side or on the other; at any rate, it must at least be hoped that there is an ultimate resting-place which will be satisfactory from both points of view.

Perfect candor in recognizing facts and their bearings, without trying to explain away real difficulties so as to make out a decided conclusion, is the very first point of scientific morals. To get at the facts of observation, uncolored by any theory or doctrine, moral, political, or physical, is what the scientific man must strive for. It does not please him at all to have his observations agree too well with one another. It makes him suspect that something is wrong. An obstinate discrepancy is his delight, because it shows that he is on the road to learning something he does not yet know. It was a little discrepancy in the place of the planet Mars, of a fourth of the breadth of the moon, that forced Kepler, who would not blink it, to the discovery of his first two laws, and so made the discovery of Newton possible, and opened the way for all modern science. Nothing, it is true, is more common than to find admirable scientific men strangely incapable of seeing the force of certain kinds of evidence; as many medical men long were blind to the evidences of the germ-theory of acute constitutional diseases. Perhaps they are even better scientific men for that, within a limited field; but in a broader field it is a fatal defect. Let lawyers have their rules for excluding certain kinds of testimony if they will, but science must exclude nothing, not even the fancies and traditions of men. On the other hand, science must not confound different orders of premises. It must let instincts and superstitions have their say, unchecked, and listen to them; and then it must let scientific observation have its say, equally unchecked. Science will erect a theory which shall do full justice to both orders of facts, if it can. But whether it can or not, it will collect new facts in all departments to see whether they confirm an existing theory or suggest a new one.

But Mrs. Buckley Fisher rightly understands by the "moral teachings of science" something different from such teachings of scientific logic. She means the moral and spiritual beliefs and tendencies which are in harmony with the discoveries and theories of science. Now, to hold that *these* moral teachings of science are necessarily sound and wholesome is an utterly unscientific belief, because it is not borne out by facts, but is merely an airy optimism. Science is incomplete; it is *essentially* incomplete, for what we mean by science is the sum of human activity at any epoch in the path of discovery; and were everything once found out, this activity must cease. True science never pronounces an ultimatum. Philosophical writers are always doing so. Men like Spencer lay down the principle of the conservation of energy as an ultimate, primordial principle of the universe; but a pure scientist is puzzled to know what can be meant by such a truth. For him the conservation of energy is a principle which he may safely assume in all reasoning about large and unorganized masses, and with little hesitation for molecules and atoms, and which is certainly applicable, to a great extent at least, in regard to living matter. But what absolute universality means, or whether it means anything at all, he does not know nor greatly care. Science is dealing only with what is likely to come into the field of experience in a moderate time. It has nothing whatever to say about eternal verities, and its moral teachings are necessarily defective if such verities have anything to do with morals. But science really makes no pretence to teaching spiritual things; and what are rightly enough called its moral teachings—that is to say, the views of spiritual questions which have a general resemblance to the discoveries science has made up to date—are doctrines for which science does not vouch in the least.

Nobody who analyzes these teachings understandingly and without bias can well deny that, so far, they have been in the main distinctly anti-Christian. The first general feature of nature which attracted the attention of modern scientists was the prevalence of mechanical law; and Robert Boyle, one of the most devout of Christians, formulated the mechanical philosophy according to which the universe works like a machine. Make this proposition absolute and universal, and it jars utterly with the creed of Christendom, for it leaves no room for final causes. Boyle himself made room for them by limitations of the proposition. For instance, he held that in the beginning there was no such mechanism, until God had made his plans; and that, that done, the whole character of his action was changed. There is a fearful want of philosophical unity about such a conception. The natural "teaching" of science, though far from being a scientific conclusion, is that all appearance of final causation is illusory. Christ taught that God loves his children, and that not in an entirely inscrutable way, but humanly, so that there is intercourse between each man and God, and prayers are sent up and answered. Yet the "teachings" of science reduce God to the condition of a limited monarch, acting under laws which leave no room for personal favors. This view has penetrated so far that when Tyndall proposed a prayer test, the attitude of the clergy was less courageous by far than that of Elijah towards the Tyndalls of his day.

Recollections of a Happy Life. The Autobiography of Marianne North. Macmillan & Co. 2 vols., pp. 351–337.

MISS NORTH was in many ways a notable woman, and when she died in 1890, she left behind her this interesting record of her travels, which has been edited by her sister, Mrs. John Addington Symonds. Of many minor errors we note a few which might be corrected in a second edition: Brooklyn for Brookline, Ongar for Ogden, Tahoo for Tahoe, Denning for Deming, Alldine for Aldine, Puebla for Pueblo, Bernard for Barnard; while okra is dis-

guised as accro (which the table of *errata* says should be okery), and milreis is written millen reis. Moreover, dates are important in some books of travel, because of the rapid changes which take place, but instead of being given at the top of each page in these volumes, the years are inserted in the text in the most casual and unexpected places.

Miss North began to travel at an early age. While still a girl, her father took her all over Europe, and they were driven from one capital to another by the troubles of 1848, reaching Dresden the very day before Wagner, not yet the world-famous, led the mob which assaulted the palace. It may have been owing to this experience that she failed to appreciate what she calls "the endless weariness of the music of the future," but it is more probable that, in spite of some early training in singing, she had inherited some of her father's feeling toward music, which led him to consider it "a horrid noise which must be submitted to for the sake of others who like it." This theory finds confirmation in her confession that she disliked poetry. Before reaching womanhood, Miss North had arrived at the conclusion that English society, especially that of the country squires, was extremely dull—an opinion that is shared by many unprejudiced observers at the present time. She very much preferred wandering about Europe with her father, which she did for many years, and it is to be presumed that during this period she acquired some of the independence and *savoir faire* which characterized her later life.

Her serious travelling, during which she was almost entirely without companionship, began in 1871, after her father's death, and continued for some fifteen years. During that period she visited this country, Jamaica, Brazil, Teneriffe, Japan, Borneo, Java, Ceylon, India, Australia, Tasmania, New Zealand, South Africa, the Seychelles Islands, and Chili, and several of these countries more than once. She was very far removed from the ordinary globe-trotter, who wanders from place to place in order to kill time, and sees little or nothing but the bills of fare in the different hotels. On the contrary, she had a keen sense of the beautiful in scenery, especially tropical scenery, and to a less degree in architecture, while her comments on men and manners are generally original and intelligent. Of humor she shows occasionally what mineralogists call a trace, as, for instance, in the story of a stout and fashionably dressed lady at a ball who was horrified by the cannibal King of Fiji's admiration of her arms when she learned that these are esteemed the choicest morsels of human flesh! Like other travellers, she found the Dyaks of Borneo the most truthful, polite, and contented of all savage races, although professing no religion at all. She was very decidedly of opinion that, except in unfavorable climates, the white man must inevitably drive out the colored—a view which it would be difficult to maintain successfully.

However, it was not to study sociological questions that Miss North made her long journeys. As far as possible she avoided large towns and the society of tennis-playing English people, and wandered into by-ways and remote districts where she could paint the wonderful plants and trees free from the interruptions of the idle and frivolous. This was her hobby and her life-work, and in the pursuit thereof she underwent discomforts and privations which would have daunted a less courageous soul, and which undoubtedly shortened her life. In one of her sleeping-places in Africa, she says, "Lizards and rats were perpetually on the move, but when once I knew what they were, they no longer disturbed me." To be able to sleep at all under such circumstances argues a nervous organization uncommon among men and certainly very rare among women. By dint of incessant labor, and in the face of many difficulties, she finally completed a collection of paintings covering the whole range of tropical vegetation, and these she presented to the nation, and they can now be seen at Kew Gardens. The Queen, being advised that she could not make Miss North a baronet, sent her her photograph instead, but it is probable that the successful completion of her task was in itself a more precious reward than any honor a grateful sovereign could bestow.

Our English Homer; or Shakspere Historically Considered. By Thomas W. White. Charles Scribner's Sons.

THE Baconian theory of the authorship of Shakspere's plays receives a curious contribution in the work whose title we give. The author improves on the old theory by informing us that the plays were written by everybody except Shakspere. Greene, Nash, Peele, Drayton, Marlowe, Daniel, Lodge, Chapman, and "Unknown" make up the list, with Bacon as author of "Hamlet," "Timon," "Henry VIII.," and the Roman plays, and as "reviser" of the others, originally composed by the dramatists named above. The way of it is sufficiently exposed by the following extract: "We say nothing of the loose life which ruined the morals of his [Shakspere's] associates. But he is a mere Jack-of-all-trades—a man with a tiger's heart, who would allure scholars to do his work, fawn on them, suck their brains, and cast them off when they had served his turn; while, for we cannot omit this, he would represent to the world that their works were his own." The argument is, that Shakspere invented a dramatic "sweating" scheme, hired the poor University men to compose plays, paid them just enough to keep them subject to his will, and at the same time taught them debauchery in order the more surely to enslave them by necessity, and finally, as they died under his tyranny, assumed their works, had Bacon revise them, and then made the wise courtier his last mouthful.

The book is pretentious and wears a certain semblance of learning; consequently a few more quotations from it may be given in illustration of its quality. Here, first, is a passage on the origin of Greek tragedy out of the Bacchanal choruses: "From all we know of those songs, they seem to have been very similar to our old-fashioned negro minstrelsy—disconnected tirades, full of impudent allusions, and accompanied by the grotesque humor proper to those who were drunk. Nor were the Bacchanals themselves very different in appearance to our earlier sable songsters." Here is the origin of Italian drama: "When, therefore, their [the Goths'] slaves—and all the Romans spared had been absorbed either in marriage or servitude—began to compose plays for their entertainment, they naturally combined the Roman dramas of their recollection with the fairy legends they had been compelled to accept; and as the former were all imitated from the Greek, that combination arose which is seen in 'A Midsummer Night's Dream.'" Here is the origin of Venice: "Of all the world the Venetians exhibited the most violent hatred of the whole Saracen race. Rather than submit to their sway, they had deserted the fertile regions of Italy and had taken refuge on those barren sand-banks which ultimately became Venice." This is apropos of the statement that "Othello" is from the Spanish, supported as follows: "As the reader will have gathered from our remarks, we have been unable to put our hand on the Spanish piece whose existence we suggest. We have not even got notice of it from books. But that need not create any surprise." It doesn't. Did the author "get notice from books" of the statement on his first page that the "Lower Empire" was overthrown "a century later" than "the invention of printing," namely, "in 1543"?—an amusing instance of how figures can lie, since but for his words in the text his date might have gone as an obvious misprint.

Here is page after page of novelties in the way of history, but enough, surely, in the way of example has been given. This acrobatic ignorance naturally disports itself most on the ground of Baconianism, where it finds a congenial ring, and indeed the performance has new features. The proposition that everybody except Shakspere wrote the plays and poems has a humorous charm; the list, all tabulated, with ascription of each play to its right owner at last, is almost worthy of Tristram Shandy's faculty for diagrams; the staid Greek quotations on the page seem to wink and blink with suppressed fun in their masquerading learning. Excellent fooling! The "Baconian," willy-nilly, "chronicles a deal of sport."

Vermont: A Study of Independence. By Rowland E. Robinson. Boston: Houghton, Mifflin & Co. 1892.

THE history of Vermont has a marked individuality. New England and New France dissociated—as Tacitus would say, *mutuo metu aut montibus*—left the intervening spaces a wilderness until after the conquest of Canada. Then the Green Mountain region became to the older colonies, like the Northwest of our day, the agricultural land of promise. But that whole area turning out debatable ground between New Hampshire and New York, the pioneers set up a government of their own. Statehood was thrust upon them. Independence, however, cost them a thirty years' struggle. Their Constitution shows the earliest prohibition of slavery, and no slave was ever held within their limits. Their administration was simpler and cheaper than their neighbors had dreamed of. In all wars their military record has been glorious; and their children, swarming as from a Northern hive, have gone out West in crowds proportionally greater than from any quarter of the Atlantic slope.

The present historian of Vermont has uncommon skill in picturesque description. Marches, battles, the Westminster massacre, log-rolling and other bees (as raising, husking, apple-paring, and sugaring off) are well rendered in word-painting. Mention of flowers, trees, and especially birds, varying with the seasons and hours of the day, gives a charming local color to incidents. In details of this nature, which paint a scene to the life, Mr. Robinson has followed in the footsteps of Parkman. His story, thanks to this descriptive power and to terseness, is more readable than any thus far written of the State in the series to which it belongs. Nevertheless, it is a work of no great research. The manuscripts gleaned for the State archives with so much pains by Henry Stevens do not appear to have been consulted. The voluminous 'Records of Governor and Council' are rarely referred to. Little use is made of the side-lights thrown on early history by con-

temporary newspapers. Geography and chronology are the eyes of history; in this narrative they are both sometimes dim. The battle of Hubbardton would be more intelligible were we told its distance from Ticonderoga. Among the routes of Indian raids, Poultney River should have been mentioned, it being on the shortest thoroughfare between lake and river, and traversed in 1754, when so many captives were carried off from Charlestown. More dates (as pp. 207, 217, 241, and often elsewhere) would make the narrative clearer. Those given are not always correct. Thus it is said (p. 32) that Amherst in 1757 moved by the same route which Abercrombie had taken. The date of Abercrombie's movement is not stated, but it was in fact a year after 1757. There may be here a misprint.

No such excuse, however, can be made for misstatements of fact. The library of George P. Marsh is said to have been his *gift* to the Vermont University. The truth is, that, after the death of Mr. Marsh, his library was bought of his widow in Italy for $25,000 by Frederick Billings, and given by him to the University. Gen. Ransom, President of Norwich University, is set down as merely "a military instructor" in that institution. Spanish merinos are said to have been "imported by Consul Jarvis in 1809 and 1810, and *about the same time* by Col. Humphreys, and by Chancellor Livingston as early as 1802." But Humphreys made his importation seven years before Jarvis, and, according to the *North American Review* (iv., p. 98), "was the first person who introduced into this country merino sheep." In keeping with this declaration is the epitaph on Humphreys at New Haven, in which Prof. Kingsley declares that he first enriched his country with a truly golden fleece, *vellere vere aureo*. The Yankees at Bennington, Mr. Robinson tells us, stormed the breastwork with "bayonetless guns" (p. 175); but Pittsford men, while burying the dead at Hubbardton, picked up twenty-seven bayonets and had sold them to the State in time to be of service at Bennington. Indeed, ex-Minister Phelps, at the dedication of the Battle Monument, stated that half of Stark's force had bayonets. Our author needed confirmation of his opinion concerning Arnold's course in eluding the British fleet at Valcour Island. What he desiderated he would have found in Stone's translation of Pausch's Diary. Pausch says: "The batteaux formed a chain from shore to shore."

But the point where we most regret Mr. Robinson's superficial investigation is concerning Dr. Thomas Young, who not merely "suggested" but gave her name to Vermont, April 11, 1777, and also, as is highly probable, the first draft of her Constitution. The Vermonter who had spoken of him most fully could only say: "He is believed to have died in Philadelphia in the latter part of the year 1777." Files of contemporary newspapers elucidate this and other particulars, which decent respect to such a benefactor as Young calls on Vermont historians to commemorate.

Indika: The Country and the People of India and Ceylon. By John F. Hurst, D.D., LL.D. Harper & Bros.

In this very well-written book the author gives an account of his visit to India, describes its scenery and all its celebrated places, sketches its history, touches upon its numerous religions, tells us something about all the principal castes, tribes, and sects into which Indian society is distributed, examines the English administration of the country, and discusses some of the leading questions of Indian politics. His personal narrative expands after this manner in various directions, and becomes the connecting thread of a whole series of impressions taken during his travels, and of very intelligent observations upon places and people. We may add that the value of the book is much increased by many really admirable illustrations.

Dr. Hurst has evidently studied India and Indian literature from every point of view; and his object appears to be to include in this volume a brief summary of all that the general reader may find useful in taking a rapid survey of the past history and present state of this most interesting country. It is not surprising that, in taking such a wide range over his subject, he should have fallen into a few inaccuracies, or that his insight into the circumstances out of which British dominion arose in India should be occasionally imperfect. When, for example, he writes that "History utters no voice as to who suggested such a strange and far-off gift" as the cession of Bombay by Portugal to England in 1662, he is treating as mysterious what was really a very intelligible transaction. In the seventeenth century the Dutch were formidable rivals on the Indian coast to the English as well as to the Portuguese; and the cession of Bombay represented an alliance of England and Portugal against Holland. The brief notice of the French in India is not quite satisfactory; and we may remark, though it is a small matter, that "many thousands of native troops" were not slain at the battle of Plassey in 1757, but only about five hundred. On the other hand, we have a very useful and substantially correct account of Anglo-Indian administration in all its branches, with an impartial review of its advantages and drawbacks; and although one may demur to the prophecy that "the native States will diminish and in time disappear"—for the English policy is to maintain and strengthen them—yet the whole work shows a fair and well-judged appreciation of the relations between the English and the Indians, and is full of generous sympathy for the indigenous races.

It is natural that much space should be allotted to religion and to education, and to the prodigiously difficult problems raised by the rapid extension of Western knowledge, which saps the foundations of the primitive faiths, and destroys without reconstructing. Much is said about the Protestant missions: we are told, somewhat confidently, that "England has learned that the Christian religion is the real and only basis of a permanent tenure of the country"; a short chapter is devoted to "The Skeptical Invasion of India"; and two are occupied with the "Reformatory Movements" that are going on within Hinduism. Short studies of such deep and complex subjects are necessarily inadequate; nor is it clear that they are much elucidated for the earnest reader by such passing remarks and expeditious conclusions as can find room in a book of this character. The neutral attitude of public instruction in India is severely criticised; but Dr. Hurst takes little account of the immense difficulties of the situation, or of the fact that it is only by observing this strict neutrality that the English Government has been able to spread education among the jarring sects and rival creeds of this vast population. We may add that it is this reputation for careful neutrality among conflicting religions which has empowered the Government to protect and even to encourage Christian missions.

Similar exception may be taken to the two chapters on "The Opium Curse in India" and on "Intoxicating Drinks," which inevitably fail to deal with more than the obvious and indisputable aspects of questions that demand very careful scrutiny. It is easy to say that England has never made a greater contribution to the world's wretchedness than by the opium traffic, and to give statistics of drunkenness among the lower classes of the natives; but the point to be proved is whether opium-eating or drinking would increase or diminish if no revenue were raised from drugs or liquor. Into this argument, however, we cannot enter.

We can entirely commend the picturesque descriptions of the beautiful buildings that are scattered all over India, of the people, their princes, and their capital cities; there is a chapter on Bassein, "a dead Portuguese city," which is particularly striking and of much historical and archæologic interest; and in his final chapter, "What has England done for India?" the author shows a just and discriminating appreciation of the results, up to the present time, of one of the most extraordinary political experiments ever undertaken in the history of the world's civilization. He enlarges upon the expansion of education among all classes, the physical care of the helpless, the subtle bond of the English language, the development of the soil, the opening of the country for the incoming of Western ideas, and the breaking down of all doors for the free spread of the Gospel. Such books as this will be read with pride and profit by all English-speaking races; and the author will have earned the respect and gratitude of all those natives of India who desire the friendship and sympathy of the civilized natives of the West.

BOOKS OF THE WEEK.

Allen, J. L. The Blue-Grass Region of Kentucky, and Other Kentucky Articles. Harpers.
Barter, S. Manual Instruction: Woodwork. London: Whittaker & Co.; New York: Macmillan. $2.
Birrell, Augustine. Res Judicatæ. Scribners. $1.
Black, W. Kilmeny. New and revised ed. Harpers.
Brace, Maria P. A Text-Book of Elocution. Leach, Shewell & Sanborn. 40 cents.
Burnet, John. Early Greek Philosophy. London: A. & C. Black; New York: Macmillan. $2.50.
Bury, J. B The Isthmian Odes of Pindar. Macmillan. $2.25.
Caller, Mary A. A Literary Guide for Home and School. Charles E. Merrill & Co. $1.25.
Castle, Egerton. Schools and Masters of Fence. New and revised ed. London: George Bell & Sons; New York: Macmillan. $2.
Cavazza, Mrs. Elizabeth. Don Finimondone. Charles L. Webster & Co. 75 cents.
Clerke, Agnes M. Familiar Studies in Homer. Longmans, Green & Co. $1.75.
Crafts, Rev. W. F. The Sabbath for Man. 6th ed. Baker & Taylor Co. $1.50.

NEW VOLUME OF CHAMPLIN'S YOUNG FOLKS' CYCLOPÆDIA.

Vol. III. GAMES AND SPORTS. By JOHN D. CHAMPLIN, JR., and ARTHUR E. BOSTWICK. Illustrated. $2.50.

A compendium of all kinds of games, athletic sports, simple chemical and mechanical amusements.

"No such collection has ever appeared before."—*Nation.*

"The most satisfactory of which we are aware."—*Congregationalist.*

"Should form a part of every juvenile library."—*Hartford Post.*

"A mine of joy."—*N. Y. Tribune.*

HENRY HOLT & CO., Publishers, New York.

Letters of Credit. We buy and sell bills of exchange on and make Cable Transfers of money to Europe, Australia, and the West Indies; also make Collections and issue Commercial and Travelers' Credits, available in all parts of the world.

Brown Brothers & Co., Bankers,
NO. 59 WALL STREET, NEW YORK.

A Loan of 5,000 dollars is wanted, for five years or less on improved property worth 17,536 dollars at forced sale. Nine per cent. interest will be paid, quarterly. Eastern reference given. A. C. MARKLEY,
FORT BAYARD, NEW MEXICO.

"GLOBE-GIRDLING TOUR."
Chaperoned by a Physician. Low Cost. Address E. B. BLANCHARD, 143 W. 104th St., New York.

FOR RENT, FURNISHED—8 ROOM Cottage at Prout's Neck, near Portland, Me., close to sea. JNO. T. SINNOTT,
125 South 5th St., Philadelphia.

TRANSLATING from French and German into accurate English. Moderate rates. ANNA O. GOEPP, 204 N. 35th St., Philadelphia.

Government Baking Powder Tests.

UNITED STATES and Canadian Government food investigations show the Royal Baking Powder a cream of tartar powder superior to all others in leavening strength.

Statements by other manufacturers to the contrary have been declared by the official authorities falsifications of the official reports.

Exhaustion.

HORSFORD'S ACID PHOSPHATE.

A wonderful remedy, of the highest value in mental and nervous exhaustion.

Overworked men and women, the nervous, weak, and debilitated, will find in the Acid Phosphate a most agreeable, grateful, and harmless stimulant, giving renewed strength and vigor to the entire system.

Dr. Edwin F. Vose, Portland, Me., says: "I have used it in my own case when suffering from nervous exhaustion, with gratifying results. I have prescribed it for many of the various forms of nervous debility, and it has never failed to do good"

Descriptive pamphlet free.

Rumford Chemical Works Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION: Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

"*The weary brain requires some nerve sustaining element as food.*"—HERBERT SPENCER.

Crosby's Vitalized Phosphites.

The vital principle of animal and vegetable life isolated from the ox brain and wheat germ.

The loss of memory, the tired and exhausted feeling, the dull, unrefreshed sleep, or nervous sleeplessness, brain weariness, depressed vitality, are simply the brain and nervous system calling for their necessary food. In this condition the Vitalized Phosphites give great relief. It restores the true protagon, the brain phosphoid, increases brain and nerve power by specially feeding the nerve centres. It reinvigorates brain and body.

For thirty years endorsed by leading physcians, and the world's best brain workers. Formula on the label. Pamphlet free to those who write for it. Druggists or by mail, $1.00. 56 W. 25th St., N. Y. *F. Crosby Co.*

Our new **Book Catalogue** not only gives the size and price of all the standard works on Homœopathy, but an interesting description of each, together with opinions of the press and of physicians. Mailed free.

The Nation.

NEW YORK, THURSDAY, JUNE 9, 1892.

The Week.

No great party ever had a more troublesome idol than the Republican party has in Mr. Blaine. He is perpetually subjecting it to unexpected strains, which leave it rent with new dissensions, and weakened by fresh defections of men who can invent no further excuses for his extraordinary conduct. He cost his party thousands of votes when he induced it to nominate him for the Presidency in 1884, and cost it also its self-respect by forcing it into a defence and condonation of his public record. In 1888 he again subjected it to the strain of defending the sincerity of his professions that he was no longer a candidate, while his confidential friends were working like beavers to "set up" his nomination in the Convention. This year's strain has been the severest of all, and the party as a whole has shown less ability to withstand it than on any previous occasion. As a member of President Harrison's Cabinet, Mr. Blaine was bound by etiquette not to be a candidate against his chief before the Convention. He has himself recognized the binding nature of this etiquette in repeated public and private utterances, and only a few months ago he did so in the most formal manner possible by sending a letter to the Chairman of the National Committee of his party, declaring that he should not be a candidate before the Convention. His party accepted this letter as sincere. Yet three days before the Convention meets, he himself declares, in effect, that what he wrote was not sincere, that he has all the time as a member of the President's Cabinet been intriguing against the President's nomination, and that he is in the field as a candidate against him.

This is not a hostile interpretation of Mr. Blaine's curt resignation from the Cabinet, but the interpretation which men hitherto his devoted friends at once put upon it. These agreed that it meant a declaration of his own candidacy and of hostility to Harrison's candidacy. Mr. Chauncey Depew, for example, for years one of Mr. Blaine's most ardent admirers, declared his course to be "nothing less than indecent," and predicted that "his duplicity and insincerity will drive him out of the race and out of politics." The changed attitude of the Republican press is as significant as this and similar utterances of the party's leading representatives. In every other dramatic and sensational episode of his career, and especially in previous assaults upon the Presidential nomination, Mr. Blaine has had the enthusiastic support of the New York *Tribune*, the Philadelphia *Press*, the Boston *Journal*, the Milwaukee *Sentinel*, and other leading newspapers of his party. All of these, as well as the St. Paul *Pioneer Press*, the St. Louis *Globe-Democrat*, the Burlington (Iowa) *Hawkeye*, and other equally conspicuous party organs, are in favor of Harrison's candidacy in preference to his, and many of them are openly condemning his present course. It is plain from these defections that he is weaker with his party than he has ever been before, and that if he should be able to persuade its delegates into committing the blunder of nominating him, he would go before the country with a following greatly diminished from that which he had when he was defeated in 1884.

The purely factional nature of the division in the Republican ranks forbids the hope of so salutary a schism at Minneapolis as that which destroyed the ante-bellum Democratic party at Charleston in 1860. There is no principle or line of public policy for which Blaine or Harrison can be said to stand as contradistinguished one from the other; in fact, they are in the ludicrous position of contending each for the sole glory, such as it is, of the present Administration. The choice of Mr. Sherman, on the other hand, which cannot be considered remotely probable, would mean the taking of a definite attitude on the silver question; that of Mr. McKinley would accentuate the tariff issue; that of Mr. Reed, perhaps, would mean an intimation, at least, of a revival of the Force Bill. The platform will glance at all these issues, but the nomination depends on the party orthodoxy of no man—for there is no such thing as Republican orthodoxy—but solely on "availability." Whoever can "get the votes" or "carry," is a good-enough Republican for this occasion; and never was our political gambling more undisguised than at Minneapolis at this moment, where not a ray of honest enthusiasm for a cause or a moral idea is visible. War-whoop tactics, with brass-band and bunting accompaniments, are the order of the day; buying and selling openly takes the place of discussion and persuasion; the most discredited bosses, Mahone, Quay, Platt, Foraker, Clarkson, direct the intrigues in the interest of public plunder and against the renomination of the present head of the party.

While, at the present writing, Mr. Harrison still seems likely to be made once more the candidate of his party, the more important question is, what good the nomination will do him when he gets it. At best his chances of a reëlection have never been promising. The first popular verdict upon his Administration, at the Congressional elections in 1890, was the most overwhelming rebuke ever administered to a party. There was no evidence that Harrison's personality did anything to weaken the force of this blow. Nor is there any indication that he has gained strength personally during the past two years. On the contrary, there is abundant evidence, accessible to any one who will make inquiries among Republicans, that the President has a singularly weak hold upon his party, and that thousands upon thousands among those who voted for him four years ago to-day are either doubtful whether they will take the trouble to go to the polls next November, or say that they shall go there and vote for Cleveland if the Democrats give them a chance.

The situation at Minneapolis and the Republican outlook for the campaign both emphasize the folly and the weakness of the spoils system. Harrison's cause at Minneapolis is greatly hampered by the fact that so large a proportion of the delegates and "workers" for him are Federal office-holders, whose bread and butter is at stake. Such supporters always do a man more harm than good. Even if he gets a majority of the Convention through the votes of these office-holders, his cause will be quite as much hampered during the campaign by the hostilities which the distribution of the patronage has provoked. A host of men from Platt down oppose Harrison's nomination because he has not given them what they wanted. These men are not going to work for his election, because they know very well "there is nothing in it for them." The result is that Harrison, in 1892, with all the offices, will be far weaker than he was in 1888 without one, while Cleveland will profit as much as Harrison loses by the reversal of the situation in his case.

The Syracuse Convention did its work thoroughly well. It adopted an excellent platform of principles, elected a strong delegation to the National Convention, and approved the ticket for Presidential electors framed by the "Snap" Convention, to which no objection has been raised by anybody. Hardly any opposition was manifested to the idea of choosing a contesting delegation, as almost everybody recognized the absurdity of doing anything else. Whether this delegation is admitted to the National Convention in whole or in part is a matter of little consequence, but it was of the very first importance that representatives of this movement should go to Chicago with full authority to state the reasons for its existence and for its recognition. So far as the nomination of Cleveland is concerned, the votes of this delegation will not be needed; and when he is nominated, its action regarding Presidential electors leaves but one ticket for De-

mocrats to support. The strongest testimony to the wisdom which characterized the Convention is furnished by the disappointment expressed alike by the Hill Democrats and by the Republicans.

There was a protracted and hot debate in the House last Friday and Saturday over a section of the Post-office Appropriation Bill proposed by the Committee on Appropriations, providing that all railroads should have their charges for carrying the mails fixed by the Postmaster-General, and that such charges should not in any case exceed one-half the amounts paid by private parties for similar service. This attempted confiscation of private property was strenuously opposed by Mr. Hayes of Iowa, Mr. Castle of Minnesota, Mr. Hooker of Mississippi, Mr. Weadock of Michigan, and others, and was finally defeated in Committee of the Whole by a vote of 51 to 104. Subsequently, Mr. Holman moved to recommit the bill, with instructions to report an amendment restricting the compensation of land-grant railroads to 70 per cent. of that allowed to other railroads. This, too, was voted down by 87 to 110. There has hardly been anything in the proceedings of the House this year more happily illustrative of the value of debate than the proceedings on this measure. The result demonstrates again, and perhaps for the fortieth time, that Mr. Holman, the Chairman of the Committee on Appropriations, has lost the confidence of the House, if he ever had it, and that he is estimated at his true value, as an antique humbug and demagogue who will bear watching.

The passage of the Anti-Option Bill by a very large majority in the House recalls attention to an undoubted evil in our system of legislation and government, namely, the practice of suppressing or hindering lawful occupations by Federal taxation. If this Anti-Option Bill *prohibited* trading in grain, cotton, etc., for future delivery by appropriate words, it would be unconstitutional, and would be so pronounced by the courts as soon as they could get at it. But coming in the form of a Federal tax, having the same effect as prohibition, it cannot be, or is not likely to be, upset by the courts. Thus we have the solecism which President Lincoln, in one of his debates with Douglas, repudiated and ridiculed, that there is a constitutional way to violate the Constitution. The first time that this power was used was in the 10 per cent. tax on State bank notes, which is now threatened with repeal. A later instance was the tax on oleomargarine —as flagrant a usurpation and as gross an abuse of power as can be found in the dominions of the Czar or of the Sultan. And now we have this tax on contracts for future delivery—an odious measure, carried out by unwarrantable means. There is no reason why the buying and selling of broadcloth or of cotton cloth should not be prohibited by the same means. There is no reason why this boasted land of liberty should not be turned into the most intolerable despotism. We still have hope that this measure may be stopped in the Senate or by a veto.

Victims of "corners" in commodities are doubtless protected to a considerable extent by the statutes; but the chief protection against such schemes, after all, is the series of pitfalls with which natural and commercial conditions have surrounded the would-be cornerers. The lately collapsed "corner" in corn for May delivery illustrates this fact. The calculations of the two young gentlemen who undertook to corner the Chicago market, and, by controlling the whole supply of May corn, to force their fellow-brokers to pay any price demanded, were cleverly made. There is a story that they even persuaded the largest "dryer" of corn, on whose output expectations for May delivery had been based, to announce that his corn would not "grade," and could not be delivered before June. Whether this device was, or was not, a part of the scheme, the "corner" worked famously, and on the last day of May the price had risen from 40 cents to $1 a bushel. Unfortunately for these calculations, it was found that two could play at the game. The manipulator of a "corner" defies both written and unwritten law, and he cannot expect to enjoy the courtesies of trade. The cornered brokers who had previously sold corn at fifty cents for delivery on the last day, came coolly into the market offering the same corn to the manipulators at a dollar a bushel. Asked for an explanation, they quietly announced their intention of defaulting on their earlier contracts, and seeking shelter under the law against "corners." This was certainly not a very reputable procedure, and it resulted promptly in the collapse of the "corner" and the ruin of the "corner's" organizers; but it is not easy to apply principles of common morality in a controversy where both parties proclaim their indifference to such principles. The wholesome lesson of this episode, as of many of its predecessors, is that the schemer for a "corner" is a commercial outlaw. Every man's hand is against him, and the public's best protection is the certainty of bad faith among the manipulators.

It was reported last week that the Reading Railroad was about to enter into competition with the Pennsylvania Railroad in supplying bituminous coal to Buffalo and to this city. Should this report prove true, it would only furnish another illustration of the great difficulty which even the most powerful monopoly finds in securing anything more than the normal rate of profit. It was argued at the time of the combination of the coal roads, that any attempt to force up the price of anthracite coal beyond a figure that would afford a fair return on the capital invested, would defeat itself by stimulating the consumption of soft coal. We may now see the very agency to which such horrible designs have been attributed by some excited journals, such as the *World* and the *Christian Union*, compelled by the force of circumstances to adopt measures that must necessarily result in reducing the price of coal of all descriptions. For if the Reading, supported by the New York Central, proposes to engage in the soft-coal traffic, there will be a rate war with the Pennsylvania, which, of course, means cheaper coal to the consumer. And if bituminous coal becomes cheaper, it will to a certain extent be used in place of anthracite, in which case, the supply of the latter being in excess of the demand, its price must fall.

The reduction by one of the largest banks in the city of New York of the rate of interest allowed upon the deposits of out-of-town banks is a very significant occurrence. It is one of the peculiarities of our National Banking Law that the "country" banks are allowed to place a certain part of their deposits in the custody of the banks in the great cities, while counting this money as a part of their "reserve." The country banks have made some interest on their reserves, the city banks have earned a margin of interest over what they have paid, and money has been collected where it was most in demand. The condition of the business has been of course the ability of the city banks to earn more interest on this money than they paid, and the amount paid has varied with the amount earned. When the demand for money was brisk, there was a natural competition among the city banks for the deposits of those of the country, and the reduction of the interest allowed, even by one bank, shows that competition is not active, and that the demand for money—at such rates as have prevailed—is not brisk. This state of things seems to have astonished many commentators on financial affairs, but there is much reason for maintaining that so many causes are tending to produce this result that the only perplexity in the matter arises in determining which cause is most potent.

Eleven months of the fiscal year are now past, and the situation of the Treasury is more critical than it has been at any time since the resumption of specie payments. On the operations of the month of May a deficit of $4,250,000 appears. The net cash balance is down to a trifle over $26,000,000, of which $14,459,497 is in unavailable subsidiary coin. Last December, Secretary Foster estimated his cash balance "available June 30, 1892," at $39,728,145—only 30 per cent. out of the way. What the apparent deficit at the end of the year will

be, no mortal knows; but what the real deficit will be, on the basis of receipts and appropriations, can easily be figured out. No one will deny that the actual expenditures of 1891–'92 should be as great as those for 1890–'91; in the latter year they were $388,696,824, exclusive of the postal service, and so far this year they have been but $332,408,035, leaving $56,000,000 for this month, when the receipts cannot go much above $30,000,000. There is a deficit of $26,000,000 for June alone, and of $33,000,000 for the entire year, all on Secretary Foster's own estimates and reports. If the true measure of appropriations for the fiscal year were applied, the deficit would be so enormous that we do not wonder the Administration dares not face it, and systematically keeps back payments.

Before the Republican band gets to playing too deafening an accompaniment to "the triumphant march of the American hog through the markets of Europe," it will be well to state precisely what has been done. Mr. Blaine made a characteristic attempt to claim the admission of our hog products into Europe as a new achievement of "reciprocity," but he was promptly squelched by the President and Secretary Rusk, who showed that the repeal of the European prohibition of American pork was entirely due to our retaliatory law, and to our adoption of a system of meat inspection satisfactory to the foreign authorities. In other words, that system was forced on us by foreigners, and it is costing us a pretty penny, too, as Secretary Rusk asks Congress for $1,000,000 extra on that account. We can all imagine the patriotic shrieks that would have greeted an admission by a Democratic Administration that a foreign system of meat inspection was better than ours, to say nothing of the weak acceptance of any methods at foreign dictation and the laying of a tax of $1,000,000 on our hard-working farmers to pay for the same. Looking solely at the business aspects of the case, the transaction comes down to this: In 1881 we exported $104,660,065 of hog products—the largest amount on record for any year. In 1890, when the European prohibition was in force, our exports amounted to $85,281,174. The difference, $19,000,000, is all that can be attributed to the prohibition and all that we can expect to gain by its removal. That is equivalent to saying that, in order to get a business of $19,000,000 at a profit of not more than $1,500,000, we are compelled to pay $1,000,000. If the American hog will stand that, it will stand anything.

None of the "reciprocity" treaties has fallen flatter than the one recently announced as having been completed with Austria, and the reason is not far to seek. In the list of articles upon which concessions in import duties are made to the United States, there is scarcely one in regard to which we do not have to protect ourselves against European competition, and the duties upon which were not raised by the McKinley Bill upon that express ground. How are we going to get an Austrian trade in cotton goods, on the basis of "reductions of from 5 to 9 per cent.," when we have to defend ourselves from like goods of European manufacture by customs taxes of from 30 to 60 per cent.? The same question arises in regard to manufactures of iron and steel and brass and leather. Either the treaty is a self-confessed sham, or the claim of the McKinleyites that we need discriminating duties against European imports is a fraud. The reciprocity organs have, in fact, scarcely been able to pretend that there is any question of actual trade involved in the agreement with Austria, and content themselves with profound metaphysical disquisitions on the subtle distinction between taking off tariff taxes under the name of reciprocity and under that of free trade.

Commenting upon the decision of the Pope sustaining Archbishop Ireland's plan of union between public and parochial schools, the Paris *Temps* remarks on the interest of the question "to the French in America." It refers particularly to the French Canadians in New England, where they already form 120 parishes, with 60 parish churches. The French Catholic press, says the *Temps*, has "vehemently defended Archbishop Ireland," and this may be taken as an indication of the readiness of the French-speaking Catholics of New England to favor the Minnesota plan. There can be no doubt that the French-Canadian immigration into the New England States, assuming larger proportions every year as it does, involves many social problems, not the least of which is that of the education of the children of the immigrants. That the latter would be better off in public schools than in the parochial schools, which can be but inadequately equipped among so poor a constituency, does not admit of doubt.

Minister Egan is understood to be on his way to this country, on a sixty days' leave of absence from Chili, which the Chilians make no secret of hoping will be indefinitely extended. At his departure he left a pleasant little memorial behind him in the shape of a claim for $1,000,000 against the Chilian Government. He presented this in the name of an American firm now extinct, and it naturally dates back to the time of the war between Chili and Peru, and with equal naturalness relates to guano deposits out of which the firm expected to get rich, but did not. "It is said," we read in the Panama *Star*, "that a settlement had been nearly effected with Balmaceda by Egan." The Dictator's fall closed a good many other brilliant openings for Americans in Chili, it will be remembered.

The Government of Austria-Hungary, in submitting to the Reichsrath and the Hungarian Diet its bill for the regulation of the currency, has not only joined the ranks of the States which have adopted the gold standard, but has taken the first serious step towards the resumption of specie payments. The Austrian Minister of Finance, Dr. Steinbach, remembering the scepticism with which similar promises of his predecessors were received, has offered what the *Neue Freie Presse* calls a "guarantee of good faith" by proposing to raise a loan for the conversion of the Austrian paper money, both State and bank notes, into notes redeemable in gold. The share of Cisleithania is 183,500,000 gold florins, representing 70 per cent. of the entire paper circulation of the Empire, and that amount of gold, when procured, is to be deposited in the vaults of the Austro-Hungarian Bank, and to be used only when the day of resumption arrives. The recommendations of the Hungarian Minister of Finance with regard to the conversion of the Hungarian quota of the paper money are practically identical with those of his Vienna colleague. The *Neue Freie Presse* thinks that resumption could be brought about in four years by the Government's entering into an agreement with a syndicate of bankers for an annual purchase of gold to the amount of 10,000,000 pounds sterling. Still, it warns the Government against fixing definitely the date of resumption before the gold is actually stored away, and would have the Government await the most favorable opportunity for the purchase of the metal.

The situation is a little difficult for foreigners to understand. Austria has the single silver standard. Her unit of value is the silver florin. But there was and is a gold florin in the Austrian system struck at the ratio of 1 to 15.30. Now that the gold standard is to be adopted, the question comes up, What would be equitable as regards debts having a long time to run, but not specifically payable in gold? The present *market* ratio of the two metals is 1 to 23.57. The ratio adopted as the basis of the new law is 1 to 18.22, although the ratio ceases to be operative when the coinage of silver is stopped. That portion of the Government debt which is payable specifically in gold florins of the old issue will be paid in the new florins at the rate of fifty of the latter for forty-two of the former, this being the exact equivalent in weight of pure gold. The unit of value under the new system will be the crown, two of which will be equal to the new florin. The smallest gold piece coined will be ten crowns. The florin under the new system will be equal to 40½ cents of our money. The old silver florins, worth about 35 cents, will continue to circulate as subsidiary coins until further notice, but no new ones will be coined.

SENATOR SHERMAN'S SPEECH.

THE two days' speech of Senator Sherman on the Stewart Silver Bill may well be esteemed the greatest speech he ever made. It is interesting to note that, after speaking two hours and a half on Tuesday week, he said that he was not at all tired and was ready to go on and finish then. This was said in reply to a suggestion that the Senate should adjourn. For one who has passed his sixty-ninth year this is surely a remarkable exhibition of mental and physical powers. His speech, covering not only the silver question, but the whole range of national finance, cannot be reviewed in detail within the limits of a newspaper article. All that can be said about details is that Mr. Sherman has not merely a mind well furnished on the whole range of topics embraced in his discourse, but so well furnished that there is no point too small to have escaped his attention or his memory. Consequently, he cannot be tripped at any stage. Anybody can see that if he makes concessions here and there to the silver folly, they are only such as he considers necessary in a political sense. Give him a clear field, such as the statesmen and financiers of Europe have, where there are no wrong-headed and befooled constituencies to be reckoned with, and he would easily be their peer.

Nobody can have failed to notice what Mr. Sherman said of the national-bank note in the course of his speech. He has virtually, we think, proclaimed the doom of the system in these words:

"The people of this country, whether rightly or wrongly it is not for me to say, are not in favor of the continuance of the national-banking system longer than is necessary to wind up and pay off the outstanding bonds. These bonds have been reduced to so low an amount that the people care very little whether they are continued or not. The bonded debt has ceased to be a phantom, although at the close of the war everybody who knew anything about finance brooded over the twenty-nine hundred millions of dollars of debt. In addition to that there was a floating debt of probably a hundred millions more, so that we owed three thousand millions. Therefore, I repeat that the people will not tolerate the continuance of the national-banking system longer than the continuance of the bonds. They are unwilling to take any less security than the security of the United States. As to the amount of currency, my own opinion is that the amount now outstanding will be about sufficient. It does not follow that if there is more money in circulation the poor and needy will get it. We cannot distribute it per capita to the poor and leave out the rich."

The authority of Mr. Sherman upon this point is great, and it happens to tally with other authorities possessing high influence in the world of finance. The only question we need to ask is, whether the people are likely to change their minds during the small interval between now and the maturing of the 4 per cent. bonds, and if so in what way they are likely to change. There is not the smallest probability that the people will consent to an extension of the national debt in order to furnish security for national-bank notes; and when the question comes up, What shall we substitute for national bonds? there will be such diverse views and such unconquerable prejudices that probably nothing will be done. That is to say, the system, or, at all events, its note-issuing function, will expire. And with it, most likely, will expire the discriminating tax on State-bank notes, if, indeed, that is not sooner swept away.

As regards silver, what could be more true or felicitous than Mr. Sherman's statement that free silver is not now an issue between parties, and does not represent any national interest, but is only a "local" or "provincial" question concerning the silver-producing States? Most significant of all, however, was his admission that the Republican Silver Law of 1890 is a dangerous law that ought to be repealed:

"There are possibilities in the future in regard to that law, miscalled the Sherman Law, which make me as anxious for its repeal as I was reluctant to pass it. In the absence of any provision for the sale of silver, if the price of silver should continue to decline, I should be desirous, as far as I could, to arrest the further purchase of bullion. With a circulation of $127,000,000 on the hundred millions pledged, and only $27,000,000 surplus, to talk of maintaining the two metals on a parity is the wildest scheme of imagination. This very effort to bring about free coinage of silver is, in my opinion, doing more to disturb the finances of the country than anything else. The task of maintaining the two metals on a parity is herculean. How can we do it? Shall we sell bonds for gold? The very effort would probably impair our credit and degrade us from our high position among the nations of the world. Shall we sell our silver? We have over $400,000,000, and only six or seven millions in circulation. The rest is stored away in vaults and cellars as security for the various forms of paper circulation. Dare we sell that silver? I wanted to provide in the law of 1890 for power to sell it, but the parties would not agree. Now, to attempt to sell that silver on a falling market would only be adding misery to ruin. I do not like to talk of these things, but it is my duty to do so."

It appears, therefore, that those Democratic conventions which are calling for the repeal of the "Sherman" Silver Law can count upon the hearty support of Senator Sherman himself. The President would oppose such repeal, however, as he is choosing this highly opportune time, when the free-silver lunacy is in its final stage of impotency, to announce through his now faithful organ, the *Tribune*, and his Secretary of the Treasury, that he is "a firm friend of silver."

Mr. Sherman's speech was well calculated to admonish the delegates of the Republican party assembling at Minneapolis that the silver peril is very real and very near, and to remind them that they have a statesman not openly in the lists for Presidential honors who possesses the *mens sana in corpore sano* which is denied to some persons more talked about.

FLOUR-MILLING IN THE NORTHWEST.

BEFORE the Inter-State Commission at Minneapolis, in the case now pending for lower railway rates to that city on wheat from northern Minnesota and North Dakota, Mr. C. A. Pillsbury, the well-known miller, made some startling statements. Asked what the effect would be if the present rates on flour and wheat continued in force, he said:

"The effect will be that the milling interests in Minneapolis will be utterly destroyed. Not only must the Minneapolis mills go out of business, but all the mills in southern Minnesota and all in Milwaukee as well. In four years, yes, in three years, with a continuance of the present régime, Duluth will have a milling capacity greater than Minneapolis has to-day. The mills of Minneapolis have made the wheat market here. This market will go to the dogs, too, and every elevator in the city as well."

The situation in which flour-milling in Minneapolis finds itself to-day, and the causes leading to it, form a most interesting story of the workings of commercial forces. Flouring mills established themselves there originally because of the valuable water power. The introduction of the middlings purifier and the steel roller revolutionized the manufacture of flour, making Minneapolis the great centre of that trade, with command of the wheat market of the Northwest. The output of Minneapolis flour, only 2,000,000 barrels in 1880, was 5,250,000 in 1885, 8,000,000 in 1891, and is expected to reach 9,000,000 barrels the present year. It was partly by the demand for wheat thus created that the new Northwest became so great a grain-producing section. About $7,000,000 is invested in mills at Minneapolis, the terminal elevators costing $4,000,000 more. Cooper-shops and other businesses dependent upon milling make up the larger part of the city's trade and of city values.

Of this large output of flour, fully 80 per cent. seeks an outlet through the great lakes, half of it being exported to foreign countries. The milling at Minneapolis has grown to such proportions that the contiguous parts of the Dakotas and Minnesota cannot furnish wheat enough: supplies must be drawn from the Red River Valley and other northern sections where the famous "No. 1 hard" is grown. This part of the wheat lands is as near Duluth as Minneapolis, and the railways serving the territory quote the same rates to both places, with the result that prices for wheat tend more and more strongly towards the same quotations in both cities. From some of its own territory Minneapolis gets wheat at rates two cents per hundred or more under Duluth tariffs, but the quantity thus secured at reduced rates amounts only to one-fifth of the necessary supply. Flour at Minneapolis, when sold at the East, costs fifteen cents a barrel to transport to Chicago or Duluth. So long as enough wheat was brought to Minneapolis at a proportionately lower charge, the thing equalized itself; but now that northern fields must be drawn upon, the farmers there will send their grain to Duluth at the same freight rate if that market is a penny higher. Under these conditions the milling industry has increased greatly in Duluth and Superior, and promises to become as important as at Minneapolis. Mr. Pillsbury stated the average profit in flour manufacture as 10 cents per barrel, which seems very low. Wheat prices and other

things being equal, the 15-cent rate on flour from Minneapolis to Duluth leaves the millers of the former city with a loss on the greater part of their output.

The suit mentioned is brought to force a lower rate to Minneapolis than to Duluth on wheat from such towns as are nearer the former city. As before mentioned, the lines of the Northern Pacific and Great Northern are of about the same length from the wheat sections to either place; there are other roads, the St. Paul for example, whose lines by reason of position lead naturally to Minneapolis, and yet which are compelled by competition to quote the same rates as the two first named. It is these roads, in the case of which distance favors Minneapolis, that the millers of that city are charging with unjust discrimination. What can the Inter-State Commission or any other body do? It will not order the rates to Duluth advanced, nor can it easily ask for lower charges to Minneapolis, since the distance warrants the tariffs now in force, which, indeed, do not cover the same lines to both places. "One can appreciate the seriousness of the situation without seeing clearly how it is to be avoided," is the comment of the St. Paul *Pioneer Press*; for even if the Chicago, Minneapolis and St. Paul (which has no line to Duluth) be brought under subjection to Minneapolis, the vast wheat supplies of the Red River valley cannot be taken from the Lake Superior towns.

As to cost of manufacturing, while Minneapolis has water-power (whose limit has been reached or passed), Duluth has cheaper coal; all things considered, there is not much to choose in this respect. Minneapolis has, however, a large local market in all the States south and west, which cannot be taken from her. If, therefore, the millers of that city would be content to buy contiguous wheat, and supply those markets which can be reached at a profit, Minneapolis would long remain a great milling centre. But it seems inevitable that the greater part of the future increased demand for flour in the East and in foreign countries should be supplied from mills on Lake Superior. With the best wheat as low in Duluth as in Minneapolis, with the cost of manufacturing substantially the same, the railway rate from Minneapolis to any lake port, no matter how small it may be, must, to that extent, be a handicap upon any further growth of Minneapolis. It is useless as well as economically wrong to put the blame for this conclusion upon the discriminating rates of Minnesota railways, for these rail carriers did not make Minneapolis an inland city, nor did they cause North Dakota wheat to grow so near Duluth. In short, the railways are not themselves the discriminators, but only the registrars of the discriminations of nature and commerce.

PROFITS OF "INDUSTRIALS."

OUR readers are familiar with the reasons which in England have led, and in the United States are leading, many large industrial firms to reorganize as corporations, and to offer for public subscription a large proportion of the new capitalization. There is no doubt that the rates of dividend—8 per cent. on the preference and even more on the common shares—have attractions for the investing public as contrasting favorably with the scant 4 or 5 per cent. received from good railway stocks and bonds.

The question first asked, of course, is whether there is any guarantee that the profits of the past, as set forth in the prospectuses, will continue for the future. Upon this point and upon the general subject of the value of the bonds and stocks of new industrial corporations, much stress is laid in the prospectuses upon the certificate of the chartered or expert accountants employed to examine the old books and report. With but few exceptions these specialists in accounts stand well in the community, being known to be honest men. This very fact of acknowledged honesty at times leads investors to put more confidence in the accountants' certificates, or, more properly, to draw more inferences from these certificates, than are warranted or wise. Occasionally there appears in these certificates a juggle with words or figures, conscious or unconscious. In England, where industrial corporations have greatly flourished, the Bohemian Breweries Company was started in 1889. The conclusion drawn from the report of the chartered accountants was that these breweries in 1889 earned $207,000 profit. They were capitalized at $1,890,000, fully two-thirds being paid to the vendors in cash. In 1890 the profits were $62,000, and in 1891 only $42,000, which is a fifth of the accountant's expected sum. A committee of shareholders had the accountant before them. His excuse was that he had been careful to ask the shareholders to inspect his full report at the office, wherein he had given no certificate of profits. After examination, the Committee reported that, "under the circumstances, Messrs. Deloitte, Dever, Griffiths & Co. should have refused to report, and that, having reported at the instance of the directors, the latter made a grave error in judgment in the issue of a prospectus based upon that report"—a very mild censure.

A large number of American concerns which have in the last few years been incorporated, and the stocks sold on the London market, are now turning out less profitable than was anticipated. This is the case with many American breweries, though not so with all; with manufacturing concerns like the Otis Steel Company of Cleveland, with the Pillsbury-Washburne Flour Mills Company, and others. In all these instances bookkeeping statistics (no doubt honestly made) were produced showing value of plant and the profits for a certain number of years.

Valuable as a statement about a business must be when given by an impartial bookkeeper, it must nevertheless be remembered that an accountant, though honest, cannot and does not go behind the face of the books; that is to say, he is an expert in figures, but not in the details of the business under examination. A chartered accountant might be set to examine the books of a railway, for illustration, and might report to the best of his ability, and yet lead everybody astray as to the future. For a crafty railroad manager, if so inclined, could arrange for a favorable exhibit which would be no criterion of future profits, and yet would deceive any accountant not thoroughly familiar with railway management. So with manufacturing: a firm looking forward a year to incorporation and sale could make unusual profits, whose fallacy as a ground for valuation no mere bookkeeper could easily detect. Sometimes an accountant is asked to state in his certificate the average profits for three years, and perhaps the last year's gains separately. This covering of three years was originally intended as a safeguard, but by stating only the average, an average raised by the exceptional prosperity of the last year, the fact may be concealed that the former years were much less profitable.

The question of profitableness in the long run is the vital one, and really determines the price which can safely be paid for the plant and good-will. The amount of money originally invested by the first partners is no concern to the public. The problem is to find what amount of capital can be invested so that in good and bad years, all debts and depreciation being allowed for, it will receive a fair return. Oftentimes in industrial prospectuses a certificate is printed giving the value of the premises and machinery. Here again the appraiser is sometimes instructed to value the plant for the purposes of that particular line of business, thus rendering the certificate useless as an appraisal of the property in the event of failure. So far, however, as such a certificate throws light upon the amount paid for good will, it is to be welcomed; though, as we have said, the whole business is to be valued chiefly for its earning power.

The great falling off in expected profits in a few of our incorporated industries shows conclusively enough that we have not yet learned to distinguish clearly between the good and the bad. Industrial incorporation is yet a new idea. We must wait for the knowledge which comes from experience before learning to separate the profitable from the unprofitable, or to discriminate between the stable and the fluctuating. Fortunately, most of those whose shares have been offered to the American people have so far proved worthy of public support, nor can there be any doubt that the corporate form is capable of great service in our manufacturing. Yet, in our present comparative ignorance of the real details of these concerns, we may expect that

some worthless industries will appeal for subscriptions along with the good. Evidently the chartered accountant's statements and certificates, important as they are, are not the only information needed about industries whose shares are offered to investors.

ENGLAND AND HER COLONIES.

SOMEWHAT more than a year ago a resolution was moved in the House of Lords inviting the Colonial Governments to send representatives to London to confer upon the advancement of trade in her Majesty's dominions, and Lord Salisbury expressed the opinion that for the present the summoning of such a conference was not expedient. He pointed out that the real question before such a conference would be that of retaliatory duties, and declared that the state of opinion in Great Britain made it impossible for any statesman, whatever his own opinion might be, to propose such duties. He added, however, that whenever such a modification of opinion took place as to make the idea of discriminating duties in favor of the colonies a fiscal possibility, he should be the last to oppose such a resolution as that before the House. And some months later he pointed out to a deputation from the United Empire Trade League—which included fifteen members of Parliament—that to give "a preferential treatment" to the colonies meant to alter the established trade policy of England, which was to be accomplished only by effecting a change in public opinion. According to appearances, he has since made up his mind to take some part in effecting this change.

Whether encouraged by Lord Salisbury's suggestions or not, the colonial advocates of federation have been recently moved to renew their supplications. In the Canadian Dominion the Government recently carried a motion pledging them to reduce the duties on British manufactured goods as soon as the Imperial Parliament "admits Canadian products to the British market on terms more favorable than it grants to foreign products." This is perhaps the most formal and explicit offer that has yet been made by the Federationists, and it was received by the London *Times* with great consideration. The offer, it said, if backed by the other colonies in Australasia and South Africa, could not be disregarded. The rigorous doctrines of free trade must not be pedantically applied, and it might well be worth some sacrifice "to bind the great self-governing colonies in close and permanent commercial alliance with the mother country, securing not only a vast reserve of political strength, but the command of large and rapidly growing markets." The wisdom of this utterance is certainly not unworthy of any American "organ" of protection, and the Canadian statesmen may well congratulate themselves that the proverb, "In vain the net is spread in the sight of any bird," is not without its exceptions.

The complementary proposals from the other side of the globe are, of course, not lacking. A professor in an Australian college has recently published a book showing exactly the sacrifices that England is expected to make. The existing commercial treaties, which contain clauses providing that no higher duties shall be imposed upon the products of foreign countries than upon those of her Majesty's possessions, must be cancelled, and duties imposed upon those products until either reciprocity or non-intercourse results. Now, at present, the total foreign trade of England is about £742,000,000, whereof only £187,000,000 is with her colonies, or a little more than one-fourth of the whole. The Australian Professor anticipates, however, that nations with which trade to the amount of £152,000,000 exists would join the "Britannic Commercial Alliance," and there would be an increase of colonial trade, so that England would surrender trade to the trifling extent of only £250,000,000, and the total trade of the British Empire would fall off by a matter of only £540,000,000. This looks rather serious, the colonial Professor admits, but then if imperial federation is worth anything, it is worth some sacrifice, which, of course, would be only temporary. England now obtains but one-third of her imported food from her colonies, but, if it were made an object to them, they would supply the mother country with all that she requires. Indeed, if England, instead of abolishing the corn laws, had only "taken the trouble to inform herself as to the cereal capabilities of her own dominions, she would by this time be enjoying a cheaper loaf, the United States would be an out-at-elbows, shin-plastered collection of communities without any trade at all, and the British Empire would be the most powerful confederacy in the world."

It is refreshing to turn from these absurdities, which, emanating as they do from the colonies and repeated in the mother country, furnish proof that there is nothing new under the sun, to the grave comments of the London *Economist* upon Lord Salisbury's recent speech. That journal calls attention to the fact that, in the first place, the war of tariffs in which England is invited to join, is acknowledged by the Powers that have been engaged in it to be ruinous in its effects. In the second place, as England's treaties insure her the treatment of the "most-favored nation," she has received the benefits of the reciprocal concessions made by the belligerents without engaging in the fight. In the third place, Lord Salisbury's idea that England could carry on a war of this kind by levying duties upon luxuries is idle. The other Powers do not hesitate to tax the bread of their subjects in order to force the fighting, and for England to confine herself to taxing luxuries would be like opposing a pop-gun to a repeating-rifle. In the fourth place, a duty upon such a luxury as wine would be paid principally by English consumers, so that the suffering would be chiefly on England's part. In the fifth place, since it is evidently useless to go into a fight of this kind unless you mean to fight it out, the only thing to do would be to adopt a system of wholesale protection. And in the sixth place, since Lord Salisbury admits that such a policy would be suicidal, it would have been more judicious for him to have kept his opinions to himself, and not have aroused in other nations apprehensions of a hostile commercial policy, which will stimulate them to reprisals.

The *Economist* might have added that this speech will make a great deal of trouble for England in her colonial relations, but its criticism can be read by no impartial man without giving rise to the conviction that the whole scheme of Imperial Trade Federation is utterly impracticable. As the *Economist* says, there is nothing sacred about free trade. It is simply a means to an end. But dismissing what Lord Salisbury calls free-trade dogmas, the plain common sense of the *Economist* makes an end of his theories. So long as that journal represents the dominant thought of England, so long will colonial protectionists sigh in vain for exclusive privileges in the English markets.

A TREASURE TROVE.

VENETIA, May 20, 1893.

SOME five and thirty years ago, when Enrico Mayer and F. S. Orlandini, following in Mazzini's footsteps and assisted by his counsel, undertook to edit the published and unpublished works of Ugo Foscolo, they applied to Count Giuseppe Albrizzi for the letters which the poet had written to his mother, a beautiful Greek lady, Countess Isabella Albrizzi, *née* Teotochi, one of the many ladies of the time who kept an open salon and received all the native and foreign celebrities of the day. Foscolo met her first in 1796, and, about 1804, commenced a regular correspondence with her during his residence in Milan, Brescia, Pavia, and throughout the years of his exile in London. Her son answered that he intended to publish a collection of all the letters addressed to his mother by Lord Byron, Lord Aberdeen, Hobhouse, Pindemonte, Canova, etc., and that he was unwilling to allow Foscolo's letters to be published separately.

Many years later the editors of Foscolo's works, in the preface to the sixth volume, which is the first of the correspondence, wrote: "We have waited in vain, and with an impatience not untinged with bitterness, the publication of Foscolo's correspondence with the *saggia Isabella* [the title bestowed on the mother of Count Giuseppe Albrizzi]." They waited long, and if alive would be waiting still, for the son died without giving any of the letters from Foscolo or others to the public. All these papers, with a valuable collection of diplomatic correspondence from Carlo Pisani, ambassador of the Venetian Republic, from Madrid, Paris, and London, are now in my hands. Their proprietor has decided on their sale to some public library or museum at home or abroad, where their contents can become available for the students of the eventful period of Italian history which unrolled itself during the last quarter of the eighteenth and the first of the nineteenth century. With the owner's permission, I select a few here and

there, sure that their contents will be interesting to readers on both sides of the Atlantic.

Lord Byron evidently thought highly of the talents of the lady whose house he frequented during his long sojourn in the city he loved so well, as, in writing of contemporary celebrities, he says: "Italy is not behind other nations. She has Monti, Pindemonte, Foscolo, and the Albrizzi, but the world has only one Canova." Byron had introduced John Hobhouse to the Albrizzi, and, on his return to London, Hobhouse writes on May 30, 1818:

"MADAM: I take the liberty of sending you Lord Byron's last poem on Italy, with some illustrations written by myself. If you should ever read the latter, perhaps you will favor me with some observations which may assist me in another edition of the works. . . . The bearers of this little present are Mr. and Mrs. Smith, two very good friends of mine who will feel highly flattered at making your acquaintance, and who are charged to convey my best acknowledgments for all your kindness to myself during my stay at Venice. Present, I beg you, my best compliments to your son. Tell him to bring you to England that I may assure you in person how much I am, Madam,

"Your faithful and obliged servant,
"JOHN HOBHOUSE."

But the little present never arrives, and on December 4 the following letter explains the reason why. It is written in French none of the best, so we give the translation.

"MME. LA MARQUISE: I must either deceive you or speak frankly; anyway I fear that I shall sooner or later incur your displeasure. It would be very easy for me to allow you to believe for the moment that I had either forgotten the poem or my promise, and with any other person than yourself I should so act, for a fib more or less matters little in this life of falsehood which politeness imposes upon us. But as I desire to be held in your esteem as a sincere man rather than an adept in the practice of *les convenances*, I deem it my duty to confess that I was indiscreet in promising you the poem, and to avow that I cannot send it to you. It is not my property, it has never been published. The verses are not flattering to our Prince, who, though it must be admitted he is not *grande chose*, is no worse than the other viceregents of God upon earth; and at any rate he is our sovereign, and his subjects have no right to blazon his vices abroad, but remember Napoleon's fine saying, that dirty linen should be washed at home.

"It is very likely that Lord Byron, who knows nothing of my promise nor my scruples, will give you the verses. That is his affair; for me, nothing remains save to express my deep regret that I should have troubled you and your son by my imprudence at first, and now by my confession. Believe me when I say that my vexation is enhanced by the recollection of all your kindness, which will, Mme. la Marquise, always maintain me,

"Your most devoted servant,
"JOHN HOBHOUSE."

So many are Byron's strictures on the Prince Regent, the George the Fourth of Thackeray's unflattering portrait, that it is difficult to fix on the special offender. I strongly suspect that it was the "Ode on Venice," written in 1818, which grated on the loyal ears of true-born Britons, not so much for the allusions to the monarch as for the profound admiration expressed by the poet for the

"One great clime,
Whose vigorous offspring by dividing ocean
Are kept apart and nursed in the devotion
Of Freedom, which their fathers fought for, and
Bequeath'd—a heritage of heart and hand,
And proud distinction from each other land,
Whose sons must bow them at a monarch's motion
As if his senseless sceptre were a wand
Full of the magic of exploded science—
Still one great clime, in full and free defiance,
Yet rears her crest, unconquer'd and sublime,
Above the far Atlantic!—She has taught
Her Esau-brethren that the haughty flag,
The floating fence of Albion's feebler crag,
May strike to those whose red right hands have bought
Rights cheaply earn'd with blood.—Still, still, for ever
Better, though each man's life-blood were a river,
That it should flow, and overflow, than creep
Through thousand lazy channels in our veins,
Damm'd like the dull canal with locks and chains,
And moving, as a sick man in his sleep,
Three paces and then faltering:—better be
Where the extinguish'd Spartans still are free,
In their proud charnel of Thermopylæ,
Than stagnate in our marsh; or o'er the deep
Fly, and one current to the ocean add,
One spirit to the souls our fathers had,
One freeman more, America, to thee!"

It seems probable that Byron did give a copy to the Countess, as he refers to a translation which she wishes to make, but he adds: "I doubt whether some of the expressions are not too strong for the censor."

In presenting her to Prof. Pictet at Geneva, he speaks of the Countess Albrizzi as a lady well known in Italian literature, and more particularly distinguished as the illustrator of the works of Canova. The son having thanked the poet for ranking his mother among the best writers of the time, Byron answers:

"DEAR COUNT ALBRIZZI: Your letter would have been acknowledged sooner (as it ought to have been) but I have been unwell. Mr. Hobhouse's address is Whitton Park, Hounslow, near London, where he resides with his father, Sir Benjamin Hobhouse, Baronet, which answers to *Cavaliere* in this country. In mentioning your mother amongst the few illustrious persons whom the narrowness of my limits out of my experience permitted me to name as the present lights of Italy, I merely echoed the voice of her country. Your favorable opinion does me great honor, and affords me equal pleasure. I beg my respects to the Countess your mother, and trust that you will always believe me

"Most truly and affectionately your obliged and faithful and humble servant,
"BYRON.

"VENICE, Nov. 2, 1818."

Foscolo's letters are intensely interesting to those who regard him as the first propounder of Italian unity, who believe in his unwavering patriotism and in his sterling character maligned by envious satellites of every rising sun, and especially by Monti, for whom he entertained to the last a deep and regretful affection, although he criticised his translations and deplored the fetters laid on his genius by his sojourn in the court of Rome. To the *saggia Isabella*, who was the intimate friend of his sister and worshipped mother, living then in Venice, he pours out all his hopes and griefs, his pecuniary troubles and the reasons of his self-chosen exile. Foscolo was an *egotist*, not an egoist: his admiration of genius or talent in others was never marred by envy or jealousy. Both Foscolo and Monti had translated the 'Iliad'—Foscolo, born in Zante, from the original; Monti, without knowing a word of Greek. He gave the manuscript to Foscolo, who printed the first canto, translated by Monti, side by side with his own, and sent them to him with a letter, saying, "If Italy ascribes to you the palm, as I believe she will, the 'Iliad' will have the good fortune of the greater poet, and I shall not regret the toil spent more for love of Homer than for the desire of fame. The little book will, I think, be prized by you as a token of our old friendship. May you live long to enjoy your glory."

"Monti," writes Foscolo to *la saggia Isabella* in 1808, "has just recited to me the seventh canto of his 'Bardo della Selva Nera,' and he saw me weep. Either the magic of his voice touched me more profoundly than usual, or that poem is the finest of the beautiful things written by my friend; certainly it is the most affecting picture painted in Italian poetry. Pity it is not in blank verse. I preach and pray in vain; he promises, seems convinced, but continues to write his *ottavi* [eight-line stanzas] in a metre that is not his own. They do not suit the subject, nor evolve, in my opinion, the virtue of the poem. Oh, if his soul would but keep on high—and he has a soul lofty as that of Parini, as that of Alfieri. But the court of Rome has spoiled him. He will win great but not holy fame. For myself, I aspire to posthumous fame rather than to contemporary admiration, if posterity should care at all for me who think so much of the future! Alas, I have so little time for study: I have to perform my duties as military advocate, to go every day to the court martial, now to plead for the liberty of a deserter, now for the life of a homicide. The laws are so stern that a special pleader may exhaust all the powers of his eloquence without any scruples of outraging justice. What is justice? It is the handiwork of men, born of their interests and of their passions. Legislators and judges ply their trade distinguishing virtue from crime; I only distinguish *fortune* and *misfortune* in the actions of our poor humanity."

Monti was for long the fast friend and a fervent admirer of Foscolo. Apropos of the poet's preface to the 'Epistle to Pindemonte,' Foscolo writes to the Albrizzi:

"The dedication written by Vincenzo Monti to my 'Epistle to Ippolito' was so profuse in praise of me, and so partial, that I have absolutely declined to publish it. It would seem as if I went begging literary fame under the protection of powerful friends. I have prayed Monti to change or, at least, to modify it. He answers: 'So, or nothing.' I wanted him to gratify Ippolito, not me; he praises Ippolito, but exalts me. Therefore I answer, 'Nothing,' and nothing will appear. If you have not shown my yesterday's letter to the Chevalier, do not do so. If you have, show him this also, and tell him that Monti will seek some other occasion to render justice, and beg him to accept my letter void of other praise. The world will see that the letter comes from the inmost sanctuary of my heart. I hope that my fellow-citizens and posterity (if posterity remember me) may not deem me unworthy to have been his friend and contemporary. And you, dear Isabella, love me as I love you, warmly and tenderly. What would become of me if my few friends were to abandon me? All your letters are precious—write more frequently. Kiss Pippi [the little Count Giuseppe], and talk to him of FOSCOLO."

His first letters from London are chiefly letters presenting celebrated travellers, such as Samuel Rogers, William Rose, etc. A letter of 1818

"is sent by Mr. Everett, who has left the United States to see all Europe, and especially Italy and Greece. He is one of my best friends, and, though quite young, he is *letteratissimo* and Professor of Greek in one of the Universities of his country. He is also of the sweetest disposition, and therefore I know that you, *donna gentile*, will welcome him as a friend, and that your friends will enjoy the conversation of one who has travelled and observed so much, and that you will help him to know and pity our unhappy Venice. He will bring you news of me; and as far as the outward man goes, they will be true tidings. But what is really true of me no one knows save myself. I have escaped shipwreck, but navigate in tempestuous waters. Salute your son, Leopold, Saranzo, and remember your friend,

"UGO FOSCOLO."

Later:

"SAGGIA ISABELLA MIA: Neither my long silence, not the distance which separates me from you, condemns me to this bitter exile, and deprives me of the sight and sound of Italy, must induce you to think that I ever forget you, or the name by which you are known among worthier friends than myself. I send this letter to the *saggia Isabella* by Mr. Milman, the celebrated poet of 'Reason,' Professor of Poetry in the University of Oxford. He will tell you how I live—studying little, writing day and night for daily bread—and how it is probable that never more shall I have leisure for study and for writing after my own heart. Thus the muse whom I courted as a lover is now, alas, treated as a wife, loved always but sometimes perforce; and affection born of necessity is not the best in the world. I have to write in a tongue that is not my own, and this I do rather than allow others to

translate (*tradire* or *tradurre*, oftener *betraying* than *translating*).

"I know that I may count on hearty welcome from you and all your friends for Mr. Milman."

The latest letters, of 1824, relate to the works of Canova illustrated by the Countess Albrizzi. Foscolo, when in Milan, had revised them with the greatest care, both in manuscript and in the proof sheets, and when he was almost too ill to attend to his own writings, he supervised the translation, and writes on July 30, 1824:

"SAGGIA ISABELLA E CARA: I, feeling sure that Signor Vendramini would prove a faithful messenger, gave him sixteen or eighteen numbers of your descriptions of Canova's works, and I should have sent them all had you not asked for two only. The editor declines to sell them separately, and I cannot let you remain without the whole collection, which are elegantly executed and give pleasure to the eyes and to the mind; so, when the entire series is complete, you shall receive it. I did not write to advise you of the mission intrusted to Vendramini because I had no doubt of his care, and also because I never, if I can help it, and save in the case of urgent necessity, trust letters to the post. This will be brought to you by another friend of mine, Signor Crawfurd, but, as I write after midnight, and he starts for Calais to-morrow morning, I have only time for a few lines," etc., etc.

But the *saggia Isabella* does not receive her numbers, and writes a long and affectionate letter to her friend in London, telling him how Vendramini had consigned the packet to Signor Neumann, secretary to the Austrian Ambassador in London; how he had transmitted it to Count Strasoldo, Governor of Milan, etc., etc. She still gives him tidings of his sister—his mother being dead—and through her he sends such help as he can. She gives him news of all his old friends, even of those turned foes. Monti, who had threatened "to scatter the dust of Foscolo's 'Sepolcri,'" that beautiful poem on burials and burial-places, she tells him, "is aged and deaf, half blind, and inconsolable for the death of his and our Perticari." "Pindemonte is flourishing, and is now reposing on his laurels after his translation of the 'Odyssey.' This is the first winter that he has abandoned Venice, but he promises to return in the spring."

No news to the last of the missing numbers, nor can I ascertain whether the translation was ever published entire, as so far I have not been able to find it in the Catalogue of the British Museum. In the many letters written by Canova from Rome to her "Excellency the Countess," always sent by hand by some illustrious foreigner, he tells her of his work, his projects, and his hopes, and expresses himself delighted with her descriptions of his sculptures. First he has only seen the frontispiece, though the Countess has sent all the numbers for his approval. He presented "his faithful friend" with the bust of Helen of Troy, which is still to be seen in the Albrizzi palace, and tells her of his commissions for the Duke of Devonshire (who, by the way, possesses the fine bust of Madame Letizia, mother of the first Napoleon). He sends her the first engraving of his monument to Senator Giovanni Falier, which Canova presented to Venice in gratitude to his first patron; of the statue of Napoleon now in London, while a bronze copy is in the Brera at Milan. About his colossal group of Hercules and Lichas, modelled as early as 1795, which is still in the palace of the Marquis Torlonia, Duke of Bracciano, he writes: "You are right in imagining that I have tried to reproduce the different attitudes which Euripides apportions to the three figures called sons of Hercules; but they are only three, and I, using the authority of Pindar, model *eight*. . . . I heartily wish that your Excellency could see a gigantic group which I have just completed in clay of Theseus triumphing over the Centaur." This group was destined to Milan, but was carried off to Vienna and placed in the imperial gardens after its completion in 1819. Besides the letters of Antonio Canova, there are a number from his brother, who informs the Countess of all the surprises that "Canova the great" is preparing for her. He was a great friend and admirer of Pindemonte, and in all his letters to the Countess sends his "warm affection and admiration."

Pindemonte's letters, of which I may yet send a selection, are 500, and are extremely interesting as showing the views taken by a Venetian of Venice on the point of "ceasing to be." "Pindemonte," writes Byron to his publisher, Murray, "is a thin little man, with fine and agreeable features; his manners are courteous and gentlemanly, he looks like a philosopher. He is about sixty, and, after a somewhat wild youth, has turned devout, says his prayers, and preaches himself so as to exorcise the devil; but, after all, he is a very agreeable little old man." Of all the friends of Isabella Teotochi Albrizzi, he was the earliest and the most constant. Certainly his early letters are "quite other" than devout, or at least his devotion is reserved for mundane objects; but when, after Byron's death, John Hobhouse write to the Countess Albrizzi to induce Pindemonte to subscribe to a monument to Lord Byron, he answers her: "Signor Hobhouse has written and printed that I, grown old and infirm, have become bigoted, and that the greater part of my time is devoted to religious observances. Would that this latter assertion were the truth. At any rate, you will understand me and judge whether I can contradict myself and contribute in any manner to honor a man who outraged religion to such a point as to merit a public reproof from the Grand Chancellor of England" !! J. W. M.

BOISSIER'S SAINT-SIMON.

PARIS, May 28, 1892.

IT is a bold enterprise to write a book on Saint-Simon, to pass judgment on a man who speaks so well for himself, to "review" a writer who has left us an account of half a century, with innumerable details, with the most minute analysis of a thousand interesting characters. M. Gaston Boissier has done this, however; he has added a small volume to the collection of "Les Grands Écrivains Français" which is published by Hachette.

Few men are more competent to write upon Rome and Latin literature than M. Boissier; he has just given us a new volume on the last days of the Roman Empire and the transformation of a pagan into a Christian society. We are very willing to be introduced by him to these curious times; he is at home there, having lived in familiarity with all the Latin writers, and he can teach us not a little about the great men and writers of the first centuries of the Christian era. Can he tell us more than we all know about Saint-Simon, or Louis XIV., or Mme. de Maintenon? Here *we* feel quite at home; we know Versailles as well as he does himself. I had already made such remarks to myself when M. Boissier gave us a 'Madame de Sévigné.' I had been all my life familiar with the amiable Marquise, and I felt a little surprised at M. Boissier's attempt to explain her to me. Still, I must candidly confess that I read his little volume with much pleasure. Madame de Sévigné wrought a new miracle: she reconciled me to her biographer, she gave to his style a peculiar lightness, to his manner an unwonted delicacy. I found only one fault with M. Boissier's 'Madame de Sévigné,' and I said so to him: he is not quite just to her when he lays her virtue almost entirely to the credit of a cold temperament. This is too materialistic a view. We have no right to say of a virtuous woman that she has no merit in being virtuous because she is not tempted. Madame de Sévigné was often tempted, and her wicked cousin Bussy said of her: "On lui fait voir bien du pays, mais elle en revient toujours."

I opened the volume on Saint-Simon with some alarm: it begins with a complete account of the Duke's life. The origin of the fortune of the Saint-Simons is well known. "Among the pages of young Louis XIII. there was one who belonged to a noble and ruined family of Vermandois. The King hunted constantly; he had to change horses from time to time, and he noticed young Claude de Saint-Simon, who always presented him the fresh horse so that he was not obliged to dismount and could spring from one saddle to another." Of such trifles is made the fortune of man. Saint-Simon became a favorite; he obtained many offices, and in 1635 was made a Duke and Peer. His son expresses no astonishment at such a favor: "We are," says he, "issued from Charlemagne, at least, on the spindle-side; there can be no contention on this point." M. de Boislisle, the new editor of Saint-Simon, contests it, however, and he is probably right.

Claude de Saint-Simon had only a daughter by his first wife; he married again in 1672. He was sixty-four years old, his new wife, Charlotte de L'Aubespine, was thirty-five years younger. Three years afterwards, on the 15th of January, 1675, was born the child who became the author of the Memoirs. His opinions, prejudices, hatreds, preferences, came to him naturally. His passion for rank, for the privileges of his birth, was in his blood, and was a part of his devotion for the people he had seen around his old father, and for his father himself, who seemed a remnant of old times at the end of the seventeenth century. Saint-Simon stayed a short time in the army; he became rapidly a colonel, saw two sieges and one battle, and resigned because he was not appointed brigadier as soon as he wished, and began the life of the court. Versailles became his world—the Versailles of Louis XIV., which was the seat of the French monarchs, the centre of all authority, the fountain of all favors. Nobody knew better what he calls the *mécanique* of the court—the succession of small duties and of fatiguing pleasures which constituted life at court. For twenty-four years he led this monotonous life, assisted in the morning at the *lever* of the King, followed him to the chapel, saw him take his repasts, accompanied him in his promenades. Louis XIV. prized, above all, assiduity; why did he not like Saint-Simon, and why did not Saint-Simon like him? Louis XIV. was helped by his instinct: he hated in this little duke his judge; the proud nobleman, passionately fond of the rights of his caste; the virtuous husband; the man who felt contempt for Mme. de Maintenon; the friend of his grandson, the Duc de Bourgogne, who was preparing plans of government in secret; and afterwards, when the Duc de Bourgogne was cut off in his prime, the friend and adviser of the Duc d'Orléans. Saint-Simon hated the absolute King,

who ignored the privileges of his nobility; who was always using men of the people, nobodies, upstarts; who could bear no superiority; the slave of women, the tool of Mme. de Maintenon.

The King and the courtier were, so to speak, born enemies; and they both felt it, though their hatred was almost unconscious. They represented two different political ideals. "L'État, c'est moi," was not an empty word in the mouth of Louis XIV.; as for Saint-Simon, he has explained to us explicitly his political ideas. He wrote out at his leisure long plans of government. The four Ministers who were the incarnation of the will of the King, the Minister of War, the Minister of the Navy, the Minister of the King's Household, the Minister of Foreign Affairs (they bore only the name of Secretaries of State), with the General Comptroller of the Finances, were odious to him. "They were," he says, "the five Kings of France, who exercised their tyranny in the name of the true King, and often without his knowledge." He wished to replace them by councils, which were to be composed of the best and most important men of the kingdom. In the eyes of Saint-Simon, the King is the true representative of the nation, but on one condition—if he be surrounded by his Peers; the royal decisions are legal only if they are sanctioned by the Peers. They are a part, an essential part, of the sovereign power. Saint-Simon often becomes ridiculous when he insists upon the difference between the "ducs et pairs" and the other members of the Parlement; he stands for "l'épée" against "la robe"; he hates the "gens de robe et de plume" who have usurped all the places, the intendants. He shows us the legal advisers of Saint Louis sitting on small benches, giving their opinions on their knees; he cannot bear the idea of their successors standing face to face with Peers; he becomes almost mad with rage when the presidents of the Parlement talk to the dukes with their bonnets on their heads: he fills page after page with this "enormous usurpation of the bonnet." This bonnet is his perpetual nightmare; he becomes terribly eloquent when he tells us the story of some of the *gens de rien* who have emerged from their *néant* and have become the real rulers of the country.

We must not forget, however, one thing: under all these prejudices, these dislikes, these pretensions, there was a great idea. Saint-Simon was, in one sense, a precursor of parliamentary government; he hated absolutism and the instruments of absolutism; he wished to establish in France a sort of "House of Peers" like the English House of Lords. He did not go so far as a House of Commons, a permanent legislative assembly; but he advised the Regent to convoke the States-General; he wished them to assemble every five years, and would have assigned to them the laying of the taxes and the administration of the finances.

Saint-Simon suffered all his life the torture of Tantalus: he had hoped to obtain a commanding influence when the Duc d'Orléans became Regent, but the Regent found him too intractable. He was himself irresolute, weak, changeable. After a long conversation, in the course of which Saint-Simon had attacked Dubois with the greatest violence, the Regent said, with all the air of perfect sincerity: "Well, we must dismiss this rascal," and a short time afterwards he made him Prime Minister. The Regent had great good-will for Saint-Simon; he liked in him the man who had great hopes of him, who wished to make him play a great part; he disliked at the same time his severity, his unflinching seriousness. All their instincts were different: Saint-Simon stood for the Spanish alliance; the Regent had a leaning towards England. Saint-Simon was sent as Ambassador to Spain for six months. On his return he was seldom consulted. The Duc d'Orléans died on December 2, 1723, and with him ended the political career of the Duke.

Saint-Simon spent the last years of his life in complete retirement at his château of La Ferté-Vidame, between Chartres and Dreux. The château has been demolished; the immense park and the forest are still there. In this great solitude, surrounded with books, with portraits of Louis XIII. (there was one in each room), he finished his extraordinary and admirable memoirs. He had begun to write them in 1694 in camp. He noted afterwards all his conversations with the Duc de Beauvilliers, with the Duc de Bourgogne, with the Duc d'Orléans. Later, having read the 'Journal de Dangeau,' a sort of diary of the Court of Louis XIV., he found it "d'une fadeur à faire vomir," but it gave him a sort of groundwork for his own Memoirs. Dangeau's chronology, which is so exact, helped his memory.

M. Boissier speaks of the reasons we have for not trusting Saint-Simon entirely. The Memoirs were written when Saint-Simon was old; his notes have been lost, and we do not know what they were exactly. He was passionate to injustice. This is all very well. Saint-Simon may have committed, and he certainly did commit, some errors of detail; but he was fundamentally sincere; he conceals nothing. We understand him well; he is always the same. We can make an allowance for his prejudices and his passions. On the whole, he has given to us a living image of the *grand siècle*, such as cannot and never will be forgotten. There is an intensity of life in his Memoirs which will make them immortal.

M. Boissier writes a special chapter on Mme. de Maintenon and Louis XIV. He finds fault with Saint-Simon for having so much abused Mme. de Maintenon, for having mentioned the accusations brought against her before she was Mme. de Maintenon; it seems to him that such details do not belong to history. Why not? Are not Mlle. d'Aubigné, Mme. Scarron, and Mme. de Maintenon one and the same person? Saint-Simon is not the only man who has injured the memory of Mme. Scarron; we could cite in the printed correspondence of Scarron letters which are as damaging to her as anything can be. M. Boissier is too indulgent, and so is M. Geffroy, the last editor of Mme. de Maintenon. Posterity will not have for her the admiration which was felt by Dangeau, and will side with Saint-Simon.

Correspondence.

THE BLAME OF IT.

To the Editor of The Nation:

Sir: In the line of fair play I beg leave to say a few words. This is heresy where "lynching" has lately been the dominant sentiment; Maryland enjoying for this lawlessness no enviable notoriety. A negro man, brought from the country where the crime is committed, taken into the town, handed over to the lawful authorities, and then the jail taken possession of and the man dragged out and hung in the town under the shadow of the court-house—this frightens every woman and child in the town. It terrifies the innocent negro element so that they do not feel safe to go out at night, and are not sure that they are safe in bed. When and where men are given over to lawlessness, it is useless to ask for pity or justice; but even the reckless might pause and consider the unfairness to the timid, the helpless, the innocent. If they are resolved to do without law courts, let them do their deeds of vengeance where the crimes are committed. A race war seems almost inevitable because of the bitterness and the aggressive attitude of affairs amid an innocent and ignorant population.

This is not all. The negroes who made the attack and brutally murdered Hill went out of the village a drunken and disorderly crowd, and, in a "local-option" county, the white men make the laws and are responsible for their faithful keeping. No one sells liquor, and yet the evidence is everywhere, and is the root of the evils that they would extinguish by "lynching." Where does the blame lie? Who is the innocent man to throw the first stone? Certainly not the one who enriches himself by demoralizing the black as well as the white American.

Victor Hugo wrote 'Les Misérables' to show that it is civilization that creates its own thieves and scoundrels. That may or may not be true, but it is not a paradox to insist that law-breaking on the part of the whites must answer for the crimes among the blacks. Perhaps if the end we seek is truth and not plausibility, we may find the three R's are responsible. It is not always easy to lay one's finger on the beginnings of things. But there is no doubt that much of the unsoundness of our national life is due to demagogism, drunkenness, and democracy.—Respectfully,

B. B. Ellets.

Maryland, June 2, 1892.

PLACES AND MEN.

To the Editor of The Nation:

Sir: Probably no department of administration in our institutions for higher learning gives more trouble than that of filling vacant chairs. The same, indeed, is true of the lower schools as well. I recall that ex-President White once said that this feature of his work at Cornell gave him much concern, although he was not tied by any bonds of party or sect. At present there seems to be no effectual way of bringing together the places and the men. The teachers' bureau is a very imperfect method, even when conducted with care, as some are. It is able to give no assurance that an appointee is suitable for the place. And it is a sorry fact, but nevertheless true, that the recommendations of officers of instruction are so much tinged with ulterior purposes that often they are worse than of no value. Under these circumstances it becomes largely a matter of experiment whether the right man is chosen for a given place. Institutions often suffer, as some the writer knows of at present are suffering, because all ordinary means have failed to procure suitable instructors. The common opinion that our institutions, and foreign ones, are providing ample material for such openings, may be true, but where is that material? How can it be discovered when needed? The waste incident to improper elections, the disaster of finding one's self in the wrong place, are drawbacks painfully felt by institutions and men. Whoever will suggest any, even an imperfect, means of bridging over this difficulty, will certainly receive unstinted thanks from both parties interested.

Charles M. Moss.

Champaign, Ill.

PIG SILVER.

To the Editor of The Nation:

Sir: The London *Times*, a few weeks ago, in commenting on the proposed international conference to bring about an enlarged use of silver, says it is not easy to see what "enlarged use" can mean. It adds that "the result of the employment of the American Treasury as a pig-silver warrant storehouse has not been so satisfactory as to encourage imitation." Certainly not as to "enlarged use." We ought, however, to thank the *Times* for an apt characterization of what used to be called bullion as "pig silver." This expression gives it its proper place with pig lead, pig tin, pig copper, pig iron, and the like. Its superabundance takes it out of the level with gold, and it should no longer be called bullion, but pig metal.

J. S. F.

Boston, May 30, 1892.

Notes.

Charles Scribner's Sons have in preparation 'Norway and the Norwegians,' by C. F. Keary; 'Conversations and Correspondence with Thomas Carlyle,' by Sir Charles G. Duffy; 'The Wrecker,' by Robert Louis Stevenson; 'First Aid in Illness and Injury,' by Capt. James E. Pilcher, U. S. A.; a translation, by the Rev. John Wilson, of Wendt's 'Teaching of Jesus'; and 'Our Moral Nature,' a brief system of ethics, by Dr. McCosh.

Macmillan & Co. announce 'The Life and Letters of Charles Keene,' fully illustrated, and 'The Autobiography of an English Game-Keeper,' edited by Arthur H. Byng and S. M. Stephens.

'Earth Burial and Cremation,' by Augustus G. Cobb, is in the press of G. P. Putnam's Sons.

D. C. Heath & Co., Boston, have nearly ready a volume consisting of the Prefaces to Wordsworth's 'Lyrical Ballads' (1798–1815) and the controversial essays they evoked, the whole edited by A. J. George.

A work of no small value to bibliographers is 'Die Elsässischen Druckerzeichen bis Anfang des 18. Jahrhunderts' (Strassburg: Heitz & Mundel), with an introduction and explanatory notes by Prof. K. A. Barock. The vignettes or printers' signs have been collected by Paul Heitz, and are to be chronologically arranged according to cities or places of publication and reproduced in facsimile. The edition will be limited to 300 numbered copies.

'Die Denkmäler der Renaissance-Sculptur Toscanas' (Munich: Bruckmann), with text by Dr. W. Bode, is announced, and will be published in seventy parts at twenty marks ($5.00) each. Each part will contain five plates printed on large imperial paper.

About a year ago the Berlin Geographical Society, with the financial aid of the Prussian Ministry of Education and Worship, sent Dr. Konrad Kretschmer to Italy to collect materials for a "Festschrift," which should celebrate in a worthy manner the approaching fourth centenary anniversary of the discovery of America. The success of Kretschmer's exhaustive researches in Italian libraries and archives surpassed his most sanguine expectations, and the results will be issued in August by the German Imperial Printing-House in two volumes, of which the first will contain texts and the second maps illustrating the subject. Of these early maps thirty-one have never yet been printed, and will be a valuable contribution to cartographical science. The German Emperor has given fifteen thousand marks towards defraying the cost of publication.

Nansen's 'First Crossing of Greenland' (Longmans) has passed into a popular edition without losing anything of importance to the narrative proper, though with some abridgment and with certain excisions necessary to bring the work into a single volume of 450 pages. Very few of the illustrations have been dispensed with. The work may even be thought to have been improved by this condensation, judged by literary canons. It still remains one of the most readable in the whole library of Arctic adventure.

The 'Toilers in Art' commemorated in the volume edited by Henry C. Ewart (New York: Thomas Whittaker) are nineteen in number, and vary greatly in the degree to which the sensational title applies to them. The sketches, by half-a-dozen hands, are of artists, especially in black and white, beginning with John Tenniel and ending with Bewick and Flaxman. Some are straightforward accounts, some flowery and discursive, and there is no pretence at chronological or national arrangement. Noticeable is the group of contributors to *Punch*—Tenniel, Charles Henry Bennett, Frederick Walker, Frederick Eltze—who are somewhat intimately described; and concerning all the strictly contemporary artists, like Oskar Pletsch, Léon Lhermitte, Josef Israels, and Alexis Harlamoff, is given information perhaps not easily to be found elsewhere. In almost every case there is a portrait of the artist and one or more examples of his work, not very carefully printed. There is an odd symptom of political bias in the selection for a frontispiece of Tenniel's cartoon, "The Order of the Day" (murder and rapine in Ireland), which his Scotch biographer calls "full of force and salutary lessons."

Two of the latest numbers of "Les Artistes Célèbres," published by the Librairie de *l'Art* (Macmillan), are "Raffet," by F. Lhomme, and "Les Audran" by Georges Duplessis. Raffet was one of the best of those artists who have owed their reputation to the French love of military glory rather than to the real qualities of their work. The Audrans were a very large family of engravers of considerable merit.

'The Trade Policy of Imperial Federation,' by Maurice H. Hervey, a professor in an Australian college (London: Swan Sonnenschein; New York: Scribners), is a statement of the conditions upon which a commercial union between England and her colonies can take place. The argument is that, as the colonies will not give up their protective duties, England must impose duties upon the products of foreign countries until her trade is transferred to her own dependencies. Mr. Hervey seems to contemplate a British trade alliance something like the "Continental system" of the first Napoleon. His work is marred by many mistakes of fact.

'Kilmeny' and 'In Silk Attire' are the latest volumes in the new and revised edition of William Black's novels which the Harpers are bringing out in a neat and convenient form.

The return of the tourist season is marked by a number of guide-books, new and old, which have reached our table. A thin and naïve souvenir of European travel is 'To Nuremberg and Back: A Girl's Holiday,' by Amy Neally (E. P. Dutton & Co.). Its only excuse for being lies in its photographic views, which are well chosen. From Houghton, Mifflin & Co. come new editions of their 'Satchel Guide to Europe' and of Sweetser's incomparable 'White Mountains,' 'New England,' and 'Maritime Provinces.' No changes of importance appear to have been called for in them. One always expects a good deal of rewriting in Mr. Charles Eyre Pascoe's unconventional guide-book, 'London of To-Day' (Roberts Bros.), and the current issue, which is the eighth in England, is dubbed American in virtue of some new preliminary chat about the ocean voyage to England. In the chapters which lend themselves to it, the usual freshening is observed, but those which deal with the street routes and the chief public buildings are mostly stereotyped. The pictures are a medley of new and old. The unpretentious but well-edited 'Visitors' Guide to Salem, Mass.' (Salem: Eben Putnam), first published in 1880, has been extensively overhauled for the current year. The twelfth chapter contains a list of historic portraits accessible to the public in Salem. The illustrations are rather pallid. The 'Gossiping Guide to Harvard,' published by the Cambridge *Tribune*, is adapted to hasty sight-seeing, but no more.

A new-comer, 'Guide-Souvenir de Florence et Pays Environnants,' by Dr. J. Marcotti (Florence: G. Barbèra), will meet with a warm welcome as being much needed. An enormous amount of information is packed into pocket compass, with cuts and maps, and the editor's collaboration has been of the most authoritative. As a key to the art treasures of the city this guide-book has never been equalled. It opens with a frank discourse on the character of the Florentines, whose dialect, it says, is less intelligible to foreigners than the Roman, and fortunately so, as their speech is too often gross; on their manners and customs, *e. g.*, their May and November "movings," in spite of Franklin's proverb, here rendered "lo sgombero costa come un incendio"; on their dress, *e. g.*, the general absence of the stove-pipe hat (*cilindro*) except, by municipal regulation, on the heads of cabmen. A brief outline of the city's history follows, with a bibliography. The rest is itinerary, winding up with an alphabetic list of the chief artists mentioned. We have but one criticism to pass on this admirable performance, and that is that the index is far from being adequate. It furnishes no answer to questions like these: Where shall I find Michael Angelo's "Night and Day," where Botticelli's "Spring," where the cyclopean remains and Roman theatre in the suburbs, etc.?

Seventy-four pages of the annual report for 1891 of the State Geologist of New Jersey are occupied by "A Preliminary Paper on Drift or Pleistocene Formations of New Jersey," from the pen of Prof. R. D. Salisbury. This is a most lucid popular exposition of glacial action, illustrated with maps, diagrams, and views from nature in New Jersey, and is highly to be recommended to any one who is curious regarding the subject. The rest of the volume consists of the usual matter, with especial stress again on Southern New Jersey, of which the agricultural possibilities of the oak-land and pine-land belts are set forth in detail by C. W. Coman. The Russian Jews planted by Baron Hirsch in this section have, it is said, thus far "proved industrious and economical, and have gained a good reputation for prompt settlement of debts." C. C. Vermeule deals with the water-supply and water-power of the State, which are shown to be unexpectedly good in the flat portion, but capable of being indefinitely supplemented by electric transmission from the greater powers to the north, with much social and economic advantage. Progress is reported on the making of a surface geological map of the State; one sheet of it will shortly be ready for printing.

While Prof. Sayce is announcing, through the *Academy*, that he has found the clue to the Hittite inscriptions, Prof. Cyrus Thomas states, in *Science* of May 27, that he has "discovered at last the key which will unlock the mystery of the Maya Codices, and, probably, of the Central American inscriptions."

The first number of the new quarterly, the *Yale Review*, which succeeds the *New Englander*, contains very good matter. The editorial comment is judicious, but somewhat limited in range, while the articles are of more than average merit. Three of them are the result of much research: "The Demarcation Line of Pope Alexander VI.," by E. G. Bourne; "Massachusetts and the Saybrook Platform," by Williston Walker; and "Labor Troubles between 1834 and 1837," by Evans Woollen. Prof. Hadley contributes a thoughtful paper on "Legal Theories of Price Regulation," reaching the conclusion that the safest policy in dealing with monopolies is judicial prevention of discriminating rates, while Mr. Henry Villard and Prof. H. W. Farnam discuss "German Tariff Policy, Past and Present." A fair allowance of space is given to book reviews. The *Review* is published by Ginn & Co., Boston.

The address of Dr. Stanley Hall, delivered some time since before the School of Pedagogy of the University of the City of New York, has just been published. It is entitled "The New Movement in Education," and dwells particularly on the advances made in education during the last year, in Europe as well as in this country. The new movement Dr. Hall considers to mean three things: that the physical sciences are rapidly coming to underlie all the arts of peace and war; that the study of the biological sciences in the widest sense is modifying the chief conceptions of morality and religion; and that governments can be made strong and stable only by education. It follows that the work of schools of pedagogy is of great and increasing importance. The address is prefaced with a brief but interesting account of the school before which it was delivered.

We have received from Bernard Quaritch Part I. of 'Contributions towards a Dictionary of English Book-Collectors, as also of some Foreign Collectors'—namely, those whose libraries were incorporated in English collections, or whose books are met with chiefly in England. The contemporaneous libraries of Archbishop Cranmer and of Bilibald Pirkheimer of Nuremberg are first treated of, by Edward Burbidge and M. Kerney respectively. A biographical sketch of each is succeeded by a scholarly catalogue of his books, with marginal and other annotations. Facsimiles of Cranmer's signature, with Dürer's etched portrait of Pirkheimer and woodcut book-plate, and Pirkheimer's beautiful copper book-plate (perhaps Dürer's design), embellish this portion of a very entertaining publication. On the woodcut plate, one remarks the ante-Grolierian "sibi et amicis." Pirkheimer's Latin Ptolemy was the first to contain a map bearing the designation *America;* and the same book, ridiculing the literal Scriptural account of Judæa as "flowing with milk and honey," played a part in the condemnation of Servetus for heresy.

One of the most attractive features of the Munich International Art Exhibition, now open, should be the hall of old masters, arranged by Prof. Lenbach in accordance with his conception of what such a gallery ought to be, both in construction and decoration, as well as in the method of lighting it. The contents have been carefully selected, and consist of rare masterpieces, most of which have never been publicly exhibited. The Empress Frederick, Prof. Knaus, Baroness Todesko, Dr. Fiedler, and other connoisseurs and collectors in Berlin, Leipzig, Hamburg, Munich, and Vienna have furthered Lenbach's project by placing the choicest of their art treasures at his disposal. The sculptural and pictorial decorations of this ideal of an art cabinet have been executed by Rauch and Rudorffer. Radical changes have also been made in the interior of the Munich Glass Palace, by which the space for works of art has been considerably increased and the architectonic effect of the whole vastly improved.

The German Committee formed for the purpose of aiding in replacing the library of the University of Toronto, recently destroyed by fire, has already brought together 8,800 volumes, including a handsome gift from the Emperor. Additional contributions are expected, and every effort will be put forth to make the collection as complete as possible in Germanistic literature and philology.

The most noticeable plate in *Sun and Shade* for June (New York: Photo-Gravure Co.) is a portrait of Mr. Howells from a photograph by Cox.

Prof. Butler writes to us from Madison, Wis.:

"Among private libraries which have been transferred *en bloc* to our public collections, you mention (No. 1405, p. 413) Van der Meulen's as at the University of Wisconsin. This library is not at the above University and it never has been. Its local habitation is in the rooms of the State Historical Society of Wisconsin, a mile from the University. The institutions have no official connection. The Society, however, has always granted University students the largest liberty in consulting its accumulations, which are stored in the State Capitol. The Van der Meulen Library (4,812 volumes, 374 pamphlets) remained at Zeist in Holland till 1867, when it was presented to the Wisconsin Society by his daughter, Mrs. Otto Tank of Green Bay."

—The June *Atlantic* opens with a comprehensive discussion of the sort of education which is needed as a means of strengthening and preserving civilization in the negro race. It is written by Dr. W. T. Harris, and is annotated by some others whose knowledge of the conditions of the problem gives interest to what is said. The policy of concentrating charitable aid upon the secondary and normal schools, in which the more intelligent and progressive youth, the selected minds, are trained, is approved, and attention is directed to the importance of industrial education for the whole mass. The ideas advanced are not new, but the emphasis with which they are stated and their reasonableness shown, is very striking, and it is to be hoped that the beliefs and faith of the writer may be contagious. It must be added that the optimism and confidence of the text are somewhat shadowed by the comment. Mr. Fenollosa, in a paper upon the traits of the Chinese and Japanese, makes some noticeable historical parallels which seem to bring the development of those nations nearer to the Western mind, and especially he protests against the contrast usually accepted between the two as one of conservatism with flexibility. The stagnation of China is related to its past, he suggests, as that of the Byzantine Empire was to earlier Greek ages. At present, he thinks, the Japanese exhibit a likelihood of falling back again upon their artistic temperament as their means of grace in the new world opened to them, instead of directing their energy to a competition with the West in the things characteristic of Western civilization, and he ends with a hazard of prophecy in accordance with which our old and overworked friend, Macaulay's "New Zealander," must hail from the shores of Japan. Other papers of particular note are Janet Ross's sketch of her grandfather, John Austin, and Prof. Searle's account of Dr. S. C. Chandler's observations of the star Algol.

—*Harper's* is distinguished by the first of Mr. Lowell's papers on the Elizabethan dramatists, which has the agreeable trait of resembling talk more than essay, and is full of literary appreciativeness; but it will be more convenient to speak of these lectures when they are complete. Dr. Waldstein writes with his usual discrimination and felicity of comparison concerning the relief of Athene found on the Acropolis, and is inclined to connect it with a funeral memorial; he uses the occasion to quote at length the two greatest of funeral orations, Pericles's and Lincoln's. Mr. Courtenay de Kalb writes of the social and intellectual condition of one of the least known parts of the semi-civilized world, Eastern Peru. He makes its past and its present equally real, and tells a strange tale of the contact of religion with savagery, ending in an institution of serfdom which still continues. It is a depressing story; but as the country has been open to the modern world only since 1866, little was to be expected. The Christianized Indians, so called, though not slaves, are practically bound for life by debtor laws, and even if they break them and free themselves from attachment to the soil, they have no place to go to. The customs of the community, however, in which the condition of these serfs is tempered by the kindness of their masters, seems not ill-fitted to the stage of civilization reached, and some regeneration of the individual by moral and mental agencies must precede any social betterment. The account of the masters themselves is equally interesting as a picture of the patriarchal land-holding system which has almost vanished from our observation in nearer regions. A paper upon Kentucky, which celebrates this year the centennial of her admission to the Union, is timely, and recalls especially her Revolutionary glories.

—The *Century* discloses one of the sure magazine weather-indications in the paper upon the Sea-Serpent. He appears only in the summer. Generally he is permitted to retain the atmosphere and distance of a myth—a myth of science possibly, but not more nigh to reality. In this instance there is no such paltering with our senses. The sea gives up its wonders; in fact, it gives up its dead. We have on the page a drawing—after the description, it must be allowed—of the carcass of the monster discovered on a remote spot of the Florida coast in 1885, and beside it a representation of the skeleton of the clidastes found in the Bad Lands of Kansas. The two are very like. The writer, J. B. Holder, recounts again the oft-repeated testimony of the many unimpeachable witnesses who saw the sea-serpent on the Massachusetts coast early in the century, and he entertains no doubt of the existence of the creature of which the Florida carcass is probably an example. If it is ever captured and catalogued, the credibility of human testimony should be distinctly greater than ever before; but until then doubt may still be expected to invade the minds of all who are not dwellers on the Cape Ann shore, where expectancy of the marvel is always a pleasing incident of the summer. An elaborate article upon Budapest; an account of Mt. St. Elias, with some novel ice-views; some

highly interesting examples of primitive political caricature in this country, annotated by Mr. J. B. Bishop; and Castelar's continuation of the life of Columbus, are the remaining papers of novelty or importance in the number, which besides fitly commemorates the public-spirited character and career of the founder of the magazine, the late Mr. Roswell Smith.

—*Scribner's* is characterized by two philanthropic articles. The first is Mrs. Burnett's realistic narrative of the origin and growth of the Drury Lane Boys' Club, in which she became interested and for which she did some private benefactions. It is a chapter of boy-life among the poor of the city of London, told with a master pen. The instinct of self-help, acting in a natural and unconscious way, was the source of the little club, which met with the usual kind and humble friends and the equally common difficulties, but had enough vitality in its boy-interest to make it become a useful centre of good morals and intelligence in its neighborhood, and an example to others through the English world. A more hopeful story of the boys' clubs has not been told. The second paper, upon the tenement-houses of this city, is also optimistic in tone. The writer, notwithstanding his long experience, does not undertake to make a sensation by recounting a catalogue of horrors, as he could easily have done; but, taking good with evil, he finds improvement, and reminds us again that these districts are not a permanent home, but a stopping-place through which the new arrivals pass on their way to Americanization and higher standards of living. The population is shifting in the sense that its children go on to better homes. Their places are filled, and the work is to do over again, but it is a work of civilization, and should be welcomed. The means of improvement, however, are far from being exhausted, and the writer enumerates a number of new agencies which he advises—first among them, apparently, being the institution of public baths, with reading-rooms and restaurants. He directs attention to the mutual helpfulness of the tenement class among themselves, and gives some admirable instances showing a sound spirit in the people themselves. He illustrates, of course, the really large amount of undeserved suffering and hardship incident to the economic and domestic conditions of poverty. The article is, altogether, well-considered and enlightening, and should have a wholesome effect upon both sentiment and labor. A third paper, upon the problem of rapid transit, with its definite proposition for this city, is of municipal interest.

JULIAN'S HYMNOLOGY.

A Dictionary of Hymnology: Setting forth the Origin and History of Christian Hymns of All Ages and Nations, with Special Reference to those Contained in the Hymn Books of English-speaking Countries, and now in Common Use. Together with Biographical and Critical Notices of their Authors and Translators, and Historical Articles on National and Denominational Hymnody, Breviaries, Missals, Primers, Psalters, Sequences, etc., etc., etc. Edited by John Julian, M.A., Vicar of Wincobank, Sheffield. Charles Scribner's Sons. 1892. 8vo, pp. xii., 1,616.

THIS long title has nothing of vain pretence: it is simply and exactly descriptive. The pages are double-columned and closely printed, with a minimum of margin. The object has been to cover the whole field of Christian hymnody, which is much larger—especially the English portion of it—than is generally supposed; and the degree of success in compassing this ambitious aim is remarkable, considering the comparative, one might almost say the absolute, lack of precedents. The previous work on this line has all been recent, and it has been attempted on anything like a corresponding scale only by Daniel and Mone for the Latin hymns, and by Knapp and Wackernagel for the German.

With those who use the English language the word hymnology was till lately supposed to mean "a collection of hymns"; and the thing it really stood for, which was, of course, the special study (it can hardly be called a science) of hymns, has existed only within the last half century. Till about 1840, nobody, so far as is known, had thought to gather and compare hymn-books, except for the scissors-work of the compiler. The fashion was set by Daniel Sedgwick, an humble and untaught dissenter of strongly Calvinistic opinions. Originally a shoemaker, and a poor one at that, his tastes led him into the second-hand book trade, and his little shop in Sun Street, Bishopsgate, became the resort of men of all creeds and connections when they wanted information about hymns. The tree of English hymnology is of his planting, and Mr. Julian's book should be dedicated to his memory.

The first volume on this topic was by Burgess, a Wesleyan, now forgotten, and not commemorated by Mr. Julian. It was a small affair, and dealt with the provision of his own sect merely. So did the larger book of David Creamer, a Baltimore Methodist, in 1849. Ten years later Dr. J. Belcher, a Baptist of Philadelphia, put forth 'Historical Sketches of Hymns,' a rambling production, but not confined in its scope. Far more valuable was Josiah Miller's 'Our Hymns,' 1866, based on the British Congregational Hymn-book; and his 'Singers and Songs of the Church,' 1869, has been the most extensive and useful publication on the subject till now. Others followed, usually containing, like the recent American works of Hatfield and Duffield, more blunders and less facts, or, like most of the English efforts, offering more for edification and entertainment than for information. At home Putnam, Nutter, and Burrage did some good work in illuminating each his denominational corner of the field.

Mr. Julian's big book differs from its predecessors in containing more solid matter than all of them put together, and in presenting it in an entirely new shape. On the first head there is little to say except by way of the praise due to immense research and successful industry. As to the handling and arrangement of the matter the case is different. Both the general plan of the work and the irregular way in which that plan is carried out are open to serious exception.

The dictionary, or cyclopædia, method requires a strictly alphabetic order, and places all subjects on a level: if you want Cheese, or General Grant, or Zanzibar, you know where to look for it. But it was, or should have been, a question from the start whether this method was applicable here. Names of authors and first lines of hymns do not mix well together; only one collection out of thousands has been known to group the two in a single index. The natural order is that hitherto pursued, *i. e.*, under each writer's name, after the facts of his life, to gather such of his hymns as are worth mentioning, preferably in the order of their publication. That is here done in part; to do it entirely would have saved much precious space and some trouble to the reader. Every Latin or German hymn of any note (presumably) has an article to itself, and so have a multitude of English ones, but few or none of American origin. Thus one may find "Rock of Ages" on p. 971, but not "My faith looks up to Thee" on p. 778. On looking for the latter in the index, on p. 1406, one is referred to Dr. Ray Palmer, on p. 877. Or if the reader is of antiquarian tastes, and wishes to look up such a once-popular piece as "Thou sweet flowing Kedron," he may at length discover the line on p. 1609, and then travel back to Maria De Fleury on p. 1559—for beyond the main indices of First Lines and Authors (which it has been thought necessary to keep apart here at least) is an Appendix with indices of its own. All this is clumsy, and should have been obviated; but after reading at the start (p. v.) that "the first pages were completed more than ten years ago," one is prepared to believe that many additions and corrections were afterwards needed.

To revert for a moment to first principles: every student or collector, in whatever field, knows that with more than a few dozen books, or specimens, or titles, arrangement on some definite plan is important. When the subjects mount up, as here, to many thousands, the arrangement makes all the difference between perfect utility and chaotic uselessness. This 'Dictionary' is not a chaos, but its order is not orderly enough. It might have been better to give it another name and abandon the effort at alphabetic sequence, except in the indices. Then the splendid array of the Latin hymns (which are mostly anonymous) could have been set forth in chronologic order, preceded or followed by the Greek and Syriac. The German lyrics could have had several hundred pages to themselves, authors being arranged by periods and schools, as in T. Kübler's admirable companion volume (wholly overlooked by Mr. Julian) to the two of 'Lyra Germanica.' The Italian, French, Dutch, Scandinavian, etc., would stand each by itself — as here mainly, not wholly. The vast bulk of English material, almost entirely the product of the last two centuries, would be treated like the German: first, that prior to 1700, then Watts, the Wesleys, and their followers, and so on; America, with its moderate native provision, bringing up the rear. Fatherless hymns in any of these sections would fall into line according to their dates. Then alphabetic indices, one set for the first lines and another for the writers, editors, etc., in their different departments, would (especially in the former case) probably be better guide-posts than one each—not to say two, as here—for the poetry and the poets. If one wants to find a German hymn, for instance, he will surely know that it is German, and look for it more easily among its near relations than in a hodge-podge of a dozen languages. To cite the extremest case, there is an awkwardness in mixing the Greek with our own alphabet, and placing Φῶς ἱλαρὸν next to Greville Phillimore, as in the body of this book, or to *Peuple Chrétien*, as in its index.

Such an arrangement as above suggested would have made the contents of the 'Dictionary' more valuable, both for reading and for reference. In the case of so expensive a publication, appealing to a limited class and little likely to be revised, everything should have been done to make it at once as complete as possible and as attractive as is consistent with sound scholarship. But where no regard is paid to Mr. Lincoln's advice about

swapping horses while crossing a stream, where plans are radically changed while the work is in process, where a number of contributors work each after his own lights, some confusion is inevitable. For "Italian Hymnody" and other topics we are referred to the peculiar heading "Various." Under "Various," p. 1205, the seeker is informed that "the expansion of the work far beyond its original limits," etc., etc., "have necessitated an Appendix, which will be found at p. 1307." At p. 1307 begin the indices. Journeying on to p. 1525, the pilgrim finds the promised Appendix, which contains, mostly in very small type and severely condensed treatment, a great many topics that ought to have been thought of earlier. Here are the old names, well known to every hymnologist, of R. Burdsall, Mrs. M. F. Cowper, M. De Fleury, T. Greene, G. Heath, R. Lee, J. Marsden, J. Peacock, M. Pyper, Mrs. E. Rowe, A. Serle, Mrs. Clare Taylor, Wm. Taylor, and J. Wingrove, nearly all of the last century; the more recent but not less important names of D. E. Ford, R. Nicoll, W. Palmer, G. Robinson, Lord Selborne, Abp. Whately, the Whittemores, and E. Wigleswortb; poets of such note as W. Blake, T. Chatterton, Eliza Cook, Giles Fletcher, Hans Sachs, James Shirley, and Lord Tennyson, whose slightest connection with hymns should have put them into Mr. Julian's memoranda years ago; and such Americans as Eliel Davis, H. F. Gould, J. H. Hopkins, A. Kneeland, J. G. Lyons, F. P. Mace, B. Manly, D. March, M. F. Ossoli, G. Robins, and R. Turnbull.

Besides these worthies, preserved by a happy afterthought from hymnologic oblivion, the Appendix (which has two parts and a brief supplement) gives long additional lists of hymns "in common use" by familiar authors like Alford, Bathurst, Beddome, Bonar, Collyer, Doddridge, Ellerton, Faber, Kelly, and Lyte. These lists might be extended indefinitely. With the two leading hymnists of the eighteenth century, the editor's patience happily gave out; thus, he remarks of Dr. Watts, "Nearly 100 hymns, additional to those already annotated, are given in some minor hymn-books"; and presently of C. Wesley, "In addition to nearly 1,000 of his hymns which are annotated in this Dictionary, there are many more in C. U. which we have not space to notice." There is a moral in these confessions. If our diligent editor had strung out the thousand hymns of C. Wesley in one long row and in order of time, each set headed by the title and date of the book or tract in which they first appeared, instead of giving half of them six or eight lines apiece, repeating the same statement on many different pages, and dwelling needlessly on minute changes of text, made for the most part unintelligently at the caprice of conscienceless compilers, he would have saved a great many pages. Nobody need object to the handling at length (as is here done) of *Dies Iræ*, or *Veni Creator*, or *Ein' feste Burg;* but there are not many English hymns that have more of a history than can be told in a few lines, and between a vicious arrangement and the amplification of trivialties much space is here wasted.

What with two main parts of the book and two pairs of indices, it would be dangerous to attempt to detect omissions. The probability is that nearly every name or first line of any note which may have been overlooked in the first 1,500 pages has been caught for the Appendix. We cannot find Robert ("Satan") Montgomery, whose pious lyrics were not so bad as his epics, though none of them is much used—in fact, they seem to have sunk under the weight of his reputation; and the research of weeks might detect other oversights hardly to be called criminal. If a name does not appear in either of its proper places, it may usually be found in one of the indices: thus, E. Cooper, T. Gisborne, and Lady Lucy Whitmore are bundled away under the head of Staffordshire, and a number of minor Unitarians under their denominational title. These invidious discriminations—though with no malice prepense, for sectarian bias is happily wanting—are a small feature of the book. Foreigners who used a tongue other than Greek, Latin, or German have no rights that need be respected; thus, Savonarola is relegated to "Italian Hymnody," p. 1533, and nothing is said of a striking piece, said to be translated from one of his, which occurs in so notable a book as Dr. Kennedy's 'Hymnologia Christiana,' 1863. One curious case may charitably be supposed unique, in the absence of similar charges against the accused. The beautiful Communion hymn, "Shepherd of souls, refresh and bless Thy chosen pilgrim flock," is much used in America, and most of it is anonymous. The index, p. 1451, refers to p. 119, where a brief lyric of J. Montgomery's is cited as forming the closing stanzas of this piece, "(q. v.)" But alas, there is no "q." to our "v."; at least the texts in S and the indices, being further entreated, are dumb. Such accidents may happen in the best-regulated books, when of these dimensions, but the fewer of them the better.

Biography, in which Miller and his imitators revelled, is not Mr. Julian's strong point. This will be a disappointment to many, for the human element is precious, and the older English writers had few black sheep among them. Most of their views would call forth a smile or a frown to-day from members of the same bodies, and they produced many dreadful verses; but personally most of them were estimable and lovable people, about whom one would be glad to know more than is told here. By way of exception, Dr. Grosart is unduly explanatory concerning George Wither: "How sorrowful the wrongheadedness of the King who compelled such a true man to forsake him and prefer the kingdom to the King, as [*sic*] many others who with pathetic reluctance became Roundheads!" As A. Ward once remarked, "Too true; it's a scandalous fact."

Of style not much is expected in a dictionary, and the style of Mr. Julian and his helpers, over whose contributions he is said to have freely exercised the editorial prerogative of revision, is at times erratic. Under his own initials he speaks (p. 1291) of "several Congregational congregations"; and he or they are fond of saying that So-and-so became a pastor or professor and "retained the same" for so long, or was born at such a date, and "subsequently" or "afterwards" emigrated, or what not. The doubt whether Dr. Nettleton "ever did or ever could have written" a hymn may be well founded, but is not prettily expressed.

What little there is of criticism goes far to reconcile us to the lack of more. "Amongst modern hymn-writers, Dr. Irons ranks with the first," though "his hymns have not been largely used outside of his own congregation." Oh, no; his version of *Dies Iræ* is in almost universal use, and it is the only thing of his of any special note. Seven of T. Kelly's "rank with the first hymns in the English language." In quality, not one of them does; he was a good man and a useful versifier, but of very limited faculties. Bishop Mant "is known chiefly through his translations from the Latin." On the contrary, these, with possibly two exceptions, are inferior to his originals, and much less used. Dr. M. W. Stryker of Chicago will feel doubtfully complimented on learning that his productions are "full of dogmatism and fire"—two qualities which in hymns have not usually helped each other since the days of Toplady. Dr. Grosart cites as "very fine" and "still finer" two unused and ordinary pieces by E. Perronet. Dr. J. H. Overton, who as rector of Epworth may be expected to enthuse over the Wesleys, says "it is perfectly marvellous how many there are which rise to the highest degree of excellence" among the 6,500 sacred songs of Charles; and of his sister Mehetabel (Mrs. Wright, far less known to fame), that she "had an exquisite poetic genius," and "it is a great temptation to go on quoting this exquisite writer." Those who write for dictionaries should learn to resist such temptations. It is Dr. Overton again who "caps the climate" of alleged criticism in asserting that Dean Stanley's "poetry is prosaic. The divine afflatus is wanting. . . . That exquisite taste and felicity of diction which distinguish more or less all his prose writings seem to desert him when he is writing verse." This is as wide of the mark as well could be. Three or four of Stanley's pieces have come within the range of recent collections, but others, found only in the Westminster Abbey Hymn Book, are too delicate, too subtle, too fine (in the stricter meaning of the word) for common use.

In statements of fact the book may be held to have attained, as was its business, a high level of general accuracy; at least, bad blunders are few. Dr. Joseph Beaumont did not die September 3, 1652, but November 23, 1699. The one hymn credited on p. 1586 to Prof. Phelps of Andover was published by Charles Wesley in 1762, and is so mentioned on p. 1264, No. 339. W. B. Rands, better known as "Henry Holbeach," was a precocious youth if he died at the age of twenty; and Dr. W. H. Furness accomplished an unexampled feat if he "graduated at Harvard in Arts and Theology 1820"; the date 1823 should be added. American names, of course, are full of pitfalls for the unwary Briton. "Bowd*o*n College" (p. 108), "Brown's University" (p. 316), "H. W. Bellowes" (p. 400), "Higham" (p. 810), and perhaps "*G*all River" (p. 685), explain themselves to a native, but "Eaton," twice on p. 451, needs to be interpreted into Easton, Pa., and "New Haven," in at least four places, into New Hampshire, a State apparently unknown to Mr. Julian and his proofreader. Moncure *Dana* Conway (p. 1195) disguises a family surname (Daniel). Little slips of this kind are numerous, and are accounted for by the fact that this edition is reprinted *verb., lit., et punct.* from that of Murray in London.

To sum up, the 'Dictionary of Hymnology' comes as near exhausting the bibliography of its subject as could be expected or reasonably desired. It contains a huge mass of information, imperfectly digested, and presented with inadequate regard to proportion, economy, and order. The German part is far ahead of the English, in quantity and quality; and the same may be said in a degree of the Latin, which has been committed to several hands. The volume should go into every public library and upon the shelves of such as care for extended consideration of its topics. As a book of reference it has no rivals, and is unlikely to be superseded for a long time to come. But

its technical character and approach to scientific methods will make it caviare to the general: it has few pretty stories to tell at prayer-meetings or round out a sermon with, and these are what most people want in connection with hymns. The more serious reader will often be disappointed by the difficulty of finding what he is after, the paucity of biographic data, the crude feebleness of occasional comments, and the general lowness of the literary tone. If Mr. James Mearns, who was assistant editor towards the last, had extended his cares from the German to the native English hymns and been allowed to direct the whole, or if some competent writer—say Mr. W. T. Brooke, whose brief notice of his master, the late D. Sedgwick, shows a discriminating mind and an apprehension of the uses of language—had been commissioned to handle Mr. Julian's huge accumulations and thrash them into shape, it would be possible to praise with less qualification this large result of long-continued and arduous labors.

MARSHAL MACDONALD'S RECOLLECTIONS.

Recollections of Marshal Macdonald, Duke of Tarentum. Edited by Camille Rousset (Member of the French Academy); translated by Stephen Louis Simeon. Imported by Charles Scribner's Sons. 2 vols., 8vo, pp. 356, 380.

MARSHAL MACDONALD'S personal recollections add another to the list of valuable contributions to history which have recently come forth from the seclusion of French family archives. The book carries in every page the evidence that it was written, as it professes to be, purely from memory, dashed off at speed, without revision by the aid of documents. By the same evidence, Macdonald's memory is shown to be tenacious and reliable, and the occasional slips which are inevitable in such a memoir are neither numerous enough nor important enough to diminish the substantial value of the narrative. What might be lost in fulness of historical detail is more than made up in the lively and vigorous presentation of the Marshal's own personality. He stands vividly before us for what he was—a brave, honest, and blunt man, half Scotch and half French, whose military eminence was fairly won and honorably used.

Such memoirs, when honestly written, have an authority which is unique. Every student of history is conscious, from time to time, of an overpowering wish to interrogate the actors in great events. Their character, their bearing and manner, their freedom of disclosure, and their reticences, all are full of meaning. It is perhaps unnecessary to make the qualification that such memoirs should be honestly written, if the material be abundant enough and the witnesses sufficiently numerous. No writer ever attempted more deliberately to construct history in his own interest than Napoleon; but the story dictated at Saint Helena has its perversions of the truth exposed by the overwhelming mass of the Emperor's current correspondence, and the sinister light thrown upon his character as a ruler makes the self-exposure one of the most important helps to the truth.

It is not long since the rules of our courts of justice excluded all interested parties from being witnesses; but a short experience has taught us that, for the purposes of discovering the truth, the cross-examination of the contestants themselves is worth more than a cloud of other witnesses. An analogous conclusion holds good in history, and nothing helps more to turn the lay figures of a formal historical drawing into living and comprehensible men than to set them to talking. Their memories will, of course, differ as to minor matters of detail, but it will not be hard to discover who is most trustworthy or who is seeking to give a false gloss to the facts.

This is well illustrated in comparing the story Macdonald tells of his escape across the Elster after the rout at Leipzig, with that of Marbot. Macdonald's command was the last to leave the lines in front of the town, and, when he reached the bridge, it had already been blown up and the mob of fugitives was crowding into the stream to meet death in another form. The Marshal succeeded in getting out of the confusion on one side, and some distance from the bridge he found that two trees had been felled on the bank of the stream, side by side, and by laying shutters and doors on the trunks a swaying bridge had been made, over which some were escaping across the narrow stream. The trees separated and the flooring fell. Macdonald dismounted and clambered across the trunks; but, as he neared the other side, the shaking caused by others who were following him, threw him into the water. He could, however, reach the bottom, and waded out, dripping and muddy. One of his grooms had stripped and swum across, bringing to him a wallet and papers which he had left with his cloak on the other side. He says that Marmont furnished him with a horse, and the naked soldier walked beside him towards Markranstädt, where the Emperor was. Marbot was in command of a brigade of cavalry which sought to hold back the Allies and cover the escape of the French fugitives, and was witness to part, at least, of the scene. He saw the naked man, but supposed it was Macdonald, and that he had stripped and swum the stream. He says that he sent a led horse of his own to the Marshal. Both accounts have only just become known, and were, of course, written each in complete ignorance of what the other said. Marbot was most likely to be mistaken as to the Marshal's stripping to swim the river, where Macdonald's statement is conclusive; but we can understand how the former, busy with his own combat and seeing a group in which stood a naked man, would be honestly misled. As to the loan of the horse, Marbot, to whom it belonged, is the stronger witness, and the Marshal most likely to be mistaken. Thus the minor differences are such as would naturally arise, and the concurrence in the more important facts establishes these beyond dispute.

A similar analysis makes Macdonald's testimony of decisive importance in relieving Marmont from the charge of traitorous conduct at the fall of Paris in 1814. Napoleon, on his return from Elba, justified his invasion of France by the assertion that his abdication would not have occurred except for what he called Marmont's treason. Macdonald's circumstantial statement shows that Napoleon consented at Fontainebleau to abdicate on the representations of his generals (not including Marmont) that further contest was useless. Macdonald, Ney, and Coulaincourt were made commissioners to treat, on the part of the army, for the best terms which could be obtained. On their way to Paris they passed Marmont's camp and informed him of their mission. He had fallen into the error of entertaining negotiations for separate terms for his own command, but accompanied them to Paris, and notified the allied sovereigns that he should make solid cause with the others, and this was acceded to. In his absence, and contrary to his orders, his subordinates marched the troops within the allied lines, the occasion for it being some peremptory orders of Napoleon's that they should march to Fontainebleau. This seemed to indicate the withdrawal of the abdication and a new appeal to arms, and Marmont's generals of divisions cut the knot by marching in the other direction. Macdonald describes Marmont's dismay when first learning how grave a mistake he had made, his appeal to Prince Schwarzenberg to place him again in the same situation as the rest, his manifest joy when this was done, and his grief and wrath when he learned that his subordinates had prematurely surrendered. Marmont's own memoirs have long been before the world, and have been supported by sufficient corroboration to make the scale turn in his favor; but the circumstantial narrative of Macdonald, an impartial and honorable witness, must be held to be conclusive of the controversy.

The Marshal's account of the Hundred Days is as thrilling as anything can be. He points out the faults which had produced a general reaction against the Bourbons, so that the army, at least, was ready to desert them when Napoleon landed at Fréjus. He accompanied the King's brother to Lyons, and tells how the troops passed from apathy to sullenness, and then to open revolt as Napoleon drew near. It was with difficulty that Monseigneur got away, and only extraordinary vigor and shrewdness saved Macdonald from being carried to Napoleon as a prisoner. His return to Paris was full of adventure, and he gives a vivid picture of the change in the garrison and in public sentiment as Napoleon drew near. Finally the King fled to the frontier almost alone, and Macdonald, leaving him, then returned to Paris, but refused to join Napoleon, and shut himself up in his own house. Marshal Davout, Minister of War, forced himself into the apartment and begged Macdonald to declare for the Emperor, but he answered that the new revolution was contrary to the interests of France, and refused to have anything to do with it. He was able to give Davout the first news of the outlawry of Napoleon by the Congress of Vienna, and of the renewal of the European alliance against him. Davout in substance acknowledged that this made the situation desperate, as the Emperor had hoped that Austria would prevent it. We are made to feel the suspense before the battle of Waterloo, and the dismay which seized upon all true Frenchmen when France was more prostrate than ever before the allied invaders. The brilliant insanity of Napoleon's last stroke, its selfish disregard of the true interests of the country, and the utter ruin it brought to the army and the military chiefs who had made it possible, are told as only one could tell who kept his head cool in the midst of it all, and who had a high enough standard of personal honor and duty to keep him from catching the unthinking enthusiasm of his comrades. Macdonald mourned over the folly which threw away reform for revolution, making absolute Bourbonism possible for the next fifteen years; and we are helped to understand how the revolutions of 1830, of 1848, and of 1852 became not only possible but inevitable.

If the passages we have referred to have the greater general interest, it is not because others are lacking in it. The opening sketch of military service during the Terror, though a mere outline, is full of instruction; so is the Italian campaign of 1797, that of 1809, and the field of Wagram. Macdonald perhaps slurs a little

his defeat at the Katzbach in 1813, but still he shows enough of the effects of storm and flood, of misunderstanding of orders, and of official insubordination under any but Napoleon's own hand, to make it evident that it was not for lack of capacity to handle an independent army that he suffered that reverse.

The book is sure of a high place in military history, and the lovers of that department of literature will only wish there were more of it. The English version is in excellent form, beautifully printed, and illustrated with copperplate engravings from paintings by Charpentier, Horace Vernet, Girardet, and others. The frontispiece is a photogravure after David's portrait of the Marshal. The translation is satisfactory, though a few slips are noticeable. In the synopsis at the head of chapter iii. of the second volume, "Naples" is printed for Tilsit. On page 264 of the same volume the French "brigadier" is rendered by the same word in English, which is erroneous and misleading, as the *brigadier* in a French cavalry regiment is a non-commissioned officer of the rank of a corporal of infantry.

Germanic Origins: A Study in Primitive Culture. By Francis B. Gummere. Charles Scribner's Sons. 1892. Pp. 490.

It was time to summarize for English-speakers the facts and theories up to date concerning the civilization, home, religion, the social and physical status of the early Germanic tribes. The general public, and even the scholar, will be grateful for such a work. It requires a man of broad sympathies—we are thinking of the narrow spirit shown by Germans and Frenchmen when they try to determine the original Aryan type—and of very wide learning in philology, ethnology, and archæology. The scope of this book is somewhat narrower than the primer or résumé we have in mind. The author aims to give an account of the founders of "the great English-speaking race while they held their old home, their old faith, their old customs." His use of the word "race" shows well his position as to ethnology, which should go hand in hand with philology. He scorns the "witness of the skull"; for him there is only the "witness of speech," as the late Prof. Freeman expressed himself. Putting the primitive Aryan and Teuton on a level with other savages is, in his eyes, an abomination. He calls it the *Interpretatio Africana.* In the chapter "Men and Women" our ancestor, clad in skins and a bit of linen, and living in the forest, is a "huge, keen-eyed, florid, yellow-haired person, impetuous, melancholy, cruel, passionate, fitful, with dreams of conquest, with longings dull and indefinite, with a contempt for civilization, and an eagerness to touch and keep some of its nobler elements." This is "rhetoric" of the sort of which Prof. Gummere frequently and justly complains in his sources, for instance in Sidonius Apollinaris and in Tacitus. From a sober, scientific point of view there is no English-speaking race at all. English is spoken by different races which are grouped politically in separate nations. The above beautiful portrait is that of a man who, in the later chapters on "Worship of the Dead," "The Funeral," "Form and Ceremony," is depicted as given to ancestral worship, guilty of sacrificing wife, friend, child, and slave. The father exposed his children. The old and feeble were killed or exposed. Again, we are told how our ancestor drank mead excessively, mixed blood and honey, and sipped this beverage from the skull of friend or foe; how he wooed and won the fair without really being in love—just like any other savage, forsooth. The only concession Prof. Gummere makes to the demands of ethnology is the admission of ancestral worship. But he prefers to assume a separate origin for the worship of Nature, though "doubtless much of this worship once belonged to ancestors, but it soon ceased to be regarded as such. From the start man must have felt that the water, or the cloud, or the cave had a population not entirely dependent on emigration from the living world of men: he must have recognized at the outset a *natura naturans.*" This view is a remnant of the antiquated mythology of Simrock, Grimm, and Max Müller.

In the chapter on "Land and People" the author clings to the old tradition that the home of the Aryan "race" was in Asia. Is it not time to throw this notion overboard? It is not settled where in Europe it was, but a non-Asiatic home of the Aryans is all but a certainty. Müllenhoff thinks that the Germans considered themselves autochthonous. Why not treat them as such for the purposes of this book? If Prof. Gummere was not willing to do that, he might have briefly given the reasons for and against, or referred the layman to Taylor's 'Origin of the Aryans,' or Rendall's 'Cradle of the Aryans,' two books that treat scientific facts and speculations without rhetoric, yet popularly and clearly.

The sources consulted in the making of the book our author gives in foot-notes and partly in the introduction. He has at his disposal all the necessary material, from the last section of Paul's 'Grundriss' back to Pytheas. The main sources of our knowledge of the primitive German are three: (1) the contemporary classical writers, *e. g.*, the 'Germania' of Tacitus; (2) early Germanic literature, *e. g.*, 'Beowulf'; (3) survivals, *e. g.*, the church festival of All Souls. Prof. Gummere lays a great deal of stress on 'Beowulf,' which is pardonable in a professor of English. He himself calls a very long extract from it in the chapter on the Germanic home "somewhat tedious." The translations from 'Beowulf' and German poetry are made by himself, and they are excellent.

The book is well written. It is bright and interesting, even brilliant in places. There runs through it a vein of enthusiasm and good humor, a mine of first-hand quotations and anecdotes, that will attract and amuse the general reader.

The Art of Entertaining. By M. E. W. Sherwood. Dodd, Mead & Co.

What To Do. By Mrs. Oliver Bell Bunce. D. Appleton & Co.

If we are to take without sceptical reservation the word of the Scriptures that in the multitude of counsellors there is wisdom, who is there who should be so wise as that much-counselled representative of her sex's beneficent activities, the young housekeeper? It is professedly in behoof of this typical and interesting personage that the last portly addition to the "Portia Series" delivers its precepts at "full-throated ease." Several reasons, however, suggest themselves why the young housekeeper should hesitate for a while before committing herself irretrievably to a perusal of these thirty-seven chapters and a preface.

It is to be feared, in the first place, that unless she have an unusual devotion to the tenth commandment, she will find it difficult to preserve a due respect for the decalogue while she reads all about the table-cloths of duchesse lace, the cups of Russian gold filagree for cordials, and the "splendid bouquets" at those ladies' lunches that cost a thousand dollars, without counting "the cost of the china, the glass, porcelain, cloisonné, Dresden, Sèvres and silver, which make the table a picture"; or about the delightful doings, so intimately described, of those "many opulent people" who keep thirty servants and live "with much of European elegance"; or about the menus and the functions in those sublimated spheres, "our best country houses." Unless, indeed, she be a very angelic, or else herself an "opulent" young housekeeper, it is even conceivable that, in view of the state of her wardrobe, she may not find it conducive to a virtuous frame of mind to be assured that, whether high in the neck or low in the neck, "the dinner dress must be handsome."

Another and different sort of difficulty that the young housekeeper will have to encounter in these pages is that of keeping the thread of the discourse. If she be of very strong mental texture, it may not rend the serenity of her mind to be called on, when she seems to be just on the point of getting at information that will be of practical usefulness in her own modest station in life, to learn that "the royalties, all blessed with good appetites, eat eggs on toast, hot scones, and other good things at five o'clock tea, and take often an *avant goût* also at seven." In fact, we will venture to assert that more is to be learned from this book about the appetites of "the royalties," past and present, than from any other book of its size and scope in existence. If the young housekeeper is anxious to increase her knowledge in this direction, or to remember, in case of a possible emergency, that it might be a compliment to Mr. Stanley, by way of contrast to the Dark Continent, "to ornament the ball-room with Arctic boulders, around which should be hung the tropical flowers and vines of Africa," it would be well for her to put away 'The Art of Entertaining' for future reference. Otherwise, she may safely let it go where Mr. Henry James says the bad novels go—"to some unvisited limbo, or infinite rubbish-yard, beneath the back windows of the world."

'What To Do' is not a plethoric volume. It is, on the contrary, a thin compilation of seventy small 18mo pages, whose contents are suggestive of exceeding thinness of individuality on the part of those who would be likely to claim their services. Not that we do not hold, with rustic *Audrey*, that it is "no dishonest desire to desire to be a woman of the world." The wish to have the best manners is only second to the wish to have the best feelings, which they should express. Unfortunately, however, these things are not to be come at by dipping into pocket manuals of etiquette. What innate dignity, good feeling, common sense, and observation cannot teach the "plain" man and woman, must be left to time and association. Better an honest admission of ignorance of social forms than the regulations of a *Touchstone* who admonishes gentlemen to stay in their rooms in bath-robes and slippers, and ladies not to eat sweets or rattle their programmes in a theatre.

The Life of Charles Sumner: The Scholar in Politics. By Archibald H. Grimké. Funk & Wagnalls Co. 1892.

Charles Sumner. By Anna Laurens Dawes. [Makers of America.] Dodd, Mead & Co. 1892.

To say our ill things first: Mr. Grimké's book

has been printed with extreme carelessness, as if the publishers had no conscience for the niceties of the printer's art. There are fewer typographical mistakes than in Mr. Grimké's 'Garrison,' in the same series, but we have counted them by scores, and the misspellings and grammatical errors for which the author must be held responsible are many. The book is written in an easy, flowing style that tends to diffuseness and to a vivid rhetoric which is sometimes of doubtful taste, as where we read of Sumner's "mastiff glare and spring," and, in the same sentence, of "his powerful lance." There is a great paucity of dates, with too little definite statement and too much moralizing by the way. The book is not well proportioned: 161 pages are devoted to Sumner's early life before he entered the political field, and only forty pages to the eleven years of active service following emancipation. But this is readily accounted for by the fact that only the first two volumes of Mr. Pierce's unfinished biography were available to Mr. Grimké.

His book is written in terms of hearty admiration. There is more discrimination in the body of it than in the preface, where we are told that "Garrison more than any other man embodied the moral forces of the conflict," while "Sumner was the impersonation of the political movement against the giant evil of the country." But what Sumner really stood for was the moral element in politics, for a hatred of slavery and all caste distinctions not inferior to that of the abolitionists who were his earliest anti-slavery teachers. There was never perfect sympathy between him and the politicians of his party. His interpretation of the Constitution was not that of Garrison, but "Freedom national, slavery sectional." Which was the more accurate need not be considered here, though it might have been in Mr. Grimké's book without impropriety. It was, however, obviously a piece of good fortune that a man of Sumner's force and character could accept the interpretation that allowed slavery no national existence, and make that interpretation the rallying-cry of a political party. But it is noteworthy that his political attitude did not preclude his sympathy with the attitude and agitation that were wholly moral.

Sumner's interpretation of the Constitution in regard to slavery was only a part of his general exaggeration of the national as opposed to the federal aspect of the Government and the rights of individual States. No Republican inherited more largely the centralizing national tradition of the Federalists and Whigs. Mr. Grimké brings out this fact clearly and furnishes it with many illustrations. Those who are interested in coincidences will be glad to read that Sumner sailed for Europe, where his travels were to be wide and his personal connections of the happiest, on the very day (December 8, 1837) on which Wendell Phillips made his great speech against the Lovejoy murder. Mr. Grimké gives a full account of the circumstances of Brooks's assault on Sumner. If Sumner's sense of humor had been greater, he would have wondered at it less, for more exasperating language he could not have used. In the same debate, disclaiming personalities, and insisting that they could not be allowed, he compared Mr. Douglas to a "noisome, squat, and nameless animal," emitting "the perpetual stench of offensive personality."

Miss Dawes's book presents more points of contrast than resemblance with Mr. Grimké's. It is strong where that is weak, and weak where that is strong. It is a much more intellectual book, and a great deal more careful study has gone to its preparation. It gives us much more information, and its information is much more explicit and exact. This is true of Sumner's private life as well as of his public career. The man is made much more real to us, Miss Dawes having had the advantage of her father's acquaintance with Sumner, and perhaps some recollections of her own. Mr. Pierce's two volumes have lain lighter on her spirit than on Mr. Grimké's. Allowing 43 pages to Sumner's life before 1845 and 140 to the years after 1863, she has reversed Mr. Grimké's emphasis and shown her wisdom in so doing. She has written the more masculine book of the two, except, possibly, that she tends to gossip as her rival never does. But she is lacking in the genuine sympathy with her subject which Mr. Grimké has and manifests on every page. The biography that she has written is essentially a work of filial piety. The name of Senator Dawes is mentioned only twice according to the index—once more in fact—while the veiled allusions to him are numerous. But he is visible everywhere between the lines; and to prove that Sumner was not a bigger man, or so very much bigger, is a purpose that is never lost sight of. The effect of this is painful on the reader's mind. He feels that Miss Dawes is writing Sumner down as much as possible. Compelled by his character and his performance to express her admiration, every time she does so the reader finds himself saying, "Now for the depreciation"; and it almost never fails to come. If any trait is exceptionally fine, as, for example, his response to Channing's spiritual genius, she speaks of it as "a side of Mr. Sumner's nature not altogether natural to him." She does not damn him with faint praise, nor hesitate to express her dislike, but she is always hinting faults; the slur and innuendo following her spasms of generosity as inevitably as the night the day. There are several things introduced as rumors which should not have been introduced at all, or without distinct authority. The unkindest cut of all is where Miss Dawes extends a gracious possibility to things she cannot rationally believe, as, for example, that Sumner favored Chase's elevation to the Supreme Court to get rid of him as a rival aspirant to the Presidency. It is a pity that a book into which much faithful work has gone should have these disfigurements. It abounds in admirable matter and in nice discrimination.

The Life and Letters of Samuel Palmer, Painter and Etcher. Written and edited by A. H. Palmer. London: Seeley & Co.; New York: Macmillan. 1892.

It would scarcely be too strong an expression to say that the name of Samuel Palmer is absolutely unknown in this country; and even in England, his native land, his reputation is not much more widely spread. Yet he was an artist worth knowing about, and his son has done well to put on record the story of his career. A much briefer account would have answered all purposes, however, and would, at the same time, one cannot help feeling, have been far more effective in bringing this obscure though interesting artist to the notice of an indifferent and ignoring world. Few persons will care to plod through the 170 pages of memoir, and fewer still the 230 additional pages of letters, in all of which, from beginning to end, there is not a single episode or event of the slightest interest to any one beyond the artist's own family circle or associates. The interest of the life lies in its singleness of purpose, and in the nobility of endeavor to realize ideals maintained uninterruptedly through long years under almost continuous disappointment and failure.

Early in life Samuel Palmer became the intimate friend of William Blake, and the quality of his mind seems much like that of Blake. He had the exalted poetic imagination, and uncompromising fidelity to his own visions, erratic though they might be, if not in the same degree as had Blake, yet of the same kind. But his character was far less rugged and manly. There is much of religion mingled with his art; and the fact that although his ancestors and connections were all the strongest sort of Dissenters (Baptists), while he himself early became an uncompromising Churchman, may serve to throw some light upon the nature of his mind. The things of the Church, old cathedrals, old ceremonials, and all the mediæval life had strong hold upon him. As his biographer says, he approached his work in the spirit of a mediæval monk—as Fra Angelico might have done.

Samuel Palmer tried all his life to paint in oils, but without success; it is as a painter of water colors, and more especially as a teacher in that branch, that his accomplishment lay. His etching was confined to about a dozen plates, which have a considerable reputation. They manifest much knowledge of nature, much power and delicacy of drawing; but, with the exception of the early Shoreham drawings, greatly influenced by Blake, they seem to have been chosen for their adaptability to reproduction, and hardly suggest the intense poetic idealism for which their author is praised. Neither, of course, do they convey any idea of the force and splendor of color which is said to be characteristic of Palmer. Scattered throughout the memoir are many striking passages from his voluminous memorandum books and letters. They show great insight into his craft, for which he maintained to the last a passionate devotion. There are also many incisive criticisms on literary and artistic matters. Not a few of the notes, however, require some acquaintance with Palmer's works in order to be profitable. For example, in this passage—"A mass of shade in centre, with one side hard and the other soft [sketches] as my *Morning of Life;* but in this kind where the clash is between distance and sky, dark must be somewhere else; and, I think, best organized thus [sketch]"—the absence of the illustrative sketches makes the note perfectly unintelligible. The letters, which fill more than half the book, although written in an attractive and original fashion, might well have been much condensed, particularly as many passages which they contain have previously done duty in the memoir.

Imperial Defence. By the Rt. Hon. Sir Charles W. Dilke, Bart., and Spenser Wilkinson. Macmillan & Co. 16mo, pp. 234.

The collaboration of authors in this little book is such as gives the whole a very high authority as a discussion of the question of the vulnerability of the British Empire. Sir Charles Dilke has made the problems of "Greater Britain" peculiarly his own, and, by repeated personal visits and investigations, has made himself preëminent among living English statesmen for an intimate knowledge of all the British colonies. He has shown also an aptitude for comprehending the elements of the larger military questions which grow out of the vast extent of the British possessions.

Capt. Wilkinson has an established reputation for mastery of the theory of army organization. The result is a discussion of the relation of Great Britain to future possible wars which must command the attention of both statesmen and soldiers, and which will be profitable reading for everybody interested in public affairs.

The Afghan frontier of India is taken as the probable theatre of land operations in the next struggle to maintain the Empire, and a topographical and strategic study is made of it at once succinct and clear. The maps are compiled from the latest and best authorities, and make the complicated features of the great divide between the Indus and the Oxus easily understood. Now, as in former generations, the "wooden walls" are regarded as the necessary bulwark of England's safety, not only in her island home, but in her empire which is bathed by every sea in the four quarters of the globe. To keep the navy decisively superior to any combined fleets which might be arrayed against her, is the prime necessity. A better and more independent organization of the army in India is the second.

The relations with Russia are discussed calmly, the conclusion being that, in any European disturbance in the near future, the natural attractions and antagonisms are likely to place Russia and France in opposition to England and the central European kingdoms. As between England and any single Power, Russia is most likely to prove an opponent because the rival interests in the far East are those most likely to provoke collision. The problem is considered from this point of view, aided by all reliable data.

Animal Life and Intelligence. By C. Lloyd Morgan, F.G.S. Boston: Ginn & Co. 1891. 8vo, pp. xvi, 512, illustrated.

By means of this book Prof. Morgan is exerting a considerable influence for good on naturalists of the present generation. In the theoretical and the problematical he is one of the safest guides among modern European writers, and in the main his teachings are of the soundest, scientifically and philosophically. He is a conservative evolutionist, not exactly of the American type, so called, but rather of the true Darwinian. More liberal than the latter, he yet favors selection too much, and effort and reaction, as resulting in hereditary tendencies of greater or less diffusion, too little for the former. Rather than credit selection with the effects not proved to belong to some other factor, the American goes so far as to demand evidence of the supposed struggles for existence, and proof that competition and elimination, instead of simple divergences through use and disuse, have produced the differentiation of particular species. To concede, as Prof. Morgan does of the individuals, that 90 per cent. or more of the species may have been lost through fortuitous agencies, would reduce the extravagant estimates of selection that have prevailed, though not quite enough for those who desire proof that instances in which selection has been the one great factor have not themselves been fortuitous.

Prof. Morgan's position is not open to the objections urged against that of the neo-Darwinians. The three evolutionary agents on which he most relies are (1) elimination through natural selection, (2) selection through preferential mating, and (3) the inheritance of individually acquired modifications. These will sufficiently indicate the lines along which he traces the development of organs and faculties. It was his purpose to deal with animal intelligence. As an indispensable foundation he makes a study of life and its evolution. With the greater portion of this matter we are already somewhat familiar, but not in such a clear and powerful presentation. Necessarily his work involves consideration of prominent theories of origin, and the strength of the author is especially manifest in his critical analyses of their claims for recognition. Their inconsistencies are put forward in such light as will not permit them to be ignored. Of Weismann's germ plasm he says it is an unknowable, invisible, hypothetical entity, which by a little skilful manipulation may be made to account for anything and everything; a myth or mystery of no practical value, and of a character against which biological science should set its face. He points out the impossibility of excluding the possibility of direct action on the germ. In his discussion of Darwin's pangenesis, with its gemmules and unlimited supposabilities in explanations, he asks whether an honest confession of ignorance is not a more satisfactory position. The inability of the advocates of the absolute sway of natural selection to give an adequate answer to the question, "How are particular variations (as in the twisted skull of the flat fish) produced?" also receives attention. Protoplasmic unity and cellular continuity are Morgan's points of departure.

From the consideration of the nature and origin of life and the factors and methods of organic evolution he passes to the senses of animals, mental processes in men and in animals, appetence and emotion, habit and instinct, and finally to mental evolution. The assumptions concerning body and mind which in his opinion yield the most consistent and harmonious results are those of the monistic hypothesis, which assumes the molecular changes of brain activity (neuroses) and the concomitant consciousness (psychosis) to be identical. This is preferred to the materialistic theory that psychosis is a product of neurosis, and to the spiritualistic hypothesis of the existence of conscious beings independent of matter. Neurosis and psychosis are identical, the former being the outer or objective aspect, the latter the inner or subjective. The neuroses have been evolved, through simpler modes of molecular action, from others too simple to be called neuroses, and the psychoses through simpler psychoses from something far back that answers to the subjective side of motion. "Every mode of kinesis has its concomitant mode of metakinesis, and when the kinetic manifestations assume the form of the molecular processes in the human brain [neuroses], the metakinetic manifestations assume the form of human consciousness [psychosis]. . . . Every kinesis has an associated metakinesis, and parallel to the evolution of organic and neural kinesis there has been an evolution of metakinetic manifestations culminating in conscious thought." By making it the metakinetic concomitant of a highly specialized form of kinesis, Prof. Morgan avoids committing himself to the admission either that consciousness is a property of all matter, or that it is something independent of matter. Phenomena are states of consciousness, and cannot for percipients be anything else, but he adds that they have a kinetic aspect; and this, with the initial assumption of a noumenal system of "things in themselves," enables him to avoid idealism.

From the assumed identity of neuroses and psychoses it follows that the history of the development of the mind is practically that of the brain. And as the generic difference between the mind of the brute and that of the man lies in the latter's power of analysis, it again follows that the history of the evolution of the human mind is that of the brain of the animal, plus that of the facilities for abstract thinking. In the case of the lower animal, and of the practical activities of the man, the development is said to be subject to the law of natural selection; but, besides inheritance of individually acquired faculty, a new law, that of elimination through incongruity, is put forward to account for mental evolution when the neural processes become capable of originating metakinetic hypotheses, theories, interpretations of nature, moral ideas, and religious conceptions. Incongruity here means little else than uselessness, and American thinkers will account for the evolution of the higher phases, as of the lower, by aid of the laws of use and disuse and of heredity, with less assistance from selection than is invoked by our author in either case.

Space will not permit us to give an adequate idea of the depth of the author's researches, the cogency of his arguments, or the attractiveness of his style. We can but add that there are few works on the subject so deserving the attention of our students.

The Evolution of Christianity. By Lyman Abbott. Boston: Houghton, Mifflin & Co.

This book attempts "to restate the eternal yet ever new truths of the religious life in the terms of modern philosophic thought." This is done in the hope that Christian faith may be made thereby "more rational and credible." But Dr. Abbott, as is well known, repudiates a good part of historic and current Christian theology, and hence the reconciliation of his personal religious beliefs with the evolutionary philosophy may leave the faith of the generality untouched. On the scientific side, on the other hand, he confesses himself a "non-expert." There must necessarily, therefore, remain much doubt of the authority of his exposition of the faith of the historic church or of the implications of evolution—much more of his right to declare the two identical.

But there can be no doubt of the ability and attractiveness of these lectures, nor of the fact that they represent the direction in which a great many thoughtful Christians are moving. We can well believe that the positions which Dr. Abbott here assumes will be welcomed, as he hopes they will be, by not a few as a way out of their mental perplexities. The question arises, however, whether every such successive "reconciliation" of Christianity with science or philosophy does not by so much break down the distinctively supernatural claims of the former. What becomes of the independent and sufficient sanctions of a system of religious thought that is ductile under the pressure of each new prevalent form of philosophic speculation? How much more permanent can an evolutionary Christianity be expected to be than a Christianity run into the moulds of Greek philosophy? Martineau has acutely observed of Butler's 'Analogy' that, while admirable as an argument to close the mouths of the Deists, it was really in direct opposition to the accepted view of Christianity as something quite apart from and superior to nature. That Dr. Abbott can save "the eternal truths of the religious life" in an evolutionary philosophy is undoubtedly true; they could be saved under any philosophy which did not blink the facts of human nature. Whether he

has given new strength to a particular way of conceiving of those truths by hitching it to the doctrine of evolution, is another matter.

A Course of Experiments in Physical Measurements. Part IV. By Harold Whiting. Boston: D. C. Heath & Co.

Two parts of Dr. Whiting's work have already been noticed in this journal. The part before us consists of an appendix for the use of teachers, and, from its point of view, is one of the most elaborate works which have been published. The author begins by stating in sufficient detail the necessities of a physical laboratory, as regards the building and its permanent furniture, position, exposure, and mode of heating. Two plans are given, one of which is, we believe, substantially identical with one in the upper story of the Jefferson Physical Laboratory at Cambridge, which has been found to be extremely well adapted to its purpose. A long list of apparatus follows, general descriptions being given in many cases, as well as prices of instruments sufficient at least for purposes of instruction. The third appendix, or chapter, treats of the subject of expenses, and Dr. Whiting gives his estimate of the total cost of the apparatus described in his list as from $300 to $500. This chapter contains a good deal of detail of great value to instructors and based upon much experience. The subject of instruction comes next, and here we find sound practical advice as to what may be called the detail of teaching, the proper mode of keeping systematic note-books containing a full account of the experiments made and also of the calculations involved. In appendix v, we have a very large number of experiments and calculations taken from actually reported students' work, and giving a better idea of the kind and grade of Dr. Whiting's teaching than could be gained from many pages of mere description. Appendixes vi, vii, and viii contain lists of experiments intended to cover the ground required for admission to Harvard College under different conditions. The remaining chapters are chiefly mathematical and do not require special notice here. The subject of the probability of errors is treated at length and very clearly. Dr. Whiting's work cannot fail of a cordial reception among students as well as among teachers. It is very gratifying to those who were educated by the old system of ex-cathedrâ lectures to mark the progress of modern methods of instruction.

BOOKS OF THE WEEK.

Barrie, J. M. My Lady Nicotine. M. J. Ivers & Co. 25 cents.

EDUCATIONAL REVIEW.

ARTICLES.—The Educational Policy of the Stanford University, David S. Jordan; The Teaching of Geography, II., William M. Davis; Values in the Education of the Deaf, Edward M. Gallaudet; Notes on Educational Method, Harry K. Wolfe; Public School Pioneering: A Reply, George H. Martin; Compulsory Education in the United States, II., William B. Shaw; Results under an Elective System, I., Richard G. Boone.
DISCUSSIONS.—College Entrance Requirements in English, James E. Russell; Higher Education in Arkansas, A. C. Millar.
EDUCATION IN FOREIGN PERIODICALS.—A New Method of Teaching Modern Languages.
Reviews. Editorial. Authorized Announcements.

35c. a number: $3.00 a year (monthly except July and August). Condensed Table of Contents of Vols. I., II., and III. free.

HENRY HOLT & CO., N. Y.

Our new **Book Catalogue** not only gives the size and price of all the standard works on Homœopathy, but an interesting description of each, together with opinions of the press and of physicians. Mailed free.

BOERICKE & TAFEL,
Homœopathic Pharmacists and Publishers,
1011 Arch Street, Philadelphia.
Established in 1835.

Letters of Credit. We buy and sell bills of exchange on and make Cable Transfers of money to Europe, Australia, and the West Indies; also make Collections and issue Commercial and Travelers' Credits, available in all parts of the world.
Brown Brothers & Co., Bankers,
NO. 59 WALL STREET, NEW YORK.

FOR RENT, FURNISHED—8 ROOM Cottage at Prout's Neck, near Portland, Me., close to sea. JNO. T. SINNOTT, 125 South 5th St., Philadelphia.

REMOVAL.
Anson D. F. Randolph & Company,
INCORPORATED,
PUBLISHERS, BOOKSELLERS, AND STATIONERS,
Owing to the taking down of their former premises,
Have Removed
to the eligible site,
182 FIFTH AVENUE,
Three doors below 23d St.,
NEW YORK.

EUROPEAN SUMMER AND WINTER Resort, University town of Innsbruck, Tirol, Austria; 1,900 feet above the sea, with dry, bracing climate. Hotel Tirol, open all the year, Carl Landsee, Proprietor. Large, airy, sunny rooms, well furnished. Elevator. Superior cuisine (table d'hôte or à la carte). Reduced rates in winter. Carriages and sleighs at low rates. Charming excursions made from the hotel at all seasons. Unusual advantages for securing teachers of the languages, history, science, art, music, etc., at very moderate terms. Eminent medical care and skilled nurses if desired. Best English and American references. Illustrated pamphlets sent on application.

FOR SALE.
OLD CHINA.
Historical Plates, Pitchers, Etc.
Economical collectors save 50 per cent. Address Box 161 Albany, N. Y.

Exhaustion.
HORSFORD'S ACID PHOSPHATE.
A wonderful remedy, of the highest value in mental and nervous exhaustion.
Overworked men and women, the nervous, weak, and debilitated, will find in the Acid Phosphate a most agreeable, grateful, and harmless stimulant, giving renewed strength and vigor to the entire system.
Dr. Edwin F. Vose, Portland, Me., says: "I have used it in my own case when suffering from nervous exhaustion, with gratifying results. I have prescribed it for many of the various forms of nervous debility, and it has never failed to do good."
Descriptive Pamphlet free.
Rumford Chemical Works, Providence, R.I.
Beware of Substitutes and Imitations.
CAUTION: Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

"The weary brain requires some nerve sustaining element as food."—HERBERT SPENCER.
Crosby's Vitalized Phosphites.
The vital principle of animal and vegetable life isolated from the ox brain and wheat germ.
The loss of memory, the tired and exhausted feeling, the dull, unrefreshed sleep, or nervous sleeplessness, brain weariness, depressed vitality, are simply the brain and nervous system calling for their necessary food. In this condition the Vitalized Phosphites give great relief. It restores the true protagon, the brain phosphoid, increases brain and nerve power by specially feeding the nerve centres. It reinvigorates brain and body.
For thirty years endorsed by leading physicians and the world's best brain workers. Formula on the label. Pamphlet free to those who write for it. Druggists or by mail, $1.00. 56 W. 25th St., N. Y. *F. Crosby Co.*

NOW READY:
THE ERL QUEEN.
By NATALY VON ESCHSTRUTH, author of 'The Wild Rose of Gross-Stauffen.' Illustrated. 1 vol., 12mo. Cloth, $1.25; paper, 75 cents.
A poetic love story, brilliantly told.
WORTHINGTON CO., 747 B'way, N. Y.

Buffalo Lithia Water, the Natural Solvent. Effective remedy for Gravel.—*Advt.*

"GLOBE-GIRDLING TOUR."
Chaperoned by a Physician. Low Cost. Address E. B. BLANCHARD, 143 W. 104th St., New York.

The Nation.

NEW YORK, THURSDAY, JUNE 16, 1892.

The Week.

THE selection of Major McKinley for permanent Chairman of the Minneapolis Convention was altogether fitting. He represents the policy that led the party to the direst disaster in its history. It was McKinley and Reed to whom Senator Ingalls referred in his dying agonies on the 5th of February, 1891, in these words:

> "Those leaders who have conducted the most powerful political organization in American history to the most stupendous and overwhelming disaster recorded in its annals, should be able to forgive those who doubt the infallibility of their judgment. If they are wise, they will be less proscriptive and more tolerant of differences of opinion, especially among those whose devotion to human liberty cannot be questioned, and whose constancy and fortitude have been exposed to tests as severe at least as any they have ever known."

A man whose chief distinction it is that he was the instrument selected by the protected classes to work out the most exorbitant piece of tariff robbery the country ever experienced, and by the same token caused a change of 172 seats in Congress against his party, might be fitly chosen to preside over the Convention, if the party had not yet recovered its senses from that concussion. What McKinley said upon taking the chair was commonplace in the extreme, and has been repeated by him a hundred times. "We propose to raise our money for public expenses," he said, "by taxing the products of other nations rather than by taxing the products of our own." Why, then, was the duty on raw sugar repealed? That is the product of other nations. We received fifty millions of revenue from those sugar-producing countries, according to the McKinley idea, by taxing their products. The Treasury is sadly in want of that revenue at this time. There will be abundant opportunity between now and November for McKinley and others to explain why they thus exempted foreigners from a tax of fifty millions which the said foreigners had been paying for many years without the slightest complaint.

The most humorous feature of the Minneapolis Convention was the spectacle of "glorious Tom Reed" booming himself for the nomination. The ex-Speaker conceived the idea that he was the ideal candidate for his party some time ago, and for weeks past he has been buttonholing every Republican from any part of the country whom he could get hold of, and begging his support. As the movement for his nomination did not appear to be making much headway, and threatened to disappear entirely unless carefully looked after, he concluded to go to Minneapolis—although not a delegate to the Convention—and manage it himself. The personnel of this Convention was the poorest ever seen in a national gathering of the Republican party, and Mr. Reed was, perhaps, warranted in thinking that it would disregard the indecency of such a performance. The result, however, was such as to remind him how small a person he is away from the scene of his arbitrary career as Speaker of the House.

Considered as "practical politicians' (for they all claim that title as their highest distinction), Messrs. Quay, Platt, and Clarkson return from Minneapolis in a very sorry plight. They formed a "combine" for the openly avowed purpose of "knocking out' the President because he had not given them as much patronage as they thought they deserved. They declared to the whole United States, several times a day for a month, that they had come to the conclusion that the President should not be renominated, since they did not consider him "available." After searching about for a candidate for some time, they finally concentrated on Blaine and began their campaign for his nomination. Anything more childish than this campaign proved to be has never been witnessed in this country. The members of the "combine" announced, two weeks in advance of the Convention, that they were going to stampede it for Blaine. Then they went to work, not merely to defeat the President, but to attack his record in office, and to assail that of his associates in the Cabinet and his leading supporters everywhere. Then they induced Mr. Blaine to resign from the Cabinet in the very manner and at the very time best calculated to injure their own cause and create sympathy for the President. Then, when they reached the Convention city, they continued their brass-band tactics daily by announcing in advance every move that they intended to make. Finally, when their bogus Blaine boom collapsed, they announced, again in advance, that they were going to concentrate on McKinley and stampede the Convention for him.

The Republican platform is not received with much heartiness by Republican newspapers. There is nothing inspiring about the Force-Bill and McKinley-Law planks, while the silver plank is characterized by the Philadelphia *Ledger* as "a most unwise, timid, evasive one." As to this question the *Ledger* declares that it was "most essential that the Republican party should place itself squarely upon record concerning it," whereas what it has done is to "hang out a two-sided shield—the one, facing North and East, of gold; the other, facing South and West, of silver." The weakness of the plank is shown by the fact that it is hailed with delight by the free-coinage men in the party. Senator Teller of Colorado says that "it is the most complete declaration in favor of the use of silver as money that has yet been found in any platform since the question has been one to be considered in national politics"; and further that "it is an outspoken declaration in favor of the double standard as against the gold standard, and will result in the ultimate use of silver on terms of perfect equality as to mintage and legal-tender functions with gold."

As regards the Force Bill issue, what the platform says will hurt rather than help the party in the North, while it will weaken it in the South. Every intelligent man knows that the Force Bill is dead, and that even the perfunctory reference to the subject in the platform really signifies nothing. The more progressive element rejoiced over the defeat of the measure in a Republican Senate last year, and resent even the intimation that an attempt will be made to revive it. On the other hand, the mere intimation will suffice to keep the South solid against the Republican party. The whites of the South know that, if Harrison is reëlected and a Republican Congress with him, an attempt at least will be made to pass a law every whit as obnoxious as the one pushed in the Fifty-first Congress. The threat is of itself enough to remove the last chance that the Republicans will carry any Southern State this year.

It is already apparent that a leading Republican argument in the coming campaign will be an appeal to those who want the tariff let alone, not because they like it, but because they have now adjusted their business to it and would prefer no further unsettling. The McKinley Bill may be mischievous in many particulars, so runs the argument, but business men now want no further agitation of the question, and should vote for President Harrison because they know that no tariff changes could be made during his term of office. The history of the last twelve years shows that this is but a crying of peace when there is no peace. All the tariff changes that have been made in that time have been made by Republicans, and have been made just after their loudest shrieks against the wickedness of the Democrats in proposing to meddle with the tariff and disturb the business community. Garfield was elected in 1880 largely on the strength of the "business men's campaign," which was based upon the tariff scare, and the new tariff of 1883 came along just the same. The election of 1888 was for ever to put an end to inconsiderate tinkering with the tariff, but only led up to McKinley's monstrosities. The

Republican party has no power to guarantee tariff stability. McKinley himself is on record as saying that certain articles —binding-twine, for instance—need more protection than he was able to give them, and it is certain that if the Republicans come into power again, there will be a new rush for the tariff spoils. It will be remembered that the *Tribune* was promising no end of Republican tariff bills if the Force Bill were passed. Even in Republican hands the tariff has always been in a state of unstable equilibrium, and always will be. Moreover, no question can be permanently settled until it is settled right.

The general effect of the six Democratic State Conventions which chose delegates to the Chicago Convention last week—viz., Maine, Maryland, Mississippi, Montana, Texas, and Alabama—has been to strengthen the already practically certain prospect of Mr. Cleveland's nomination. While there have been no positive instructions for him, save possibly in Alabama, all the delegations of the other five States have a majority in his favor, and all of them have been elected on platforms warmly commending his Administration as President. There is very little left of the opposition to him now, and there is likely to be even less when the Convention meets. The only argument which is advanced by his opponents is the parrot cry, "He cannot carry New York." This is weakened badly by the fact that the opponents of Harrison in the Republican party are making the same objection to his candidacy. Each of the two great parties seems determined now to nominate a candidate who "cannot carry New York." Somebody must carry it, and, if the prophets of evil are to be trusted, the Prohibitionists would seem to be in the presence of the opportunity of their lives.

Public interest having been centred in the Minneapolis Convention during the last week, little notice has been taken of what occurred in Congress. A rather important vote was taken on Monday week on a bill introduced by Mr. Richardson of Tennessee to repeal the 10 per cent. tax on State-bank notes. The bill had not been referred to any committee, but Mr. Bacon, the Chairman of the Committee on Banking and Currency, said that a similar bill was now under consideration by his Committee. He begged that the House would not pass the bill until the Committee should have concluded its labors. Mr. Richardson advocated the measure in a brief and temperate speech, in which he said that its effect would be to give more relief from money stringency than the free coinage of silver, and that it would answer the wants of the farmers much better than the so-called sub-treasury scheme. Mr. Walker of Massachusetts opposed it on the ground that the bill was the product of only one mind, that it had been prepared in haste, and that the subject was too important to be disposed of in such a summary manner. Mr. Harter of Ohio supported it. He contended that inasmuch as State-bank notes would not be legal tender, they would not circulate unless they were actually good. Mr. Tracey of New York was in favor of the repeal of the discriminating tax, since it was, in his judgment, an invasion of the rightful domain of the States. The vote on the bill was 84 yeas to 116 nays. Sixty-four of the affirmative votes were from the South and twenty from the North. The Farmers' Alliance men from the South voted against the bill, believing that it would tend to weaken the sub-treasury scheme. Of the affirmative votes from the North, Illinois furnished four, New York three, Ohio two, California two, Minnesota two, Massachusetts, New Hampshire, Montana, New Jersey, Pennsylvania, Rhode Island, and Connecticut one each.

It will be remembered that in the case of Morris against Bulkeley for the Governorship of Connecticut, the Court sent it as well as the Phelan case back to the lower (Superior) Court for trial as to the facts. In its opinion last January the Court used these words:

"From the facts spread out in the information it appears not only that the election process has broken down, so that there is a failure to elect a Governor, but that all legislation has ceased. Owing to the difference between the branches of the Assembly, an entire collapse in the Legislative Department has ensued. . . . In these circumstances is it not possible that the Superior Court may make an investigation, and, on finding that the relator received a majority of all the votes lawfully cast for Governor on the 4th day of November, 1890—whatever the returns of the presiding officers may show—establish his title to that office by some judgment that shall be legally equivalent to the declaration which should have been made by the General Assembly? . . . By the defects in legislation already mentioned, the will of the people in this respect has failed to be accomplished. A very great wrong is being done to them. The relator claims to have received a majority of all the votes cast for Governor at said election. If his claim is correct, a great wrong is being done to him. He has come into court seeking to establish his right to that office and to obtain redress for that wrong."

Under this finding the complaint of Phelan, who had received 544 majority over all on the face of the returns, was duly amended, and started again in the lower court several months ago. It was met at every step by vexatious tactics of delay on the part of the Republican lawyers.

When at last, about a month ago, it reached its formal trial as to the facts, the task incurred was prodigious. Some 600 witnesses, a number unparalleled in a Connecticut lawsuit, had to be summoned, the court held in several parts of the State, ballot-boxes opened and thousands of ballots examined. At the close of the case in the lower court a few days ago, the Supreme Court of the State was asked by Phelan's counsel to hear argument on appeal in July, and, exercising its discretion, and without giving public reasons, it has just refused and adjourned until next September. In other words, the supreme tribunal of an old New England commonwealth, in spite of the privileged nature of election cases, in spite of the rapid expiring of the tenure of the office in litigation, and in spite of its own earlier decision and its emphasis of the "great wrong" done, deliberately postpones for months opportunity for justice for Mr. Phelan, whose election from the first hardly a single Connecticut Republican has denied, who was voted for at the election of 1890, and whose term, if now in office, would expire less than seven months hence. We doubt whether such a palpable injustice under the discretion of a high court has its parallel in the annals of American litigation.

The report of the New Haven Coroner who investigated the circumstances under which a Yale student—Wilkins Rustin—came to his death, contains a severe reflection upon the Yale Faculty. The Coroner finds that the death was due to the carelessness of boys conducting an initiation into a secret society, but that this carelessness was purely the result of boyish fun, and not such as is regarded by the law as criminal. But he further finds that no restraint has been put upon the modes of initiation, that they have entirely exceeded the bounds of reason and propriety, and are often dangerous to health and life. He recommends that the Faculty take the matter in hand, or, in default of their action, that the proper authorities take such measures as will prevent further practices of this nature. It is very much to be regretted that the Yale Faculty have allowed themselves to be placed in a position where they will appear to have been forced to take action which they might better have taken voluntarily. There has never been a time when the absurd barbarities and personal indignities practised by college boys on one another could not have been stopped by the authorities at Yale had they chosen to exert their power. In some colleges the Faculty have wisely coöperated with the students in organizing self-government, and the experiment, we believe, has been attended with perfect success. There is no question that if the feeling of Yale students at large could be fairly taken, it would condemn all practices involving their own personal maltreatment or humiliation, and it would probably be wise for the Faculty to take advantage of the profound emotion aroused by this shocking occurrence to procure an expression of the real sentiment of the College. It was supposed that "hazing" had been for years extinct at Yale, and the discovery that these stupid and brutal modes of initiation had come to be adopted by junior societies, among which in former years there was nothing of the kind, is an extremely disagreeable surprise to Yale graduates.

The decision in the Schuyler monument case just rendered by the General Term is wholesome law applied to a state of facts remarkable if not unique. The Women's Memorial Association wished to erect a statue at the World's Fair to a "typical philanthropist," and selected the late Mrs. Mary Hamilton Schuyler as the subject. Her family objected, but were forced to carry their objection to a court of equity, which has now enjoined the Association from carrying out its intention. It is not probable that the case will be of much use as a direct precedent, for the conjunction of an earnest wish to spend money to blazon an honored name, and a sturdy opposition on the part of its guardians, is not likely to recur in an age in which monumental reputations are hardly won and tardily recognized, and of which modesty is not a ruling passion. The point actually decided is, that a woman who, without ostentation, travelled far on the royal road of philanthropy, need not be subjected after her death to a notoriety she would have shunned when alive. The principle of law which seems to be laid down is that there is such a thing as a family sensitiveness of which members of the family are the guardians, and that it is possible to outrage this feeling by a pretentious expression of admiration for the character of a deceased member. So far as this particular case is concerned, there is an appropriateness of law to fact which will be recognized by all who maintain that, whatever of self-assertion may comport with feats of war and statesmanship, modesty should be ever the handmaid of philanthropy.

It was intimated in the opinion of the court below that Mrs. Schuyler could not be fairly considered a "public character," and that, therefore, her name and memory were in no sense the property of the public. The inference from this argument is earnestly combated by Judge Van Brunt, who says, "The claim that a person who voluntarily places himself before the public, either by accepting public office or by becoming a candidate for office, or as an artist or literary man, thereby surrenders his personality while living and his memory when dead to the public, to be used or abused as any one of that irresponsible body may see fit, cannot for a moment be entertained." The good taste of this *dictum* is manifest, but its vigorous expression may create the impression of a broader statement of law than we believe warranted or intended. Let it be admitted that if a soap-boiler proposed to erect a monument to a great warrior as an advertisement of his wares, his family, if not the public, might well enjoin so shocking a breach of propriety. Admit, further, that the erection of an honest memorial to such a man might be so pressed by begging or other methods detracting from the spontaneity of the tribute as justly to offend the sensibilities of his family. But let the memorial be a respectful tribute cheerfully offered to a public character who has deserved well of his country, and family opposition, if conceivable, should and would be brushed aside as a morbid fancy.

The strike of the coal-miners in the Durham district in England has been in many ways so disastrous as to make it a matter of international interest. Of course the 65,000 miners were not alone affected, for the cessation of the supply of coal caused a great advance in its price, so that the poor in many places suffered from their inability to buy fuel. Then the ironworks dependent on the Durham mines for coal were obliged to close, and 100,000 people dependent for their support on the wages paid in these works were thus reduced to such destitution as to call for alms from the charitable. The strike has been represented by many journals as due to the greed of the masters, and this has been the claim of the miners. But in fact, in 1879, after a great deal of trouble, a sliding scale of wages was agreed upon by both parties, wages to vary with the price of coal, and since that time under this scale the wages of miners have risen 35 per cent. But the price of coal having fallen, the masters gave notice this spring that wages would be reduced 10 per cent., the sliding scale really calling for a reduction of 11¼ per cent. Against this application of the agreed scale of wages the men struck, and their disposition to resist any reduction of wages was naturally aggravated by the fact that a further fall in the price of coal justified a reduction of wages by 13½ instead of 10 per cent. This percentage, however, is calculated upon the wages of 1879, and amounts to but 10 per cent. of the present wages, and that part of the wages paid which consists of free houses and coal suffers no reduction.

It seems, therefore, that the strike was a violation of a long-standing agreement, and there was nothing that could properly be submitted to arbitration, although it was repeatedly proffered by the masters and refused by the men prior to the strike. The men having deliberately chosen to resist by force all reduction, even to the drowning of the pits, the masters maintain that the subsequent call for arbitration on the part of the men came too late, although they profess willingness to refer disputes about wages to arbitrators in the future. Upon the whole, it seems that the strike not only was a breach of faith, but was doomed to fail from the beginning, and its effects have been, therefore, in every respect injurious, unless the reduction in the stock of iron be regarded as a gain. So far as the interests of working people are concerned, it has been a piece of criminal folly on the part of their leaders.

Both France and Spain are already sick of the war of tariffs which has been raging between those two countries since February, and a *modus vivendi* has been agreed upon whereby, pending further negotiations for a permanent treaty, the minimum instead of the maximum rates of duty shall be mutually put in force. In April the exports of Spain to France fell off 70 per cent. from the monthly average of 1891, and the exports of France to Spain 40 per cent. Moreover, as the *Figaro* has pointed out, Frenchmen have been heavy losers by the great depreciation of Spanish securities and industrial stocks as a consequence of the disturbances in trade caused by the tariff. It declares that "we are really the ones who have been conquered, inasmuch as on the one hand we hold the larger part of those depreciated securities and have lost the difference in price, and on the other have been led to ask the Spanish Government for the minimum tariff in return for ours." These are some of the gratifying forms of the "growth abroad" of the American doctrine of protection to which the Republican platform "calls attention."

The relations between Bulgaria and Turkey, which had been somewhat strained by the murder of the Bulgarian Minister at Constantinople and the events that followed, were apparently subjected to severer tension by the conduct of the Bulgarian authorities in liberating the Armenians arrested in connection with the Rustchuk conspiracy. The object of these conspirators was the liberation of Armenia from Turkish rule, and the course of Bulgaria was a warning to Turkey that it was not wise for the latter Power to countenance conspiracy. It seems, however, that the spirited attitude of Bulgaria has impressed the Porte, and it has made suggestions that not only indicate a disposition friendly to the rising Power, but are also of importance to the commercial world. These suggestions relate to the construction of a railway uniting Sofia with Salonica, which the Porte has hitherto opposed, owing to its apprehension concerning Bulgarian designs on Macedonia. The conditions now proposed by Turkey amount to a consent to the railroad, which, whether politically advantageous or not, will be of inestimable value to Bulgarian commerce. The country is really rich, and this opportunity for trade will be at once appreciated in Europe. The result can only be to strengthen the bulwark already erected against Russian aggression by giving the Bulgarians a basis of supplies in Europe, and their Government will purchase these great advantages very cheaply by consenting to keep the recently liberated Armenians under surveillance. According to the London *Times*, the new railroad will either follow the Struma valley to Seres, connecting with a line to be constructed from Dedeagatch to Salonica, or will pass by Kustendil to a point on the Nish-Salonica Railroad south of Uskub.

THE NOMINATIONS AND THE PLATFORM.

THE renomination of President Harrison was anticipated by everybody who has had an impartial eye for the proceedings of the Convention at Minneapolis. Now that it has come, it takes nobody except the Blaine shouters by surprise. These are not merely silenced—they are dumbfounded. Their candidate never ran so badly in a national convention where he was an avowed candidate. His supporters were reduced to the necessity of bringing a third candidate into the field—that is, of virtually dropping him—in the hope of defeating Harrison. The result is extremely mortifying, since it shows him at least 150 votes weaker than he really was. It sends him into obscurity not only defeated, but disgraced. Nobody can be disgraced except by his own acts, but Mr. Blaine has supplied all the materials needed for the purpose. He wrote and published a letter taking himself out of the race. He then belied his own pledge, and resigned the leading place in President Harrison's Cabinet in order to give desperate battle to his chief in a place where he had said that he would not be found at all. Such an act, followed by a stunning overthrow like that which he has now received, would politically crush any man in the world. Even if Mr. Blaine were in the prime of life, he could not recover from such a blow.

It is true that Mr. Harrison's nomination has not been received with enthusiasm. This is partly because it has been anticipated for two years, and partly because Mr. Harrison is not a man to rouse enthusiasm. He has a cold exterior. His handling of the public patronage has made him four or five enemies to one friend, and has not won the admiration of anybody who has not been a recipient of it. The mammon of unrighteousness has served him badly, as it does all those who put their trust in it. Nevertheless, the lack of momentary enthusiasm must not be counted upon as any great factor in the campaign. Mr. Blaine's nomination would have gained more cheers, but he would not have run so well as Harrison. This is proved by a comparison of the votes cast for them respectively in 1884 and 1888. Mr. Harrison has better staying qualities than either Blaine or McKinley. The nomination of Mr. Whitelaw Reid for Vice-President will neither add to nor subtract from the popularity of the ticket, as may be said of most Vice-Presidential nominations.

The first thing to be noticed in the platform adopted at Minneapolis is that it contains no endorsement of the McKinley tariff. "The American doctrine of protection," as it is curiously called, is reaffirmed and "attention is called to its growth abroad"—another curiosity. How, we beg to inquire, can the *American* doctrine of protection grow abroad, seeing that the doctrine of protection had its origin long before there was any American Government? Is the American doctrine of protection different from the German or the French? and if so, when did Germany and France abandon their own and adopt ours?

The reciprocity plank is marked by the same simplicity as the tariff plank. Reciprocity is spoken of as "a Republican policy," in the same way that protection is spoken of as an American policy. The truth is that reciprocity and protection are contradictory terms, and were so understood at the time when Mr. Blaine declared of the McKinley Bill that it would not make a market for another bushel of wheat or another barrel of pork.

Of more importance than either of these is the silver plank, which deserves to be quoted in full:

> "(3.) The American people from tradition and interest favor bimetallism, and the Republican party demands the use of both gold and silver as standard money, with such restrictions and under such provisions, to be determined by legislation, as will secure the maintenance of the parity of values of the two metals, so that the purchasing and debt-paying power of the dollar, whether of silver, gold, or paper, shall be at all times equal. The interests of the producers of the country, its farmers and its workingmen, demand that every dollar, paper or coin, issued by the Government, shall be as good as any other. We commend the wise and patriotic steps already taken by our Government to secure an international conference to adopt such measures as will insure a parity of value between gold and silver for use as money throughout the world."

The "straddle" here consists in saying nothing about the intrinsic value of the two dollars, but apparently leaving each voter to determine for himself how parity shall be maintained. We say apparently, because in reality the platform decides this question in favor of the silver cranks and the mine-owners by introducing the words, "to be determined by legislation." The restrictions and provisions to maintain the equal value of the silver dollar and the gold dollar are not those of weight and fineness which are commonly called intrinsic value; they are to be determined by legislation—that is, they are to be determined as they are now determined. But the word legislation has acquired a new significance since this Convention met, and since Senator Jones declared that the silver question ought to be settled by Congress, and not by a Presidential veto, and said that he was for Blaine because Blaine would not veto a free-coinage bill. Words to the same effect are to be found in one of Senator Teller's recent speeches, and it happens that both Jones and Teller were on the sub-committee which framed this silver plank. In strictness of speech the word "legislation" embraces both Congress and the Executive. Yet it is not to be doubted under these circumstances that an indirect command was sought to be given to the President by this resolution not to veto a free-coinage bill. If the hands of Gen. Grant had been tied in this way, he might have considered himself instructed not to veto the Inflation Bill of 1874, and thus might have failed to do the act which, of all others, brought most renown to his Administration and rendered most service to the country.

THE ELECTION AND THE SECRET BALLOT.

A REPUBLICAN politician from this State was credited with saying at one of the confidential meetings of delegates, held during the session of the Minneapolis Convention, that his party spent a large sum of money in carrying New York for Harrison in 1888, and that it must be borne in mind that a similar expenditure in 1892 would be impracticable because of the Secret Ballot Law. Whether this statement was actually made or not, we are unable to say. The report that it was has been circulated widely for a week or more, and has not been contradicted. That it might have been made, no one who is familiar with the methods pursued by Quay, as Chairman of the Republican National Committee in the campaign of 1888, will question. A similar remark might have been made with equal truth of Indiana, both as to the expenditure of money for "blocks of five" and other purposes, and as to the impracticability of repeating such expenditures this year.

We doubt if many persons realize the full significance of the fact that our next Presidential election will be the first one in the history of the country to be decided by an absolutely secret ballot. There are now thirty-five States, more than three-quarters of the whole number, which have new ballot laws upon their statute books. With the exception of New York, New Jersey, Pennsylvania, and Connecticut, all these laws are reasonably good applications of the Australian system of voting. That is to say, they provide for a secret, official, blanket ballot, to be obtained only inside the polling-places, and provide also for absolute secrecy of voting. The four exceptions named are all defective in various ways, because all of them were drawn by enemies of genuine ballot reform, but, in spite of their defects, even these four laws provide for absolute secrecy in the act of voting. In no one of the thirty-five States which have adopted new laws can a voter be followed to the polls by a briber, or a bulldozer, or an intimidator, or a boss, to see how he votes. Every one of the laws severs completely the connection between the voter and the man who seeks in any way to influence his vote, at the critical moment before he is to prepare and deposit his ballot.

What this isolation of the voter will accomplish in Indiana, for example, need not be pointed out. No "blocks of five" can be marched to the polls in that State on election day with their ballots held in sight of the man who has bought them till they are dropped into the ballot-boxes. What the same isolation will accomplish in great manufacturing centres is equally obvious. There can be no intimidation of employees in any part of New England, or Ohio, or Indiana, or New Jersey, or New York. No workingman need fear loss of employment if he votes in ac-

cordance with his own beliefs and against the "interests of his employer," for his employer cannot see how he votes. In the list of the thirty-five States which have the new system are to be found all the so-called "doubtful States," and all those States in the Northwest, like Iowa, Wisconsin, Illinois, Michigan and Minnesota, in which the tariff-reform sentiment has made such havoc with old-time Republican majorities. In all these States there is to be a free and untrammelled and absolutely secret ballot for the first time in a Presidential election, and Republican politicians will be wise to take the hint of their New York associate, quoted above, and calculate increased difficulties for their party to encounter because of this fact.

In the great cities of the land, there is another gain from the new system which is as important as that of the secret ballot. "Trading" and "deals" will be practically impossible, because of the difficulties which are thrown in their way. In this city and Brooklyn, for example, the Democratic electoral ticket must be printed on the same ballot with the Democratic local nominations, and the Republican electoral ticket must be printed on the same ballot with the Republican local nominations, and all ballots must be printed accurately, because all must be printed by the sworn officers of the counties. "Mixed" or "split" tickets, in the interest of a "deal"—that is, Republican Presidential electors and Tammany local candidates — will be impossible, except through the use of large "pasters," which would be detected instantly, and would thus expose the "deal" to the gaze of all men. As secrecy is the prime requisite of every "deal," since neither party to it wishes to have its treachery proved, the law furnishes a practically complete obstacle. Furthermore, since the law puts into the hands of every voter a straight party ticket, giving to every Tammany man the electoral ticket and the Tammany ticket combined in one, if the count shall show that the Democratic electors poll a smaller vote than the Tammany local candidates, the proof of treachery will stand revealed on the face of the returns. The same showing will be made also by the returns for Republican Presidential and local candidates.

It follows from all this that corruption and trickery must perforce play a far less important part in the approaching Presidential election than they have played in many preceding ones, and especially in that of 1888. Quay and Platt and Clarkson may find in this fact a fresh explanation of President Harrison's willingness to divest himself of their services, as he had previously divested himself of further services from Dudley. It is surely going to be more difficult for either party to use in the closing days of the campaign, including election day itself, a vast corruption fund like that which Mr. Wanamaker raised for Quay to use in behalf of Harrison in 1888. Other agencies for securing votes must be sought, and other managers than professional corruptionists and traders must be put at the head of the party organizations to conduct the campaign. It will be wise for both parties to take this change in the situation into account in selecting their campaign managers. With money as an influence put in a secondary place, argument and reason will come into the front place as the deciding factors of the contest, and the party which has the man at the head of its campaign organization who is best able to direct forces of this kind will stand the better chance of winning at the polls. It will be an incalculable gain to American politics to have the professional corruptionists of both parties removed from the control of their campaign machinery.

TROUBLES OF AMERICANS IN TURKEY.

ONE of the meetings at the annual missionary conference at Clifton Springs, N. Y., last week, was given to the consideration of the grave condition of affairs which now confronts American missionaries in Turkey. Dr. Cyrus Hamlin, ex-President of Robert College, in his address greatly blamed the United States Government for its "failure to protect the lives, property, and treaty rights of its citizens in Turkey." As at least nine-tenths of the work of our legation in Constantinople is concerned with the affairs of the missions, it fails lamentably in its duty if it fails as thus alleged.

It appears to be beyond dispute that the missionaries have met with a series of hindrances to their work, interposed by Turkish officials, which have grown in seriousness and taken on a more evident appearance of concerted action during the past two years, until now the situation is regarded by those who know most about it as critical. The restrictive measures have related to the circulation of books and to the general activity of the missionaries as teachers and preachers. In an "appeal" which has been put forth in behalf of religious work in the Turkish Empire, a list is given of thirty instances, mostly within the last two years, in which Bibles and other books were seized, notwithstanding the fact that they bore the official seal of authorization, and were either permanently confiscated or returned only after long delays and difficult negotiations. The nature of the reasons given for such action may be inferred from the following sample case:

> "In December, 1891, the authorities of Erzrum detained the Turkish Lexicon of Sir James Redhouse, published by the American Mission at Constantinople with the authorization of the Ministry of Public Instruction. After holding the book for two weeks they defaced it by blotting out with ink the Turkish word signifying Armenia."

There certainly seems to be good ground for a protest against such interferences with a trade that has been considered lawful for more than sixty years; and the societies that have invested capital in printing establishments in the Turkish Empire, under the open or tacit understanding that any of their books, once given official sanction, should be permitted free circulation, are not to be blamed for appealing to their embassies for protection. A project of law is now under consideration by the Sublime Porte which, if adopted, will still further cripple the book business. It relates to the colportage of authorized books, and provides, among other things, that a license as colporteur shall be obtainable only by petition to the highest authority of the province, and shall involve the surrender of national rights by any foreigner securing it; that colporteurs shall be liable to punishment for selling even authorized books, provided that local officials deem such selling injurious; and that the Government may prohibit the sale of any book without assigning a reason.

Still more embarrassing has been the effect of the order sent to the Governors of Provinces early in 1891, in regard to the use of the private houses of missionaries as schools or places for public worship. No such use can hereafter be made without authorization by Imperial Firman. As the order has been interpreted, and in many places put into execution, it practically means the prohibition of new missionary enterprises in Turkey, and possibly even the closing of work long in successful operation. At any rate, the order has been an engine of persecution in the hands of many provincial governors. And the difficulties in the way of obtaining an Imperial Firman are so enormous, mainly through the complicated process involved and the number of officials through whom the application has to run the gauntlet, that it is almost hopeless to try for it where there is any opposition. Thus, the application of the Armenian Protestants in the city of Constantinople for a Firman to enable them to build a church is stated to have been already delayed ten years while yet in its earliest stages.

The case of the missionaries in their appeal to the laws and treaties of Turkey seems to be entirely clear. As to the sale of authorized books, a Turkish law of 1876 forbade their detention or reëxamination. It was partly on the strength of that law that some of the societies set up their printing plants. Moreover, the spirit if not the letter of Turkey's commercial treaties would call for the right to sell freely any article of merchandise declared lawful by the Government. In the matter of the general right of missionaries to exercise their calling, the treaty rights of Americans are not perfectly explicit. The French capitulations of 1740 guaranteed protection to the French religious orders, and in the English capitulations of 1809 like privi-

leges were extended to English subjects. The Treaty of Berlin asserted the freedom "of all forms of worship." In a communication of Secretary Bayard's to Minister Strauss, April 20, 1887, he wrote:

". . . The construction given by Turkey to these treaties, and especially to the capitulations to Great Britain, quoted above, is evidenced by her continued protection of the American missions in Turkey, with their hospitals and schools, in which Turkish patients are received and Turkish children instructed. . . . The protection by Turkey of the schools established by other religious communions on Turkish soil, a protection which has existed from a time coincident with the establishment of such schools, shows that Turkey has regarded them as among the incidents of the territorial rights assigned by the capitulations to those religious communions. We have, therefore, in this protection not only a contemporaneous construction of the Turkish capitulations, treaties, and edicts, but a construction so continuous that it has the force of settled law."

Acting on that interpretation and under the instructions of the State Department, Mr. Strauss was able to secure from the Sultan such action in favor of the missionaries whose work was then interfered with as to win their hearty thanks. Whether his successor has been less efficient or the repressive measures more violent, we will not undertake to say. It is to be remembered in any case that the Turkish Government is so given over to extortion and corruption that the cupidity of irresponsible officials may account for much that looks like deliberate persecution by the Government. However, the evidence seems strong that there is a marked disposition on the part of the authorities at Constantinople to curtail and embarrass the work of foreign religious laborers. To whatever this may be due, the sympathy of Americans cannot fail to be with their fellow-countrymen who have gone to Turkey on so philanthropic an errand, and it certainly becomes the Administration at Washington to move as promptly and positively in behalf of persecuted American missionaries as in that of adventurers whose citizenship is as doubtful as their motives.

CHURCH GROWTH VS. CHURCH DECLINE.

Two significant articles appear side by side in the June *Forum*—"Impending Paganism in New England," by President Hyde of Bowdoin College, and "What the Census of the Churches Shows," by H. K. Carroll, special agent of the census. The two articles throw into strong contrast what may be called the outside and the inside of the existing status of the modern Church in America. Read the statistics of the census, and one is impressed by the great growth of the various denominations in numbers and in wealth. Turn to the statements of President Hyde, and one is depressed by the demoralized condition of the rural New England Church, by the lapse of New England's rural population into a state bordering on paganism.

The census figures given by Mr. Carroll are unfortunately incomplete. The returns from two such important bodies as the Protestant Episcopal and the Baptist denominations have not yet been published, and there are also wanting the returns of some other smaller denominations. Another interesting question cannot be settled by this census—the growth of the Roman Catholic Church in the last decade. The *Church* authorities have always included all baptized persons (even infants) in its enumeration. The *census* enumeration of Roman Catholics has been confined to communicants. As this is the first census ever taken of religious bodies, there exists no basis for an accurate estimate of growth. All that can be affirmed with safety is that the Roman Catholic Church has grown very largely. The effect of immigration in swelling certain denominations is very marked. The various Lutheran bodies have added 487,274 to their membership, an increase of 68 per cent., due largely to German and Scandinavian immigration. The Jews have surpassed even this record, having made a net increase of 80,496, or 160 per cent. The percentage of increase in the total population is 24.86, which shows how far these bodies are keeping in advance of population. But this is true also of a smaller body, like the Congregational, which is but little affected by immigration, and, from the character of its membership, is greatly affected by modern thought. The Congregational Church made a gain of 128,439 members, or 33 per cent. Taking all the denominations so far reported, there has been a gain of 28.21 per cent. in membership—a gain which is 3.35 per cent. higher than the growth of population. Again, to take another side, the value of church property owned by the Roman Catholics is $118,381,561. As to other churches, Mr. Carroll makes this general statement: "The returns for about a hundred denominations, with some of the largest not included, make the enormous aggregate of $463,000,000, representing about 88,000 organizations or congregations." In the face of such a growth and such a property interest as this, who will dare talk of church decline?

But President Hyde's facts concerning "Impending Paganism in New England" are just as forcible as those arrayed in the census. Take this statement, a summary of statistics recently gathered by the Maine Bible Society: "The combined statistics of fifteen counties [in Maine] show that of 133,445 families, 67,842 are not attendants upon any church." But the mere fact that there are so many "stay-at-homes" is not the most serious fact of the situation, in President Hyde's opinion. There is no vitality in the rural church system. It is frittered away in an unequal struggle to maintain mere denominationalism, so that, as a friend said to President Hyde of home-missionary work in Minnesota, "the only mission of any man out there was to go up and down the State burning half the churches." This is the similar situation in rural New England, as President Hyde has found it: "Financially the churches are on the verge of bankruptcy. What money is raised comes not directly in subscriptions and pew-rentals, but through the sewing circle, from fairs and entertainments. The church is supported practically by a club of women, not by families and men." The truth of this is patent to every one who has ever closely observed church life in the so-called "decayed" parts of rural New England. But excessive denominationalism is from one point of view an effect rather than a cause. "The real line of division between Christians to-day," says President Hyde, "is not between denominations, but between the broad and narrow men of all denominations." If the broad men could "get together," as the politicians say, this evil of excessive denominationalism would, he thinks, soon settle itself.

The contrast, as has been said, between the superficial figures of church growth as given in the census, and the facts of church decline as brought out by so accurate an observer as President Hyde, points anew the old moral that mere figures tell only a partial story. Valuable as the census statistics are, the future historian will turn from them to such articles as this on the paganism of rural New England when he attempts to give a truthful picture of the religious condition of society to-day. The contrast also suggests that the "unchurched masses" of our cities do not present to the modern Church a problem half so difficult of successful solution as do the "pagan" communities of rural life. In the cities there are thought and activity and responsiveness to new ideas and fresh inspirations. The country has been largely drained of brains and heart to enrich the cities. There is comparatively little left to appeal to. In that simple fact lies the supreme discouragement.

THIS YEAR'S EXHIBITIONS IN PARIS.

PARIS, May 23, 1892.

THAT art should be encouraged is the most deplorable of modern fallacies. Of late years innumerable schools have been endowed, exhibitions held, travelling studentships established, medals awarded, and all to what purpose! This is what one asks when, from the wilderness of the Royal Academy and the New Gallery, one turns to the hardly less barren wastes of the two Paris Salons.

For the Salons this summer are singularly devoid of artistic interest. The Champs-Élysées has not recovered the distinction it lost two or more years ago when its most distinguished exhibitors ceased contributing to it; the Champ-de-Mars scarce fulfils the promise of its first two shows, as, indeed, it was almost impossible that it should. It is long since such complete stagnation has prevailed in the world of art.

At first, on going the rounds of the Palais de l'Industrie, it seems so incredible that the technical facility displayed should result in so conspicuous an absence of originality, that one thinks the fault must be in one's self, not in the work—that the consequence of looking at too many pictures in too short a time is the

temporary lessening of one's pleasure in them. And then, suddenly, a little canvas wakes a responsive sensation or emotion, and one knows that it is not one's power of enjoyment that is exhausted. For in the acres of *grandes machines* from the studios of "shilling shockers" in paint, of placid academical studies, the few good things are not overshadowed, but tell with even greater effect, perhaps, than if hung in more congenial surroundings. If a man has but used his own eyes, and expressed himself in his own way, his record of his impressions, however small, will in the end prove far more striking than the hugest expanse of sensational commonplace. There are large ceilings, destined for the Paris Hôtel de Ville, by Morot and Benjamin Constant, almost crude in their would-be brilliancy; but one passes them unmoved, to stop before a little decorative arrangement of "L'Homme et la Fortune" by Luc Olivier Merson, in which beauty of line and color and form, and not the notoriety of a day, has clearly been the chief end; Bonnat and Múnkacsy have turned out their usual gorgeous millinery, and yet the girl on horseback, by Mr. Lavery, a Scotchman, the Mr. Gladstone, by Mr. McLure Hamilton, an American, are the portraits of the year which have made most stir among artists in Paris, where they are now seen for the first time, though both have been exhibited before in London, and Mr. Lavery's, last summer, in Munich. Nozal, Harpignies, and Jules Dupré repeat the old themes of which they are masters, but it is the landscape of Mr. Roche, another of the Glasgow men, which stands out with artistic preëminence. It is no exaggeration to say that the rest of the exhibitors may be divided into those who still compete for medals and those who are *hors concours*, but who conscientiously keep on painting what they think the public and the jury expect of them.

It may be that exhibitions are the best salesrooms, but it is as certain that their influence on artists is, in the long run, deadening, especially when, as in Paris, medals are awarded. An exhibition standard is necessarily set up, and its maintenance implies the sacrifice of individuality. The painter paints to exhibit; while he is at work, he sees, not only the canvas before him, but the gallery where it will be hung with hundreds of others, all struggling fiercely for recognition. He seeks, like his rivals, to make himself distinguished, and the result is the *grande machine*. One wonders what men like Bonnat and Múnkacsy, Henri Martin and Maignan, would have done if success at the Salon had not been their little game. The cleverest among the Americans usually represented at the Champs-Élysées cannot steer quite clear of the danger. There is nothing of its kind more scholarly than Mr. MacEwen's "Witches," nothing more spirited than Mr. Bridgman's "Crossing of the Red Sea"; but I question whether either picture would have been painted had there been no Salon to send it to. For this reason it will be interesting to see what one of these artists, Mr. MacEwen, will accomplish when working for a definite end in the decoration of the Exhibition buildings at Chicago. In many a monthly magazine Mr. Du Mond and Mr. Blashfield have shown more artistic work than their canvases at the Salon; in many previous shows Mr. Gay, Mr. Mosler, and Mr. Bisbing have appeared to better advantage. The privilege of exhibiting in the Champs-Élysées is not an artistic stimulus, but unfortunately it is to this annual exhibition that most painters look for commissions. Black-and-white men are in this respect more fortunate—a fact which explains the greater vitality and originality found in the rooms devoted to black-and-white work. Medals, which they are willing enough to accept, are not their primary aim and object, and, despite the limitations set upon them by the exigencies of reproduction, both draughtsmen and engravers have far more freedom to do what they like than painters. The etchings here are never remarkable; but the wood-engravings of Baude and Léveillé and two or three others, and the lithographs of Fuchs and Jouanne and Jacque, are simply masterpieces. The progress that is being made in lithography, the proof given of its hitherto hardly realized possibilities, is really the most interesting fact to be learned in the two Salons.

At the Champ-de-Mars one's disappointment is greater because one expects more. It is hard to shake off first impressions, and I remember keenly my dismay upon walking down the entire side of one of the long galleries without finding a single canvas that would not have seemed more at home in the Champs-Élysées. The Hanging Committee this year have lowered the old standard, and the key-note to the exhibition is given in the line of portraits of meretricious elegance by the President, Carolus Duran. There are good things, it is true—better than pictures to be seen elsewhere. But many are paintings done years ago—the masterpieces of Whistler and Alfred Stevens—which are in no way representative of the art of the day. And others are but repetitions of old themes and problems by men who, in repeating themselves, have not surpassed their previous efforts: the little girl in gray, with long, shiny black legs, sitting amidst gray cushions on a gray sofa, by Boldini, is but a variation of his delightful little boy of last year; Besnard's lady in pink has already stood for us, as gracefully and with as good effect, in the open air on a sunny day; Puvis de Chavannes's "Summer" had far more charm of color, far less affectation in the primitive angularity of the figures, than the "Winter," which is eventually to face it in the Hôtel de Ville; Carrière's peculiar methods are better adapted to his smaller portraits than to the large "Maternity," which has just been bought by the French Government. Contributors who really give the show its chief distinction are Cazin, with a series of marvellous landscapes, characteristic and individual in style, and yet something more than mere new versions of old schemes; Aman-Jean, who suffers from the praise of Sâr Peladon, but whose portraits reveal him as a master of decoration; Louis Picard, who shows what artistic ends the study of the nude may serve; Helleu, who has rendered the effect of the light falling through stained glass in a cathedral interior as it has never been done before; and Raffaëlli, whose paintings only seem less good because his pastels are so much better. Englishmen, Scotchmen, and Americans here, as at the rival Salons, come well to the fore: Sargent's "Carmencita" stands out in as strong relief as it did last year at the Royal Academy, and Alexander Harrison, Henry Moore, Burne-Jones, and Guthrie are the others who do most to raise the show from the threatened abyss of incompetent cleverness.

For clever a large number of the exhibitors unquestionably are; only they do not know what to do with their cleverness. Apparently they have nothing of their own to say, and yet, if here there are no medals to be won, at least notoriety is to be achieved at all hazards: they must make their mark on the gallery walls; they, too, must paint up, or down, to the accepted standard, and this in an exhibition where the public look for eccentricity. To imitate masters who, because they have been misunderstood, have already made a noise in the world of art, evidently seems the easiest means to this demoralizing end, and the rooms are filled with spurious Carrières and Cazins, Boldinis and Besnards. Clearly it is not realized that individual modes of expression are the characteristic methods of these men of value. But most striking of all is the growing influence of Monet, in the Champs-Élysées as well as in the Champ-de-Mars. The new school has been gaining year by year, but now it seems to be meeting the old on equal grounds, and no one to-day can say which of the two will prevail to-morrow. At a glance it might be thought that there was no longer doubt of the ascendancy of the new leaders—of Monet, of Besnard, and even of Chéret, whose posters are, as he uses them, the legitimate outcome of the late movement in art, but were never meant by him to be accepted as models for the painter of easel-pictures or the decorator of public buildings. In the Champs-Élysées even a man of Benjamin Constant's position seems to think it worth while to be on the right side; and in his large ceiling for the Hôtel de Ville, Besnard and Chéret appear to be striving for mastery. In the Champ-de-Mars, Dannat, with misapplied cleverness, so frankly and successfully rivals Chéret in his own line that one wishes he would undertake to do for the streets of New York what Chéret has accomplished for the boulevards of Paris. It is no wonder that in this year's shows the conservative sees the beginning of the end.

But it is doubtful whether the prevalence of new methods means anything more than the sudden popularity of the New Testament among painters. For if Monet's technique has been borrowed on every side, so, at the Champ-de-Mars, has the subject of Jean Béraud's successful canvas of last year. That, it will be remembered, was the picture of Christ and Magdalen at the house of Simon the Pharisee, which became the talk of the town because all the figures, with the exception of Christ, were in modern dress. Of course this in itself was no novelty even for modern times, since Von Uhde has been doing the same thing for some years past. But Von Uhde places his Christ among the people and in humble interiors; Béraud brought his to a fine dinner party and gave him a seat at a table littered with coffee-cups and liqueur glasses, among men in dress suits smoking their after-dinner cigars, and all Paris was enchanted with his daring. As a natural consequence this year Christ has taken the place of Bastien's peasants as a favorite *motif*. Béraud, in a new moment of inspiration, has made of Montmartre the new Calvary; Blanche, Lhermitte, Montenard, Deschamps, Dubufe, Frappa, and half-a-dozen more have vied with him in modernizing Christ for the sake of a sensation, establishing him in their own home or in a tavern, in Parisian streets or under Provençal olive trees, until it but remains, to complete the blasphemy, to paint him in a boulevard café or in a popular music hall. These men forget that if the old masters made pictures of Christ and saints and angels, it was because the people wanted them; that if Von Uhde's compositions have any merit, it is their sincerity and their technical accomplishments. The sanctity of a subject is

not sufficient to conceal the lack of originality which was the real reason for its choice, and it is absence of originality, in matter and manner alike, that characterizes the two Salons of 1892, and is the cause of their unusual dulness. There is no more emphatic proof of this than the fact that Continental artists have gone even to England for inspiration, and that Burne-Jones and Holman Hunt have found followers in a land for whose art they have nothing but contempt. Here again, as at the Champs-Élysées, it is in the various branches of illustration and black-and-white, for which there is a genuine demand, that vitality must be sought. Not the most faithful imitation of Burnes-Jones can compete with the series of drawings in color made by Schwabe to illustrate Zola's 'Rêve'; not the most audacious Christ can be compared to one small etching by Helleu or Whistler, one little lithograph by Lunois. Even the sculpture this year has succumbed to the commonplace.

Altogether, the Salons would be cruelly dispiriting were it not so evident that much of the barrenness on their walls is due to the present crisis (I scarce know what else to call it) in art in France. The struggle between the old and the new school cannot go on much longer, for it is something more than a mere matter of taste. Indeed, the whole art world is disorganized. Only the very strong men can afford to stand by themselves; it is too soon for the rest to decide to which school to give their allegiance. Dealers look on askance, private patrons bide their time, the critic is sorely puzzled. But probably matters seemed quite as desperate to Tuscans of old when Giotto first asserted himself and threw cherished Byzantine traditions to the wind. In the end Giotto triumphed; the present interval may be but the preparation for the triumph of the modern innovator. N. N.

WORDSWORTH AND SOUTHEY ON SLAVERY.

LONDON, June 1, 1892.

SOME days ago, at the house of a friend in the north of England, I was afforded an opportunity of looking over a collection of MSS. and memorabilia of the struggle for emancipation in the West Indies and the Southern States. Letters from Wordsworth and Southey, of which the following are copies, especially interested me. They are singular proof of the depth to which the canker of slavery had, even in the best minds, eaten into and undermined society. It is only in the perusal of such vestiges of a demoralized public conscience that the present generation can at all realize the difficulties of the task to which their forefathers gave themselves. They are singular proof of how, in the clearest cases of wrong, men have ever shrunk from effectually aiding necessary reforms from want of confidence in the working out of good principles, and from attributing the evils inevitably springing from mistaken systems to the efforts for their reform. The letters were written to a lady in response to an application for literary contributions to a little book to be sold for the advancement of the anti-slavery movement. ALFRED WEBB.

[No date—Spring of 1833.]

DEAR MADAM: Your letter, which I lose no time in replying to, has placed me under some embarrassment, as I happen to possess some MS. verses of my own upon the subject to which you solicit my attention. But I frankly own to you, that neither with respect to this subject, nor to the kindred one, the slavery of the children in the Factories, which is adverted to in the same Poem, am I prepared to add to the excitement already existing in the public mind upon these and so many other points of legislation and government. Poetry, if good for anything, must appeal forcibly to the Imagination and the feelings, but what at this period we want above everything, is patient examination, and sober judgement. It can scarcely be necessary to add that my mind revolts as strongly as anyone's can, from the law that permits one human being to sell another. It is on principle monstrous, but it is not the worst thing in human nature. Let precipitate advocates for its destruction bear this in mind. But I will not enter farther into the question than to say, that here are three parties—the Slave—the Slave-owner—and the imperial Parliament, or rather the people of the British Islands, acting through that Organ. Surely the course at present pursued is hasty, intemperate, and likely to lead to gross injustice. Who in fact are most to blame? The people—who, by their legislation, have sanctioned, not to say encouraged, slavery. But now we are turning round at once upon the planters, and heaping upon them indignation without measure, as if we wished that the Slaves should believe that their Masters alone were culpable, and they alone fit objects of complaint and resentment.

Excuse haste and believe me, Dear Madam,

Respectfully yours,

(Signed) WM. WORDSWORTH.

P. S.—Unwillingness to allude to my own writings, even though indirectly led to the subject, has prevented me from expressing the satisfaction which I felt in learning from your Letter that they had afforded you so much pleasure.

KESWICK, 4 May, 1833.

MADAM: Numerous and pressing employments allow me barely time for stating as briefly as possible what my opinions are upon the subject in which you express so lively an interest.

I earnestly desire that slavery should be abolished, but I dread the consequences of precipitate measures, and having more than once set on foot petitions for ameliorating the condition of the slaves and for the gradual abolition of slavery, I have just refused to sign one for immediate emancipation.

Obstinate as the Planters have shown themselves on the one part, and rash as the Abolitionists on the other, there is no longer any safe course. But that which might be commenced with least danger, which is most practicable, and involves the least injustice, seems to be a scheme of manumission, by which (as in the Spanish and Portugueze Indies) the master should be compelled to emancipate any slave who can purchase his freedom. If the slaves were empowered to purchase it in parts, it might facilitate the process. There should be an annual grant from Government in aid of it, so that the slave who was ready with a fixed proportion of his own price, should be assisted with the rest. Freedom then, instead of being given indiscriminately to all, would be placed within reach of those who desired and deserved it, and in the course of one generation we might reasonably hope for the extinction of a great and crying evil.

If a more precipitate course should—(as I verily believe it would)—bring upon our sugar-islands the horrors of insurrection, devastation, and massacre, no slight portion of the guilt must rest upon those who have hurried it on.

These observations are hastily penned; but they are not offered without full consideration of the subject, and as much knowledge concerning it as can be obtained from official documents. Should you think proper to publish them, they are at your service for that purpose.

I remain, Madam, your obedient servant,

(Signed) ROBERT SOUTHEY.

Correspondence.

THE POPE AND THE GOVERNMENTS.

TO THE EDITOR OF THE NATION:

SIR: I must confess that I was considerably surprised on reading the article in the *Nation* of May 26 regarding the Pope's letter to the French cardinals. That letter is given an importance which seems to be altogether undeserved. It advises, in brief, the French prelacy to submit to the French republican government, as a government *de facto*, under some modifications and reservations. Your article says: "That these instructions should be characterized by tact is no more than would be expected from the Vatican, but they also indicate the possession by the Pope of a very high degree of political wisdom." But was not the policy commended in that letter the policy of the Papal See from its very existence to the present time? When did the Vatican ever care about the *forms* of governments? The German Empire was an elective monarchy, France an hereditary one. The south of Italy, with Sicily, was a kingdom. The rest of Italy was divided into dukedoms and a number of republics. Switzerland was a republican confederation. The Popes never found any trouble in recognizing our North and South American republics. The unfortunate Louis XVI. of France was a devout Catholic, and Rome defended royalty there with all its might. When the Constituent Assembly of 1789 established a constitutional clergy, the Pope excommunicated all the bishops and all the priests who had taken the oath to support the Constitution. Yet when Napoleon, as First Consul, made his peace with the Vatican by the Concordat of 1801, the Pope at once recognized the Republic, and, when Napoleon destroyed the Republic, went to Paris to consecrate Napoleon (who had also been excommunicated) as Emperor of France.

The policy of Rome was, is, and always will be to submit to governments, however bad and tyrannical they may be, when they give to the Popes ample scope to exercise their spiritual powers, so as to direct and control the consciences of their coreligionists and to propagate their doctrines, which are essentially illiberal and inconsistent with progress and civilization (see the Encyclica and Syllabus published by Pio Nono in 1864), and to oppose those Governments whenever they attempt to confine the papal power to its ethical and strictly religious duties.

Now, Leo has given no other instructions to the French clergy than all his predecessors, including the most simple-minded, have done. It may be freely admitted that he is a man of great intellect, of considerable general information, a most elegant classical scholar, and of an active and somewhat restless mind; but surely it does not appear from his missive to the cardinals "that it indicates a very high degree of political wisdom." If a judge should write an opinion based entirely upon judicial precedents of a thousand years, adding to their force nothing original, no one would ascribe to him a very high degree of judicial wisdom.

But this admonition to obey the powers that be is well guarded. The sovereignty of the State, the Pope points out, "is not absolute. It is the duty of the subject to accept the established political authority; but this does not imply acceptance of legislation *on points where the legislator, forgetful of his mission, sets himself in opposition to the law of God and the Church.*" "And let all bear in mind," he continues, "that to display activity and use influence to induce Government to change for the better iniquitous laws, void of wisdom, is to give proof of a devotion to the country alike intelligent and courageous *without a shadow of hostility to the authorities deputed to govern public affairs.*" There is an adjective which characterizes these sentences

very appropriately, but which I forbear to apply. It is clear, however, that, according to the Pope's circular, the clergy is to use activity and influence to have changed the laws which the *Church* considers as iniquitous and devoid of wisdom, and, of course, to oppose similar laws. That the Pope considers all the late laws enacted in France which have a tendency to deliver the education of the French youth from the thraldom of the Church—in other words, to secularize the schools and have religious instruction imparted separate and apart from the State schools—as iniquitous and devoid of wisdom, there is not a shadow of a doubt. The clergy, then, are admonished to be active, and to use their influence to have these laws repealed. And that influence, through the pulpit, the confessional, the directorial spiritual domestic visits, is very great.

France as well as Germany is in the midst of a serious struggle to confine the orthodox churches within their proper bounds. That this two-edged letter of the Pope will in the least contribute to allay this irrepressible conflict is exceedingly doubtful. It advocates the old, well-known policy of the Vatican of accommodating itself to existing circumstances, without for one moment losing sight of the central principle of the Papacy, which is to work through the consciences of the people for the supremacy of the Roman Church over all secular governments. G. K.

A RUSSIAN PROFESSORSHIP.

To the Editor of The Nation:

Sir: I was very much struck by the forcible and sensible letter from Mr. Charles M. Moss, on "Places and Men," in your issue of June 9, in which he speaks of the difficulty, nay, the almost impossibility, of getting proper persons to fill the chairs of instructors in our higher institutions of learning. "It is a sorry fact, but nevertheless true," he says, among other things, "that the recommendations of officers of instruction are so much tinged with ulterior purposes that they are often worse than of no value." This is a fact which many of us have had ample opportunity to observe for ourselves, and it is not necessary for me to dwell upon this or any other feature of his letter further than to apply it to a (possible) future case, where all these difficulties may be avoided by due circumspection at the outset. At the same moment that Mr. Moss's communication came under my notice, my attention was called to a paragraph in the "Notes from Boston" published in *Book News* for June. The writer of the Notes suggests that some university should establish a chair for Russian and Slavonic languages and literatures, and hopes that Chicago will see its way to doing so. The idea is far from novel; it has been talked of long ago. But it seems appropriate to state the case plainly, at this time, lest Chicago or some other university should accept the hint too literally, and spoil its splendid chance for ever from the outset by the appointment of precisely such a person as Mr. Moss deplores, for the lack of a little definite knowledge of the conditions.

In the first place, no university should take the advice of any interested person in appointing so important a professor. There is not a single man in this country who is fitted to fill that chair even creditably. It demands a knowledge of Russian, Old Slavonic, Polish, Bohemian, Servian, Croatian, Montenegrin, Wendish, and the varieties of Russian used in different parts of Russia proper, especially of Little Russian, or Ruthenian. Moreover, it demands a speaking and writing knowledge of Russian such as no American man possesses. Any one who has ever wasted his time in endeavoring to learn the pronunciation or even the theory of a foreign language from a person not a native, and a well-educated native at that, can appreciate this point. It is a downright waste of time on the part of the learner, which years of after study will not repair; and it is as downright an imposition on the part of any institution of learning to palm off any one but a highly educated and specially trained and adapted native of the particular country on its students.

If there is to be any chair of Russian and Slavonic Languages and Literatures in an American university, I hope that no interested advice will be taken; that no American will be appointed to a place which he will certainly be unqualified to fill. Let the university get a trained professor from St. Petersburg, Moscow, Kieff—any first-class Russian university. Plenty of these professors are accomplished English scholars. Even if the one chosen is not perfect in English at the outset, that will be an actual help to his students in their preparation for acquiring enough of the languages to qualify them for literary studies; and the disqualification—if disqualification it can be called for a moment, under the circumstances—will speedily disappear.

As a person who has had extensive experience with the acquisition of many foreign languages (and also in fraudulent instructors who have been a curse), especially in this matter of Russian, Slavonic, and cognate tongues, I make this earnest appeal for caution and rigid inquisition, by properly qualified individuals, not pretenders, of the claims to a Slavic professorship in any of our universities.

Isabel F. Hapgood.

June 11, 1892.

Notes.

We are requested to state that the little volume published in Boston by J. G. Cupples Co., entitled 'American Ideas for English Readers, by James Russell Lowell,' is unauthorized by Mr. Lowell's representatives, who were not consulted in regard to it. It consists of some of the speeches made by him and some of the public letters which he wrote while in England. The speeches were slight, spontaneous performances, and he did not attach sufficient value to them to revise them. In the book they are given in reporters' English, with errors which ought not to have been overlooked in an American edition.

Ginn & Co. will have ready July 1 'The Beginner's American History,' by D. H. Montgomery.

Mr. G. R. Parkin's work on 'Imperial Federation' is in the press of Macmillan & Co.

B. Westermann & Co., New York, will dispose of the 100 numbered copies allotted to the American market of 'Old Sword Play: the Systems of Fence in vogue during the 16th, 17th, and 18th Centuries,' by Capt. Alfred Hutton. It is illustrated by fifty-seven plates of typical examples.

Bernard Quaritch, London, will bring out next month an edition of 'Shakespeare's Midsommer Night's Dreame,' with seventy illustrations by J. Moyr Smith, including fifteen full-page plates etched on copper. There will be three styles—vellum, Japanese, and antique. Mr. Smith illustrated "Macbeth" in a similar manner three years ago.

The New York Shakspere Society will finish its 'Bankside Shakespeare' in August next, and will then proceed at once to issue separately in one volume a Concordance of its line notation with that of the Globe and the Cambridge Shakspere, and a complete Index of the Bankside Introductions. This volume can be used as a concordance to the First Folio and First Quarto texts in connection with the Bankside, Globe, or Cambridge editions, or with any edition that follows the Globe's notation. The clerk of the publication committee is Mr. L. L. Lawrence, Box 323, Westfield, Union Co., N. J.

Mr. Skeat has just published through the Clarendon Press (New York: Macmillan) a selection of 'Twelve Facsimiles of Old English Manuscripts,' one of which (plate ix.) "seems to be an autograph of the author" of 'Piers Plowman.' The MSS. range from the ninth to the fifteenth century, the latest being "probably but little older than the date (1477) of the introduction of printing into England." The first four of the dozen examples are in the so-called Anglo-Saxon (Celtic) hand; the remainder in the Anglo-French. The distinction between these two types is clearly pointed out in his introduction by Mr. Skeat, and he passes from a detailed discussion of the forms of the letters to an exhibition of the principal abbreviations, modes of correction, punctuation, errors, glosses, etc. In short, he furnishes in connection with his texts an excellent discipline for scholars who would like to be able to check the readings of MSS. adopted by editors. The quarto plates are confronted with transcriptions in clear letter-press; and the extracts v.–vii. are all to be found in Morris's 'Specimens of English.' Mr. Skeat's service merits a grateful recognition.

To undertake to furnish an encyclopædia of politics in 336 duodecimo pages seems almost a farcical enterprise. Nevertheless the 'Politisches Konversations-Lexikon' of Dr. H. Normann (Stuttgart: Levy & Muller; New York: B. Westermann & Co.) does manage to convey a good deal of useful and condensed information. Much of it, indeed, is calculated to be useful mainly to that large class of readers whose only literature is newspapers; such will no doubt be glad to have a brief manual at hand to answer questions that people of a higher degree of culture do not often need to ask. Naturally the little book is fuller in regard to the German Empire than to foreign countries, and on that score may be recommended to American readers who take an interest in German politics but have infrequent opportunities to learn its details and intricacies.

M. Jusserand's excellent series of "Grands Écrivains Français" grows rapidly. The latest volume to appear, and it is one of the best, is the 'Fénelon' of M. Paul Janet. A fourth series of the essays in criticism contributed by M. Anatole France to the *Temps*, and now gathered into a volume, 'La Vie Littéraire' (Paris: Calmann Lévy), is as bright, as inconsequent, as clever, and as delicate as any of its predecessors. Among other entertaining matters, it contains two useful and sensible papers on plagiarism, a sympathetic criticism of the lively lady who calls herself "Gyp," a pathetic account of the forlorn comedian poet, Albert Glatigny, and a cordial analysis of the character of Julian the Apostate.

The "Théâtre Complet" of M. Legouvé we noted some months ago. Now the first volume has appeared of the "Théâtre Complet" of the late Octave Feuillet, containing the "Romance of a Poor Young Man," by which he was best known in America. Announcement

is made also of a "Théâtre Complet" of the late Edmond Gondinet.

Prof. Homer B. Hulbert, an American scholar, for the past six years connected with the Royal Corean College in Séoul, has published a political geography in the *en-mun* or native character. It treats of the physical, political, and social conditions of the various countries of the world, with their natural and artificial products. Such a work is greatly needed in a country in which the vast majority of the ten millions or more of the natives still wonder, as they did in Hendrik Hamel's day, how the sun can shine on so many countries at once. Probably because of its wonderful simplicity and perfect adaptation to the spoken language, the native literati despise the *en-mun*, which is a true alphabet, and write only in Chinese. Prof. Hulbert's example will be a wholesome one, apart from the value of the book as an illuminator. The same author has in preparation a much needed work on the folk-lore of Corea, together with a sketch of its mythology, history, and politics. One of the most interesting questions concerning the Far East is that of the origin and racial affinities of the Corean people. It is understood that Corea will have a good exhibition at the Columbian Exposition in Chicago.

'Boyd's Philadelphia Business Directory' in its current edition (Philadelphia: C. E. Howe Co.) counts its thirty-fourth year. It is a compact volume of nearly 1,500 pages, divided into an alphabetical resident and copartnership register, a classified business register, and a city register. It appears to leave nothing to be desired except, perhaps, a map of the city.

'Evolution in Religion,' by Rev. W. W. McLane (Congregational Publishing Society), is the latest addition to what has come to be called "the Prof. Drummond literature." The author has a good knowledge of the earlier literature of Evolution, and is himself an amateur in some lines of scientific experiment; and the result is, in our judgment, a firmer sense of reality in the scientific than in the religious parts of his volume.

The second number of the *New World* (Houghton, Mifflin & Co.) fulfils the promise of the first issue of that new religious quarterly in point of range and tolerance of differing opinion. The positions taken by most of the contributors are at once to be inferred from their names, and it is perhaps for this reason that the article of Mr. Nobuta Kishimoto, "How I came into Christianity," seems to have peculiar freshness. It certainly lets one into the secret of Japanese hostility to Christianity, and exposes some of the inherent weaknesses of missionary methods, while its principal force is to be found in its showing how provisional and unsatisfactory are the answers which the theology of the missionaries gives to the deeper questioning of the Japanese mind.

Theatrical periodicals rarely prosper when they rise above the level of an ordinary trade-paper. Yet the *Revue d'Art Dramatique* still struggles along in Paris, and that feeble monthly, the *Theatre*, continues to appear in London. Now announcement is made of an *Allgemeine Theater-Revue*, to be edited by Herr Max Henze, and to be published in Berlin. Another German announcement is a 'Biographisches Bühnen-Lexicon des Deutschen Theater,' by O. G. Flüggen, to contain some 6,500 biographical articles (Munich: A. Brüchmann).

We have before us the prospectus of *Jahresberichte für neuere Deutsche Litteraturgeschichte* (Stuttgart: J. G. Göschen), of which the first volume will deal with the publications of or about the year 1890. A large staff will cooperate with the three editors, Julius Elias, Max Herrmann, and Siegfried Szamatólski, and has assigned to it for critical estimation the several works, articles, etc., relating to the period and branch appropriate to each member: as, (1) General Part, eight subdivisions; (2) from the middle of the fifteenth to the beginning of the seventeenth century, eight subdivisions; (3) from the beginning of the seventeenth century to the middle of the eighteenth, five subdivisions, etc. According to this scheme, four scholars will be critics of Goetheana, one of Schiller literature, one of Luther, etc., and the general topics in each period—lyrical and epic poetry, drama, didactics—will be similarly apportioned.

The dependence of the scholarly world on the industry of German students is nowhere better illustrated than in the unrivalled *Geographisches Jahrbuch*, of which the fifteenth volume is lately issued from Gotha. It contains a concise statement of the progress of the world in terrestrial physics, geological investigation, meteorology, oceanography, and ethnology for the past two years; these subjects alternating with certain others in the volumes of even number. An index of authors consulted gives a means of ready reference to the active workers in these sciences.

Putnam's Monthly Historical Magazine (Salem, Mass.) for May begins volume and number one of a new series, and has for its first paper a sketch of Gen. Israel Putnam by the Rev. Alfred Putnam, D.D., reprinted from Part II. of Mr. Eben Putnam's 'History of the Putnam Family in England and America,' which reaches us together with the *Magazine*, and is illustrated with a portrait and with a view of Putnam's well-preserved birthplace.

A beautiful relief map of the United States, compiled by Henry Gannett, has just been added to the series in course of publication by the United States Geologic Survey. The scale is about 115 miles to the inch. The degrees of elevation are agreeably shaded, the hundred-foot line from Calais, Me., to the Rio Grande being especially emphasized. Almost all of Delaware, Florida, and Louisiana is below this altitude. Almost all of Mississippi is below 500 feet; of Indiana and Illinois below 1,000 feet.

A valuable report on "Irrigation and Water Storage in the Arid Regions," by Gen. A. W. Greely, has been published as "Ex. Doc. No. 287" by the House of Representatives. Its full measure of value is difficult to determine without table of contents, index, or cross reference between the text, the appendices, and the numerous maps. It opens with a report on the climatology of the arid region by Gen. Greely, accompanied by many tables of temperature and rainfall, various diagrams, and a fine series of climatic maps. A series of reports is appended by Lieut. W. A. Glassford, on Arizona, New Mexico, California, and Nevada, for which the author's former residence on duty in those States and Territories has well fitted him. The volume contains a great store of information.

Mr. Richard H. Dana's paper on the "Practical Working of the Australian System of Voting in Massachusetts" has been printed as No. 55 of the Publications of the American Academy of Political and Social Science, Philadelphia. It will be useful to the friends of ballot reform in States not yet provided with statutes, or imperfectly provided.

The American Philosophical Society, Philadelphia, will take measures to celebrate appropriately next year its 150th anniversary.

The Glenmore School for the Culture Sciences will open in the Adirondacks on July 1 and be held for two months. Application should be made to Mr. Thomas Davidson, Keene, Essex County, N. Y.

—Last March a meeting of Harvard graduates was held in Boston to discuss the feasibility of founding a magazine devoted to the interests of Harvard University. Bishop Phillips Brooks presided, and the sentiment was so favorable to the scheme that a committee was appointed to get the opinions of the general body of graduates. Circulars sent out have elicited a very satisfactory response; the feeling is widespread that such a magazine is needed, and sufficient money has already been subscribed to warrant its publication. The first number will be issued about Oct. 1. The scope of the magazine is to furnish a field wherein educational and other topics concerning the University can be discussed; to supply graduates all over the country with complete and authentic reports of the current life of the University, and so to bind more closely the relations between the alumni and Harvard. The magazine will advocate no particular policy, nor be the organ of any clique, but it will represent as fully as possible the various opinions of Harvard men. It will be called the *Harvard Graduates' Magazine*, will contain about 125 pages of the size of the *Forum*, and, for the present, will be issued quarterly. Several important contributions have already been secured, and it is hoped that Harvard men everywhere will coöperate by sending news and communications of general interest. It is intended that the magazine shall be the medium through which class secretaries may make announcements to their classes and furnish news more frequently than is possible in the infrequent class reports. Subscriptions, at one dollar per year, should be sent to Warren K. Blodgett, jr., No. 7 Acacia Street, Cambridge, Mass. In order that the publication of the magazine may rest on a firm basis, an association has been formed, each member of which pledges himself to pay five dollars annually for three years. Many graduates have already joined this association, and it is hoped that many more will do so. The association will have a meeting during Commencement week to elect officers and a council which shall permanently direct the magazine.

—A correspondent writes to us:

"Has attention ever been called to the curious and lasting impression made upon Washington by Addison's 'Cato'? It is all the more remarkable as it is doubtful if Washington was an appreciative reader of the masterpieces of English literature. His library contained a few volumes of general literature, much on agriculture, and a few controversial tracts on the Revolution. He was an ardent student of the works on agriculture, carefully summarizing them in note-books; but of the controversial pamphlets, even when they discussed his own deeds, he records no opinion. I was recently shown by Mr. George L. Rives of New York copies of the Clinton-Cornwallis pamphlets, which had belonged to Washington and bore his signature. There was not a line or a mark in the two pamphlets to show that they had been read by him, much less criticised. It was only when Monroe published his labored 'Examination of the Conduct of the Executive' that Washington in his retirement annotated the margins with curt and sharp rejoinders, in defence of his own policy. With this exception, I know of no other instance in which he indulged in such a practice. A stray note, of little interest, may give evidence of his reading; but even such evidences are rare. In his copy of Adam Smith's 'Wealth of Nations,' which is now in the possession of Mr. Wharton of Philadelphia, Washington queried the good Scotch word *fiar*, as a possible misprint for *fair;* so we know he must have read the volumes. This poverty of record renders more noteworthy the deep impression made by 'Cato.' In 1758, when on the frontier with Bouquet, he wrote

to Mrs. George William Fairfax: 'I should think our time more agreeably spen', believe me, in playing a part in 'Cato,' with the company you mention, and myself doubly happy in being the *Juba* to such a *Marcia* as you must make.' Beginning with 1775, he frequently uses the words in his military correspondence: ' 'Tis not in mortals to command success'—a quotation from the play. Another twenty years passed, and, wearied by the anxieties of the Presidency, he longs for retirement, and continually quotes another sentence from 'Cato': 'The post of honor is the private station.' Thus from 1758 to 1795, 'Cato' is the only bit of literature that Washington gives any evidence of having studied. His quotations are usually taken from a much humbler source—the almanac—practical maxims of business, common sayings, and the like."

—A timely publication is 'Das literarische und artistische Kunstwerk und sein Autorschutz' (Manheim: Bensheimer), "a juridical-æsthetic study," by J. Kohler, Professor of Law in the University of Berlin. The motto on the title-page, "Der richtige Weg zur Erkenntniss des Autorrechts führt durch die Erkenntniss der Kunst hindurch," is the clear and concise expression of the purpose of the book, namely, to show by critical analyses of the essential character of literary productions and works of art the grounds on which they are entitled to legal protection as personal property. From this point of view the author reviews many decisions of courts in different countries, accepting or rejecting them according as they conform or fail to conform to the principles which he has established. He has chapters on the formative arts, lyrical and dramatic poetry, novels, music, and the musical drama. He does not confine himself, however, to these forms of artistic and literary creativeness, but treats incidentally of scientific and historical works, compilations, translations, maps, programmes, and other printed matter. A catalogue of pictures, for example, he would recognize as legal property only so far as it contains observations of an artistic, biographical, or historical character. Prof. Kohler not only is a distinguished writer on law, particularly on the subject of patents, but has also essayed to climb the German Parnassus, having recently issued a volume of lyrical poems, and is a man of judgment in the provinces of æsthetics and belles-lettres. The work before us is exceedingly interesting and instructive simply as a series of critical papers on art and literature, independently of its legal bearings. As a rational plea for the extension of copyright we fear it will prove to be "caviare to the general," including the mass of our legislators.

—Some months ago, in reviewing the Journal of the Historical Society in the University of Tokio, we hinted at the probable results of the application of the critical method to the study of Japanese history. Japan is a country in which the Government is trying to keep yoked together a theocracy and a representative system, with a Parliament and written Constitution. Such a thing as a scientific investigation into the origin of the primitive Japanese and their rulers is simply moral dynamite. The Mikado is still popularly reckoned to be a god, and even the Constitution of 1889 was issued by the theocratic Emperor as the gift of his divine ancestors to the people of Japan. When, therefore, the learned Prof. Kumé of the University published, in the Historical Society's Journal, his critical and exhaustive monograph which showed that Shinto was originally the worship of Heaven, and the worship of the dead, deification of the Mikados, etc., a corruption and aftergrowth, the fanatical Shintoists at once marked him for punishment. Yet, even confined to the Society's Journal, the essay might have lain many months without causing explosion. When, however, Mr. Taguchi, a patriotic editor, long known as a Christian, though now not professedly so, republished it in his daily journal, the shock was tremendous. Mr. Taguchi's motive in giving greater publicity to the paper, and reinforcing it with a commendatory editorial, was to show that the indigenous religion of Japan was no local cult, but was substantially in accord with the early world of primitive monotheism. The fanatical Shintoists and the orthodox politicians in the penetralia of the Court, however, saw at once that the logical consequence of Prof. Kumé's paper was to destroy the doctrine of the divine origin of the Imperial family, for, instead of the Mikado's ancestors coming from heaven, Mr. Kumé shows that they came from Corea. Mr. Kumé was accordingly waited on by a delegation of Shintoists, who labored with him for five hours to obtain a retraction. Their non-success having been reported to those in authority, Mr. Kumé was placed on the retired list, and practically disgraced by the stigma of governmental disapproval, and he has since resigned. The Shintoists charged Mr. Kumé with making Shinto, the holy religion of Japan, "a branch of Christianity." Mr. Taguchi in his paper rallies to the aid of the scholar, and shows that Prince Mito, author of the standard history 'Dai Nihon Shi,' was even more guilty than Prof. Kumé; for he, the true author of the revolution of 1868, which restored the Mikado to supreme power, omits all account of "the divine ages," and declares them purely mythical. Intense excitement has been created all over Japan among native scholars by this political interference with investigation, under the Constitution sworn to in the name of all the Imperial ancestors and heavenly gods, which provides that "Japanese subjects shall enjoy freedom of religious belief," and the liberty of speech, writing, and publication "within the limits of the law."

—Prof. Kumé, with marvellous wealth of knowledge, argument, and quotation from the ancient books of Japan, shows that Shinto was originally a form of monotheism. All the religious ceremonies of the Japanese court rest really on the worship of Heaven. The original bent of the Japanese mind was, as in China, towards monotheism. The mention of inferior deities, polytheism, and the worship of the dead are, as the records show, aftergrowths in times much later. Even the great national festivals still celebrated and popularly supposed to be in honor of the sun-goddess, the Mikado's ancestor, were at first celebrations in honor of the Great One in Heaven. In the Kojiki, or most ancient Japanese writings, it is distinctly stated that Amatérasu, the sun-goddess herself, celebrated the Niiname (offering of the new rice to the kami, or gods), the most famous of these festivals. The imperial shrine at Isé was at first a temple for the worship of Heaven, and the palace sanctuary for the same purpose. Not one of the first emperors was deified after death, apotheosis of the Mikados dating from the corruption of Shinto by the imported religion of Buddha. Only in this era of decay was the ruler of the country given a place in the worship, and the connection made by attributing to him a descent from heaven. All this was done in order that Shinto might be used as an engine of government. The elaborate details in the ancient rituals relating to self-purification, the ranking of offences against purity as sins, the uncleanness of dead bodies, etc., all show that human beings could not possibly have been worshipped in the original cult. Even the three divine regalia preserved as the palladia of the imperial line of Japan, and alleged to have been given in heaven to the Mikado's ancestors for the conquest of the aborigines, come under scrutiny. Documentary evidence shows that the mirror, crystal ball, and sword were originally emblems of the wisdom, benevolence, and dignity of the heaven-ruler. The "inferior" or "evil" gods, said to have been subdued by the grandson of the sun-goddess, form no part of true Shinto. The "coming down" from heaven of the conquerors is interpreted to mean their descent from the civilized into the wild regions. Prof. Kumé claims that his purpose, apart from the search for truth, was to exalt Shinto to a higher plane, and to show that Heaven of the early Japanese was the same as the Amida of the Buddhists and the God of the Christians. Apart from its unlooked-for local political interest, the document has a high value to the student of comparative religion, and should be translated into English. Odd as it may seem, almost every document promulgated by either the Executive or the Parliament of Japan is inscribed with the terms "Téi Koku Nihon" (country ruled by a theocratic dynasty), or "Ko-koku" (the land of the divinely-descended Mikado).

FISKE'S DISCOVERY OF AMERICA.

The Discovery of America. By John Fiske. 2 vols. Boston: Houghton, Mifflin & Co. 1892.

THERE is something of supererogation in characterizing Mr. Fiske's work at this date. We are all familiar with his pleasant style, which holds the attention and offers no obstacle of its own to the flow of thought; his ease of elucidation; his art of putting things, springing from thorough comprehension of a subject, in union with a strong and precise imagination. In the discovery of this continent Mr. Fiske has a most congenial subject. Two lines of study, he tells us, carried on for thirty years, have here converged, one "of that strange world of savagery and barbarism to which civilized Europeans were for the first time introduced in the course of the fifteenth and sixteenth centuries," "nowhere so full of instructive lessons as in aboriginal America, which had pursued its own course of development, cut off and isolated from the Old World, for probably more than fifty thousand years"; the other, of the curious chain of beliefs and of events which brought Columbus to these shores. So many were the misconceptions of those who were first brought into contact with the aborigines, so many cases of insufficient evidence exist in the records of discovery, that nowhere could Mr. Fiske's strong common sense have been more profitably employed than in clearing this matter from the confusion with which ignorance and perverted ingenuity have combined to enshroud it. The investigation of the sources has been thoroughly and carefully made, and the result is not a compilation for popular consumption only, but a work of independent research, seriously undertaken and worthily performed; attractive, even fascinating, to a wide circle, it also appeals, and is meant to appeal, as an essay in their own field, to professional historians.

Mr. Fiske's defects, judged by this standard, are patent, lying in the very elements of his

popularity. To see so vividly is sometimes to see one thing to the exclusion of others equally suggestive, and these small but illuminated fields of vision easily run together in a connected chain. This is the temper of mind that in research provokes the formation of opinions as naturally as a rod inserted in certain solutions induces crystallization. Mr. Fiske tends unconsciously to write as an advocate, and this is a warp not easily got out of the grain.

The interest of the book is largely anthropological, and some of its best work is the exposition of present knowledge about the aborigines of this continent. Mr. Fiske follows Mr. Lewis H. Morgan and the new school of American ethnology in admitting, apart from the Eskimo, but one race of aborigines on this continent, and appraises the grades of culture attained by the various tribes according to Morgan's triple division of the states of savagery and barbarism. The Fuegians and the Indians of the Lower Columbia, the most degraded of all, fall within the upper status of savagery; the greater part of the Indians were in the lower status of barbarism, though some, like the Iroquois, Creeks, and Cherokees, had made some advance towards the next stage, or middle period, of barbarism. This stage is distinguished from the period below it, in the Old World, by the domestication of animals other than dogs; but in America, where only one tribe, the Incas, had found an animal which they could domesticate, the use of extensive tillage and of adobe brick, or stone, in building serves the same purpose. The use of iron marks the passage from this stage to the upper period of barbarism, which in its turn passes into civilization with the invention of phonetic writing. According to Mr. Morgan and Mr. Fiske, no American tribe had got beyond the middle stage of barbarism at the time of the Conquest, and this period therefore covers alike the Pueblo Indians of New Mexico and Arizona, the Aztecs and Mayas of Mexico and Central America, and the Incas of Peru. It should be said that Mr. Fiske does not follow Morgan to the full extent of his destructive criticism of the Spanish accounts of Mexico, but possibly he follows him too far; this last period is too inclusive to be of much practical use, we suspect. We must know more about native systems of writing in Mexico and Central America before we can grade these tribes accurately.

Not to linger over this interesting subject, we pass to the discovery, and note first that Mr. Fiske utterly refuses to entertain the idea of a discovery of America, in any proper sense, except by Columbus. The Phœnicians, the Chinese, the Moors, the Welsh he dismisses to the limbo of eccentric literature with a flourish of his pen. The Zeni voyages he treats after the manner of Mr. Major, although admitting the possibility that the account of Drogeo may be based on some such journey as that later performed by Ingram or by Cabeza de Vaca. The voyages of the Northmen are examined at length, and we think with very sound and valuable results. While distinctly rejecting the minuter identifications of Rafn and the vagaries of Prof. Horsford, the historic intent and fundamental truthfulness of the Eric saga are well maintained, and the famous comparison of that saga with the 'Iliad' by the committee of the Massachusetts Historical Society is held to be unfortunate and unjust. "It is in the highest degree probable that Leif Ericsson and his friends made a few voyages to *what we now know to have been* the coast of America; but it is an abuse of language to say that they 'discovered' America." "In the midsummer of 1492 it needed to be discovered as much as if Leif Ericsson or the whole race of Northmen had never existed." "In no sense was any real contact established between the eastern and western halves of our planet until the great voyage of Columbus in 1492" (i., 255). The reality of the voyages, though we cannot retrace them, is witnessed by the sagas, as well as by their inherent probability. This seems to us nearer the truth than the more conservative view taken by Mr. Winsor.

The treatment of Columbus is not especially noteworthy in itself, but it is interesting to compare it with the representation which Mr. Winsor has just given us. Columbus is to Mr. Fiske no saint, but a man of worth and high purpose. Not condemning much that to Mr. Winsor is offensive or significant of mental or moral weakness, Mr. Fiske regards Columbus more leniently, and, perhaps, with an easier comprehension of mediævalism. Mr. Fiske had not the advantage of writing this part of his book with Mr. Winsor's work before him, but he notices the latter in his preface, and says:

"No one can deny that Las Casas was a keen judge of men, or that his standard of right and wrong was quite as lofty as any one has reached in our own time. He had a much more intimate knowledge of Columbus than any modern historian can ever hope to acquire, and he always speaks of him with warm admiration and respect. But how could Las Casas ever have respected the feeble, mean-spirited driveller whose portrait Mr. Winsor asks us to accept as that of the Discoverer of America?"

We are not quite sure of that first assumption on which so much is hung, but certainly Las Casas found a ready excuse for the attitude of Columbus toward the natives in the fact that Columbus after all had short experience of the results of his own acts. Las Casas lived in Hispaniola eight years after the death of Columbus before he freed his slaves and took up his crusade. Nevertheless, Mr. Fiske gets very featly over the slavery question, and they who would know the exact truth must linger where he runs.

Mr. Fiske has devoted much attention to Vespucius, concerning whom, as he rightly says, most of us are in Egyptian darkness. There is nowhere a better exposition of the whole matter of his voyages than in the first chapter of Mr. Fiske's second volume. (But a chapter of 212 pages! It was not necessary that Mr. Fiske should hypnotize the reader to secure his attention.) In 1504 Vespucius wrote a letter to a friend describing four voyages to the Western lands in which he had taken part. This letter is preserved in a Latin translation in the *Cosmographiæ Introductio* of Waldseemueller, printed in 1507, and in an Italian text of uncertain date. The last three voyages are unquestioned, but because the first voyage, if made, as asserted, in 1497, would, in the light of our knowledge, deprive Columbus of the honor of first seeing the American continent, it has been vigorously attacked with strong and ingenious arguments. The charge made by Herrera that Vespucius invented this voyage to steal from Columbus the honor of discovering the continent, is not now accepted by any reputable scholar. Mr. Fiske disposes of it neatly. If this 1497 voyage was not made, Cuba was not circumnavigated until 1508, and until then Columbus was supposed to have discovered the continent, not in 1498, but in 1492, when he discovered Cuba. Hence, to invent a voyage to antedate this discovery, Vespucius would have had to go back of 1492 instead of 1498. But if the voyage was made in 1497, as described, then Vespucius did see the continent before Columbus, and there can be no question of deceit. Mr. Fiske, however, follows Varnhagen in believing that Vespucius sailed on a voyage in 1497, but not to *Parias*, or the Pearl Coast, as the Latin version of the letter says.

Some mistake there evidently is, because the letter gives the latitude of "Parias" as 23° N., which brings it on the coast of Mexico. The Italian text, which Mr. Fiske believes to be the original, reads *Lariab* instead of *Parias*, and this, Varnhagen held, is a native term applied by Vespucius to the eastern coast of Mexico. On this theory Vespucius sailed from Honduras along the shore to some point on the Atlantic coast of the United States, and of course proved the insularity of Cuba long before the time of Ocampo. Now it is a curious fact that La Cosa, who had sworn in 1498 that Cuba was a continent, in 1500 put it on his map as an island with a doubtful western coast, while the Cantino map of 1502 makes Cuba an island, and tantalizingly indicates its relation to Florida. When it is shown that Vespucius was engaged in Spain from 1495 fitting out an expedition which sailed, not in 1498, as is commonly stated, but in 1496, and when we find Oviedo stating that the bay of Honduras was discovered, not by Columbus, but by Vincent Yañez Pinzon, Juan Diaz de Solis, and Pedro de Ledesma, before 1500, it appears that to associate the first voyage of Vespucius with this voyage of Pinzon, and place it in 1497 instead of 1506, does give a working hypothesis. Whether it gives more than that is not clear; we cannot get over as easily as does Mr. Fiske the silence of all parties in the great trial about this Pinzon voyage of 1497, nor are we sure that the cartographical evidence is entirely favorable.

The name "America" is shown to have had no connection with this first voyage; it grew out of the voyages in which Vespucius coasted along South America to 34° S., and was supposed, by crossing the equator, to have discovered that hypothetical fourth part of the land masses of the globe, the home of the antipodes, according to the scheme of the Latin geographers, correlative to the home of the antichthones in the southern part of the eastern hemisphere. In the classical and mediæval geography, as Mr. Fiske well says, the contrasted hemispheres were not the east and west, but the north and south. It was in honor of this great discovery of the antipodes that Waldseemueller and his friends proposed to affix to the southern continent, the "new world," the name of its discoverer. This is well set forth, and constitutes a distinct and valuable contribution to our geographical history.

Mr. Fiske allows himself in this work a greater number of colloquialisms and little pleasantries than we have before observed in his writings. We enter no complaint in behalf of the offended dignity of Clio, but we somewhat fear the author will get himself into trouble by his facetiousness. Referring to the exemption of Columbus from the edict against riding mules, he adds (i., 345):

"In practice this precious decree, like other villanous prohibitory laws that try to prevent honest people from doing what they have a perfect right to do, proved so vexatious and ineffective withal that it had to be perpetually fussed with and tinkered. One year you could ride a mule and the next year you couldn't."

It is understood to be five years since one could "ride a mule" in Cambridge. We fear that Mr. Fiske's preference for the "wet system" over the "dry system" is not confined to its geographical application, and on this count we commend him to the prayerful consideration of the prohibitionists. But worse re-

mains behind. In a note (i, 291) he speaks of "benighted heathen countries afflicted with robber tariffs," and actually quotes as still "useful" the advice of a fourteenth-century traveller to treat the custom-house officers with respect and make them something of a present, because then "they will always be ready to appraise your wares below their real value." We ask our Republican contemporaries to put their hands upon their hearts and tell us if a man capable of such sentiments can possibly have any correct views upon the discovery of America.

The index is made with intelligence and evident care, and is good in method but not quite inclusive enough. In a work of this kind, which is practically a reference book, one should be allowed to come very near the ideal of indexing—the inclusion of every name and every fact. We were curious to know what Mr. Fiske thought of *Irland-it-mikla* and *Huitramannaland*, but the index failed us, though both names are treated of in the book; and we have noted one or two similar cases.

MORE NOVELS.

The Three Fates. By F. Marion Crawford. Macmillan & Co.

Pushed by Unseen Hands. By Helen H. Gardener. Commonwealth Company.

The Pot of Gold, and Other Stories. By Mary E. Wilkins. Boston: D. Lothrop Co.

A Day at Laguerre's and Other Days. By F. Hopkinson Smith. Boston: Houghton, Mifflin & Co.

Van Bibber and Others. By Richard Harding Davis. Harper & Brothers.

A House of Pomegranates. By Oscar Wilde. London: James R. Osgood, McIlvaine & Co.

Mr. Crawford, that Gaze's Tourist among romancers, has turned his back upon India, Arabia, Babylon, and Rome, and now folds his errant quill over Washington Square, New York, N. Y. His touch, in all that relates to the entourage of a story, is here, as elsewhere, most happy. The scene is sufficiently characteristic of New York and of the Hudson River to give atmosphere to the book, yet are we not drenched in afternoon tea, choked with cumulative Knickerbocker names, nor deafened with street cries. Life in New York, it seems, may be conducted as elsewhere, and a novelist need not be either a landscape gardener or a gatherer of crumbs from under the tables of society. On the other hand, Mr. Crawford's art of telling appears to have suffered somewhat in his latest work. Over and above the intricate relations of his hero to the three Fates, of whom more anon, it has been, in an evil hour, borne in upon him that, along with the story, it would be a good thing to present the analysis of the evolution from a paragrapher of a distinguished novelist, recording minutely both his subjective and his objective helps and hindrances, from his ink to his love affairs. Whether this be autobiographic or only the "cautionary tale" of our childhood, is of no consequence. The fact remains, and is one regretfully to be mentioned of the author of 'Mr. Isaacs' and 'Khaled,' that three-quarters of the book are prosy. Your novel-reader is irked by page after page of close writing about the pen-and-ink habit; and Mr. Crawford, infected by his own example, adds page upon page of close writing about motives, about vanity, about mental processes, till one cries out, "Leave off your damnable faces and begin."

When the story arrives, it is found to have certain original aspects and striking situations. The attitudes of a man towards three women who (up to date) are the controlling human influences in his life (his profession is his real fate), afford ground for realistic treatment which it is tribute to say does not become absurd or vulgar. We only wonder, since Mr. Crawford has thus boldly attacked, seriously and not in burlesque, the subject of the polygamousness of the human heart, why he hedges, as less able writers do, by saying, in reference to the latest flame, that "the others" were not real loves. Why not openly take the ground that, for the George Woods of the world, being in love is a movable feast? We should have expected it of so clever a writer and one who seems here to be intent on realism. George Wood finds it "better to have loved ever so unhappily than to have been married to any of the Constances or the Mamies of this world!" So he says, and yet one has a sneaking fancy that as he had tenderly loved three ladies and hoped to marry each of the three, he might have gone on and found happiness even with a lesser than the goddess to whom we leave him devoting a hopeless affection. The conviction in the reader's mind that he did not understand himself perhaps only heightens the naturalness of the character. George Wood would not, in theory at all events, have sympathized with David Grieve in making the best of a tiresome fate and finding his reward. He stands rather as type of that man in whose heart the cry is, "The queen is dead; long live the queen," who honestly thinks he never loved till now, but of whom one ventures to suspect that with him, however unconsciously, "to love" means "to be near to." Both types are interestingly new in literature. Young ladies will find them very unheroic. Parents, guardians, and realists will rejoice in the overthrow of the unreal and one-emotioned young gentleman who for decades has contributed largely to the discontent of the young feminine mind.

There is a wordy preface to the little volume of tales called 'Pushed by Unseen Hands,' in which the writer heralds her own praises. First she quotes Dr. Spitzka, who warmly commends the scientific value of her stories, placing upon them "far more than a mere literary value." Next we have Don Piatt's opinion that they "are rare fiction," and that "facts, science, and reformation work belong in another field." The reader, being thus confronted with the two horns of the dilemma, is now promptly seized with the predisposition to side with Dr. Spitzka as to the literary criticism, and with Don Piatt as to the scientific; nor is his prejudice at once dispelled by beholding that each of the little sketches is preceded by an array of three or four quotations, ranging in source from the Bible to Ingersoll. The preluding being finally disposed of, most of the stories are found to be slight but clever and observant studies, fairly well written, of life under various aspects. The psychologic studies are better than the reformatory ones; the pictures of poor-devilism, with no tendency at all, are perhaps better than either. Let the author be advised to remove from another edition the offending guide-posts, as many of the stories are sufficiently suggestive to speak for themselves, and the remainder not good enough to be advertised by bush.

Great unevenness also prevails among the stories which make up Miss Wilkins's latest volume. But criticism is disarmed by knowing that the collection was made, without the author's knowledge or consent, from publications of long ago. They show an odd touching of hands between Yankee-land and fairyland—calico and cloth-of-gold. Not lacking humor or imagination, but jerky in construction, a few only of them flow smoothly and wear their fancies without a difference, from first to last—notably the amusing story of the reformatory for ill-behaved children, called "The Patchwork School."

Mr. Hopkinson Smith's sketches are brimful of color, vivid if not solid, laid on with the rapid, deft touches of an artist and an enthusiast, making the Bronx to blossom as the Grand Canal. "When the paints mix too slowly," he says, "you use your thumb, smearing and blending with a bit of rag—anything for the effect." The result is a series of brilliant impressions left on the eye—impressions which, in their out-of-door freshness and fragrance, get close, as well, to the Dryad at the back of every man's brain. The human interests are gracefully touched in, with feeling, but with an avoidance of the emotional entirely in keeping with the modern workmanship of the whole. An excellent sense of climax marks the chronicle of each of these nine "Days," with the exception of that devoted to "Hutchins." A rather hang-dog little affair is the whole of this story, indeed, as if it were an understudy for one more worthy to stand among the mystic nine. But this is only one, and, all in all, there can be no pleasanter way to get the tang of Mexico, of Spain, of Squantico, than to quaff the sparkling wine of this little volume.

If the library traveller prefers to linger in and near New York, taking Philadelphia for his Ultima Thule, let him follow the fortunes of Van Bibber, who comes up again fresh, smiling, and boutonnièred in a dozen adventures of Knickerbocker life. As a moralist, this charming old friend seems to us a bit of a *poseur;* but in the lighter affairs of life, as a struggler after economy, as a rescuer of lost collies, as a discourager of fraud in making a beggar just from breakfast eat a hearty meal under his personal inspection, he is truly engaging and debonair. Of the "Others," the most prominent are Gallegher, the renowned; and Mr. Hefty Burke, whose specialties are swimming and "scrapping." The strongest work in the book is to be found in "An Unfinished Story," which is masterly in its force and originality.

There is a glut of description and epithet in Mr. Oscar Wilde's book of fairy tales which leaves the reader with a strong sense of having fed on lucent syrup tinct with cinnamon, and having had too much of it. No language can compare with it except Ouida's when she is giving an inventory of the properties environing one of her heroines. Few basal ideas in fairy stories can bear this treatment; certainly not Mr. Wilde's. To make matters worse, he has chosen to relate them in a style paraphrasing Scripture, which gives to the whole the air of complexity aping simplicity without success. The weird decorations sown with studied carelessness among the margins heighten this effect, as do also the mediæval illustrations and the Grosvenor-Gallery covers. Mr. Wilde seems, on the whole, to have taken his stories something over-solemnly. In a less ostentatious setting, certain really poetic ideas found floating about in the volume would have gone further towards redeeming the inconsequent and spasmodic construction. The descriptions, in the opening story, of the weaving of the King's robe "on the loom of Sorrow and by the white hands of Pain," "the blood in the heart of the Ruby, and Death in the heart of

he Pearl," have a shuddering force, and are among the few things in the book that leave an afterglow in the mind.

LORD CANNING.

Earl Canning. By Sir H. S. Cunningham, K.C.I.E. [Rulers of India.] Oxford: Clarendon Press; New York: Macmillan.

THE case of the Cannings, father and son, is another proof of the precarious character of the principle of heredity when applied to human genius. Canning, the father, was a wonderfully gifted man, and a paragon of the brilliancy which the Eton and Oxford of those days worshipped, to the disparagement of plodding industry. Canning, the son, though eminent in his way, was by no means gifted as an orator or otherwise, but was a paragon of plodding industry. He was, indeed, laborious above measure, as his eulogistic biographer allows; and in the middle of the great Mutiny, when he ought to have kept his mind fresh and his nerve unshaken for vital questions, he would sit grinding at his desk from two A. M. to luncheon time without allowing himself even an interval for breakfast—the consequence being that his brain at last refused to work. He succeeded to his peerage when young, and was pushed forward in public life by the old colleagues and friends of his father, especially by Peel, his loyal attachment to whom is the best answer to the charges brought against Peel by Lord George Bentinck, or rather by Disraeli through Bentinck's lips, of ungenerous conduct towards his father. In course of time he was taken into the Cabinet; but he impressed his chief rather by his pertinacity than by his ability, and it was commonly believed that the chief was glad to relegate him to the Governor-Generalship of India, a grand but (as all was then calm) apparently not a difficult or dangerous post.

When the terrible news of the mutiny arrived in England, the general consternation was enhanced by the thought that the man whom fate had set to grapple with the peril was one of so moderate a reputation for ability as Lord Canning. He rose, however, to the occasion. The firmness of his character asserted itself, and he read the situation right. Probably he did better than his brilliant but somewhat fanciful and erratic sire could have done. Above all, he had the moral courage to restrain the cruel vengeance of the dominant race in the maddening hour of peril and afterwards of victory. At the expense of much temporary obloquy and moral suffering to himself, he saved not only the lives of the conquered, but the honor of his country. How fierce was the tide of sentiment against which he had to struggle will be seen when we remember that even in distant England the cry for vengeance was swelled not only by the moral rabble which always swells such cries, but by such men as Lord Shaftesbury and Mr. Ruskin. From the baffled terrorists of Calcutta the Governor-General earned the nickname of "Clemency Canning." It has become a title of glory, ratified by national gratitude, and it adheres to him for ever.

Most of this volume is taken up with the history of the Mutiny, of which a clear and instructive, though dry, account is given. Nothing seems more certain than that the cause, and the sole cause, of the outbreak, was the distribution of the greased cartridges, in which the Sepoys, and especially the Brahmins, saw an attempt to destroy their caste. This was the last of a series of mutinies, or disturbances, some, such as the mutiny at Vellore, on a large scale, all arising from the same cause. Mischief, it is true, as Sir H. S. Cunningham notes, was in the air. Native feeling had been offended by the efforts of the Government to restrain suttee, and alarmed by the aggressive attitude of missionaries. A shock had been given to the native dynasties by the unwise refusal to recognize the privilege of adoption. The Mussulmans were still brooding over their lost supremacy. Oude had been recently annexed, on the ground of its intolerable misgovernment by the native dynasty; by this, also, the native mind had been stirred, while, the army of the King of Oude having been disbanded, 60,000 native soldiers had been sent adrift. The cakes of mystery, the *chupatties*, were being clandestinely passed round, indicating that there was a commotion of some kind in the dark depths of Hindu sentiment, though their exact meaning is still unknown. It may be added that security had made the masters of India careless, that too many British officers had been drawn away from the native regiments by staff appointments, and that those who remained had been seeing too little of their men. Since the transit between England and India has become rapid, the Anglo-Indians have been more English and less Indian than before, and have fewer opportunities than they had of gaining insight into native movements. In former days, when the Anglo-Indian was for twenty or thirty years cut off from home, connections were commonly formed with native women, through whom, though the channel might not be the cleanest, useful knowledge was derived.

Be the British empire in India righteous and beneficent or not, it is beyond doubt a marvellous proof of the ruling and organizing powers of the Anglo-Saxon race. Nor was the fibre of that race ever more tremendously tested than it was when a handful of Anglo-Saxons stood up to face the great Mutiny, with the possible revolt of all the feudatories of Hindustan, some of them considerable military powers, and of the whole Hindu population, much of it by no means unwarlike, looming as hourly possibilities in the background. The insurgents, however, had at the outset a taste of the qualities of those against whom they had risen. Delhi was taken by the mutineers, and every European found in it who could not escape was put to death. But the British lieutenant, Willoughby, and his eight men in charge of the great magazine, held out there.

"They resolved early in the day that if they could not defend this invaluable store of ammunition, they would destroy it, though its destruction would almost certainly involve their own. For hours they defended their stronghold against an overpowering crowd of assailants. The train was laid; the sergeant who was to fire it stood ready. Willoughby took a last look out upon the Meerut road (the quarter from which aid was expected); the assailants were swarming on the walls; the word was spoken: a vast column of flame and smoke shot upward. Two thousand of the assailants were blown into the air. The thunder of that explosion announced to the mutineers that one great object in the seizure of Delhi had escaped their grasp."

The native army, upon which the power of the East India Company had rested, was no more. The system of double government had been found awkward. The abolition of the Company and the direct assumption of its realm by the Imperial Government naturally ensued. Yet there were those who at the time expressed their misgiving as to the probable results of a close political union between Great Britain and Hindustan. It is now to be seen how a democracy, such as England is becoming, can govern such a dependency as India.

The Beautiful in Music. By Dr. E. Hanslick. Translated by Gustav Cohen. Novello, Ewer & Co. Pp. 174.

MR. COHEN has made an excellent translation of Dr. Hanslick's famous little book on musical æsthetics; a translation which betrays not only a knowledge of musical terminology, but also the skill to render correctly the abstract philosophical terms which are unavoidable in such a treatise. It must be said, however, that Dr. Hanslick differs favorably from his German colleagues in the fact that he avoids metaphysical jargon and abstruse theorizing as much as possible, and that this is one reason why his book has, since 1854, passed through no less than eight editions in the original. Hanslick is the best-known musical critic of the time, and he owes his fame, not to any special superiority of knowledge, but to his literary art. Once a week, or oftener, he writes a feuilleton on current musical topics for the Vienna *Neue Freie Presse;* he has done this ever since 1844, and the best of these *causeries* have been republished in more than half-a-dozen volumes, 'Aus dem Concertsaal,' 'Moderne Oper,' etc., some of which have passed through several editions.

Another thing that has helped to make Dr. Hanslick conspicuous is the fact that he has for several decades been recognized as Wagner's most formidable enemy. He pronounced against all his works following "Lohengrin," treated Wagnerism as a disease, and prophesied that there would never be another Bayreuth Festival after 1876, and that the Nibelung Tetralogy was impossible outside of Bayreuth. The 'Bayreuther Taschen-Kalender' for 1892, however, shows that last year the Tetralogy, or parts of it, were given in twenty-one German cities, while the whole number of Wagner performances in seventy-nine German and Austrian cities was 963, a gain of eighty-four over the preceding year. And as for the Bayreuth Festivals, they are now given annually, and the tickets are all sold two months before the festival begins. In a word, Hanslick and his followers have suffered a tremendous defeat, and he has wisely kept quiet for several years, after making the audacious announcement that he had never opposed Wagner, but only the Wagnerites. In connection with the little treatise on 'The Beautiful in Music' the amusing fact deserves notice that Hanslick and his admirers fancy that the edge of it is turned against Wagner, whereas in truth its cardinal doctrine, rightly interpreted, is a confirmation of Wagner's principal dogma. This cardinal doctrine is that music cannot express *definite* emotions—which is just what Wagner believed, and what led him to insist that poetry should be added to music to give it a definite meaning or content. True, Dr. Hanslick gives this doctrine a different turn by insisting that the content or substance of music is purely musical and cannot be anything else. He defines music as *tönend bewegte Formen*, or "sound-forms in motion," which is about as valuable a definition as it would be to call painting "visual forms at rest."

The purely formal and mathematical view which Hanslick takes of music explains his whole attitude towards modern composers. He dislikes them all except Brahms, Brüll, Bruch, and others who have no power of emotional expression, but only a great command of "moving" the "sounding forms" according

to fixed rules. The vast majority of music-lovers care for music only so far as it expresses or rather arouses emotion; not so Hanslick. Ignoring the fact that all the great composers were stirred by music, as by nothing else, he declares that "it is well known that the action of music is most powerful of all in the case of savages"—an argument which can only be matched by this other (p. 26): "Music may undoubtedly awaken feelings of great joy or intense sorrow, but might not the same or a still greater effect be produced by the news that we have won the first prize in the lottery, or by the dangerous illness of a friend?" No doubt, but what has that to do with the question? No one has ever contended that music *alone* can arouse emotion.

Dr. Hanslick seems to be wofully ignorant of modern natural history, else he would not have disposed of the question of "Music in Nature" by alleging that there is no harmony in nature, nor any melody, but only rhythm. The facts discovered by Mersenne and Rameau, and developed by Helmholtz, that the basis of our harmonic system is to be found in the overtones which accompany fundamental tones, prove Hanslick's error as regards harmony; and when he insists that there is no melody—not even the germ of it—in bird song, he shows that he is unfamiliar with bird life, and knows nothing of the exquisite though stereotyped snatches of melody and melodic responses of birds. A perusal of Darwin's treatise on Sexual Selection would open his eyes as to bird song and the varied emotions of love, emulation, and jealousy which bird song "expresses."

It is useless to go into further details. Dr. Hanslick's whole treatise is based on incorrect premises, and is a tissue of errors and illogical conclusions. As already intimated, it owes its vogue to the fact that it is readable, and to its humor, which is amusing even when it is all wrong, as when he says: "Not the voices of animals but their gut is of importance to us; and the animal to which music is most indebted is not the nightingale but the sheep." Many of the most important branches of æsthetics are not even touched upon by Hanslick, but his little treatise is useful for its definite statement of a point of view, and its suggestiveness, as well as for a number of interesting details and *aperçus*. Among the latter this is one of the best:

"Music demands the keenest *watching* and the most untiring *attention*. In the case of intricate compositions this may even become a mental exertion. Many an *individual*, nay, many a *nation*, undertakes this exertion only with great reluctance. The monopoly of the soprano in the Italian school is mainly due to the mental indolence of the Italian people, who are incapable of that assiduous fixing of the attention so characteristic of Northern races, when listening to and enjoying a musical *chef d'œuvre*, with all its intricacies of harmony and counterpoint."

There is a whole philosophy of music, especially of operatic music, in that last sentence.

A Popular Handbook of the Ornithology of the United States and Canada, based on 'Nuttall's Manual.' By Montague Chamberlain. Vol. I., The Land Birds, pp. xiv., 473; Vol. II., pp. viii., 429. Sm. 8vo, cuts and colored frontispiece. Boston: Little, Brown & Co. 1891.

Thomas Nuttall was chiefly a botanist, and not much of a zoölogist. But he was fond of birds, had an eye for their forms, colors, and actions, and especially an ear for their notes, and wrote of them two small volumes which appeared in 1832 and 1834 respectively. This was when Ord and Bonaparte had finished with Wilson; Swainson and Richardson had just appeared (1831); and Audubon had arisen above the horizon. Nuttall's writing of the handful of birds he knew had a real fragrance, and in the course of years acquired a particular smack, comparable to that of Bewick. The attempt at a second edition in 1840 broke down, probably because Audubon was then in his zenith. From that day to this the possible reappearance of Nuttall has been a theme for discussion with more than one generation of ornithologists; and the original edition has become so rare and antiquated as to serve only the purposes of the virtuous bibliomaniac. We turned, therefore, to these two pretty volumes, handsomely bound, gilt-edged, with a brilliant column on a generous page, and full of pictures—we turned with a genuine interest and some anxiety, which gave way to surprise, to exasperation, to righteous indignation at last, when we saw that this "new Nuttall" is simply old Nuttall knocked into a cocked hat. Where is the Nuttall of our boyish dream? Where is the Nuttall of our bibliographical vision? Here are only the *disjecta membra*, mangled almost beyond recognition—the title twisted out of shape and conveying a wrong impression alike of the scope, contents, and authorship of the book; the text slashed into at the indiscretion of a singularly wanton pair of shears, and eviscerated of nearly or quite all of Nuttall's descriptions, to be replaced by singularly trivial and ineffectual characterizations of the birds themselves, of their nests, and of their eggs; Nuttall's nomenclature all gone, and, to make our misery hopeless, Nuttall's pictures (dear and familiar to us as the face of the old family clock in the hall, that has not kept time since we were born) gone too, and in their stead another series borrowed from a recent work, a few from a new hand, and a couple of chromos. The sad plight in which our "quaint and curious" author has been put seems all the more pathetic when we find him in the fix of having to carry along with him a lot of new matter by Mr. Chamberlain. This is well enough in itself, well-intended enough too, and, in fact, called for by the title. But we object to it as out of place, and as something that should not have been imposed upon our old friend Nuttall.

This is not a popular handbook of the ornithology of the United States and Canada by Montague Chamberlain, because it treats of the birds of only the lesser part of the area specified, and is mainly by Thomas Nuttall; while it is certainly not a real edition of Nuttall, for reasons already stated. Perhaps one reason why two generations of ornithologists failed to see their way to bring out a new Nuttall was the very difficulty of "editing" him to any useful purpose. It would have required a rare editorial tact, a certain delicacy of touch that could only be found in a thorough ornithologist who was also a thorough book-lover, thoroughly saturated with the traditions of his lore, who would have held Nuttall up to us in correct historical perspective, amid all the glamour of the legends that cluster about the name. Some vague sense of guilt seems to have crossed Mr. Chamberlain's mind during his persistent assault on the most obvious literary proprieties; for, as if to apologize for his own Icarian wax-works by eulogizing Nuttall's strong plume, he says (preface, p. vi):

"If a great advance has been made in the study of scientific ornithology—which term represents only the science of bird's skins, the names by which they are labelled, and the sequence of these names—in other words, the classification of birds—if this science has advanced far beyond Nuttall's work, the study of bird-life, the real history of our birds, remains just about where Nuttall and his contemporaries left it. The present generation of working ornithologists have been too busy in hunting up new species and in variety-making to study the habits of birds with equal care and diligence."

This is glaringly untrue. To say nothing of sixty years (1832–1892) of ornithological activity in every branch of the science, Mr. Chamberlain's own contributions to Canadian ornithology represent some good conscientious work, perhaps of more scientific value to-day than the whole contents of Nuttall's Manual. We could name a hundred living ornithologists who know more about more birds than Nuttall ever did; and we could cite some thousands of pages of contemporaneous bird-biography, of pure life-histories of birds, good in literary form and sound in scientific substance. We could give chapter and verse in support of our strictures, but have neither space nor patience to protract our pain. What we have written is scarcely a review; but it will serve its purpose if it be set down as a lamentation.

Zur Lebensgeschichte des General-Feldmarschalls Grafen von Moltke. Berlin: Mittler. 1892. Pp. xii + 353.

This Life of Moltke forms the first volume of the "Gesammelte Schriften und Denkwürdigkeiten" which began to be issued nearly a year ago, although it is the fourth volume in the order of publication. It is not so much a biography in the proper sense of the term as a collection of biographical, or rather autobiographical, materials. The volume opens with a few pages of "Family History" written by Moltke himself, in which he traces his descent from Matheus Moltke, "knight," who in the thirteenth century held estates in Mecklenburg in fee from Henry the Lion, the conqueror of that country. Then follow brief genealogical notes and personal reminiscences by his father, a concise sketch of his own career from his birth, October 26, 1800, to 1866, and various documents throwing a favorable light on his character and conduct as cadet in the Academy at Copenhagen and his high standing as officer in the Danish service. His only novel, entitled 'The Two Friends,' which was originally published in a Berlin periodical in 1827, is also reprin ed. It is by no means remarkable as a work of fiction, and reveals no strikingly original faculty of invention, but it contains many fine thoughts expressed in an easy and graceful style, and is especially valuable as an embodiment of the author's experiences and impressions and a reflection of his pure and noble personality. We have also the diaries of his journey to Constantinople in 1835–36 and of his sojourn at Rome in 1845, and an account of his travels in Spain in 1846 in the form of a letter addressed to his brother Fritz.

One of the most interesting portions of the work is the section entitled "Stillleben in Creisau," which gives a charming picture of his life on the Silesian estate purchased in 1867. In this quiet retreat, where his intense love of nature found full gratification, he was wont to spend, so far as possible, every summer, from early spring till late autumn. Here in the afternoon of July 15, 1870, as he was driving out in an open carriage with his brother Adolf and family, he met a messenger who handed him a telegram. Moltke read it and stuck it into his pocket, and, during the rest of the hour's drive, seemed absorbed in thought, so

that he paid less attention to the horses than usual and once ran against a curbstone. On his return, he leaped from the carriage and said to his brother, who had followed him into the house: "It is a stupid affair [*dumme Geschichte*]; I must go to Berlin to-night." He then went to his study, where he remained till tea-time. As he rose from the supper-table he struck it with his hand and exclaimed: "Let it come! With or without South Germany, we are ready." It was not until afterwards that his relations learned that the telegram was from the King, who deemed war inevitable and had determined to mobilize the army at once.

At Creisau he was accustomed to pass the greater part of the day in the open air, roaming through field and forest, watching the results of his experiments in raising bees and breeding trout, and giving special attention to arboriculture, of which he was passionately fond. When he was ninety years of age, he had the satisfaction of walking in the shadow of trees which he had planted with his own hands at sixty-eight. He would sit for hours in perfect silence listening to music, and never tired of arias from the operas of Mozart (his favorite composer) or from Beethoven's "Fidelio." He played whist nearly every evening, and kept up this habit even during his campaigns, as a restful recreation and relief from intense intellectual effort. He was exceedingly simple in dress and diet, and perfectly easy and natural in social intercourse; a generous host to congenial guests, but utterly intolerant of bores, whom he quickly got rid of by directing the servant to order their carriage. His gratitude for any kindness was deep and abiding, but he disliked ovations of all sorts, whether private or public, and every form of obsequiousness and subserviency excited in him a disgust which he took no pains to conceal. In short, he was a plain man, of strong common sense and clear intellect, and with a warm heart in full sympathy with all classes of his fellow-men.

In a chapter of a dozen pages we have a biographical sketch of Marie Moltke, to whom he was wedded in 1840 and who died in 1868. This lady seems to have been a most admirable character, beautiful without vanity, cheerful, witty, but firm and resolute, free from every petty trait or morbid taint, a woman in every respect after Moltke's own heart and head. On p. 20 she is spoken of as his niece, but this statement is misleading. She was not related to him by blood in the slightest degree, but was the daughter of his sister's husband, John H. Burt, an Englishman, by his first wife.

The gradual rise of the house of Hohenzollern from simple counts and burggraves to Kings of Prussia and Emperors of Germany has been due less to the superior genius of these sovereigns than to their happy faculty of uniformly putting the right man in the right place, choosing the best person for accomplishing any definite purpose, and giving him their full confidence. Baron vom Stein, Bismarck, and Moltke are striking examples of this selection of the fittest. How the Prince of Prussia (afterwards William I.) "discovered" Moltke, promoted him, and put implicit trust in him, is set forth in the chapter "Der Feld-Marschall und seine Kriegsherrn," consisting chiefly of letters addressed to the great strategist by three generations of Prussian monarchs, several of these communications being printed in facsimile. There are also full descriptions of the celebration of his ninetieth birthday, and an account of "The Last Day of His Life," by his nephew and namesake. The volume closes with a series of paragraphs, or "Consolatory Thoughts," on the present and future life, which, although not remarkably original, are concisely and forcibly expressed, and show a devout and liberal spirit, and are biographically valuable as a statement of the principles that formed Moltke's character and guided his conduct.

We may add that Moltke was expert with the pencil, drawing landscapes and portraits and painting in water-colors and oil with a force and finish quite rare in the productions of amateurs. The present work is illustrated with numerous specimens of his artistic skill.

Anthropological Religion. The Gifford Lectures, delivered before the University of Glasgow in 1891 by F. Max Müller, Foreign Member of the French Institute. Longmans, Green & Co. 1892. 16mo, pp. xxvii., 464.

THERE is no man to whom the science of the history of religion owes more than to Prof. Max Müller. He gave the first decided impulse to the study by his paper on comparative history of religions; he conceived and has admirably carried out the plan of translating the sacred books of the East into English, and so making these monuments of religious thought accessible to the general reader; he had much to do with the establishment of the Hibbert lectures, which have made such valuable contributions to our knowledge of religious history. For all this he deserves great praise, and one could wish that he had been content with the laurels thus so well earned. It was natural that he should wish to make contributions of his own to the science of which, in an important sense, he may be called the founder; but it cannot be said that his efforts as author in this direction have been fruitful. With all his wealth of learning, he seems not to have that grasp of method and principles without which writings on this subject are always in danger of being not merely useless, but also harmful.

Müller further deserves credit for the tone of freedom which he has stamped on the Gifford lectures. Of his three courses, the first, "Natural Religion," speaks of religion and mythology in general; the second, "Physical Religion," is devoted to the discovery of the Infinite in nature, traced from its first poor beginnings to its culminating point, the belief in one God as manifested in the whole of nature; the third, "Anthropological Religion," deals with the attempts at discovering the Infinite in man, beginning with the first surmises of the existence of something different from the body, and culminating in the belief in the divine sonship of man. These subjects are discussed (in the first two courses) without religious bias, but, it must be added, without scientific precision. The work before us may be described as a series of more or less interesting observations on the matter in hand, presenting a large but undigested and unorganized mass of material. Nearly one-half of it is unnecessary to the subject of the book. The preface discusses the existence of miracles, a question quite out of place here, though doubtless of interest and value for his Scottish audience. In the six first lectures Müller talks of freedom of religious discussion and of toleration, gives a summary of the results of his first course on "Physical Religion," presents the historical proof of the existence of God, diverges into a refutation of Mr. Herbert Spencer's theory of ancestor-worship, and then dilates on the untrustworthinesss of the materials for the study of religion. It is only after having disposed of all these things that he finds himself at liberty to come to the discussion of his subject.

The body of the book is really a somewhat rambling talk on ancient notions concerning the character of the human soul and its existence after death. We need not quarrel with his title, 'Anthropological Religion,' though its appropriateness is not obvious. He takes pains to say that his adjective has nothing to do with the modern Science of Anthropology. Indeed, one controlling motive of the volume is a polemic against the views of Tylor and other members of the Anthropological school. Our main objection lies, not to Müller's title, but to his manner of treating the subject, which is characterized by diffuse superficiality and irrelevancy. It is often difficult to get at his meaning, to see what his remarks are intended to lead to; as, for example, in what he says of totemism (p. 121 ff.), where, after mentioning some things which he says are not totems, he quotes Sir George Grey's description of the Australian kobong, and adds: "Here then, if Sir George Grey's description is right, we have the very opposite of totemism, the kobong or crest derived from the name of the family, not the name of the family derived from the kobong. I do not say that the explanation of Sir George Grey is right, but it is surely right to distinguish kobongs and totems and not to mix them up altogether under a vague name," where one searches in vain for the ground of his "surely right."

His whole conception of his subject seems to be unclear. Real religion, he says (p. 182), requires a belief not only in God but also in man; and accordingly, having traced the genesis of the name and concept of God in the various religions and languages of the ancient world, he proceeds to do the same for the human soul. In thus separating man from God he fails to see, or at least does not say, that the religions of the world have sprung out of the coöperation of all human faculties and sentiments. He seems to reduce his subject to a department of ancient psychology; he fails to take advantage of the light which the idea of the soul throws on the idea of God. In his account of the deification of men, he curiously inverts the true order of things. The worship of the dead, he declares (p. 352), led to their deification—a statement which seems to be precisely contrary to the fact. He has not entirely abandoned his theory that mythology is a disease of language: he supposes, for example (p. 354), that the poetical epithet Zeus-born, applied to a king, and then misunderstood, led to the belief that the king was actually a son of Zeus. Such a view, it is safe to say, will meet with no favor to-day. Among other things, it may be mentioned that what he says (p. 367 ff.) on the idea of immortality in the Old Testament is decidedly unsatisfactory.

Though this volume, considered as a scientific history of early religious development, is of little or no value, it contains a great number of useful facts, and in so far as it represents the spirit of free thought on religious history is entitled to commendation.

BOOKS OF THE WEEK.

Andrews, Charles McL. The Old English Manor: A Study in English Economic History. Baltimore: Johns Hopkins Press. $1.50.

Exhaustion.

HORSFORD'S
ACID PHOSPHATE.

A wonderful remedy, of the highest value in mental and nervous exhaustion.

Overworked men and women, the nervous, weak, and debilitated, will find in the Acid Phosphate a most agreeable, grateful, and harmless stimulant, giving renewed strength and vigor to the entire system.

Dr. Edwin F. Vose, Portland, Me., says: "I have used it in my own case when suffering from nervous exhaustion, with gratifying results. I have prescribed it for many of the various forms of nervous debility, and it has never failed to do good."

Descriptive Pamphlet free.

Rumford Chemical Works, Providence, R.I.

Beware of Substitutes and Imitations.

CAUTION: Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

"The weary brain requires some nerve sustaining element as food."—HERBERT SPENCER.

Crosby's Vitalized Phosphites.

The vital principle of animal and vegetable life isolated from the ox brain and wheat germ.

The loss of memory, the tired and exhausted feeling, the dull, unrefreshed sleep, or nervous sleeplessness, brain weariness, depressed vitality, are simply the brain and nervous system calling for their necessary food. In this condition the Vitalized Phosphites give great relief. It restores the true protagon, the brain phosphoid, increases brain and nerve power by specially feeding the nerve centres. It reinvigorates brain and body.

For thirty years endorsed by leading physicians and the world's best brain workers. Formula on the label. Pamphlet free to those who write for it. Druggists or by mail, $1.00. 56 W. 25th St., N. Y. *F. Crosby Co.*

Our new Book Catalogue not only gives the size and price of all the standard works on Homœopathy, but an interesting description of each, together with opinions of the press and of physicians. Mailed free.

"Knowledge is of two kinds. We know a subject ourselves, or we know where we can find information upon it."—Boswell's Life of Johnson.
One hundred years after Boswell gave utterance to the above
The Weekly Bulletin of Newspaper and Periodical Literature
comes to the front and provides an easy means for securing information of the sort found in the periodical press—information for the lack of which many an eager student has been thwarted in his aims.
Important Information.
The Bulletin catalogues and classifies the principal contents of over 500 daily and weekly papers, and 200 monthlies and quarterlies.
The Bulletin gives in each case the name and date of the paper, the name of the author (when known), a line of description, when necessary, and the approximate length of the article.
The Bulletin supplies the articles thus catalogued, at prices ranging from ten to thirty cents an article.
In a Nutshell.
THE BULLETIN enables its subscribers to procure the cream of periodical literature at a cost of a few dollars per year.
Yearly Subscription Price, $1.00.
Send for a free sample copy and judge for yourself.

The Nation.

NEW YORK, THURSDAY, JUNE 23, 1892.

The Week.

WE go to press before the Chicago Convention has produced either a platform or a nominee, but Mr. Cleveland's candidacy is a foregone conclusion. Whatever be the unanimity, real or apparent, of the delegates, his choice has been fixed by the country at large. The people of both parties have seen in him the appointed leader of the opposition to the policy of the party in power. This fact is a conclusive argument against the sentimental objections to a Presidential second term. Mr. Harrison's renomination was hardly less so, for, though he is not a popular personage, he was early seen to be the only available candidate; and logically the Republicans were committed to a vindication of their policy in his administration. Either party had an option of suicide by nominating a Blaine, a Hill, or a Gorman, and the bosses would have been capable of this folly; but their shortsightedness and their machinations alike were irresistibly overruled by public sentiment. We shall, therefore, have the rare privilege of a canvass between men who are to be tried not by personalities — though personal qualities will tell—but by the policies they stand for and by their respective administrations. This will not give us a "singing campaign," or one in which the blackguards and the blatherskites will play the leading rôle; but the appeal must now be to sober reason in defence of principles, and on the ground of history and not of prophecy.

The Supreme Court of Michigan has done only what every well-informed man expected in deciding, by a unanimous vote of the three Republican and two Democratic judges, that the so-called Miner electoral law is constitutional. This law was passed by the last Democratic Legislature, and divided the State into two electoral districts at large by a north and south line, and into twelve Congressional districts, each of the fourteen to choose one Presidential elector. The Republican managers, under the foolish advice of ex-Congressman Cutcheon, concluded to question the validity of this law, upon the absurd ground, as he expressed it, that "the bill is revolutionary in its character," since Presidential electors had always and everywhere been chosen by the State at large on a general ticket. Mr. Cutcheon finally learned that the district system had been generally employed for forty years after the adoption of the Constitution, under the provision which explicitly gives each State the right to appoint its Presidential electors "in such manner as the Legislature thereof may direct"; but the party had by that time been so far committed to a contest in the courts that the matter was pressed. Of course the judges have made short work of all the quibbles employed, and decided that "the statute must stand as the lawful edict of the Legislature." The court adds, very properly, that though such a law is valid, it is obviously unjust that one State should adopt the district system while all the rest stick to the usual plan. Indeed, it was a piece of the grossest partisanship for an accidental Democratic Legislature to put through such a measure in a Republican State.

The practical effect of this decision is to insure a division of Michigan's electoral vote this year. The State has had eleven representatives in Congress, and will have twelve under the new apportionment. Under the old apportionment the Democrats have never carried less than two of the eleven districts (their number in 1888), while they have gone as high as five in 1886, six in 1882, seven in 1884, and eight in 1890. Under the new apportionment the Democrats count confidently upon getting half of the twelve Congressional districts next fall, and one of the two districts at large, thus dividing the total fourteen equally between the parties. In any case, they are certain of at least two or three, so that, for the first time since the Republican party was formed, its candidate for President will not get all of Michigan's electoral votes.

The President probably did not mean anything very serious by advising the Senate on Monday to devise some measure of injury to Canadians "with deliberation, and yet with promptness." It seems as if he had purposely chosen a time for bringing up the matter when it would be ignored by the country, in the absorption of Convention week. Yet his message deserves more notice than it will receive. The precedent set in Mr. Harrison's Chilian message is here faithfully followed. In the course of a negotiation and while, as he admits, "awaiting the further communication from the Government of Canada," he makes his side of the case public, insists that his interpretation of the intent of foreign legislation and of an article in the Treaty of 1871 is the only possible one, and, with a hinted charge of bad faith against the Canadian Commissioners, urges the Senate to consider the case closed and to proceed to judgment. If the President is not careful, he will go into history as a writer of "just-in-time" messages.

The dispute arises over the rebate granted by the Canadian Government to wheat carried through the Welland Canal to Montreal for export shipment. The President asserts that this rebate is in violation of article 27 of the Treaty of 1871, which undertakes to "secure to the citizens of the United States the use of the Welland, St. Lawrence, and other canals in the Dominion, on terms of equality with the inhabitants of the Dominion." The Canadians, on the other hand, assert that there is no discrimination in the granting of the rebate, that it will be given to American shippers or vessels on precisely the same conditions as to Canadian, and that the measure is simply one of domestic legislation designed to foster export trade at Montreal. This reply the President declares to be "wholly evasive," which is emphatic if not diplomatic. He also has to report an "unfortunate misunderstanding," which is his phrase for our old friend "a question of veracity," so inevitable in negotiations in which Mr. Blaine has a part. The ex-Secretary asserted that an "informal engagement" had been made by the Canadian Commissioners "to repeal and abandon" the rebate; the latter, however, declare that this statement "does not conform to their understanding," and that "the only assurance" they had given was that the "complaint of the United States Government should be taken into consideration by the Canadian Ministry." It will probably seem fitting to the Senate, in view of this contradiction and of the incomplete nature of the diplomatic correspondence, to proceed "with deliberation," as the President suggests, if not with "promptness," as he also suggests.

It may be that a ship-railway around the Dalles of the Columbia River, and a canal to connect Lake Washington with Puget Sound, are desirable enterprises, and it is possible that it may be for the public interest that the Government should construct them. Just now, however, these schemes may be in a way to promote the general welfare with less expense by stopping the passage of the River and Harbor Bill. It is of the utmost importance that there should be some economies effected at once, for the Treasury is so nearly empty that it could not stand the slightest drain. The suspension of river and harbor improvement is of course wasteful, but it would be a much greater calamity should the Treasury be unable to pay gold to those who demanded it. The proper course for the Democratic majority in the House of Representatives to pursue would have been to reduce expenditures in all departments, including that of public improvements. As they failed to adopt a judicious policy in this respect, the best thing for them to do now is to refuse to concur in any of the Senate's amendments increasing appropriations.

There is something familiar about the introduction of a telegram into the tin-plate debate in Congress on Thursday, announcing that another factory would be ready, some time in the dim future, to make vast quantities of American tin plate. Two years ago, despatches of that sort played a great part in Republican arguments for an increase of duty, McKinley being especially profuse in them. According to him and Senator Allison, we were to be producing by this time "substantially" all the tin plate we consume. They now adjourn the date of the successful establishment of this infant industry, and add a fresh lot of discordant opinions to the mass already existing on the question of how long it will really take to create an industry by tariff taxes. The Tariff Act of 1789 was to run for seven years, that length of time being then thought to be sufficient to get an infant to walking alone. The protective duty on cotton in the tariff of 1816 was to be levied for only three years. By 1832 the infant was found to be so fearfully weak that Clay assigned twenty-five years as the time it would take to get it out of the cradle. That high protectionist authority, ex-Prof. Thompson, declares that "it will ordinarily take the lifetime of two generations to acclimatize thoroughly a new manufacture, and to bring the native production up to the native demand." This leaves the outlook decidedly gloomy. It is now generally conceded, even by Republicans, that it will take at least "four years more" for the McKinley Bill to be understood, and if its miraculous benefits in the matter of tin plate are to be reaped only by our descendants in the second generation, it would seem that the Presidential candidacy of McKinley will have to be deferred till about 1950.

Senator Stewart made it perfectly plain, in his comment on Thursday upon Mr. Morrill's vigorous speech, that the free-silver extremists regard the international conference with deep disgust as a neat little scheme to block their agitation without promising to further their wishes in the least. What they want is a general surrender to their wildest demands, irrespective of other nations and irrespective of party sentiment. Teller and Bland talk a great deal about the need of a President who will not set himself above his party, and will not veto a free-coinage bill. The Republican platform is supposed to embody this idea in its declaration in favor of settling the silver question "by legislation." But what this demand really amounts to is, that the President shall not oppose a veto, not to a measure of his party, but to the free-silver men of all parties. For neither the Democratic nor the Republican party has passed a free-coinage bill by its own votes. Such a bill passed the Senate two years ago by a combination between Democrats and Republicans, and the Bland Bill would not have come so near passing this year as it did had not eleven Republicans voted with the Democrats. It is the simple fact that neither party by itself can or will pass a free-coinage law. Thus the demand that the President shall ignore his constitutional obligation at the behest of his party, comes down to the impudent and absurd demand that he shall do so at the behest of the free-silverites of all parties or no party.

Texas must be added to the number of rabid free-coinage States that are unbending in their determination to make other people take silver while they will themselves have nothing but gold. We have received a copy of an ordinary stationer's blank for a promissory note, intended for use in Texas, and in it the words "in gold" are printed in small capitals. It is also the testimony of New York bankers dealing in Texas notes, that the latter almost invariably contain the gold clause. This is but in keeping with the traditions of the State, which, we believe, maintained the gold standard all through the rebellion, taking Confederate notes only when forced to do so. But what a spectacle it is when Senator Stewart's "gold Moloch" is thus seen to move on its destructive car out of his dreadful Wall Street and crush into subjection the leading silver States of the country.

It was predicted last year, when it became apparent that Europe must buy from us more than double its usual quantity of grain, that the debt would be paid by sales of American securities. The prediction has been fulfilled in such a manner that the process of operation has been more than usually open. The exports of grain alone from this country, in the ten months ending with the 1st of May, 1892, were worth $262,002,371, against only $101,539,749 for the same months in the preceding year. In the whole list of exports the increase was so great that the "trade balance" in our favor, on the business of the same period, was more than $200,000,000. Something over thirty millions in gold was sent to us from Europe in the fall of the year as part settlement of this difference; but it was not until our own security markets had begun to reflect the favorable turn of events that it was clearly seen how Europe was paying the balance. How large was the amount of its American holdings sold during the fall and winter rise in prices can only be guessed. Estimates of an almost fabulous magnitude have been made by conservative bankers; but all that can be said with certainty is, that every advance in stock-market prices based upon home buying, since the opening of the year, has been met by heavy sales of securities for foreign account. The problem of American bankers very soon ceased to be, Will Europe sell or will it buy? and shaped itself, instead, into the query, When will Europe's hoards of our securities be exhausted? The sales were at all events so large as to turn the actual balance of exchange in the opposite direction.

Since the opening of the year, almost as much gold has been exported from this country to Europe as was imported in the fall of 1891. A little while ago it was believed that the outward movement of specie had come to an end, and hopeful observers of the markets, both here and abroad, predicted the early return of European investors. These hopes were disappointed. In the face of the favorable crop report for May, and the consequent advance of money-market prices, foreigners resumed their selling, and eight millions in gold has just been shipped for Europe. To investors on this side of the Atlantic, this continued "unloading" from abroad has been in many ways discouraging. Yet it is not without its encouraging side. The general advance in our own prices, in spite of the foreign selling, shows that this country was rich enough to buy what Europe was too poor to keep. The favorable security market supplied by this country has undoubtedly averted a much more serious foreign crisis.

Will anybody be kind enough to inform us what has become of that investigation of Egan and McCreery which was to be vigorously undertaken by the State and Navy Departments? It is more than a month ago that this was promised by Messrs. Blaine and Tracy. Deference to those gentlemen was all that prevented Congress from taking up the inquiry at the time, and Representative Breckinridge intimated that this deference could not be made an excuse for unwarranted delays. A strange mystery seems to attach to the movements of the accused officials. They were due in this country at least two weeks ago, but, if they have arrived, it must have been incognito. McCreery, in an absent-minded moment, may have made a mistake and taken a steamer for England, but Egan, for obvious reasons, would not have been guilty of such an oversight. We hope to see an inquiry as to his whereabouts and his achievements set on foot in Congress as soon as the National Convention is over.

The address lately delivered before the Bar Association of Georgia by Chief-Justice Bleckley of that State is one of the most complete arraignments of mobs ever made. Following close upon the proclamation of Gov. Northen, it may help to check the lawlessness which has of late been so rife in Georgia and in neighboring States. Chief-Justice Bleckley declares that mobs would not exist if we could silence their deluded advocates and apologists. He especially deplores the tone of those newspapers which confound the mob with the people, and treat some, if not all, instances of mob violence as cases in which the people act in their own behalf and take justice in their own hands. He maintains that mobs are not the people; that they who compose

them are for the time seceders from organized society who outrage its fundamental principles and trample on its institutions. He even contends that if all the people should perpetrate an act of violence on the worst of criminals, the case would not be one in which the people had taken justice into their own hands, but one in which, in violation of their own law, they had inflicted injustice in the name of justice. "In such matters," he adds, "the people cannot act otherwise than through their legitimate agents. By appointing these agents and committing all punitive power into their hands, to be exercised in the name of the people and for the good of the people, the people renounced completely and for ever all right and all power to transact such business in person or by means of their own direct intervention." This language is not too strong. The Chief Justice asks what newspaper would speak with approbation of the people assembling in a mass and making laws? Why, then, should mob agency in the administration of laws be countenanced? By interfering in the first instance, or by reviewing the verdict, as in the New Orleans case, they make the jury system contemptible. As Chief-Justice Bleckley well says, "Anything which assumes to be better and tends to make itself bigger than the jury is out of place where trial by jury is an institution of the country and forms the chief bulwark for the security of person and property. Society works by and through established institutions, and can work wisely and safely in no other way. To weaken or discredit these institutions is to enfeeble government and bring authority into contempt."

By a vote of 19 to 3 the trustees of the University of Pennsylvania decided last week to remove Prof. R. E. Thompson from the chair which he had been previously, but in vain, requested to resign. The deposed professor gives to the public a letter addressed by him to the trustees, and in it there is evidence of a deep-laid conspiracy against the foremost university exponent of the "American doctrine of protection." In the first place, he says that he has vainly appealed to the trustees "for the reasons for this action," but has not been shown "even the courtesy of a refusal to give them." This looks bad. If Prof. Thompson were simply incompetent or personally offensive, what could be easier than to tell him so? The inference is unavoidable that the real "reasons" could not bear the light of day, and everybody knows that any form of assault upon protection is a thing that has to be kept very dark in Pennsylvania. Prof. Thompson himself is clearly of the opinion that the cause of protection has received a grievous stab in his person, for he puts first among the reasons for his removal, as he has "gathered" them, "that I have been teaching political economy while occupying the chair of History and English Literature." He mentions other rumored "reasons," only to denounce them as "not the real ones," and he begs the trustees "to have the candor to assign the real reasons for your action." Every lover of fair play will sympathize with this effort to force disguised enemies of protection to come out and declare themselves for what they really are.

College commencements have steadily worked back towards the first of June during the past ten years, and, in compensation, many of the colleges have adopted the Charles Lamb principle of making up for coming late to his office by going away early—that is, they have put the opening of the college year a week or so further along towards October. That the increasing length of the vacation involved is a matter of some concern to college authorities may be inferred from a short communication on the subject in the *North American Review* by President Thwing. He protests against a "too-long vacation" mainly on the ground of the dissipation of energy and loss of studious habits resulting to the student, inasmuch as the teacher, he believes, usefully employs a good part of the three months of freedom from the duties of the class-room. This idleness during one-quarter of the year may furnish a point of attack to those who are trying to shorten the college course and make it possible for graduates to begin their professional studies a year earlier. We believe that the new Chicago University contemplates four terms of twelve weeks each—with a substitution of professors during one term—so that a student may, if he chooses, make his course almost continuous and get over four years' ground in three years. The obstinate fact back of the present system is the relation of the colleges to the social demands of their chief patrons. Fifty years ago the long vacation in some New England colleges fell in the winter, so that undergraduates might teach for three months and thus help to pay their way. Changing social conditions have come to demand the summer as the free time, and it is difficult to see how the colleges are to withstand it so long as their present relations to society continue.

The problem of an ignorant negro vote, which has made so much trouble in our Southern States, and which has been solved by some of them, it must be confessed, rather after the manner of Alexander with the Gordian knot, receives some light from an unexpected quarter. A correspondent of the London *Times* at Cape Town, South Africa, explains a reform of the suffrage which has been put forth by the Government of that colony, as necessitated by the fact that the colored population outnumbers the white by three to one. At present every man, black or white, has a vote if he occupies a dwelling worth £25, or earns wages of £25 a year with board and lodging, or of £50 in money. As hardly any dwelling fit for the habitation of civilized man can be constructed for £25, it is plain that the suffrage was intended to be practically manhood suffrage for all except the native barbarian, whose worldly goods, as the *Times's* correspondent says, "are represented by a blanket and a bundle of wattles." The intention has been fulfilled so far as to give the suffrage to every laboring man, white or colored, but the barbarian vote is showing a startling disposition to increase. Moreover, certain lewd fellows of the carpet-bagger sort are beginning to control this vote, with the result that the conservative element has felt it wise to oppose a policy of expansion and development, as tending to the annexation of regions inhabited exclusively by a colored population.

To meet the difficulty, it was proposed last year to confer a dual vote upon education and property, but the objections to this plan were insuperable. This year, however, the Government has brought forward a bill providing that the voter must be an occupant of a dwelling worth £75 instead of £25, or receive wages amounting to £50 a year exclusive of board and lodging, and every applicant must write his name and address before he can be registered; but no voter now qualified is to be disfranchised. It seems that a provision of this kind is not unacceptable to the better class of natives, who would thus be distinguished from their semi-savage relatives. Considering that the cost of dwellings has much increased, and that the rate of wages is very high in the Cape Colony, it seems probably true, as is claimed, that no man who really works for his living will be excluded from the franchise. It may be that some modification of this plan would be acceptable to both races in our own Southern States.

Little was accomplished by the Central American Diet which recently met in San Salvador. Costa Rica sent no representatives to it, but the delegates from the four other republics agreed upon a sort of defensive alliance between their countries. They also decided to call together another Diet in September, 1893, to which should be invited the Ministers of Colombia, Mexico, and the United States resident in Central America, when a serious attempt should be made to finally bring about the long-delayed Central-American Union. The Colombian and Mexican Ministers were probably invited in order to give assurances that the proposed confederation would meet with no disfavor from its neighbors, north and south, and the representative of the United States to lend a benevolent, big-brother sort of sanction to the project. But the plan has so often seemed close to realization, only to be broken off by some quarrel, that a wholesome scepticism in regard to success next year is but natural.

PUBLIC OPINION AND CONVENTIONS.

THE growing importance of the Machine as an element in the organization of a party has led of late years to some questioning as to whether national conventions could longer be depended upon to carry out the theory of their existence. This theory is that such a body will bring together the chosen representatives of the party from every State of the Union—its picked men—and that these delegates will counsel together as to the wisest course for the organization to take. Theoretically this is an excellent arrangement; while not perfect, the best that any one has yet been able to devise.

Practically, however, the convention system has often been found to work very differently, so far as relates to minor officials and lesser party issues. In many of our cities nobody can vote at a caucus of either party unless his name is enrolled as a member of the organization. The total membership of such an organization is never more than a small minority of the voters of the party. Moreover, it is a rare thing to have a full representation of the organization, a small element usually "running" the caucuses. It is, therefore, not only possible, but common, to see a city convention the delegates to which have been chosen by a minority of the organization which is itself a minority of the party. In the country districts the same result may be reached by shrewd management on the part of the local machines, while the way is always open for unscrupulous men to control caucuses illegitimately by sharp practice in giving short notice of the meetings, appointing them at inconvenient places, and resorting to other such "dodges."

So successful have these methods often proved in securing control of local offices, and even sometimes in the case of a State convention, that professional politicians have hoped, and good citizens have feared, that they might be applied with equal success to a national convention. If a city boss could run a municipal convention, and a State boss a State convention, why should not a combination of State bosses control the national gathering of a party?

The attempt has been twice made during the present year, and under as auspicious conditions for the bosses as could reasonably be expected. Each party was to nominate a candidate for President. Each party had a man within the range of choice who was opposed by the bosses of his party. In each party the bosses were bent upon one thing—the rejection of this man; and in each case they felt at first great assurance of success. Platt, Quay, and Clarkson have been the three most prominent men in the Republican organizations of their respective States for many years; and their States were the chief commonwealth in the Union, the second largest, and an important State in the West. They were hand and glove with managers of the same type in many other States. They controlled the National Committee of the party. They and all of their kind were resolved upon the defeat of Harrison, and they flattered themselves that they had everything in their own hands. Meanwhile a similar combination was at work in the Democratic party to prevent the nomination of Cleveland. It is always expected that a candidate for the nomination shall be supported by the delegation from his own State—and especially so when he lives in a doubtful State. The Democratic counterpart of "Tom" Platt as a boss in New York therefore set out to secure, at all hazards, a "regular" delegation from this State against Cleveland. Hill succeeded completely in his purpose. All that remained, it seemed to him, was to strike hands with the bosses in other States, whom he knew to be as much opposed to Cleveland as he was himself. Then the combination could say to the delegates: "The party must carry New York to win the election. The delegation from New York is unanimous in declaring that Cleveland cannot carry New York. The one thing you must not do is to nominate Cleveland."

It seemed to the bosses in each party as though they must succeed. They had run their own State Conventions so long that they could not see why, if they united their forces, they should not run a national convention. What they left out of account was the power of public opinion. The masses of the Republican party favored the nomination of Harrison—not with enthusiasm, not from admiration of the man, but because he seemed the logical candidate, the strongest representative. The masses of the Democratic party favor the nomination of Cleveland with ten-fold force, not simply as the logical candidate and the strongest representative, but as the object of their enthusiastic admiration. It was this sentiment of the body of the party against which the combination of Republican bosses at Minneapolis ran and were broken. It is the similar and far stronger sentiment among the Democracy which is, as we go to press, visibly wrecking the anti-Cleveland "combine" at Chicago. Harrison had able managers in the Republican Convention, as Cleveland has in the Democratic, and such management is essential; but New would have been powerless at Minneapolis, and Whitney would be at Chicago, if it were not for the underlying and resistless force of the opinion of the party at large.

The defeat of the anti-Harrison scheme in the Republican party, and the already assured defeat of the anti-Cleveland scheme in the Democratic party, are causes for equal rejoicing on the part of all good citizens. Such events show that public opinion still controls in America. As Abraham Lincoln said in one of his joint debates with Douglas: "With public sentiment on its side, everything succeeds; with public sentiment against it, nothing succeeds." Mr. Bryce, in his 'American Commonwealth,' pointed out that "the strong point of the American system, the dominant fact of the situation, is the healthiness of public opinion, and the control which it exerts." The defeat of the spoils-seeking politicians in each party this year emphasizes the truth of this observation.

THE BLIGHT ON LEGISLATURES.

IT has been a theory, often and very earnestly set forth by its advocates, that large legislative bodies are in themselves no small safeguard against corrupt lawmaking. If, however, we test that idea by certain facts of the last few years in three New England States, apparently little remains for it to rest upon. Five years ago the most corrupt and scandalous legislative episodes in the history of New Hampshire were disclosed in what was known as the "Concord Railroad fight" at the capital of that State. Yet the lower house of the New Hampshire Legislature contains 344 members, and is, we believe, the largest legislative body of all the States in the Union. Two years later came the equally corrupt "parallel railroad" contest in Connecticut, which has a lower house of 252 members. Massachusetts has a lower house of 240 members, yet the unsavory "West End" scandal of two years ago has just been followed by doings which stamp the present Legislature of the State as probably the most venal which ever sat at Boston. Not only is the "big membership" theory thus pretty thoroughly disposed of, but also most gloomy evidence is offered of the general decay of legislative morals—a decay which unfortunately seems to strike deeper as civilization in the American commonwealths advances.

It is peculiarly impressive, as we trace out the growth of this legislative evil in the old Puritan commonwealths, to see how it has been marked by the almost complete extinction of what may be called the "honorary" conception of membership of a legislative body. In the old days the New England legislatures were "general courts," not merely in formal title, but in common parlance. Somewhat of the dignity of the judge went along with membership in them. The pay was almost nothing; the illicit profits quite so; but the personal honor of the position was very considerable. The farm communities, therefore, almost invariably sent up to the State capitals their best men, and sent them up over and over again. Usually it was the country squire, but, if a farmer, it was the farmer who was the leader in town meeting, apt to be the best-lettered man of his class, and usually the owner of many well-ordered acres. He took his election, moreover, not only as a matter of grave personal responsibility, but as a civic badge of the highest dignity and as a sort of decoration. In actual legislation he may have been an opinionated, cramped partisan,

but his integrity was flawless, and pride of place as well as his conscience checked the slightest tendency to a dishonorable act.

As time has gone on and the old General Courts of New England, with their one or two hundred judges, have been superseded by the "Legislature," with increased membership in the popular branch, the "honorary" impulse seems to have completely died out, or rather to have been abased into an impulse almost purely material. Some of the reasons are plain enough. The lowered *morale* of voting constituencies, the corporative influence, the weakened tone of the farm communities, the rise of cities, and the immense mass of diversified business which precipitates itself on the modern Legislature are some of the more palpable causes. In New England very distinctly, and somewhat less so in other parts of the country, there has been generated as a powerful secondary cause the "rotative" habit, and the theory that the place of legislator must be "passed around." The General Court of Massachusetts in 1790 contained out of a total of 204 representatives no less than 101 who had been reëlected from the previous year. Nowadays, in the districts made up of several towns, the place must be passed around in succession, and the town that takes it twice, no matter how competent and honest the incumbent, is "hoggish." But the development of this pernicious notion is most clearly manifest in Connecticut, where it has been intensified by the large number of legislative prizes under a constitutional system in which each of the towns sends at least one representative and many of the little towns two. Its progressive character is shown by decades in the table annexed, brought down through a century to the present time:

	Whole No. of Representatives.	Reëlected from previous year.	Per cent. reëlected.
1790	171	109	63.7
1800	189	102	54.0
1810	199	83	41.7
1820	204	53	26.0
1830	208	47	22.6
1840	212	27	12.7
1850	222	27	12.2
1860	236	30	12.7
1870	239	24	10.0
1880	246	23	9.3
1892	252	23	9.1

How absolutely fatal to any theory of legislative responsibility such a state of affairs must be is obvious. It simply tempts a man of easy-going principles to make the most of his "good time" as a legislator; if corrupt, to sell his vote and influence as often as he can; and, even if both able and honest, it spurs him on with no hope of appreciation by his constituents and consequently of continued usefulness. In short, the custom of rotation has caused the State legislator's place to be looked on not as a public trust and dignity but as a kind of perquisite.

NEWSPAPER COPYRIGHT.

A SUIT of importance in defining the right of literary property has recently been decided in favor of the London *Times*. That journal had so long been the passive victim of journalistic pilfering as to lead many persons to argue that a custom had been established which was superior to the law, and it was high time to take some step in repression of the abuse. The Parliamentary reports of the *Times* are said to have been for years regularly telegraphed to the provincial papers in time for their morning editions, its foreign correspondence has been freely made use of, and its telegrams have been appropriated bodily. During the recent troubles in the Argentine Republic, the despatches in two days from Buenos Ayres alone cost the *Times* £1,500, and were reprinted in a few hours, without permission, in the evening papers. Some ingenious projectors have calculated that it would be practicable to produce a newspaper in London by seven o'clock in the morning the news in which should be entirely obtained from the morning papers. Such a newspaper would contain the best of material, and, being at no expense for news, could be sold at a profit for a half-penny.

If the practice of copying news had been confined within reasonable limits, it is not probable that the *Times* would have thought it worth while to resort to the law for protection. The difficulties in the way of defending copyright are very great, and the trouble of registration is itself considerable. But certain journals went beyond all the bounds of decency, habitually appropriating large quantities of matter, both articles and news, which the *Times* had obtained at great expense, neglecting in many cases to give any credit for it, and refusing to be deterred from their course by friendly remonstrance. Under these circumstances, the proprietors of the *Times* decided to test and ascertain their legal rights, and prepared themselves by taking assignments of certain articles, among them one by Rudyard Kipling, and otherwise duly perfecting their copyright in the edition of a certain morning.

These preparations, which the plunderers of the *Times* thereafter indignantly characterized as "baiting a trap for them," were not futile. The *St. James's Gazette*, a journal that appears about noon, before the second edition of the *Times* is issued, had long made free with the matter procured by the *Times*, but on this occasion rather outdid itself. It copied a considerable part of Mr. Kipling's letter, and proceeded to add insult to injury by sneering at the *Times* for paying a price for such matter, at the thought of which "the imagination of the ordinary literary person shrinks appalled." We recollect a story of an English tourist in Naples, in the good old days of King Bomba, who was compelled by the thieving habits of the Neapolitans to supply himself with cotton instead of cambric handkerchiefs, and who had one of his cheap substitutes thrown back to him by an outraged pickpocket, in whose expressions of angry contempt the sympathizing bystanders joined. It seems to have been reserved for the *St. James's Gazette* and its supporters to complain that the victim of its rapacity had paid an extravagant price for the article which, with full knowledge of its quality, it had pilfered.

The same copy of the *Gazette* contained also twenty-two different paragraphs copied from the *Times* of that morning. In seven of these paragraphs the source from which they were obtained was acknowledged; in the other fifteen the *Times* was not referred to. In many of these paragraphs the *Times* had no copyright, but it proved copyright in three of them. Two of these were despatches from its foreign correspondents, and each had at the end the words "Our correspondent." These words were omitted by the *Gazette*, as was the word "Dalziel" at the foot of the third paragraph. Acts of like character, it was afterwards shown, had been daily practised by the *Gazette* since 1880. The solicitors of the *Times* having obtained an injunction restraining the publication of the Kipling letter, the editor of the *Gazette* expressed regret for his action as to that article, but refused to withdraw the others.

Upon the trial the defendants pleaded that it was an established custom for newspapers to copy from one another without asking permission, and that consent may be assumed if four conditions are observed, viz.: (1.) That the source of the quotation be duly acknowledged. (2.) That the paper copying and that from which the matter is copied be not direct competitors. (3.) That the paper from which matter has been copied has copied matter from the other. (4.) That it has copied matter from other papers. As to the first of these conditions the Court declared that while it might sometimes be for the advantage of a paper as an advertisement to have extracts made from it, which, however, could not have been, in its opinion, the case with the *Times* and the *Gazette*, it is impossible that any such advantage should result when the source of the quotation is unmentioned. The second condition did not apply, because the *Gazette* appeared before the *Times's* second edition, and moreover the *Times* had a tri-weekly as well as a weekly edition, so that the *Gazette* was clearly a competitor. As to the third condition, the attempt of the defendants to establish a tacit reciprocity treaty proved, as the Court said, a ridiculous failure. They succeeded in showing that, during the twelve years preceding, the *Times* had twice, once in 1888 and once in 1890, quoted from the *Gazette*, giving the source of its quotation, while the *Gazette*

had begun its systematic copying from the *Times* in 1880, and continued it on a large scale and without interruption ever since. Finally, in support of the fourth condition, the defendants adduced sixteen instances where the *Times* had copied from other papers, and the *Times* showed that in thirteen of these they had copied by request or in some equally justifiable manner, and the Court held the other instances to be too trivial to deserve consideration.

The case of the defendants thus altogether broke down, but the Court added emphatically that with respect to copyrighted articles the plea of a custom of copying them could no more be supported than the highwayman's plea of the custom of Hounslow Heath. There appears to have been some uncertainty whether this was the law or not, but this uncertainty is now dispelled, and if newspapers choose to go to the trouble of copyrighting matter the procuring of which has cost them money or required skill or enterprise, they may secure the result of their labors. Of course the cry was raised that there should be no monopoly of news, just as we heard in this country that there ought to be no property in ideas, but this fallacy was exploded by the Court in a summary manner. It pointed out that the law recognized the right of criticism or discussion, and such quotation as was necessary thereto, which was "the fair exercise of a mental operation discussing the character of an original work." But what the *St. James's Gazette* had recourse to was "not a mental operation involving thought and labor and producing some original result, but a mechanical operation with scissors and paste, without the slightest pretension to an original result of any kind; a mere reproduction of 'copy' without trouble or cost. . . . It is said that there is no copyright in news, but there is or may be in the particular form of language or modes of expression by which information is conveyed, and not the less so because the information may be with respect to the current events of the day."

THE NEW HOUSE OF COMMONS.

THE dissolution of the present Parliament, the twenty-fourth of the United Kingdom and the twelfth of Victoria's reign, will take place six years, almost to the day, after Mr. Gladstone, by dismissing its predecessor, appealed in vain to the country to reverse the condemnation which the Commons had passed upon his Irish policy. Although the second reading of his Home-Rule Bill was negatived by a majority of only thirty, the British and Irish Home-Rulers found themselves in the new Parliament in a minority of 120. So closely under English law and practice do the elections follow upon dissolution, that it is now perhaps almost superfluous to speculate as to the outcome of the struggle about to begin. The result of the general election of 1885, the first held under the present franchise and with the existing distribution of seats, showed that the united Liberal party could command, even under the not specially favorable circumstances which then confronted it, a plurality over the Conservatives of about 82. If to this plurality be added the 86 votes of the Irish Nationalists, the anti-Tory majority was 168. On the other hand, after the Liberal split, the general election of 1886 returned 314 Conservatives and 81 Liberal Unionists, or a total of 395 supporters of the present Administration, as against 189 Gladstonian Liberals and 86 Irish Nationalists.

The issue of the impending campaign will depend principally upon the number of votes the Gladstonian candidates can get from the Liberals of 1885 who, in 1886, voted for Unionists or did not vote at all. There can be no question that very many of the dissentient Liberals of 1886 have since returned to full communion with their old party. In whatever way the bye-elections, in the 133 constituencies in which bye-elections have been held since September, 1886, be looked at, they indicate that the Salisbury Government will be a minority in the new House. Whether that minority will be very large or comparatively small does not so certainly appear. In 1885 these 133 constituencies returned 59 Conservatives, 53 Liberals, and 21 Irish Nationalists. Since the bye-elections there sit for these same places 56 Conservatives, 6 Liberal Unionists, 50 Gladstonian Liberals, and 21 Irish Nationalists, including both Parnellites and anti-Parnellites. There are thus three more Conservatives and Liberal Unionists combined than there were Conservatives alone in 1885. But these 133 seats are almost precisely one-fifth of the 670 in the entire House. A similar proportion of Unionist gains in the other four-fifths of the constituencies would give the Unionists in the new Parliament but fifteen more seats than were secured by the Tories in 1885, and would reduce the combined home-rule and Liberal majority then returned by but 30, or to 138.

Compared with the result of the general election of 1886, there has been at the bye-elections a net home-rule gain of twenty-one seats. A similar proportion of change in the remaining constituencies would net a loss of 105 seats to the Salisbury Government, and would turn its majority of 120 in 1886 into a minority of 90. Ignoring the number of seats won or lost at the bye-elections, and considering only the actual vote polled, it appears that in the sixty-four British constituencies contested both in 1886 and at subsequent bye-elections the Unionist vote has increased only 7 per cent., as against a Gladstonian gain of 26 per cent. In these constituencies the average Gladstonian net gain was 547 to each seat. As in 1886 the Unionists carried no fewer than 112 seats by majorities of less than 547 each, this method of comparison indicates a Liberal gain of 112 members and a home-rule majority of 104.

The net result of these three methods of comparison seems to foreshadow that majority of 100 or upwards which Mr. Gladstone is said to expect. If, however, the comparison be made between the votes polled in 1885 and at the bye-elections, the results will not be so favorable. In the eighty-one British constituencies contested both in 1885 and at the bye-elections since 1886, there has been an average net Unionist gain of 326 votes to a seat. In 1885 the Liberals carried fifty-six seats by majorities of less than 326. If these seats be gained by the Unionists at the coming election, the Gladstonian majority will be only 56. Moreover, if the constituencies which in 1885 returned Liberals and those which returned Conservatives be separately compared, a still smaller majority in the coming Parliament is indicated. The forty-three constituencies which in 1885 gave Liberal majorities, and have since had bye-elections, show an average net Liberal loss of 778 votes to a seat. In 1885, 114 Liberal members received majorities less than 778. On the other hand, in the contested constituencies which were Conservative in 1885, the bye-elections show an average net Gladstonian gain of 185, and 43 Conservatives were returned in 1885 by pluralities of less than 185. This method of comparison forecasts a net Gladstonian loss as compared with 1885 of 71 seats, which would give the Gladstonians a majority of but 26.

In all the above calculations it has been assumed that, as the number of seats held by Irish Nationalists has, since 1885, remained unchanged, there will be no losses among them at the coming election. This the split in the Irish ranks makes a very improbable supposition. It is true that it so happens that there are not more than ten or eleven Nationalist seats in all Ireland which can possibly be endangered by a double candidature. In all the other constituencies now represented by Nationalists, the home-rule vote is more than twice as great as that of the Unionists. It is, however, probable that five or six seats may be lost by these divisions, in which case it is possible that in the new House the supporters of the present Government will number from 325 to 330 out of the total membership of 670. In that event the balance of power may be held by a handful of Parnellites.

THE GREEK ELECTIONS.

ATHENS, May 28, 1892.

THE politics of Greece lie very far out of the American horizon, yet they are near akin to ours in spirit and tendencies, and it may be worth your while, even in the thick of questions of candidates and tariff and silver bills, to listen to a brief résumé of the results of the elections which took place on the 15th of May. I happened to be in Constantinople about that date, and I inquired with eagerness from our intelligent and obliging Greek porter for the Athenian newspapers. "We don't get the papers from Athens," he said—"the Govern-

ment forbids them; but some of our friends have got the news by telegraph, and I hope you will be glad to hear that Tricoupis is successful." "Good news," I said. "Yes," he replied, in Greek which was almost classic and was clear enough even to my unpractised ear, "good news, and not for Greece only, but a common benefit to all the Hellenic race; for Mr. Tricoupis is the one man of dignity and worth on whom we can all depend." I give the exact words of this young Greek because they contain several significant points in a nutshell. The Greeks of the Levant generally have been keenly interested in the late contest. The *Neologos* of Constantinople had nearly two sides filled with news of the election, and a most sensible leader on the lesson and consequences of it. The meaning of this is, that the Greek peoples who live under Turkish misrule do not forget Hellas; they still look towards Athens. When they make an occasional pilgrimage thither, it seems to them an embodiment of that law and civilization and liberty which they do not possess; and they rejoice heartily and with an enlightened sympathy when that small kingdom which is the starting point, if not the goal, of their aspirations, has been safely tided through a crisis of its existence. If they are no longer so sanguine as to defer the christening of their children for the time when the ceremony may take place in the mosque of St. Sophia, they still dream of a magnificent Hellenic State in which Constantinople shall recall the glories of the Byzantine Empire.

The crisis which the elections seem to have terminated was really most acute and fraught with the gravest possibilities. In March, when I reached Athens, the paper currency was at a discount of 50 per cent. This discount measured the recent results of Mr. Delyannis's financial management. He had contrived to reach the quarterly payments without providing for the expenses of the Government. While he remained Minister of Finance, the banks refused to accommodate the Government with a loan. The situation was so grave that the King felt obliged to demand the resignation of Mr. Delyannis, which, with that assurance which has never failed him, he refused to tender, alleging that he was still supported by a majority of the House. The manner of this refusal, as well as the previous conduct of the Prime Minister, was offensive to his Majesty, and was purposely offensive. When the King, finally, exercising an unusual but legitimate prerogative, felt obliged to dismiss his Minister, there were a few hours at Athens when the germs of a revolution seemed to be breaking out. It is generally believed that Delyannis had tried to tamper with the army, and was interrupted in his plans by the active initiative of the King. The new Ministry which succeeded was purely temporary and intermediate; the Chamber of Deputies was soon dissolved, and the election was set for the 15th of May.

In discussing the situation before the election, some shrewd authorities maintained that the King had made a mistake—that he had been over-anxious and hasty; that he ought to have given Mr. Delyannis more rope. Mr. Delyannis had already shown that he had many lives. His fiasco when, six years before, he nearly drew the country into a Turkish war, and was obliged to resign in face of the blockade and of a Turkish army, as the only solution of the emergency, would have been the death of most politicians in most countries. But this adroit demagogue had the most extraordinary knack of lighting on his feet, and it was felt that the action of the King might help him to retrieve his situation. As a matter of fact, in the canvass of the country which preceded the elections, Mr. Delyannis took the attitude of a defender of the rights of the people against the encroachments of the Crown. His "watchword" was Greece for the Greeks, and he posed as the true republican who scorned foreign influence and opinion, and was not, like Mr. Tricoupis, "a creature of Lord Salisbury." He even went so far as to hint in his speeches that "the will of the people must not be thwarted if it demanded a republic." In short, he showed himself in a small way the Boulanger of the crisis—a most adroit and ingenious mischief-maker, expert in the coining of phrases and charges which catch the ear of a prejudiced and ignorant populace. It may be mentioned, parenthetically, that in January last he had succeeded in passing a regulation which required all foreigners entering the country to present passports and to have them viséed—a regulation so Turkish (or Russian), so contrary to the present practice of all civilized nations, that certain Englishmen, on reaching Corfu, turned their backs on the country in disgust, and went direct to Cairo without visiting Greece. I am glad to say that the regulation almost immediately fell into abeyance, and no one has heard of it lately.

So skilful was Mr. Delyannis in these arts of the demagogue, and so great was his personal popularity in the Peloponnesus, that one month before the election even the best informed in politics did not venture to predict his defeat; and all sensible, sober minds in Greece as well as in the Levant felt the greatest uneasiness and anxiety as to the issue. Yet the two questions involved were the solvency of the Government and, to a certain extent, the stability of the monarchy. I was surprised to observe this uncertainty as to the decision of questions so fundamental. It seemed to me that it indicated the lack of any considerable body of voters in the country whose uprightness and judgment could be trusted in an emergency. I am not now recording an opinion of my own; I am only stating the natural inference from the alarms and apprehensions of the most solid men in Athens.

I was much interested in the Greek method of conducting a "campaign." The newspapers, excepting perhaps the *Astu*, the more immediate organ of Mr. Tricoupis, allow themselves all lengths in vituperation and abuse; they have a splendid Aristophanic instrument in the modern language, and there is no limit to the invention of effective epithets. They outdo in this respect anything that we are accustomed to in the United States. On the other hand, I was surprised and pleased to see that, on the Tricoupis side at least, the speeches of candidates were brief, temperate, and dignified to a remarkable degree. They confined themselves generally to a simple statement of the importance of the interests at stake and of their programme for the future. There were no appeals to passion, no assaults or innuendoes on the reputation of their opponents. A half a column, or a column at most, sufficed to report them fully. Such speeches, addressed to such an assemblage as I saw at Nauplia, for instance, composed largely of peasants in their own picturesque costume, certainly do great credit to the methods of the canvass. I can hardly believe that they are typical. However, the newspapers are the real battle-field of the elections, and every one, I am told, reads the newspapers; at any rate, the nine-tenths of the population who can read impart the news to the one-tenth who cannot.

I do not know how much weight the "demonstrations" (διαδηλώσεις) have in the actual results; but it is quite certain that nothing would induce the people at large to dispense with them. Night after night they occupy the minds and bodies of certain hardy and sleepless "workers," for nearly a month before election day. In Athens, during that period, they make life a burden to all lovers of peace and quietness. Every night a fresh procession, either small or large, makes its appearance, not differing much from our displays, except that it is accompanied by a noisy crowd shouting "zeto" and "kato" for friends and foes. The torches and carriages vanish before midnight, perhaps; but a large part of the assemblage continues to huzza and to howl until two or three o'clock in the morning. The exercise is responded to antiphonally by a rival gathering of the opposite party, until the lungs of one or the other side are exhausted. I have before me a cutting from the *Acropolis*, which describes several such "demonstrations" as going on in the squares of Athens on the same night. The reporter adds, with naïve pride, that a single patrol "kept the peace," if that expression may be used, between the contending factions, and that all had retired from the field without bloodshed by three o'clock in the morning.

The fact is, that to the uneventful life of the provinces the parade and preliminaries of the elections are a great treat and excitement which they could not lightly part with. There are other practices in vogue, however, which are much more questionable than the childishness of excessive "demonstrations." It used to be the custom in the rural districts for each candidate to keep open house during the canvass, and to entertain all comers on a scale which resembled the good cheer of the palace of Odysseus. This custom is vanishing, but, on the other hand, the indifferent voter is always sure at this season of an unlimited supply of *retsinato* and of creature comforts. If he is in debt, he may be accommodated with a loan; if he must travel a long distance to his voting district, his expenses are paid. Moreover, there are certain districts, such as those of Spetsa, and Hydhra, and Psara in Eubœa—"rotten boroughs," they may be called—which were granted by the National Assembly of 1843, as a reward for heroic services, the privilege of sending a Representative, although their population is much smaller than the required number of 10,000 souls. These districts are a natural source of corruption; for here money can be spent to obvious advantage, and there is reasonable hope of buying up a majority. In general, the indifferent voter may sell his vote as high as or even higher than with us. A great deal of money is spent by each candidate. Few spend less than a thousand dollars; I heard credibly of one who expected to spend eight thousand.

Moreover, the mode of voting at the polls gives large opportunity for personal influence and inspection—for seeing to it that these extravagant sums are not wasted. At the polling-place each candidate has his name and emblem (that of Mr. Tricoupis was the olive) painted on a separate urn; from the upper part of this projects a funnel into which the voter thrusts his arm when depositing a small leaden bullet or ballot. The urn or box is partitioned into two compartments, on one of which is painted in white, "Yes," on the other, in black, "No." Behind each urn a representative of the candidate is permitted to

stand, to call out the name of his candidate, and even to solicit votes for him. The intention of the law is that the voter shall give a secret ballot; but it is quite possible to watch from behind the twist of his arm as his wrist turns to right or left, towards the white or black compartment. Formerly the voters made use of written tickets or ballots. The present arrangement was contrived to protect the rights of the illiterate voter; but it is a case of "overprotection," and plainly lends itself to the purposes of fraud and undue influence—I might say, to intimidation. For certainly, in the remoter regions of Cephalonia and Thessaly and the Peloponnesus, the churches in which the voting takes place (election day is always fixed for Sunday) do not present that peaceful and even funereal aspect which the sanctity of the place demands, and with which the Australian system familiarizes us at home. Notwithstanding the presence of soldiers to keep the peace, serious affrays and "accidents" are frequent: four such cases occurred in Athens on the 15th, and the list of assaults and wounds in the provinces is proportionately larger. Such a record is not worthy of the civilization which, in various directions, the kingdom may justly claim. Moreover, the extraordinary provision which requires the voter to cast a ballot, or ball, in *all* the boxes—that is to say, not only in favor of the candidates whom he chooses, but also against those whom he rejects—lends itself to tricksy combinations and intrigues. It is at the same time exceedingly clumsy. On the present occasion, for instance, the voter in Attica was obliged to distribute thirty balls in as many urns. It would certainly be an education in honest politics if the nation could see its way to adopting some modification of the Australian ballot.

The result of the polling on May 15 gave 170 Representatives for Mr. Tricoupis and 37 for all others, about half of whom were claimed for Mr. Delyannis. It is quite plain that this extraordinary and unexpected majority was not the result of systematic bribery and corruption. It was, on the contrary, a declaration of confidence in the statesman who has so often before served his country with honor and a practical knowledge of business affairs; the statesman whom every traveller must remember for the railways he has encouraged and the admirable highways he has had built in the Peloponnesus and elsewhere. It was perhaps still more a spontaneous and hearty approval by the people of the recent unusual action of the King. It meant that the people not only stick by the present Constitution, and have no fancy for a republic, but that they also adhere to the King personally, as well they may—to that wise and upright and conscientious gentleman who for thirty years has proved himself without stain or reproach, and has watched faithfully over the interests of his people. If the crown had not been involved, undoubtedly the Tricoupis majority would have been smaller and less decided. As it is, the result is a satisfactory testimony to the general good sense of the voters of Greece; it makes one feel easier as to the future and the stability of the kingdom. It may be concluded that the Greeks are resolved as a nation to pay their debts, and to maintain the Constitution as it stands; it may be concluded that they are even proof against the arts of the demagogue when the vital interests of the State are concerned. They have at present condemned and dismissed their Boulanger; the newspapers say that he is politically dead. In any other country he might safely be so regarded, but he was a discredited man six years ago, and even now he has been reëlected to the "Boulê," or House of Representatives.

The immense majority for Mr. Tricoupis does not mean so much as it would with us or in England. Such a following is in Greece subject to rapid fluctuations and changes. When Mr. Tricoupis comes to distribute the appointments, dissatisfaction will at once arise—there are not places enough "to go round"—and disappointment will lead to secessions and to cabals. Purely personal interests are the strongest factor in Greek politics. The integrity, the experience, and the financial skill of Mr. Tricoupis will not necessarily secure long life to his administration. Yet it is to the credit of the Greeks that when they are among the rocks, they know their pilot and have the good sense to put him in command of the ship. The friends of Greece could wish they had more such pilots as Mr. Tricoupis. At present they do not make their appearance.

The policy which Mr. Tricoupis announced in his speeches was briefly this: The development of the resources and industries of Greece, economy in expenditures, the improvement of finance, and, finally, the declaration that it behooves the Government of Hellas to interest itself in the welfare of all Greeks wheresoever they may be. This latter sentiment has been criticised rather scornfully by most of the European press. The London *Times*, with that graceful opportuneness which has often so endeared the English nation to foreigners, remarks that the population of Greece could be taken out of a corner of London; and that people must pay their debts before they can expect to be heard in the councils of the nations. Yet it is not easy to see how Mr. Tricoupis or any Greek statesman could say less with reference to the six millions of Greeks who are mostly under Turkish rule. Is it possible that the kingdom of Hellas can really forget them? They certainly do not forget the kingdom of Hellas, either in their lives or in their wills. They are truer patriots, perhaps, than their brethren who have a country and a civilized government. They are not exactly "slaves," though they like to call themselves so; but they have no country, no share in any government of their own. The Greeks are above all clannish—they are too clannish, those who have studied them in the Levant complain. Their aims embrace only the Greek-speaking peoples; there is nothing cosmopolitan in their ambitions. But a national existence comes first and cosmopolitanism comes later. Certainly the Greeks of the Levant deserve a better fate than the Scylla of Turkish or the Charybdis of Russian rule; and who can blame the Greek-speaking peoples for looking to one another across the Ægean Sea? The bond of sympathy and sentiment is strong and close between them, even if it is not a bond of blood. They have no steadfast and disinterested friends among the European Powers; they know that the "balance of power," not of justice, is that which weighs their fortunes.

If they welcome Americans and defer to their opinion, it is because they know that the American has the privilege of being disinterested. There is, therefore, something pathetic in the situation of the youthful kingdom of Hellas, with her burden of great traditions, her great ambitions, and her comparatively small resources. It recalls the words of the helpless seer in Herodotus: "The sharpest pang in the lot of humanity is to have many thoughts, and to control nothing." Yet the Attic salt has not lost its savor. The last election was a moral victory; and if one wishes to measure material progress, let him compare Athens with Constantinople—let him look at the neat, and tidy, and charming capital of Hellas, with its municipal order and conveniences, with its beautiful public buildings—let him compare these with the insecurity and the heterogeneous slovenliness of Constantinople, where each nationality, in despair, has been driven to take care of its post-office and its citizens—and let him remember that from such precedents and from a hamlet of a few hundred houses Athens has reached its present growth in half a century's time. Such progress is at once a sample of what has been achieved, and a measure of what may be expected from Hellas in the future.

M. C. D.

HENRI BEYLE AND HIS SISTER.

PARIS, June 9, 1892.

'LETTRES INTIMES' of Stendhal: I saw this title-page a few days ago in the shop-window of a bookseller. The work had not been announced. I said to myself at first: Somebody has taken the scrapings of Stendhal, what could not be used in the two volumes lately published on him, and tried to catch the public by a mere name. Still, I bought the volume and read it, and was agreeably surprised to find it very interesting.

There is no introduction—only a few lines from the editor. "What we offer to the public," says he, "is the correspondence of Henri Beyle with his sister Pauline, with the person, consequently, or one of the persons, whom he had the least possible interest in deceiving; and people will see, we believe, a little of the naked soul of the personage through this easy, fraternal correspondence; they will discover something of the true philosophy of the writer in his undressed thought." The correspondence begins in Messidor, An X., which means 1801; and I may remark that the terms of the Republican calendar are almost always retained. Beyle asks his sister to write to him regularly once a week, and promises to do the same; he will be at a distance her guide and educator.

You are struck at once by the tone of the correspondence and by the high degree of culture which it supposes in the two correspondents. "I will send you a little book of 213 pages, 18mo, which will give you more ideas than all the libraries in the world. It is the 'Logic' of our compatriot, the Abbé de Condillac. It is useless to speak of this outside of the family—people would think me mad to send you such a book, and they would think you very presumptuous to attempt to read it; but, my dear Pauline, let the fools talk and let us go our own way." He proceeds to explain the beauties of this 'Logic.' If Pauline masters the great art of reasoning, there will be nothing to embarrass her—the most complicated cases of grammar, the most difficult calculations of algebra, will become play for her. This passage interests us as showing the influence which Condillac, who founded his philosophy wholly on sensation, had on the mind of Beyle. Was he not essentially a sensualist, in the highest as well as in the lowest meaning of the word?

Are there many brothers who would write to their younger sister such lines as these (Floréal, An XI.)?

"You cannot imagine how consoling in affliction the study of letters is, and when we reach a certain point it is a pleasure which always increases. When you have felt the beauties

of Corneille, of Racine, of Tasso, etc., you will not be able to detach yourself from them; and, if you are willing to help me, you will feel them very sensibly six months hence. . . . Here are some Italian verses by Vittorio Alfieri, one of the greatest poets of the eighteenth century; they give me much pleasure."

He recommends her to read La Fontaine, "if you understand him"; so he did not think it so easy to understand La Fontaine, and surely there is more in the fables than children can imagine. Occasionally he philosophizes a little:

"If you were blind, you would have no idea of red, green, yellow, of color in general; you would have no idea of the moon, you would think of the sun only as of a warm body. If you did not smell, you would not distinguish the smell of a rose from that of a pink. If you did not hear, you would not distinguish a *mi* from a *fa*. Therefore, all our ideas come from our senses. Think much of this great truth."

This is Condillac in its purest form: "Nihil est in intellectu quod non fuerit prius in sensu." The whole literary work of Beyle is pervaded by this doctrine; it made him an impressionist, a realist, before these terms were used as they are now. He talks to his sister of Vauvenargues, of Montesquieu; but he always advises her to keep her knowledge to herself. "For the *provinciaux*, whatever is reasoning is philosophy, and whatever is philosophy is odious."

"I lodge," he writes at another time, "in the sixth story, but just opposite the colonnade of the Louvre. Every evening I see successively the sun, the moon, and the stars disappear behind the galleries which have seen the *grand siècle*. I fancy seeing the forms of the great Condé, of Louis XIV., of Corneille, of Pascal, concealed behind these great columns." It is clear that sometimes when he writes to Pauline, he writes also for himself, for he recommends her to preserve his letters. Take, for example, the letter of 9th Pluviose, An XI.: "I am going to speak to you," he says, "of the moral principles of literature, of what constitutes the beautiful, and of what has induced great men to produce the beautiful." The letter is really a sort of essay. Beyle tries his own strength; he amuses himself; he knows that his sister "will not understand this at the first reading." He constantly refers to his poverty, he complains too much of his father, and accuses him of avarice. He has small debts; he owes money even to his porter, and he has pawned his watch. "I have been nowhere for a fortnight, for want of twelve sous in my pocket; I neglect M. Daru [his patron], Gen. Michaud, Mlle. Duchesnois [the actress]." He adds, however, immediately: "I have never laughed so much. Three years ago I should have been in despair; I have become reasonable." Then follows a little essay on tedium and the various ways to avoid it.

Some of these essays are tiresome, others are unbecoming, if you reflect that they proceed from a brother writing to a sister younger than himself. He tells Pauline, for instance, not to marry any man with whom she is in love. "All love comes to an end, however violent it may have been, and the more violent ends the quickest. After love comes disgust; nothing more natural." He asks his sister such questions as, "Es-tu amoureuse?" He makes her the confidante of his own love affairs. "All these little girls here bore me; their tenderness is mere grimace and studied grace—nothing frank, natural, energetic." In 1807 he writes from Berlin:

"I have conquered love with infinite pain, and, since I must say so, with tears. I was so agitated at seven o'clock in the evening, the moment when the question of my departure was to be settled, that I ran about the streets of Brunswick like a madman. I passed before the windows of a little girl for whom I have a passion. I felt torn. However, honor was stronger than love; I went to the Maréchal and told him that I wanted to go."

There is a certain Mina whom he calls Minette. "I have no more taste for Minette, the fair and charming Minette, this soul of the north whose like I have never seen in France or in Italy." His sister was then twenty-two years old; he constantly advises her to marry a good man, inferior to her in intellect, whom she could easily rein and rule; a rich man if possible. The two great qualities of a husband are "(1) not a tyrant; (2) rich." Beyle has perhaps an excuse in the character of his sister; she seems to have been a very masculine person, too masculine even for him. We infer this from a letter written from Germany (November 25, 1807): "What makes follies so fatal to great souls lodged in feminine bodies is the fact that people always attribute them to a contemptible cause. The most intellectual young man, and most in love, would not marry you if twenty or thirty ladies assured him that they had seen you running in the streets in the evening in men's clothes." He supposes that his sister answers: "But I am too much bored; I cannot continue this monotonous life." "Yes, but reflect that when there is a scandal, you can no longer find a husband." He always advises her to be first married. "A woman must first be married; that is what people demand of her. After that she does as she pleases." His sister was married in 1808. "How did you bear it? were you firm or weak? . . . Adieu, dear madame. Study yourself in this great circumstance. Marriage is like the stage of a theatre which you ascend from the pit. It seems large so long as you do not see the decorations behind."

You will find all of Beyle in this curious correspondence—his cynicism, his materialism, his mania for analyzing passions, his dogmatism. He is never tired of abusing Frenchmen for their vanity, but he is himself the vainest of all men—perpetually speaking of himself, of his smallest sensations, of his likes and dislikes; and with all this, which is not done to create any sympathy for him, an extraordinary clearness and terseness, a total absence of prejudice, an intense love of truth in all things, sometimes a curious sentimentality which contrasts greatly with the rest of his character—when he speaks, for instance, of music, of the emotions which it excites in him, when he speaks of Italy, its scenery, its monuments. Here and there, with much sobriety, there is an heroic note, as when he speaks of the battles of Napoleon, of his friends of the *grande armée;* but this heroic note has nothing of what we now call chauvinism: it is very simple and all the more powerful.

The most characteristic trait of the correspondence is the curiosity of Beyle about mankind and human nature. The world is to him a most delightful spectacle. He has a passion, a sincere passion, for society, he never wearies of making minute observations about men and women. The knowledge of the human heart, with all its intricacies and obscurities, is to him the supreme knowledge; his psychology is entirely founded on the doctrine of Condillac, on sensation.

"The finest secret I can give to you," he writes to his sister, "is to study the heart and the head of man. You know the heart well, your ardent soul has explained it to you; the head remains to be studied. I will send to you the 'Ideology' of Tracy. . . . If we are fortunate enough to live to be old, we will live in the same house and we will spend the evening of our life agreeably, in making a list of the passions, vanities, ambitions, hatreds, etc., and of the states of passion, hope, enjoyment, despair. Observe the habits of the souls of such men as D., who lies at every word you say to him, and write near every name the feature which you have seen developed in him."

Beyle did what he recommended to his sister to do: he studied the *comédie humaine* systematically—too systematically, for it is impossible not to see in the 'Chartreuse de Parme' and in 'Rouge et Noir,' his two masterpieces, a clear trace of the doctrines which he parades incessantly in his correspondence. Every human character is explained to him by what we now call, after him, a master passion (*passion maîtresse*). Every state of the heart and of the mind is the result of a sort of crystallization of sensations or of thoughts round a certain nucleus.

This correspondence, on the whole, though it is at times quite unpleasant, will interest all who consider Beyle one of the most original writers of our time. It is a pity that the editor does not give you the slightest detail about Beyle's sister, about her life, her marriage. We cannot, from the correspondence itself, reconstruct her life. The correspondence ends in 1814, with the French Empire. It may be that there will be another volume. So far we have only the letters written by Beyle from Germany, and during a short period from Paris, in 1810; from Russia in 1812, from Savoy and Italy in 1814.

Notes.

Henry Stevens & Son, 39 Great Russell Street, London, promise for next month Henry Harrisse's 'Discovery of North America,' "a critical, documentary, and historic investigation, with an essay on the early cartography of the New World," etc. This important work by the foremost investigator in the field will make a quarto volume of 800 pages, with 23 plates and many illustrations in the text, and will be issued to subscribers (up to July 11 for American orders) in three styles, ranging in price from £5 to £12 16s. Only 360 copies are to be printed.

Only 500 copies will be printed of Mr. Austin Dobson's edition of Fielding's 'Journal of a Voyage to Lisbon,' and 300 of George C. Napier's new work on 'The Homes and Haunts of Tennyson,' profusely illustrated, both of which are announced by Macmillan & Co.

The "Stanford" 'Dictionary of Anglicized Words and Phrases,' edited by Dr. C. A. M. Fennell, shortly to be issued by the Cambridge (Eng.) University Press, deals with 270 quotations, 1,800 phrases, and 10,880 words, and gives some 40,000 illustrative quotations.

G. P. Putnam's Sons have in press several illustrated volumes: 'A French Ambassador at the Court of Charles II.—Le Comte de Cominges,' edited from his unpublished correspondence by J. J. Jusserand; 'Japan in Art and History,' by Félix Régamey; and 'The Fairy Tales of India,' collected and edited by Joseph Jacobs. The same firm will publish 'The New Exodus,' Harold Frederic's letters to the New York *Times* on the condition of the Jews in Russia; 'Lyrics and Ballads of Heine, Goethe, and other German Poets,' translated by Frances Hellman; 'Temperament, Disease, and Health,' by Com. F. E. Chadwick; and 'Hygienic Measures in relation to Infectious Diseases,' by George H. F. Nuttall, M.D.

Harper & Brothers will publish next week a

new volume of poems by Will Carleton, entitled 'City Festivals'; 'Mrs. Keats Bradford,' a novel by Maria Louise Pool; and 'The Magic Ink, and Other Stories,' by William Black.

D. Appleton & Co. will supply the American market with W. H. Hudson's remarkable work, 'The Naturalist in La Plata'; and have nearly ready also the following: 'Controverted Questions,' by Prof. Huxley; 'The Hope of the Gospel,' by George MacDonald; and 'Western Canada,' by Ernest Ingersoll, uniform with Prof. C. G. D. Roberts's guide-book, 'Eastern Canada.'

Ginn & Co. have in preparation a students' edition of Bulfinch's 'Age of Fable,' wrought over by Prof. Charles Mills Gayley of the University of California, with notes, cuts, and maps.

'Paddles and Politics Down the Danube' will be the title of Mr. Poultney Bigelow's collected articles relating his canoe voyage on that river. It will be issued by Charles L. Webster & Co.

The papers on Carlyle published by Sir Charles Gavan Duffy in the *Contemporary Review* have been collected into a volume called 'Conversations with Carlyle' (Scribners). They give, on the whole, a pleasant impression of the irascible Scot, as seen from the side of an intimate friendship of forty years' duration, and go no small way towards counteracting the idea, left by many of the later publications about him, that he was always domineering and unsympathetic. Moreover, they preserve a large number of his piquant and forcible opinions on writers and books, in which, if his inherent limitations are revealed, a good deal more than his ordinary kindliness is shown, with much of his best insight. Sir Charles touches lightly upon the question of Mrs. Carlyle's happiness in her marriage. He evidently thinks husband and wife to have been sufficiently compatible, but promises hereafter to recur to "the chief misapprehensions current in later years about the Chelsea household."

Landor's 'Imaginary Conversations,' as edited by Charles G. Crump (London: J. M. Dent & Co.; New York: Macmillan), is concluded with the newly issued sixth volume, of which the frontispiece is a view of the Villa Gherardesca at Fiesole. The opening conversation, between Landor, English Visitor, and Florentine, is one of the most incoherent of the whole, and has been most (and most carelessly) tinkered, so that the variants require an appendix in addition to the footnotes. It is also one which would naturally suggest an index of opinion and historical anecdote for the entire series, but this has not been undertaken. A bibliography of the Conversations, by Lucy Crump, follows the appendix, giving the dates of first appearance, which are usually but not uniformly, in this edition, supplied in connection with the respective conversations themselves.

Macmillan & Co. have brought out a second edition of the translation of Nägeli & Schwendener on the Microscope. The original treatise has an established place as perhaps the fullest exposition of the theory of the microscope as an optical instrument, from the physical and mathematical standpoint. The translation was made under the supervision of Messrs. Crisp and Mayall of the Royal Microscopical Society of London. A fire in the printers' establishment destroyed the "copy" of the last part of the work, and it is to be regretted that this has not yet been supplied, though the division of the subjects gives independent and substantial value to the work without the final chapters.

The Rev. J. C. Atkinson's 'Play Hours and Half-Holidays' (Macmillan) was first published some thirty years ago, and is the story of two English lads at school. Little is said of their indoor life, but much stress is laid on the discoveries made by the boys concerning the character and habits of birds and animals, the art of fishing and the making of artificial flies, the collection and preservation of butterflies, the location and nature of plants and minerals. In short, the book is an account of many of the excursions into different fields of natural science which boys generally make sooner or later. It is all told in a way that can hardly fail to create a desire to follow in the path the two lads travelled. If the style is somewhat stilted at times, this defect is compensated by the author's genuine sympathy with boys and their ways.

One of the founders of the Grolier Club, Mr. William Loring Andrews, has recently printed a little book on 'Roger Payne and His Art,' a short account of Payne's life and work as a binder (New York: The De Vinne Press). Among the illustrations are a reproduction of the etching which represents Payne in his workshop and seven books bound by him—these last being admirably reproduced by Mr. Bierstadt's artotype process with all the delicacy of colored leather and all the brilliancy of gilding. Mr. Andrews is more moderate in his claims than are most of those who write about Payne. The fact is, and these excellent plates are as good evidence as any one could wish, that Payne, although an honest and a loving workman, is wholly unworthy of comparison with the great binders of France and Italy—not merely with the anonymous artist who worked for Henry II. of France, or with the so-called Gascon, but even with secondary Frenchmen like Derome. Still, he is the best binder England produced until Mr. Cobden-Sanderson began to decorate leather covers with exquisitely fresh designs.

Among the multitude of books in the Dutch language itself and in other European tongues about Holland, there is none treating directly, and in the spirit of modern science, of the people of the Netherlands. Such a work is much needed, in view of the facts that there are few foreign students of the Dutch language, and that the popular books about it have such manifest limitations. In 'Geschiedenis van het Nederlandsche Volk' (History of the Netherlandish People), by Prof. P. J. Blok of the University of Groningen, we have what bids fair to supply the need of students who want more than Motley or Davies has yet given. The special abilities of Prof. Blok have long been known, for he is no tyro in the art either of research or of expression. With a combination of powers which suggests both Freeman and Macaulay, he makes the story of the Dutch people one of great human interest. His style is singularly clear, and he has availed himself of the garnered results of the geologist, archæologist, philologist, and legist, besides digesting the standard narratives and monographs. The first volume of his projected work comes in the form of a handsomely printed octavo, with index and colored map of the Netherlands in the thirteenth century, from the press of J. B. Wolters of Groningen. The text in this volume treats of the Roman dominion, the Frankish epoch, the period of the feudal States and their intestine strifes; the rise and power of the counts, bishops, and nobility, the various fortunes of the common people, and the emergence of political life in the form of States. The succeeding volumes will show the development of the nation in the centuries succeeding the thirteenth.

Baron Alexander von Artin's 'Kaspar Hauser: Des Räthsels Lösung' (Zürich: Schmidt) contains nothing new except two documents, namely, a letter of the Grand-duke Ludwig I. to the Minister von Berstett, dated June 5, 1828, and an extract from the diary of a prince to whom Von Berstett confided this letter on his death-bed, with the strict injunction not to publish it until fifty-five years after his decease. Von Berstett died February 16, 1837, and when the appointed term expired, February 16, 1892, the son of the aforesaid prince gave the letter to Von Artin for publication. If these documents are genuine, they prove conclusively that the foundling of Nuremberg was the legitimate heir to the crown of Baden. The brochure has already passed into the fourth edition. We may mention here that 'The Story of Kaspar Hauser, Drawn from Authentic Sources,' by Mrs. Elizabeth E. Evans, the first complete and consecutive account of this mysterious personage in the English language, will be issued early in September by Swan Sonnenschein & Co., London.

In a new volume of 'Essais sur la Littérature Contemporaine' (Paris: Calmann Lévy), M. Ferdinand Brunetière has gathered a dozen or more articles originally contributed to the *Revue des Deux Mondes*, and dealing wholly with the books of the present—with M. Sully-Prudhomme and with the new school of the Symbolists, with the Impressionistic theory of criticism as practised by M. Anatole France and M. Jules Lemaitre, with Naturalism on the Stage, and with the Novel of the Future. Perhaps the boldest of his articles is a defence of literature itself against the sneers of M. Rousse, who was elected to the French Academy because he was a distinguished lawyer. But, whatever subject he discusses, M. Brunetière speaks in no uncertain tones, and he is always worth listening to.

The French author has a means of profit not possessed by American authors: he may arrange for a succession of serial publications of the novel or book of travels in periodicals of decreasing importance. While the *Revue des Deux Mondes* and *L'Illustration* and *Le Temps* contain only novels hitherto unprinted, many minor Parisian periodicals and most of the provincial newspapers are satisfied to offer their readers literary matter already printed in some other publication, and even after it is for sale over the counter in book form. *La Lecture*, for example, was founded two or three years ago to publish only first-rate literature in this second-hand manner; and it was so successful that the same publishers brought out *La Lecture Rétrospective*, to contain the writings of recently deceased French authors. Like most French reviews, *La Lecture* appears twice a month. The same principle is now to be applied to a new weekly, *La Revue Hebdomadaire* (Paris: E. Plon, Nourrit & Cie.), which is to be chiefly eclectic, like *La Lecture*, with original articles on politics and music and the fine arts.

Readers of *L'Art* are familiar with the prolific ornamental designs in head and tailpieces, borders, cartouches, etc., of J. Habert Dys. This artist has begun a series of *livraisons* without text, entitled 'L'Ornement Pratique: Documents d'après nature' (Paris: Librairie de *L'Art*). Each contains four plates of studies, as, of flax, primroses, pinks, grasses, and sprays; or, in another line, of cats, owls, etc. These are cleverly drawn, and many bor-

rowers will be glad to put them to "practical" account.

The Danzig and Berlin sheets of the fine Perthes Map of the German Empire are now procurable (New York: B. Westermann & Co.). There remain nineteen of the total twenty-seven to be issued.

The American Association for the Advancement of Science will hold its forty-first meeting in Rochester, N. Y., from August 16 to August 24.

—It is known to most readers that the Spanish Government has arranged for a series of international celebrations to be held in Spain, during the coming autumn, for the commemoration of the fourth centenary of the discovery of America by Columbus. In response to the invitation of the Spanish authorities, our Congress, by a recent act, has made provision for the representation of the United States at the most important of these celebrations, known as the "Historico-American Exposition," to be opened in Madrid on the 12th day of September next, and President Harrison has already appointed a Commission to preside over all arrangements that may be made in the name of the United States to this effect. It is greatly to be regretted that, owing to the late date at which Congress acted in the premises, the time for preparing an exhibit on the part of the United States is so short. The Exposition will be conducted, in the strictest sense of the word, according to the comparative method, and will consist of two great sections, one of which is known as the "Historico-European Exhibition" and the other as the "Historico-American Exposition." The former will represent the state which the European continent had reached, in its social development, in its industries and its arts, at the date of the discovery of the New World, while the latter will exhibit, under similar heads, the pre-Columbian social status of America and the social status of America contemporaneous with the conquest and settlements effected by European nations. In this way the two Expositions, standing side by side, will each have a double interest because of the cross-lights which the one will shed on the other. There are three sources from which they will be fed: Museums and establishments under national control; university cabinets and private collections; and treasures belonging to religious corporations. Congress has authorized the Commissioners from the United States to select from the archives of the Federal Government, from the National Museum, and from the various executive departments at Washington such pictures, books, papers, documents, and other articles "as may relate to the discovery and early settlement of America, and to the original inhabitants thereof." The Commissioners are further authorized to secure the loan of similar articles from other museums and private collections, and to arrange and install the whole as "the exhibit of the United States."

—The Commission on the part of the United States consists of Admiral S. B. Luce, U.S.N., Commissioner General, with Dr. James C. Welling, President of the Columbian University, and Dr. George Brown Goode, Assistant Secretary of the Smithsonian Institution, as Adjunct-Commissioners. The Commission has issued a circular, explaining the purport of the Exposition, from which we take the following extract:

The Commission invites the coöperation of persons having objects of any kind suitable for exhibition on this occasion. The collections will be returned in January. Objects intended for the World's Columbian Exposition in Chicago may, by a special arrangement, be forwarded direct from Madrid to Chicago in ample time for installation.

It is especially desired that authors and publishers of books relating to the periods of discovery and conquest, and the colonial history of the several European settlements in America, shall exhibit them. The Commission and its staff will give special attention to the effective presentation of such publications.

Exhibits will be forwarded without charge to Madrid, and returned to the exhibitor free of expense, the Commission bearing the cost of transportation, and becoming responsible for the effective labelling and installation of the objects. All objects should be forwarded to Washington, if possible, before the first of July, addressed to the Madrid Commission, care of the Smithsonian Institution, Washington.

—More than fifty lectures on subjects connected with the discovery of America have already been read before the Madrid Ateneo. When that chief literary and scientific society of Spain debated the question, in June, 1890, how it could best contribute to the celebration of the centenary of the discovery, it approved the proposition of the Chairman of the historical section, Señor Moguel, that a series of public conferences should be given by leading scholars, the happy innovation being made of extending invitations to Portuguese and American specialists. The long and elaborate programme finally decided upon began with an inaugural address, February 13, 1891, by the Prime Minister of Spain, Cánovas del Castillo, himself a distinguished historian. Then the orderly course was fittingly opened with a lecture on the "Notions of the Ancients on Atlantic Lands." Next came the Portuguese historian and statesman Oliveira Martins, with a discourse upon the "Discoveries of the Portuguese anterior to Columbus." Out of the long list of professors and literati who followed, worthy of mention seem several of the Ministers from the South American republics to Spain, and, in particular, Fernández Duro, who spoke of the first voyage, principally with the aim of recovering for Martín Alonso Pinzón the glory which the lecturer thought his due in connection with the event; Capt. Patricio Montojo of the Spanish Navy, who argued that the "First Land Discovered by Columbus" was the island of Guanajani; Señora Emilia Pardo Bazán, whose theme was "The Franciscans and their Influence in the Discovery of America"; and Luís Vidart, who made the greatest sensation of all by his two lectures on "Columbus and Bobadilla," and "Columbus and Spanish Ingratitude." The first was a vehement attempt to rehabilitate the Governor dubbed "infamous" by Roselly de Lorgues, of which the patriotic motive may be seen in the assertion: "It must be clearly said that the opprobrium with which it has been sought to stain the memory of the Comendador Francisco de Bobadilla, depreciates and blackens all the glory which Spain attained in the discovery of the New World." A like note marked Vidart's second lecture, in which he essayed to demolish that part of the "Columbus legend" which asserts that Columbus died in neglect and poverty. Altogether, these Ateneo conferences, if they have made no striking contributions to knowledge, are yet highly significant of the persistence of the literary tradition in Spain.

—The new volume of the Collections of the Massachusetts Historical Society constitutes Part VI. of the Winthrop Papers, which here range in date from July, 1675, to March 25, 1728, and are derived from the later correspondence of Maj.-Gen Wait Still Winthrop, younger son of the Connecticut Governor. He was, according to Samuel Sewall, who succeeded him as Chief Justice of Massachusetts, "a very pious, prudent, couragious New England man"—and Sewall had no higher praise for any one than to call him a (typical) New England man. Winthrop's seemingly Puritanic name was a triple union of family surnames. He left a great real property to his son and daughter, but died intestate, though he had drawn up a will; and the litigation which ensued forms a large topic in the latter half of the volume. Curious lists are given of the persons invited to his funeral, with indications as to their provision with gloves, scarves, rings, and escutcheons. Sixty gold rings cost £63. Sewall, of course, was in his element as one of the bearers, and was ready in due time to make the widow his wife, had she responded to his blandishments. The drapery of the mourners produced itemized bills for "Etalian crape," "allamode," "galoom," and other stuffs; and the military tradition of the deceased called for drum-covers, "cullers," halberts, and half-pikes. The troubles of his son John at New London now began with the estrangement of his sister Anne and her husband Thomas Lechmere over the settlement of the estate. Lechmere furnishes the thread that gives the most unity to the volume, and while the editors are doubtless right in belittling the numerous letters from his pen they have suppressed, those retained have the racy quality of an informal, easy-going nature, quite alluring amid so much primness and respectability. Before he "turned catt in pann" with his brother-in-law, he proved the sincerity of his profession that "a hearty welcome with mean things is better than otherwise." He uses a great many nicknames in his familiar letters, and indulges in much delightful gossip about immigration from the North of Ireland, which he mistrusted as much as the Bostonians of 1830–'50 did that from the South; about the sudden freezing of the harbor and its unbinding by a mighty January thaw, etc. He even dared to write of "a memoriall, or somewhat else, of Doctr. [Cotton] Mather & some other gentl. concerning the customes of the times; but in my weake opinion, notwithstanding its authors, I think it is the emptiest thing I ever read in all my life." Mather would have figured much more than he does in this series but that his letters had already been excerpted and published. Lechmere has been slighted in the poor index, which is neither accurate nor full nor very intelligently made. There are ten pages of valuable facsimiles of autographs of the writers of the several letters. The next volume will contain selections from the correspondence of John Winthrop, F.R.S., for the remainder of his life.

—The second volume of the "Saga Library," edited by William Morris and Eirîkr Magnússon (London: Bernard Quaritch), is entitled 'The Story of the Ere-Dwellers,' and contains felicitous translations of the Eyrbyggja Saga, and a fragment of the Heidarviga Saga ("The Story of the Heath-Slayings"). This last saga is said to be unquestionably the oldest of all the sagas of Iceland, and its quaint language has never before been turned into English. Of the Eyrbyggja Saga Walter Scott made an abstract in English, with the help of an old Latin version, in 1813, and it was printed in 1814 in the unhappy Henry Weber's 'Illustrations of Northern Antiquities,' and reprinted, in 1847, in Mr. Blackwell's edition of Mallet's

'Northern Antiquities.' The present volume is nearly twice as large as the first one of the series, the text filling 259 pages, and the introduction and notes a full hundred more, while the indexes extend to some ninety additional pages. This increase in the size of the volumes, due to an enthusiasm on the part of the editors which the intelligent publisher is loath to repress, has led Mr. Quaritch to make a modest advance in the price of the books, from 5s. to 7s. 6d. each volume. It is to be hoped that this slight increase will not deter librarians from subscribing for the series. The books contained in it are of permanent value and of high literary excellence, and as the edition is small, the volumes are likely to go out of print and rise in price. The next four numbers—in the printer's hands—are to contain an entirely new translation of the well-known 'Heimskringla' of Snorre Sturleson, with a special map and voluminous notes. Some improvement is desirable in the way of proof-reading, and it would be a gain to abandon, in future volumes, the antiquated method of dividing up the index under various heads (in this case there are five separate alphabets, besides subalphabets), and substitute one general alphabet, retaining, however, the interesting notes inserted in the index.

GEORGE MASON.—I.

The Life of George Mason, 1725–1792. By Kate Mason Rowland. Including his Speeches, Public Papers, and Correspondence. With an Introduction by Gen. Fitzhugh Lee. 2 vols. G. P. Putnam's Sons. 1892.

In these comely and copious volumes we have a genealogy of the Mason family of Virginia; a biography of George Mason of Gunston Hall, the Planter Statesman of the Revolution; an abbreviated history of his times; a collection of his writings, speeches, and letters, so far as they can now be recovered; and a commentary on the political principles and opinions of which he was the distinguished advocate. Miss Rowland does her work so carefully that we can but regret the loss of much valuable material which, in the changes and chances of a hundred years since George Mason's death, has failed to be handed down to us. That some of this material was scattered by the havoc of war, in the way she recites, we can easily understand, but much of it was also lost from the want of an historic sense in whole communities of the American people before the civil war. This want was sometimes specially deplorable in its effects at the South, where tradition records, as Miss Rowland tells us, that the wife of Ludwell Lee, son of Richard Henry Lee, converted many of the letters of George Mason into covers for her preserve-jars, as similar treasures among the Bland papers are known to have served as lining for egg-baskets. In the days before the war, Virginia, with all her legitimate State pride, was slow to build the tombs of her political prophets. Miss Rowland makes it apparent, at every stage of her narrative, that she is a great admirer of "the old social order" which was based on slavery at the South, and she gives us a pleasing picture of the baronial independence in which the Southern planter lived on his broad acres, where he not only was surrounded by his village of negro laborers and artisans and by his flocks and herds, but, in the remoter spaces, could ride to the hounds and hunt the deer within his own domains. This segregation of the Southern social life was, however, little congenial to the nurture of an historic spirit among even the members of the ruling class; and though men like Washington, and Jefferson, and Madison abundantly showed that they knew the import and value of preserving records, their compatriots of a later period have often been singularly remiss in giving definition and distinctness to the images of worthies concerning whom they are justly proud. We learn from these volumes, with surprise, that no stone at this day marks the grave of George Mason, though he left five sons to the heritage of his honorable fame, as well as to the heritage of his ample estate. The family graveyard on many a Southern plantation was rarely visited save when its sward was broken to receive a new occupant, and so it might easily fall a prey to neglect, like that which overtook even the family vault of the Washingtons at Wakefield before the close of the first half of the present century.

Among the many modifications wrought in American character by the storm and stress of our civil war, we may count at least as a gain the stimulus it has given to the culture of studies in American history. The elaborate memoir devoted by his grandson to the 'Life and Times' of Patrick Henry, as recently reviewed in these columns, may be cited as a proof of such studies and of the new popular interest to which they appeal. And this becoming memorial in honor of George Mason may be gladly welcomed as an evidence of the same gratifying fact.

George Mason of Gunston Hall was born in 1725. He was a member of the Virginia Assembly in 1759. He was a vestryman of Pohick Church, near Mount Vernon, and was in early association with George Washington. He drafted the "Non-Importation Resolutions" adopted by the members of the Virginia House of Burgesses after the House had been dissolved by the Governor, Lord Botetourt, in 1769. In 1773 he wrote the Defence of Virginia's claim to the public lands west of the Alleghany Mountains on both sides of the Ohio River, and became ever afterwards the recognized expositor of Virginia's pretensions under this head. He drew up the "Fairfax County Resolves" of 1774, pronounced by Jared Sparks "one of the ablest and most luminous expositions of the points at issue between Great Britain and the colonies." In 1776 he drafted the Declaration of Rights and the State Constitution adopted by Virginia in expression of her new autonomy after the Declaration of Independence. Working loyally and zealously in support of American independence, he opposed the emission of paper money and denounced the knavery of legal-tender laws. He favored the honest payment of private debts due to British creditors after the Treaty of Peace, as being required equally by common honesty and by treaty stipulation. He was selected as a delegate to attend the Annapolis Convention called to consult for a revision of the Articles of Confederation, but did not attend because of illness. He was a member of the Federal Convention of 1787 and of the Virginia Convention which sat on the adoption of the Constitution in 1778.

Gen. Washington, who knew this neighbor of his most intimately in all the relations of both public and private life, wrote in 1779 that he had for George Mason at that date an "unreserved friendship," and "wished for instances in which to testify the sincerity of his regard." Jefferson said of Mason that he was "a man of the first order of wisdom among those who acted on the theatre of the Revolution, of expansive mind, profound judgment, cogent in argument, learned in the lore of former constitutions, and earnest for the republican change on democratic principles." A brilliant political controversialist has said of the Fourth Article in Mason's Declaration of Rights that if, in after days, "a deluge of despotism should overspread the world," this single sentence would be sufficient "to rekindle the flame of liberty and revive the race of freemen." If the tribute does something less than justice to the pith and condensation of George Mason's political style, it is only because of the too inflated rhetoric in which the tribute is couched.

Yet it is known by all that this political seer and sage, who certainly ranked among the foremost of the constructive statesmen of America during all the years of crisis which preceded and attended the Revolution, was numbered at last among the most embittered enemies of the new Constitution framed by the Federal Convention of 1787. Early in 1786 we find him opposing the impost bill recommended by the Continental Congress to the adoption of the States, and recommended only as a makeshift to meet the crying wants of the Government at that juncture. Madison, who knew the strength and influence of Mason, confesses at this time to his fears about Mason's "Federal ideas." A few months later he again expresses a fear that Mason may not yet be cured of his "anti-Federal prejudices." It was but natural that these "anti-Federal prejudices" of a planter statesman should be intensified in the latter part of the year 1786 by Jay's negotiations with Gardoqui for the provisional surrender of the Mississippi River to Spain. We know that Gen. Henry Lee, as a member of the Continental Congress at this time, was personally disposed to favor such a temporary surrender on grounds of public policy, though he voted against it in obedience to his instructions as a delegate from Virginia, and also because he foresaw that it would give a handle to "popular declaimers," as he calls them, in their agitation against necessary measures for "bracing" the Federal Government with enlarged powers. In this latter relation he foresaw and foretold that much would depend on the sentiments of George Mason and on his attitude before the Virginia Assembly.

Yet, in spite of all his prepossessions in an anti-Federal direction, Mason seems to have gone to the Federal Convention with an earnest desire to coöperate in measures which should have for their effect to brace the Federal Government against the imbecilities and anarchy of the Confederation. He avowed himself early on the floor of the Convention as favoring a government which should operate directly on individuals, and not on States, but he said that he did not wish to push the experiment too far. After the Convention had been sitting for some five or six weeks, and when the dissidence between the small States and the large States, as also between "Nationalists" and "States-rights men," had been fully revealed, he did not despair of an accommodation, and proclaimed that he "would bury his bones in Philadelphia sooner than expose his country to a dissolution of the Convention without anything being done." A few days later, it is true, he confesses much concern at the "aristocratic principles" which some gentlemen had advanced in the confidential debates of that body. With all his republican simplicity, he never failed to place civil security before political rights, and therefore he openly avowed that he had small faith in the result of elec-

tions for an office like that of President of the United States, if the choice of a President was to be left free to the people at large. He thought the reëligibility of the President should be absolutely prohibited as the very *sine qua non* of republican stability. The toleration of the slave trade till the year 1808 seemed to him at once a national infamy and a public peril. He thought that the provision made for the passage of navigation laws by a majority vote in Congress would for ever put the planting States at the mercy of the trading States, and so work to the disparagement and damage of the former. Towards the close of the session, when the ultimate shape of the projected Constitution had been pretty clearly defined, we find him no longer proposing to lay his bones in Philadelphia, but indignantly proclaiming that he "would sooner chop off his right hand than put it to the Constitution as it then stood."

What he then protested within the walls of the "secret conclave" he hastened, so soon as the doors of the Convention were opened, to proclaim from the housetops to the enemies of the Constitution who stood nearest to him among the disaffected and seceding members of the Pennsylvania Convention. "George Mason's hand in a chopping-box" became, for months, a by-word of derision among the Federalists. It seemed to the friends of the Constitution that Mason, in the violence of his opposition, was prone to exceed the limits of dispassionate debate. Jefferson has remarked that there was "a dash of bitter cynicism" in the oratory of Mason whenever "provocation made it seasonable." Shortly after the Federal Convention rose, Washington predicted, from his knowledge of his neighbor's character and convictions, that Mason's reasons against the Constitution "would be clothed in most terrific array for the purpose of alarming." Madison, in his correspondence, soon reports that Mason's "licentiousness of animadversion" was said to spare no longer even such as were the moderate opponents of the Constitution; and the complaint is made that, growing every day "more bitter and outrageous in the effort to carry his point," he would probably, in the end, "be thrown by the violence of his passions into the politics of Mr. Henry," whom Madison suspected of squinting at a Southern Confederacy. In fact, the opposition of Mason to the ratification of the Constitution was, if possible, more inveterate and intense than that of Henry. Towards the close of the Virginia Convention, he held up the spectre of civil dissension in order to deter the friends of the Constitution from forcing it on a reluctant people.

Miss Rowland thinks that some intimation concerning the effect of this exciting appeal on his part may be gathered from the remarks with which Gen. Henry Lee, the "Light Horse Harry" of the Revolution, sought to do away with the strong impression which Mason had obviously made on his hearers. But she does not tell us what it was that "the Federal advocate" said in order to do away with this impression. After expressing surprise and grief that such language, so well qualified to produce the sedition it menaced, should be used by "a character so venerable and estimable," Gen. Lee remarked that "if the madness of some and the vice of others should risk the awful appeal" forecast by Mason, he trusted that the friends of the paper then lying on the table "would meet the afflicting call with the firmness and fortitude which become men summoned to defend what they conceive to be the true interest of their country." It will be seen that the coming events at Gettysburg and Appomattox, even before "the paper then lying on the table" had been quickened into life, were already casting their dim shadows before them on the walls of the Virginia Convention of 1788. But how little could Gen. Lee foresee that in "the awful appeal" at which he shuddered, but which he accepted in the name of the Constitution, he would himself be called, at the head of Federal troops, to put down a popular insurrection in Pennsylvania, and that his own more distinguished son would one day be the serene and intrepid leader of insurgent forces arrayed against the Union in the name of the States. And how little could either Lee or Mason foresee that, in that collision of hostile forces, the very institution of slavery which Mason had denounced as bringing "the judgment of Heaven on a nation," would be ground to powder, with a profound sense of relief, after the agony was over, alike on the part of those who maintained and of those who opposed it. In the large logic of human events, the mills of the gods grind slowly, but they grind exceeding fine; and they grind exceeding fine precisely because they work incessantly in the *intervalla ac spiramenta temporum* of which Tacitus writes.

MAITLAND'S SLANG DICTIONARY.

The American Slang Dictionary. Embodying all American and English Slang Phrases in Current Use, with their Derivation and Philology. By James Maitland. Chicago: The Author. 1891.

"DICTIONARIES," said Dr. Johnson, "are like watches: the worst is better than none, and the best cannot be expected to go quite true." If the first part of this dictum is not correct in all cases, it approaches that result in most. The poorest of either of the two things mentioned gives information sufficiently exact much more often than it misleads. Therefore, those who are fully acquainted with the difficulties that stand in the way of perfection in the preparation of dictionaries of any sort can hardly fail to be lenient to shortcomings. There is so much inevitable drudgery in the compilation of the worst of them, there is so much inevitable inaccuracy pervading the very best, that he must be the most hardened of the fierce race of critics who can turn over the pages of one of the most ill-executed of this class of works and not experience some relenting feelings.

Yet it must be confessed at the outset that, in the examination of this work, the most tender-hearted of the tribe will need to call into active exercise every relenting feeling he possesses. He who would gladly say something favorable or else say nothing at all, is placed in a peculiarly trying position when called upon to notice the present performance. If the precise truth must be told, seldom has labor been spent to less purpose than in the compilation of this volume. Seldom has the accomplishment of a task of peculiar difficulty fallen into hands so ill-equipped for accomplishing it properly. The hopeless thing, too, about it is, that it is clear from the introductory matter not only that the compiler does in all honesty and sincerity think the work to be well done, but that he also purposes to continue doing more of the same sort.

Let us now, avoiding generalities, mention a few of the many particulars which are calculated to make the judicious grieve. The work is styled 'The American Slang Dictionary.' It uses the definite article in the title; it would have a great deal of difficulty in establishing a claim to the indefinite. So far from being an American slang dictionary, there is an exceedingly small proportion of the words and phrases contained in it which are peculiar to America. Indeed, the author himself professes that he aims to embody the accepted slang of daily use both in the United States and in Great Britain. There is surely a certain degree of impropriety, in such a case, in making this country even remotely responsible for the contents of the volume. But something much worse remains to be said. So far from being a slang dictionary, a considerable share of its words and phrases cannot be regarded as slang at all in the modern sense of that term. Furthermore, a large number cannot be regarded as slang in any sense that term has ever had.

This last is a characteristic which strikes the attention on every page. The compiler does not really know what is meant by the word slang, either in its original sense or in the sense in which it is now almost invariably employed. This is a peculiarity which he shares, indeed, with most editors of this class of works, and would not deserve special mention here were it not that, in his case, the usual ignorance has attained dimensions unusually formidable. The reader is kept in a perpetual state of wonder as to the motives which could have influenced the compiler to select the vocabulary he has brought together. He inserts in this dictionary a number of words which were once in good literary use but have now become archaic. Yet he assures us in his preface that he has found it necessary to exclude obsolete slang expressions of former days. He inserts in it also words that are merely provincial or dialectic. Here again he informs us that much of the gypsy cant has been omitted as now unintelligible. It would be interesting to know when the time was that gypsy cant was ever intelligible to the English-speaking people, or formed any part of what at the present time is called slang. Furthermore, he inserts in this dictionary technical terms and those peculiar to various trades and professions. Last, and worst of all, he inserts, as slang, expressions which have belonged to the language of literature from the very outset, and have been and still continue to be used by the best writers. In truth he has included in this collection any word or phrase which for any reason happened to strike his fancy as being at all out of the way, not caring to consider whether it is so in reality, but knowing nothing beyond the fact that it is out of any way with which he is acquainted.

Little, too, as have been the pains taken in the selection of words, the character of the vocabulary is no worse than that of the definitions. Of these latter many are inadequate, some are inaccurate. Much of the value of a dictionary of any kind, but specially of a dictionary of this kind, lies in the illustrative quotations it furnishes. This particular volume, however, does not furnish a single one. The nearest approach it makes to it is the citation of some common phrase in which the expression occurs; but even of these very few are found. Moreover, the information imparted is at times so peculiar that one is led to doubt whether the preposterous statement made is a perverse misapprehension, or a thinly disguised attempt at irony, or simply nothing more than the result of combined innocence and ignorance. Thus, under *Joe Miller*, its definition as "an old and oft-told story; a 'chestnut,'" is followed by this remarkable item of news: "One Joseph Miller, an English

clown, is credited with the publication of a book of moss-covered jests now in the possession of Chauncey M. Depew."

Nor are these the only respects in which the performance of the work fails to fulfil its promise. On the title-page we are told that this dictionary not only embodies all American and English slang phrases—which it is very far from doing—but also their derivation and philology. To illustrate the value of this assertion let us take the first letter. There are in this volume more than a hundred words and phrases recorded under the vowel A. Not half-a-dozen instances can be found in which there is the slightest attempt to give the derivation; and so far as the necessarily cursory examination of the whole vocabulary will justify the generalization, we are fairly confident that the same proportion will hold good for the rest of the alphabet.

Not that any fault is to be found with the omission. Attention is called to it because it supplies another instance of the discrepancy existing between the announcement in the title and the condition of things in the body of the work. In itself the neglect to record derivations is a positive advantage. The origin of slang words and phrases is on the whole the most puzzling question of its kind with which the student of language has to deal. The best-informed philologist might well refuse to undertake such a task. If he undertook it, he would be compelled to admit that in a large number, perhaps in the large majority, of instances he would be unable to solve the problems presented. It is easy to fancy what the result would be were the work attempted by one possessed of the linguistic acquirements of the present compiler. We are not, indeed, compelled to resort to our fancy. The derivations given, outside of a few instances where it is almost impossible to go astray, are remarkable for their absurdity or for their impossibility. The editor has not even taken the pains to examine the somewhat scanty sources of knowledge that exist, and is probably unaware even of their existence.

These observations may have the appearance of harsh criticism. To show that this is not really the side upon which they err, all that is necessary will be to make a strict examination of the very first page of the volume; for upon that one page, as in most of those that follow, the characteristics of improper selection, inadequate definition, and wrong derivation will be found exemplified. It contains the following eleven words and phrases: *A. B.*, *abaft*, *abeam*, *abide*, *Abigail*, *aboard*, *aboon*, *about right*, *above one's bend*, *above par*, *above snakes*. Of these *A. B.* as a contraction of "able seaman" may possibly pass. *Abaft* and *abeam* are both perfectly legitimate nautical terms, and are no more to be reckoned slang than "starboard" and "port." Then follows *abide* with the phrase quoted, "I cannot abide him." It is here inadequately defined as 'to suffer,' though it more plainly means 'to put up with,' 'to endure.' This sense of the word goes back to the fifteenth century at least, is found from that time on in good writers and serious compositions, and, though at present not so common as formerly, and perhaps steadily tending to be confined to the colloquial speech, has never been slang and is not so now.

The next word—*Abigail* in the sense of 'a lady's maid'—is a study in the editor's methods of derivation. He remarks that it is 'said to be from the name of Mrs. Masham (Abigail Hill), who, as lady-in-waiting to Queen Anne, distinguished herself as a mistress of intrigue.' A reference to so common a work as Webster's Dictionary might have suggested a doubt as to the correctness of the derivation, for in that work Pepys is given as an authority for this meaning. But a consultation of either the Century Dictionary or of that of the Philological Society would have shown that the word is taken from the name of the waiting-gentlewoman in Beaumont and Fletcher's play of "The Scornful Lady," which in the seventeenth century was extremely popular on the stage. A further consultation of the latter lexicon would, moreover, have supplied a quotation exhibiting the use of *Abigail*, in the sense mentioned, as early as 1693, some nine years before Anne came to the throne.

The inability to distinguish between what is an Americanism and what is American slang is illustrated in the editor's treatment of the next word. Under *aboard* is given the expression "all aboard." In itself this phrase is both legitimate English and ancient English. From an indefinite past it has been an order applied to those embarking on a vessel. The peculiarity of usage in this country of applying it to those who are going upon a land-vehicle of any sort may be deemed either an extension or a perversion of usage; but while it is a genuine Americanism, it can with no propriety be treated as American slang. An observation of a somewhat similar character can be made about *aboon*. It is a form belonging to the northern dialect of England, and has nothing whatever to do with slang of any sort, and least of all with American slang.

The four phrases which follow can, perhaps, be all fairly included under the denomination of slang, provided they can all be said to exist. They are taken from Bartlett's 'Dictionary of Americanisms.' One of them—*above par*—in its strict sense as referring to stocks, has certainly no business here; but in its colloquial extension to other matters it may be justly accorded a place. The last one, however—*above snakes*—must be regarded as extremely suspicious. It is given by Bartlett as a specimen of exaggerated cant for 'from the ground,' and the only authority adduced by him for its use is a sentence taken from Lady Emmeline Stuart Wortley's 'Travels in the United States.' It has every appearance of an expression originated by an individual, and not at all of one current in even the smallest of communities. At the same time it is not safe to make any positive statement on a point of this kind, for no one person can be expected to be familiar with the local peculiarities of speech that prevail over a continent. The very preface to the present volume furnishes in this matter an instructive warning as to the danger of general assertions. In it the compiler severely censures Hotten for mentioning as American slang four words which are particularly specified. He declares them to be atrocities of which no American has ever heard. Yet one of them—*exflunctify*—the present writer has known to be used by several persons; and two of the others, in a somewhat modified form, have been almost equally familiar.

The examination of every succeeding page in this volume would show a state of facts not essentially different from that found on the first. What, indeed, can be thought of the linguistic training or of the judgment of a man who puts down, as slang, terms descriptive of things peculiar to America, like *calumet*, *sachem*, *wigwam*, *bayou*, *crevasse*, and *eagle* as a gold coin; or such obsolete or obsolescent English words as *fardel*, *featly*, *frampold*, *dight*, *skinker*, and *thole;* or such common and legitimate ones as *athwart*, *attic*, *crabbed*, *dazed*, *dumbfounded*, *quandary*, and even the word *slang* itself? Yet these are merely specimens of scores and scores of examples that could be cited. The truth of the matter is, that the compiler of the volume has not made himself acquainted with the ordinary literature of his subject, in spite of the pretentious tone of his preface. There he tells us that "the compilation has been the work of years, the information has been derived from books of all sorts and men of all classes, and the work is offered as an honestly meant and painstaking contribution to the literature of slang." Elsewhere he says that no such collection as this has ever been made. No work, we are told, heretofore published upon this subject meets the needs of the educated people of the United States in the present day. No English one in particular has so much as touched upon the great store-house of native American slang, which has been born of our development and was made necessary by our novel conditions. After reading such remarks one comes to appreciate fully how something more than lively interest and virtuous intention is indispensable to the preparation of even the most ordinary glossary. Within the past two years reviews have appeared within these very columns of two English slang dictionaries. With all their imperfections, these not only contain such words as *boom*, *bonanza*, *boodle*, and *dude*, which we are here informed have never been recorded, but they also devote pages to quotations illustrative of their use, while to this point the volume before us can hardly be said to give up a line. Indeed, from a large number of the mistakes and misstatements here found a consultation of some of the most common books of reference would have saved the editor; and while the ambition to make a compilation of this sort is creditable, it must be said of the present work that it not only has no reason to show for its existence, but furnishes a good many reasons to suggest the desirability of its non-existence.

Mahdiism and the Egyptian Sudan: Being an Account of the Rise and Progress of Mahdiism, and of Subsequent Events in the Sudan to the Present Time. By Maj. F. R. Wingate. With 30 maps and plans. Macmillan & Co. 1891. 8vo, pp. xxviii, 617.

THE time has not yet come to write a complete history of the revolt of the Sudanese against their Egyptian rulers. Not only is it too recent for the various events to appear in their true relative importance, but there are still urgent political reasons why the part borne by England should not be fully revealed. These limitations are evident in Maj. Wingate's work, and make it chiefly valuable as furnishing important material for the future historian. He gives an interesting account of the Mahdi and the strange system of morals and conduct which he and his successor, the Khalifa, inculcate upon their followers, with numerous quotations from their letters and proclamations. The greater part of the book is, naturally, occupied with a narrative of the military operations in the twelve different provinces of the Egyptian Sudan, a vast region without well-defined boundaries. The difficulty which the reader would have in following the course of events in these widely separated districts is greatly lessened by an admirable series of maps which give the extent of the revolt at the close of each year from 1882 to March, 1891. The author, who is the head of the Intelligence Department of the Egyptian

Army, writes at times with much vigor and with not a little descriptive power. At others his style is as dry as that of an official report. This is especially noticeable in his accounts of the sieges and the more than seventy battles and skirmishes fought, in which sometimes minuteness of detail is carried to an extent too great for the patience of any but the purely military reader. His work as a whole, however, shows constant signs of painstaking and conscientious labor, and a complete mastery of his subject so far as his means of information have permitted. Some of the defects which are to be detected in his account are to be attributed to his official position, and to the possibility that the end of the struggle for the Sudan may not yet have been reached.

The culminating point of interest, of course, is the fall of Khartum, which was due, not to treachery, as has generally been supposed, but simply to the delay of the English rescuing force. Had Sir Charles Wilson arrived only two days earlier than he did, the city would have been saved and the whole course of events changed. This is apparent from the testimony of one of the Arab leaders in the successful attack, who has since returned to his allegiance and is now a respected teacher in the Azhar University at Cairo. He says that the Mahdi, greatly alarmed at the approach of the English, determined, with the advice of his principal officers, to abandon the siege and retire to El-Obeid in Kordofan. One man alone opposed this design and prevailed upon him to make one more effort to take the city before his retreat. The assaulting column found that the ditch which was the principal defence of Khartum on the south, had been partly filled with mud during the high Nile, and over this it made its way into the city, overcoming without difficulty the feeble resistance of Gordon's exhausted and famishing garrison.

Another unfortunate mishap in the long series of which this book is the melancholy chronicle, was the death of King John of Abyssinia. For some time it was believed that in a battle with the Mahdists he was killed and his army annihilated. It now appears that the Abyssinians were completely victorious, and that the King, while seated in the centre of the captured camp, fell mortally wounded by a stray bullet. Upon this his followers immediately retired to their own country without attempting to reap any of the fruits of their victory.

It is difficult to get a clear idea of the operations on the Red Sea littoral from Major Wingate's pages. Apparently at no time within the past six years has it been impossible, with a very moderate expenditure of men and material, to put an end to the guerrilla warfare which has so long desolated this region. As we read of the frequent change of commanders and the continual sending and withdrawal of troops, the impression prevails either that there has been no consistent plan for subduing the Mahdists, or that there is ground for the charge that it is in the interest of Egyptian politics that a running sore should be maintained in the country about Suakin.

Maj. Wingate's ostentatious refusal to touch upon the actual state of affairs at the present time in the Sudan, because it would be entering "into the region of undeveloped plans and current political questions," gives color to the belief that the reconquest of this country is contemplated by the military authorities of Egypt. There can be little doubt, however, that this will not be attempted so long as Sir Evelyn Baring holds his present responsible position. It is natural that there should be a strong desire to try the strength of the reorganized Egyptian army in other than merely defensive operations on the frontier. A very favorable account is given of the new fellaheen conscripts, who, under the influence of regular pay and humane treatment, have greatly improved, even developing fair fighting qualities. But Maj. Wingate does such scant justice to the native officers that the Commander-in-Chief, Sir Francis Grenfell, feels it necessary, in his introduction to the book, to apologize for the lack of the proper recognition of their services.

Character painting is not one of the author's strong points. A brief outline of the Mahdi's life is given, and there is a fine description of his preaching and its effects, but the man himself remains indistinct. He is credited with great abilities, but without sufficient evidence, since the success of the revolution which he headed was due wholly to the weakness of the Egyptians, men "who robbed without being strong, bore arms without having the courage to use them, and professed religion without confidence in its virtue." The same is true, though in a lesser degree, of his successor, the Khalifa, of Osman Digna, formerly a merchant and slave-dealer at Suakin, and of the brave fanatic, Nejumi, the greatest leader of them all, who fell at the battle of Toski. Much is told about them, and yet they have but a shadowy existence in these pages.

Notwithstanding the author's professed reticence in respect to the present condition of the Sudan, it is evident that the strength of Mahdiism as an aggressive force is well-nigh exhausted. Father Ohrwalder, one of the little band of European captives who recently made their escape to Egypt, estimates that three-fifths of the population of the Sudan have been destroyed during the past ten years through war, famine, and disease. One tribe, which in 1880 was 40,000 strong and possessed more than 100,000 camels, and was the main carrier of merchandise in the Sudan, is now "almost extinct." Maj. Wingate asserts, no doubt truthfully, that the only result of the revolt to the Sudanese has been the substitution of one set of tyrants for another even more cruel and rapacious, and that the remnants of the scattered tribes are now anxious for the return of their Egyptian rulers. Their new masters are the emirs of the fierce Baggara, "the Red Indians of the Sudan," who inhabit the fertile country to the south of Khartum. These Arabs, furious at the suppression of the slave-trade, their chief source of revenue, were the first to rise at the call of the Mahdi, who chose his successor, the reigning Khalifa, from among their chiefs. Whether this man, who is credited with great cunning, will succeed in the formation of a stable Mohammedan State, having peaceful commercial relations with Egypt, it is impossible now to say. This, however, is a solution of the question which many having the interests of both countries at heart profoundly desire, though it may be opposed to the designs of the military party to which this author belongs.

Maj. Wingate's story closed with a narration of the events of 1889, but in a supplement he gives an account of the operations on the Red Sea Coast and the occupation of the district of Tokar in February, 1891, a movement which has evoked much hostile criticism in England. In an appendix there are a number of official reports and other papers, such as Gen. Gordon's famous proclamation concerning slavery, and extracts from Col. Stewart's report on the Sudan made soon after the outbreak of the rebellion.

The Colonial Era. By George Park Fisher, D.D., LL.D. [American History Series.] Charles Scribner's Sons. 1892. Pp. xviii, 348.

THE present time is an age of "series" and brief handbooks on historical subjects, and publishers naturally recognize their opportunity in the Columbian year. The work under review is the first of five volumes designed to tell the story of that part of America which forms the United States, from its discovery to the period of reconstruction following the civil war. The planners of this series have been wise in their apportionment, and have done well to confine the story of American beginnings down to 1756 within the compass of a single volume. It may be questioned, however, whether it would not have been better had they included an account of the downfall of the power of France in North America in the history of the colonial struggles of which it is the completion, rather than yoke it, as they proposed to do, with the story of the Revolution of 1776.

Under considerable limitations of space, Prof. Fisher has prepared a most useful handbook. Three introductory chapters of less than thirty pages in all make ready the way for his real task, the history of the thirteen colonies which eventually formed the American Union. That story he divides into two portions, making the point of separation the English Revolution of 1688. The first part treats of Virginia, Maryland, the Carolinas, New England, New York, New Jersey, and Pennsylvania, in the order named—a grouping which allows the differing conditions of the Southern, Northern, and Middle colonies to be clearly pointed out. In the second portion of the book the narrative is continued to the outbreak of the final struggle with France, the colonies now being treated in their geographic order from north to south. The point of division between the two periods is certainly happily chosen, for the Revolution of 1688 had an influence in the colonies only second to its effects in the mother country.

In his preface Prof. Fisher acknowledges his indebtedness to the works of Winsor, Doyle, and Palfrey; but he is everywhere independent in his judgments, and is thoroughly abreast of current discussion on disputed points. Thus, for example, he holds, in distinction from the late Prof. Johnston, that in Connecticut colony the towns were not primarily independent communities whose union formed the State; while he points out that in New Haven colony, on the contrary, they were originally self-governing and separate (pp. 128-130). But the most conspicuous feature of Prof. Fisher's little book is its breadth and fairness. His conception of history is very different from the narrow view of the late Prof. Freeman; not only political events but religious thought and social conditions demand his attention. The book avoids the dangers into which a New England writer on American history usually falls. It is neither predominantly political nor theological, and it recognizes the contributions of other colonies than those east of the Hudson to our national life. Prof. Fisher is at his best in comprehensive but compact statement. The accounts of the early discoveries and attempts at colonization (pp. 12-29); of the causes leading to the settlement of New England (pp. 85-93); and of the effect on the colonies of the Revolution of 1688 (pp. 207-212) are admirable examples of condensed and lucid narrative.

Nor is the writer's impartiality less obvious. He recognizes the right of King James to re-

fuse the innovations proposed by the Puritans, while he declares the sovereign's spirit in dealing with that party "insolent and arbitrary" (p. 101). He admits the hostility of the early New England settlers to forms of faith and worship differing from their own; but he shows that, "in the absence of a commonly accepted principle of religious liberty, each party, in case its opponent should get the power, had nothing to look for but subjugation. For one party to give ecclesiastical freedom to its adversary was to forge an instrument for its own destruction" (p. 107). Yet the really tolerant spirit of the Lords of Baltimore has full appreciation, though Prof. Fisher's judgment is "that the younger Baltimore—and in this respect he closely resembled his father—while he aimed to provide a safe asylum for adherents of his own creed, was mainly concerned to build up a lucrative and flourishing colony, whatever might be the creed of its inhabitants"; and he points out that "when religious discussion at length became sharp [in Maryland], toleration gave way" (pp. 65, 107).

In Prof. Fisher's view, Roger Williams was neither a faultless prophet nor simply a disturber of the State. "He was an enthusiast, lacking that ingredient of hatred which turns the enthusiast into the fanatic." His vagaries, and the dangers which they brought to Massachusetts, led to his banishment; but the doctrine of "soul-liberty," though "not one of the main grounds of his expulsion from the colony," is sufficient to give him "lasting distinction" (pp. 114–116). A similar fairness of judgment marks Prof. Fisher's representation of the feelings of the colonies and the mother country towards each other during the first half of the eighteenth century (pp. 208–211).

Prof. Fisher closes with a brief sketch of colonial literature, so brief that it is little more than a suggestive outline which might well have been extended; but from his judgment there can be little dissent when he affirms: "In truth, in the colonial period prior to the middle of the last century there were only two authors who rise above a merely provincial rank. These were Benjamin Franklin and Jonathan Edwards" (p. 319). A chronological table of considerable fulness, a bibliographical note professedly designed for "younger students," but containing much in the way of comment that is of wider interest, a good index, and three well-executed but rather general maps, complete the book.

The work is remarkably free from errors of statement or typography. The name of the missionary at Norridgewock is printed "Rasle" on pp. 214, 346, and "Rasles" on pp. 229, 230. Probably "Rale," as Mr. Parkman spells it from an autograph, would be better than either. The publishers of the "American History Series" are certainly fortunate in the character of their first volume. Prof. Fisher has given us a compact, suggestive, and readable account of our colonial history—the best brief sketch of the period of which it treats.

History of the Nineteenth Army Corps. By Richard B. Irwin, Lieut. Col. U. S. V., Asst. Adjt. Gen. of the Corps and of the Department of the Gulf. G. P. Putnam's Sons. 8vo, pp. 528, with maps.

Col. Irwin's book had hardly come from the press when the news of his death was also published. The task which was his last was that on which his heart was set, and he was happy in completing it, though he did not live to hear the commendations of his comrades and of all who are interested in the military history of the country.

A more conscientious piece of work was never done. The author spared no pains to be accurate, and there are many proofs of the bestowal of very great labor on minor points which a writer is tempted to neglect. The tone is one of candor, and the writer's spirit is a judicial one, with as little of prejudice as possible, and a freedom from rancor which is every way admirable. All this is the more noticeable and praiseworthy because the campaigns of the corps have been the subject of much bitter controversy. Some of its regiments were among those which accompanied Butler in the first occupation of New Orleans by the national forces, and most of the others went with Banks to Louisiana in December, 1862. The campaign in the Teche country, the siege of Port Hudson, and the Red River campaign were the chief events in the experience of the corps in the Southwest. It was then brought back to the North, and completed its military work in the Shenandoah Valley under Sheridan, where it had an honorable part in the battles of Opequon, Fisher's Hill, and Cedar Creek.

The Louisiana campaigns have been only vaguely known, and their military importance has been greatly underestimated. A clear and soldierly account of them was very much needed, and this is exactly what Col. Irwin has given us. Except in the Red River expedition, there was very little to apologize for; and even there, while the result was unsuccessful, there was much which reflected honor upon the officers and men of the several divisions that made up the army. A candid reader of the book will close it with a better opinion of Gen. Banks than has been the popular one, for, in spite of one or two great errors, his general leadership was good, and he had the merit (no small one in the eyes of soldiers) that he led his troops in person, and was to be found near the front whenever they were engaged.

Col. Irwin has also thrown new light upon the relations of Banks's campaigns to those of Grant, McClernand, and Steele. It has not been generally known that the orders of the War Department looked to the union under Banks of the forces commanded by all these officers, and it was evidence of honesty and unselfishness in Banks that he did not make what seemed to him the public good yield to the ambition to enlarge his own importance by a junction of Grant's army with his own. The author has also dealt out even-handed justice in emphasizing the fact that, in the ill-fated Red River campaign, the orders from Washington were that the expedition must be ended within a month and a half. He reasons fairly in urging that such an inflexible limit made it impossible for the army to resume the offensive after the check at Mansfield, since delays then became inevitable which would extend the time beyond that which was thus peremptorily set.

In his determination to write a strictly military memoir, Col. Irwin has systematically avoided matters of civil administration of the department. He has nothing to say of the political scheme for organizing loyal State governments in Louisiana and Arkansas, and he makes no reference to the cotton-trading scandals which are so intimately connected with the Red River campaign. This, of course, prevents a full discussion of the general plan of action; for these things were so intimately blended with the military reasons for action that the one part cannot be understood without the other. The author's task was undoubtedly a pleasanter one as he limited it, and possibly the scandals of the time were so distasteful to him that he would not have written at all if he had been obliged to treat of them. Yet the history of that period will not be completed until the dissection is thoroughly made, however repellent it may be. He has even gone further in his self-imposed limits, and has forborne all discussion of the personal relations of Banks to Grant, T. W. Sherman, A. J. Smith, Stone, Franklin, and to Admiral Porter. Here, also, are burning questions in each case, and Col. Irwin could have thrown great light on them, and so upon the history of the whole campaign, if he had been willing to do so.

But we must take the author's work for what he chose to make it. Within his chosen boundaries, he has done his task so well that it must be a permanent starting-point for those who may wish to push their researches more deeply into the characters and motives of the men who figured prominently in political and military affairs in the critical year of the war.

The Origin of Metallic Currency and Weight Standards. By William Ridgeway, Professor of Greek in Queen's College, Cork. Cambridge (Eng.): University Press; New York: Macmillan. 1892.

Compound arithmetic can certainly make itself very disagreeable. From the urchin writhing in the agonies of a long sum in long measure, up to Belshazzar, watching the hand write upon the wall those distressful words, "Pounds, pounds, ounces, drams," that suggested there was an account to settle with God, mortals have doubtless undergone more misery, first and last, from this branch of mathematics than from any other. On the other hand, to accompany a learned and ingenious essayist in his explorations of ancient metrology, to cut the rope that ties us to the here and now, to mount the heights of speculation, borne up by a beautiful and globular theory, to cleave the thin air of ancient texts, and trust to our guide to get us back to *terra firma*, this is a most delightful and entertaining pastime. Alas! we have blown our last parting kiss to the theorists of our boyhood, Boeckh, Queipo, Hultsch, and the rest. They have sailed away for ever, and we shall never see their like upon earth again, with those two beautiful propositions of theirs, first, that, in the ancient systems generally, the units of weight, length, and capacity were connected in much the same scientific way as the gramme, the metre, and the litre are connected; and, second, that in the ancient world pretty much all the weights and measures of all climes and ages were in simple commensurable relations to one another. We know that, before the adoption of the metric system, different towns of Europe used at least 400 different pounds, and probably twice as many. The units of capacity and of length were quite as numerous; and there was no rational connection between them. In short, the language of quantity was as various as the dialects of speech. But the accepted doctrine until lately was that the Babylonian (or, as some said, the Egyptian) system was strictly scientific; and that all the peoples of antiquity followed that, or, at least, used only standards commensurable with those of that system, or, at most, slightly modified from it. These propositions rested upon the testimony of ancient authors, supplemented by divers ingenious arithmetical computations by which certain relations between certain quantities were made to appear. If anybody objected, as

many a man of logical sense did, that such calculations proved nothing but the idle industry of their inventors, and that the documents were almost all of extremely late date, and probably expressed merely convenient approximations, like "A pint's a pound the whole world round," the answer was that we were not at liberty to reject the only evidence in our possession. Yet some enduring work was accomplished by the old metrologists; namely, they weighed and measured, besides coins, perhaps a hundred ancient standards and a smaller number of other monuments.

Within a few years Mr. W. M. Flinders Petrie has determined the values of many hundred additional ancient standards and has measured thousands of monuments. What is far more important, he has contrived methods by which scientific logic can be brought to bear with all its force upon questions of ancient metrology. His conclusions will be found summarized in the article "Weights and Measures" in the 'Encyclopædia Britannica,' last edition. Having determined no less than 516 weight-standards unearthed by him in the Greek-Egyptian town of Naucratis, he has embodied the results in a curve whose abscissas measure the quantities of the weights, while its ordinates are proportional to the numbers of specimens of the different quantitative values. This curve shows certain maxima; and upon these maxima it is precisely that Petrie bases his reasoning. We know from many careful experimental researches that when men try to reproduce many times any quantity, the values they do produce will cluster about the truth, or about the truth affected by a constant error. The curve of these values will show a maximum at that point. Now, the Naucratis makers of weights were undoubtedly trying to reproduce some standards, legal or illegal. Consequently, each well-marked maximum of the curve represents the value of a standard they were trying to reproduce. This logic is irrefragable. Prof. Ridgeway endeavors to break it down by the remark that many of the weights may have been fraudulent, and *that* as well by being too heavy as by being too light. Granted; but this in no wise weakens Mr. Petrie's reasoning from maxima, which Prof. Ridgeway does not seem fully to apprehend. In order that these falsifications should produce maxima in the curve, it would be requisite that the counterfeiters should aim at quantitatively definite falsifications, and the definitely false standards so produced and put into use would be, *ipso facto*, new units. In short, a clearly marked maximum must represent a distinct unit, a distinct aim, explain its origin as you may. The general upshot of Mr. Petrie's inquiry into the weights of Naucratis is that many more units were in use in that town than could have been found in Nuremberg, or in Venice, or in any great mediæval mart. So the theory that the ancients did not have the same variety of standards that has marked the modern world down to our generation is exploded at one blast; and, that gone, the ridiculous idea that the units of mass, length, and capacity were scientifically adjusted evaporates by its intrinsic volatility. It is only commerce, extensive, pervasive, and voluminous, that can bring about a unification of units, and nobody can maintain that there was as much commerce when Gibraltar was at the end of the world as there was after men had circumnavigated the globe.

Prof. Ridgeway's theory is that before the use of metals there was a universal unit of barter throughout Europe, Asia, and Africa, to wit, the cow. Of all the metals gold first became known, and the balance was invented in order to weigh gold. Consequently, the earliest unit of weight was the gold unit; and this was fixed at the amount of gold exchangeable for a cow. Strangely enough, the cow had the same gold value in all countries and in all ages, namely, 130 to 135 grains Troy ($5 is 129 grains, 900 fine). In order to reproduce this unit, there were rules for building it up from the seeds of different kinds of grains. The author does not mention that similar rules were given by Arabian metrologists for forming the dirhem and mithcal. All the leading systems of weights of antiquity are passed in review and explained on these principles. The Roman *as* is made to have been a bar of copper from which fractions were broken off as required.

Though the author finds much fault with the "school of Boeckh," especially for supposing that units of different kinds were originally connected in the French style, yet he himself really belongs to the old school, because he attaches more importance to documents than to monuments. Now, experience has shown that this method cannot lead to any fixed conclusions. Many places in this essay are marked by the arbitrariness and the one-eyedness which belong to the old books. But judging it as a performance of the old school, in which complete truth and finality are not to be expected, but only valuable suggestions mixed with fancies, it must be acknowledged that this is a strong work. It bristles with interesting facts many of which have never before been used by metrologists. The evidences are marshalled with consummate skill, and we cannot doubt that several of the doctrines here put forth will take a permanent place among the principles of ancient metrology.

The Autobiography of an English Gamekeeper (John Wilkins of Stanstead, Essex). Edited by Arthur H. Byng and Stephen M. Stephens. Macmillan & Co.

To the lover of nature and of animals, to the votary of sport, but above all to the student of human nature, this book appeals. With all its faults, it fulfils the real mission of an autobiography, in giving a true picture of the man who wrote it, while his likeness, forming the frontispiece, with its keen, weather-beaten face, square shoulders, and angular, wiry figure, answers well to our idea of a true English gamekeeper and of the author. As the editors say, they make no apology in presenting this book to the public, and it needs none. Regarded solely as a book, it is discursive and repetitious, abounding in trivialities, and sometimes ungrammatical; but these defects are characteristic of the man, and as a study the narrative is charming.

We have been taught to look on the poacher in a rather romantic light. From the time of Shakspere he has been the hero, and the keeper the tyrant, but now we are shown the other side, and it is such a simple, kindly picture as to make us forget our allegiance and desert to the side of the oppressor. Wilkins captures his poachers in such a practical manner, and treats them so fairly and humanely, even after they have almost beaten him to death, as to leave no place for sentiment. Our keeper's pride in his profession is most pronounced. His lenity, he admits, is policy, but we may doubt it. His vanity is patent, but perfectly harmless. "What would unnerve most men," he says, "just brings me up to the scratch. For instance, with a lion or tiger, I should feel nervous whilst it was some way off, but, when I got close, I should think of nothing but killing him; the possibility of his killing me would not enter into my calculations at all." Needless to say he was never called upon to face either a lion or a tiger, but he had to face dangerous men, and his conduct under those circumstances seems to warrant his boast. The humor which he evidently thinks is necessary in writing a book, is not of a high order. Indeed, it resembles nothing more than the gambols of one of his own setter-pups—the most awkward exhibition in nature, next to the gambols of a lamb. A tremendous joke is perpetrated in the headings of four associated chapters—"Concerning Dogs," "Inasmuch as to Retrievers," "Inasmore as to Retrievers," "Inasmost as to Retrievers." And this humor, such as it is, is not relieved by the comments of the editors, fortunately used sparingly, *e. g.*, "(More humor, we presume)" and "(This Christian spirit of forgiveness is truly beautiful.)"

The hints on dogs, especially on their training, are valuable; and the old keeper's system of kindness, although he does not spare the rod when necessary, might be followed more closely by trainers, with advantage to both dog and master. Altogether, John Wilkins is a man with whom one would like to tramp all day through the field, or while away the pleasant idleness of a summer evening.

Etching and Mezzotint Engraving: Lectures delivered at Oxford by Hubert Herkomer, R.A., M.A., etc. Macmillan & Co. 1892.

This book is an exquisite production. It is a small folio with heavy hand-made paper, wide margins, and untrimmed edges; a baker's dozen of most charming etchings and mezzotints by the hand of the author; and a cover of cream-white canvas, simply lettered in gold. All the illustrations, which are literally illustrative of the points made in the text, are beautiful and admirably chosen for their purpose, and the type is large and brilliantly clear, making perusal an easy task.

The lectures really form a handbook, and one of the best we have ever met with, for the treatment of the two branches of engraving designated in the title. Nothing could be clearer, simpler, or more direct than Mr. Herkomer's explanation of the technical processes. This is in strong contrast to most essays upon these subjects, which generally leave the student in such a bewildered frame of mind as regards plates, grounds, acids, tools, printing, etc., that he is little likely to attempt an experiment with them, but rather to be utterly discouraged. Here, however, every step is described and explained in the fullest manner possible, and yet so lucidly that one is beguiled into thinking it cannot be, after all, such a very difficult matter to produce a good etching. Moreover, the artist's temperament and feeling inspire every word, and give to the whole a charm which is as rare in books that treat of processes as it is welcome. The individual characteristics of the different processes of etching, dry point, mezzotint, and the author's new patented process, which he calls, tentatively, "spongotype," are most justly discriminated, and the advantages and disadvantages of each for different styles of work emphatically brought out. A strong plea is made for painter-etcher work as one of the most alluring fields for artistic endeavor; and the limits of copyist and interpretative work are well defined.

Herkomer evidently has one quality which

does not always go with the highly developed artistic temperament such as he possesses, namely, a clear and orderly mind. This is shown not only throughout his text, but notably in two attractive descriptions which he gives; one is of the "little studio in my German home at Landsberg in Bavaria," and the other of the old paper-maker's workshop, also in Bavaria, whither he went in his search for that almost unique personage who should supply the craft with the hand-made paper so absolutely essential for the use of the etcher, no detail being too trivial for Mr. Herkomer's patient investigation, and no difficulty too great to be surmounted. These difficulties he frankly states at every stage of his elucidations, and even the frontispiece of the book typifies them. It is a striking etching of the etcher at work upon a plate, over which is lightly indicated, with a few masterly touches and in vague development, a female figure, head downward and with arms bound behind. So the etcher works, largely in the dark, not knowing just what will result, his design reversed and bound by many varying physical conditions which require the most careful consideration and attention.

Egypt: Three Essays on the History, Religion, and Art of Ancient Egypt. [By Martin Brimmer and Mrs. John Jay Chapman.] Boston: Houghton, Mifflin & Co. 1892. 8vo, pp. viii., 86; 32 illustrations.

THE number of pages contained in this volume is no indication that it is unimportant or cheap. It is to be feared that the authors have in some degree defeated their object of making their book "an introduction to works of higher authority" by giving it the luxurious shape which it possesses. The paper is heavy hand-made linen, and the illustrations are reproduced from remarkably clear photographs by the neograph process. In order to profit as much as possible by a proposed trip to the land of the Nile, the authors made preliminary studies. These essays were afterwards written out while upon the scene from notes previously taken and under the influence of their surroundings. After a careful study of the subject the conclusion was reached which is summed up in the statement, undoubtedly correct, that "some conception of the true nature of the Egyptian religion" is necessary if one would derive all possible advantage from such a journey. In the religion lies the main secret which alone can explain many of the things that are to be seen. The history is important, and the study of Egyptian art of great interest, but they are subordinate to the religion.

While it is not necessary to agree with the authors in the opinion which they have formed as to the substratum of the religion of Egypt, it is impossible not to be impressed with the beauty and finish of the presentation of the facts from which it is inferred that the basis was monotheistic, even if it was esoteric in character. If one wishes to be convinced that the religion was monotheistic in any degree, these pages are to be recommended. But unfortunately the argument is to be regarded as incomplete and unsatisfactory. It is impossible for us to go back to the beginnings of literature, art, or religion in that ancient land. At the very dawn of its history we find it possessed of a language which, though written in characters as clear and as beautifully engraved as in any subsequent age, has well-nigh defied all attempts towards its elucidation and the explanation of its grammatical structure. This language must have been developed long before it was thus written, and the religion as embodied in the texts found in the pyramids of the sixth dynasty was not the growth of a day. A vista is thus opened whose further end no eye can see. To reason as to the very beginning of all these things seems idle, and only a mind specially gifted can hope to offer even a working hypothesis upon which to proceed. It is undoubtedly possible to gather certain facts which give plausibility to the view that the ultimate basis of all the religious conceptions of these lost ages may have been a solar monotheism. But when we find a system which is polytheistic as far back as we can go, the hypothesis that the sun was the centre and spring of all is merely a working hypothesis, nothing more. It is all very pretty if one can believe it, but the proof is not yet forthcoming and will long tarry.

It will be found that the authors have not given due prominence to the fact that each district had its triad of deities, or even its trinity of triads, and that each city had its special "city-god." In fact, the subject of the Egyptian religion is too large to be disposed of summarily. The element of time must enter into the consideration also, since, despite statements to the contrary found in some books which are considered as authorities on the subject, though not in the present work, there was a change, even a development, in the conception of the gods, their attributes and their functions. We have no adequate presentation of the religion of Egypt even so far as it is known, because no one properly equipped for the task has yet taken the pains to work out the results in accordance with modern methods, and so to produce an account which shall show the development from the earliest forms to the latest.

It is open to some doubt whether it is correct to represent the moral maxims of the philosopher Ptah-Hotep as containing the ethical code of the people. Such an assumption in the case of Seneca would certainly not be correct. That many of the injunctions thus set forth are lofty and profitable, even for to-day, is beyond doubt, but that is not the question. To some extent the case is different with the morals of the 'Book of the Dead,' but inferences from these can be pushed too far. The dissertation on the history of the land is quite different from the ordinary presentation. We gladly miss those dates which are so baffling in their uncertainty. Much is said which is of interest, but of dated history there is little. This is scarcely to be regretted, since anything short of an exhaustive study would be even less satisfactory than the division into great periods here indicated. The chapter on art is less adequate than the others. Many problems are connected with this subject, but its treatment here is full of eloquent omissions. Still a hearty appreciation of art is evident, together with a desire to display some of the more important facts.

History of the Town of Oxford, Mass. With Genealogies, etc. By George F. Daniels. Oxford. 1892. Pp. 856.

OXFORD in at least one point has a unique historical interest. It was the site of a Huguenot colony, and the only one in New England, for the Narragansett abortion hardly deserves the name. The Oxford plantation, one of the earliest in Worcester County, survived for a decade from 1686 to 1696, and was then destroyed by an Indian raid. Here, as so often the world over, the French turned out, as it were, pilot-fish, showing the way for English sharks. But Oxford has never been without survivals of the early French, aside from the fifteenth of her present population that was born in Canada. The Huguenot fort, being partly of stone—and now owned by the Huguenot Association—seems to be the best preserved military work of the seventeenth century which New England can show.

The Oxford volume would have been much less than half its present size but for two appendixes. One of these, well-nigh a new departure, describes all transfers of homesteads from the first settler to the present possessor. The other is a sort of encyclopædic genealogy of all Oxfordians up to the year 1850, following each family wherever it has wandered at home and abroad. This last feature will give the book a sort of cosmopolitan interest. The minutiæ of town life, political, religious, educational, military, and industrial, are set forth in a style which shows that the compiler has neglected nothing. Oxford is by no means the first town in the Bay State to stiffen the sinews of research by pecuniary aid. No town should neglect to follow in its footsteps. There is none whose annals can fail to shed side-lights on the evolution of the New England township—the most original product of the Yankee mind, and the protoplasmic germ of our most distinctive national institutions—

> "The baby figure of the giant mass
> Of things to come at large."

The indexes, filling one-twelfth of the book, seventy pages, and as good as they are long, furnish a model worthy of all acceptation. Their maker knew that a volume without an index resembles a clock-face without any hands to show either seconds, minutes, or hours.

BOOKS OF THE WEEK.

Ambrosi, Marietta. Italian Child-Life; or, Marietta's Good Times. Boston: D. Lothrop Co. 75 cents.
Barrie, J. M. When a Man's Single. Waverly Co. 25 cents.
Beddard, F. E. Animal Coloration. London: Sonnenschein; New York: Macmillan. $3.50.
Boulger, D. C. Lord William Bentinck. [Rulers of India.] Oxford: Clarendon Press; New York: Macmillan. 60 cents.
Boyd's Co-Partnership and Residence Business Directory of Philadelphia. Philadelphia: Boyd's Directory Office.
Braddon, M. E. The Venetians. Harpers. $1.50.
Bradford, T. L. Homœopathic Bibliography of the United States, 1825–1891. Philadelphia: Boericke & Tafel. $3.50.
Bradshaw, John. The Letters of Chesterfield, with the Characters. 3 vols. London: Sonnenschein; New York: Scribners. $7.50.
Breul, Karl. Schiller's Geschichte des Dreissigjährigen Kriegs. Buch III. Cambridge: University Press; New York: Macmillan.

Messrs. Henry Holt & Co., 29 *West 23d St., New York, will be glad to send free to any teacher their new* **Educational Catalogue,** *which contains, besides descriptions of books already issued, some important announcements in the departments of Natural Science, Philosophy, Modern Languages (including English), and Greek and Latin.*

You Want This Relic.

You can have the original Illustrations pertaining to the War that appeared in "Frank Leslie's Weekly" from 1860 to 1865, complete in two elegantly bound volumes.

SPECIAL OFFER.—Sold on installments: $16.00 for five years, delivered complete on the first payment of $2.00, and $2.00 per month until paid for in full.

A1 Salesmen wanted. Address for descriptive circulars, STANLEY-BRADLEY COMPANY, Nos. 5-7 E. 16th St., near 5th Ave., N. Y.

Letters of Credit. We buy and sell bills of exchange on and make Cable Transfers of money to Europe, Australia, and the West Indies; also make Collections and issue Commercial and Travelers' Credits, available in all parts of the world.

Brown Brothers & Co., Bankers,
NO. 59 WALL STREET, NEW YORK.

A MANUENSIS AND LITERARY ASSISTANT wanted. It is important that he be a man of much system and method. He must know German and be otherwise well educated. The work will be largely of a linguistic nature. Address, giving references or recommendations, X., P. O. Drawer No. 4, Boston, Mass.

Dainty Foods Demand it.

IN EVERY Receipt that calls for baking powder, use the "Royal." Better results will be obtained because it is the purest. It will make the food lighter, sweeter, of finer flavor, more digestible and wholesome. It is always reliable and uniform in its work.

I have found the Royal Baking Powder superior to all others.
C. GORJU,
Late *Chef*, Delmonico's.

Exhaustion.

HORSFORD'S
ACID PHOSPHATE.

A wonderful remedy, of the highest value in mental and nervous exhaustion.

Overworked men and women, the nervous, weak, and debilitated, will find in the Acid Phosphate a most agreeable, grateful, and harmless stimulant, giving renewed strength and vigor to the entire system.

Dr. Edwin F. Vose, Portland, Me. says: "I have used it in my own case when suffering from nervous exhaustion, with gratifying results. I have prescribed it for many of the various forms of nervous debility, and it has never failed to do good"

Descriptive Pamphlet free.

Rumford Chemical Works, Providence, R.I.

Beware of Substitutes and Imitations.

CAUTION: Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

"The weary brain requires some nerve sustaining element as food."—HERBERT SPENCER.

Crosby's Vitalized Phosphites.

The vital principle of animal and vegetable life isolated from the ox brain and wheat germ.

The loss of memory, the tired and exhausted feeling, the dull, unrefreshed sleep, or nervous sleeplessness, brain weariness, depressed vitality, are simply the brain and nervous system calling for their necessary food. In this condition the Vitalized Phosphites give great relief. It restores the true protagon, the brain phosphoid, increases brain and nerve power by specially feeding the nerve centres. It reinvigorates brain and body.

For thirty years endorsed by leading physicians and the world's best brain workers. Formula on the label. Pamphlet free to those who write for it. Druggists or by mail, $1.00. 56 W. 25th St., N. Y. *F. Crosby Co.*

Our new **Book Catalogue** not only gives the size and price of all the standard works on Homœopathy, but an interesting description of each, together with opinions of the press and of physicians. Mailed free.

"There is no Free Trade teaching by example at all to be compared with it."—Chicago Times.
The Free Trade Struggle in England.
By Gen. M. M. Trumbull. Second Edition, revised and enlarged.
A timely book on the tariff question, of which Mr. Edward Atkinson says, in an article entitled "Common Sense Applied to the Tariff Question" (Pop. Sci. Mo., Aug., 1890):
"Those who choose to discriminate between the leaders of the two parties of the present time may read the perversion of English history by James G. Blaine, in the *North American Review*, and the true picture which is given by Gen. M. M. Trumbull. It would be well worth while for any one who has been misled by the common errors about the influences which brought Great Britain to reverse her policy in 1842, to read up the economic history of that period. All the facts are given by the radical Miss Martineau in her History of Fifty Years' Peace; by the Tory Sir Stafford Northcote, in his Twenty Years' Financial Policy, explaining the changes which Peel brought about; by the economist John Noble's Fiscal Legislation in Great Britain; or in Carlyle's Past and Present. The best summary is to be found in the little book published in Chicago in 1884, by Gen. M. M. Trumbull, entitled The American Lesson of the Free Trade Struggle in England. In this book will be found the whole record of the condition of England from 1838 to 1846. This history ought to be read by every man who desires to make up his mind how to act in this country at the present time. The logic of events is the same. We are repeating history."
Cloth, prepaid, 75 cents; paper, 25 cents.
THE OPEN COURT PUBLISHING COMPANY,
175 La Salle St., Chicago.

School Trustees,
Principals,
Teachers,
And others interested, are invited to consider the advantages offered by the *Nation* as an advertising medium. School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.
The *Nation*, in its special field of political and literary criticism, is unlike any other periodical, American or foreign. At least 10,000 copies are circulated weekly, but these figures do not accurately represent the number of its readers. It is taken by reading-clubs and literary associations in a large number of places, and may be found on file in every library of importance in the country. There are probably few weekly periodicals whose columns offer so favorable an opportunity for reaching an audience interested in educational matters.
Advertising rates, 15 cents a line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12½ per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.
The *Nation* is sent free while advertisement continues.
Orders may be forwarded through any responsible advertising agency, or directly to

The Nation.

NEW YORK, THURSDAY, JUNE 30, 1892.

The Week.

THE culmination of absurdity in the conduct of a national convention seems unquestionably to have been reached at Chicago, and it fully justified the resolution introduced by Gen. Collins of Massachusetts, that "the Democratic National Committee be instructed to provide in the next National Convention the accommodations necessary for the delegates, the alternates, the press, the National Committee, and none others." Modified into a recommendation instead of an instruction, this resolution was adopted. Gen. Collins was also able to maintain his reputation for consistency by pointing to the fact that he offered a similar resolution twelve years ago. He said "the time was not then ripe" for such a step, but he thought the events of this year's Convention would make everybody ready for it. Certainly there could not well be anything more ridiculous than to ask 900 delegates to act as a "deliberative assembly" with 15,000 people about and above them making pandemonium, and attempting to control their action by insensate howling. No presiding officer can keep such a mob in order, nor can any speaker make himself heard in their presence. Moreover, the theory that advantage can come to a candidate by having a preponderance of shrieking adherents in the gallery has completely broken down. Lincoln's nomination in 1860 may have been aided by the great expression of local sympathy inside the Convention, but the enthusiasm of packed galleries has since been always discounted, and has no effect whatever except to distract and exasperate the delegates. The scenes this year at Chicago were worse than those at Minneapolis only because the opportunities for disorder and turbulence were greater. Both parties ought to see the absurdity and indecency of present methods, and devise measures to make their national conventions more like gatherings of rational beings.

Mr. Cleveland owed his easy victory on the first ballot to the support of those Northern States which the Democrats must carry in order to elect him. New Jersey, the one State in the North which has gone Democratic in every Presidential contest for twenty years, cast every one of her twenty votes for Cleveland. Michigan, which under the new district system is sure to choose several Democratic electors, was unanimous for him. Indiana and Connecticut, which are always close and doubtful, were both of them solid for him. Illinois and Wisconsin, two of the old Republican States in the West which even Republicans concede to be close this year, cast every one of their votes for Cleveland. The same was true of New Hampshire and Rhode Island, two corresponding States in the East, and four-fifths of the delegates from Massachusetts were for Cleveland. In other words, outside of New York, every State in the North which the Democrats have ever carried in a Presidential contest, or stand any chance of carrying now, was overwhelmingly in favor of the candidate who was chosen. This is exactly the way a candidate ought to be selected.

The delegation chosen by the Syracuse Convention accomplished the unprecedented result of securing its object without admission to the National Convention. That object was to demonstrate to the Democrats of the country that the snap convention did not represent the real sentiments of the Democracy of New York, and that its claim that Cleveland could not carry the State was baseless. How thoroughly the demonstration was made, and how effective it proved, is shown by the result of the first ballot. Whether the men who brought this about were actually admitted to seats in the Convention was a matter of no consequence; and if it gives pleasure to anybody to rejoice because they were not, they would be the last people in the world to object.

"Oh, they have the mass-meetings and the brass bands, but I am getting the delegates." Such was the remark of David B. Hill in Brooklyn on the 10th of February last, when he was "fixing things" for his snap convention. What he meant by it was that Cleveland had the people on his side, but that he (Hill) had the Machine, and the Machine would control the Convention. Mr. Hill has learned something as to the power of public sentiment and the weakness of the Machine since last February. When the ballot was taken, he received in the whole United States, outside of New York, the votes of only forty delegates, while even Boies of Iowa secured seventy-seven outside his own delegation. The history of our politics does not present a more impressive spectacle of a demagogue's downfall. Even his sole claim to distinction, that "I am a Democrat," is now gone, for, after he had learned the will of his party, he persisted in an utterly undemocratic attempt to thwart it. Now that he is at last fully exposed, he is seen to be so weak and contemptible that the thought of connecting him with the Presidency seems an insult to common sense.

The Democratic candidate for Vice-President in the campaign of 1892 is not so well known to the country at large as the gentlemen who were associated with Mr. Cleveland in 1888 and 1884, but nobody could ask a better character than is given Mr. Stevenson by his Republican neighbors of Bloomington, Ill. His political strength among those who know him best has been twice demonstrated by his election to Congress from a district which is normally Republican; and it was a pleasant feature of the reception given him on his return from Chicago last Friday, that Gen. McNulta, the Republican whom he defeated in these two contests, headed the parade and delivered the speech of welcome. The local Republican newspapers were quite as complimentary and hearty. Says one of them: "Mr. Stevenson is a gentleman of unimpeachable character, and his political friends will have no reason to apologize for him in that particular, and of him they may tell the truth, without shame to themselves or scandal to their party." It would be unfair not to recognize the service rendered by Tammany in the Convention in preventing the nomination of Gray and securing that of Stevenson. Whatever the motive, the effect was a distinct gain for the Democratic ticket.

There will be 444 votes in the Electoral College this year, so that the successful candidate must secure at least 223. The "solid South" casts 159, and, despite the talk about two or three of these States being doubtful, nobody whose judgment is worth anything doubts that the Force Bill issue will carry every one for the Democratic candidate. New Jersey's 10 may be counted with equal confidence on the same side. The Detroit *Tribune*, the leading Republican organ of Michigan, admits that the Democrats will get at least four votes from that State. This makes 173 which may be called "sure." Connecticut and Indiana would add 6 and 15 respectively, making 194, and New York's 36 would carry the total up to 230, or seven more than a majority. The Republicans are relatively better off than before by reason of the admission of the new States and the changes in older States caused by the reapportionment, but the combination of 1876 and 1884 would carry the day again in 1892. There are chances for Cleveland this year in other States which no Democratic candidate has had in previous years, and it is possible that he might lose New York and still carry the country; but in all probability New York will again be, as so often before, "the pivotal State."

In the course of his eulogy on the McKinley Bill, in his reply to the notification of his renomination, President Harrison spoke of the increased exports to nations concerned in the reciprocity treaties. Of this very increase it is instructive to notice that the Acting Secretary of State, in a

report submitted to the Senate on the day of the President's speech, observes that "it is scarcely just to measure, as it is useless to conjecture, the results that have, or may, come from the advantages afforded by the reciprocity negotiations." These are at least the words of a practical student; but President Harrison hampers himself by no such qualifications. A brief study of the facts would have taught the President that the increase in our export trade with these reciprocity nations was almost exactly 3 per cent. of the increase in the year's total exports. In other words, the nations with which we have no reciprocity treaties have increased their imports from the United States in almost exactly the same measure as the nations now revelling in such treaties. The fact is, however, that the President was talking of meat and breadstuff exports. His assertion, therefore, amounts to this: that our huge exports of produce this season, and the higher prices paid to the farmers, are the direct results of the late protectionist legislation. Well-meaning but hasty reasoners have been ascribing the strangely distributed harvest of 1891, to which our enormous exports were due, to the vagaries of nature or the dispensation of Providence. Mr. Harrison brushes aside such notions in a single sentence. The great American harvest of 1891 and the great grain export were, in his view, due to one factor only—the McKinley Bill. When it is added that the "numerous reciprocal trade agreements" under the McKinley Bill, to whose auspicious agency Mr. Harrison traces so many blessings, went into effect, for the most part, some six months after the harvest of 1891 was gathered, astonishment grows into something like adoration.

There seems to be a peculiar fate attaching to President Harrison's messages relating to international disputes. They immediately excite a controversy over the question whether a satisfactory answer from the foreign country was not actually in Washington at the time the message was sent in. In the Chilian intrigue, if the apology from Chili was not in the President's hands when he sent his warlike message to Congress, it was only because the telegraph could not work fast enough to get it there. And now, immediately after his message calling for retaliation on Canada, the report comes from Ottawa that a reply from the Canadian Government was in Washington at the time. This is indignantly denied at the White House: the Canadian communication was not received, it is virtuously said, until some hours after the message was sent to the Senate. It must be admitted that the "just in time" character of the message is thereby fully vindicated. But it must occur to the President that it would have been better if he had waited for the promised communication, especially in view of the fact that his call for retaliation was at once pronounced to be silly by the chief organ of his party, edited by his associate on the Republican ticket.

The letter of the counsel of the Produce Exchange to that body on a phase of the Anti-Option Bill now before the Senate Judiciary Committee, ought to enlist against that measure the sympathy and active work of the large and important grocery and provision trades, wholesale and retail. Almost all grocers sell lard, pork, bacon, and other edible products of swine. Every day, wholesalers sell to retail grocers and provision dealers, and these to customers, hog products which they have not in their possession. In fact, it is the common custom in all trades to contract to deliver small quantities of goods which the sellers do not own at time of sale. In every such case of future sales of grain or hog products the traders would be brought under the Anti-Option Bill if it became a law. If a grocer at the time of such "future" sale had a contract with bona-fide owners of lard or pork to supply him with the quantities needed for his trade, such a grocer would have to procure an expensive license for so doing, and would be compelled to keep a record of his transactions which must be open to the inspection of the Collector of Internal Revenue. If, on the other hand, a grocer should sell lard or pork which he at the time of sale did not own or had not contracted for with some bona-fide owner, then the penalties of the Hatch Bill would apply, and they are so heavy as to mean ruin to the ordinary dealer, including fine and imprisonment. The effect would be the same if the salesmen of any wholesale house should happen to sell hog products to retail dealers when their firm at the time did not have the goods on hand. With such absurd and ruinous provisions, it may be expected that the grocery and provision trade, jobbers and retailers, will make their influence felt against the proposed legislation.

We recently animadverted on a decision of the Board of General Appraisers assessing duties upon old books that had been newly rebound, on the ground that a construction of paragraph 512 of the free list, as amended by the McKinley Act, rendered old books, bound or rebound within twenty years, liable to duty. We are glad to note that in a suit brought to recover duty paid under this ruling, the Circuit Court of the United States for the District of Massachusetts decided, on June 2, in favor of the plaintiff. The paragraph in question reads: "Books, engravings, photographs, bound or unbound etchings, maps, and charts, which shall have been printed *and bound* or manufactured more than twenty years at the date of importation." Judge Putnam, who rendered the decision of the court, seems to hold the opinion we previously expressed, that the inserted italicized words were intended to remove the doubt cast upon the Treasury Department rulings which held that unbound books were not entitled to free entry, by the opinion of the Attorney-General to the contrary. He says:

> "It is my belief that the change in the phraseology which appears in the Act of October 1, 1890, paragraph 512, so far as it reaches the present case, should be construed as intended to remove this doubt, and to make certain that the general policy concerning this subject-matter was not extended as the opinion of the Attorney-General permitted." "This was," he continues, "perhaps, sought to be accomplished by striking out the comma after 'unbound'—for whatever such striking out might be worth—so as, perhaps, to make that word limit what followed it, and not what preceded. It was reached effectually and certainly by inserting 'bound or' after the words 'printed and.' The present paragraph 512 is therefore to be construed distributively, the words 'printed and bound' referring to whatever should be bound to complete it as an article of merchandise, and 'printed' and 'manufactured' to everything else. I discover no evidence of any other change of legislative purpose so far as relates to printed books."

Judge Putnam holds that in the case of books which have been bound more than twenty years before importation, "as books of like character are usually bound before being offered for sale," such books are entitled to free entry as complying with the precise terms of the present statute; and as to books rebound he adds: "I would regard them as entitled to free entry, even though it also appeared that, in consequence of accident or ordinary use, they had needed and received repairs in all respects equal in extent to new and original binding." It is understood that the Treasury Department has already notified Custom-house officials that they are to be governed by this decision; so it is to be presumed that there will be no further assessment of duty on old books on the score of new binding. But how the decision is to apply in the case, for example, of books printed more than twenty years and kept in the original sheets until shortly before importation, and then newly bound, it is difficult to see; and on whom is the burden of proof as to the facts in the case, the importer or the United States?

Protection, like negro slavery, is a principle which cannot be allowed to stand still. Once conceded to be right in itself, the one movement, as was the case with the other, is morally bound to be advanced into new fields and carried to its remotest logical extremes. The manufacturers of Australia have discovered another possible step in the logical series. Bitter complaint has lately arisen among the Melbourne manufacturers of flour, tallow, leather, and preserved meats, that the "raw material" of their industry is exported to foreign countries, there to be turned into the finished commodity. The manufacturers protest that if the

farmers and cattlemen were compelled to bring their product to local manufacturers instead of sending them to foreigners, local business would be enlarged and thousands of Australians be employed in making the flour and tallow and leather which are now turned out by the pauper labor of England. On this ground, they have begun by demanding, at a public mass-meeting, that the Victorian Government levy an export duty of one penny a pound on raw sheepskins. The demand of the tanners will naturally be echoed, as applied to their own commodities, by the millers and the grocers; and inasmuch as Victoria is not, like the United States, hampered by a constitutional prohibition of export duties, it is hard to see how a protectionist Legislature can consistently refuse the demand. Indeed, the arguments in favor of the export tariff sound like an extract from a McKinley debate. Not one protectionist catchword is missing, from the "pauper labor of Europe" to "Australian markets for Australian workmen." This is only a fresh illustration of the fact that protectionist fallacies are best exposed by pushing the principle to its logical extreme.

The election address which Mr. Gladstone has issued puts home rule for Ireland in the foremost place. This could hardly be avoided, but in England, as in this country, the matter has lost some of its interest. No question can occupy the attention of the public for a very long time without becoming tiresome, and the Irish question has for a number of years given rise to a prodigious amount of discussion. But, whether the English people are tired of it or not, it is really the only question upon which the parties can divide. There are many subjects upon which action would probably be taken by the Liberals which the Conservatives would condemn, and vice versa, but these subjects are for the most part of no national importance, and could hardly bring about a change of government. Mr. Gladstone criticises the English Local-Government Bill and the bill intended to encourage the growth of a class of peasant proprietors, known as the Agricultural Holdings Bill; but even in regard to these measures the differences between the parties relate to matters of detail. Upon the proposed law making eight hours the universal day of labor Mr. Gladstone is rather non-committal, but reminds the working-classes that their true strength, after all, is closely connected with personal liberty. He speaks favorably of the payment of members of Parliament who represent these classes, and if this means their payment by the Government, it is very significant of democratic progress. But the report leaves it uncertain whether Mr. Gladstone did more than approve the practice already established, in accordance with which the miners have raised a salary for their member by voluntary contribution.

The general reduction of the rate of interest has been taken advantage of by the British Government in making a new contract with the Bank of England. By the terms of this contract the Government will save about £45,700 a year, a reduction which some of the Bank directors complain of as extortionate, and which in fact amounts to ⅜ of 1 per cent. on the Bank's capital. But this complaint, while natural, is not well grounded, for there is no reason why the Bank should not accept 2¾ per cent. instead of 3 per cent. on the Government debt of £11,000,000, since all the other creditors of the State have accepted a like reduction, and this difference in interest accounts for more than half the saving. After 1903 it is further provided that the rate shall be only 2½ per cent., but if this is not satisfactory to the Bank, the Government may continue the loan at 2¾ per cent. or pay the debt, at its option. The rest of the reduction is in the allowances to the Bank for various financial services, which allowances are deemed still sufficiently liberal by the *Economist*. It must not be forgotten that the Bank derives an annual profit of something like £100,000 from the privilege of issuing its notes against the debt of the Government, and that it has no legal claim to the perpetuation of this privilege beyond the periods from time to time agreed upon.

The interview with Prince Bismarck published by the *Neue Freie Presse* of Vienna is accepted as authentic by the German newspapers, whose comments on it are naturally severe. There has seldom been so much washing of domestic linen before the public eye. Not only does the ex-Chancellor in this interview disparage his successor, but he affirms that Germany has incurred the ill-will of Russia by his (Bismarck's) removal from office. It follows from this that nobody but Bismarck could insure the peace of Europe—a conclusion from which the Prince does not shrink. The peace of Europe may be preserved without him by a run of luck, but there can be nothing like a guarantee of it. "They reckon ill who leave me out," is the burden of his song. The *Tageblatt* of Leipzig is right in saying that Bismarck when in office hunted men to their ruin for saying far less than he has said in this interview. The Freisinnige journals, on the other hand, say that if it be true that the Czar is less friendly to Germany than he was during the Bismarck régime, Germany is now more united and self-reliant, and therefore better able to meet her enemies. The interview will certainly make the barrier between Bismarck and the Emperor impassable, and will reconcile most of the Prince's former supporters to his retirement from political life; for such a publication cannot be counted patriotic. It may be all true, but it is certainly disturbing. Indeed, it is hard to imagine a more disquieting communication coming from a person not charged with the responsibilities of office.

The three per cent. bonds of the French Republic, commonly known as *rentes*, have risen to par, and the French papers are naturally expressing much pleasure at this evidence of the credit of the Government. It was in 1824 that the three per cent. *rente* was introduced, when it sold for 75, and soon after fell to 60, but rose in 1829 to 80. The revolution of 1830 sent it down again to 60, but the conservative Government of Louis Philippe caused it to appreciate steadily until about 1846, when it sold at 84. The revolution of 1848 drove the price down to 50, but it struggled up to 56, and the establishment of the Empire caused a bound upward to 75 in 1852 and 79 in 1853. Yet after this the Empire seems to have lacked credit, for the *rente* ranged between 60 and 70 for a number of years. Just before the war with Prussia, when there was for a short time a belief that peace was assured, the price of 75 was attained, but the disaster of 1870 reduced it to 52 in October of that year. From that time on, the appreciation has been upon the whole steady, but the enormous expenditure of the Government evidently caused alarm, for from 85 in 1881 it fell to 78 in 1884. It thus appears that it has risen 20 francs in less than eight years, and during the last three years alone the rise has been 15 per cent. These fluctuations constitute a miniature history of the course of political events in France, but the extraordinary rise during the last few years, we apprehend, is due mainly to causes that have affected the rate of interest the world over, although due in part to certain financial measures adopted by the French Government.

There is a brilliant opening for a quorum-counter in the Brazilian Congress which it would be well worth the while of ex-Speaker Reed, in his present condition of political disinterestedness, to consider. The Congress should have met on May 3, but took things easy and did not attempt a session before the 12th. Even then no quorum was present. That state of things continued for five successive days. Finally, on the 18th, the legal number was got together and organization was partially effected, but the quorum imme diately disappeared, and it was not until nearly a month after the date fixed by law that Congress was ready for business. Various feeble excuses were presented, such as the fact that the President had exiled and imprisoned so many Congressmen that it was difficult to get a quorum, but we are sure that a good energetic Czar for Speaker would have figured out a "potential" quorum even under such discouraging circumstances.

MR. CLEVELAND'S CANDIDACY.

THE nomination of Mr. Cleveland is the most encouraging political event which has occurred in this country since the war. In many respects it resembles the second nomination of Lincoln, for, like that, it has been compelled by the people in spite of the combined opposition of the professional politicians. Every patriotic American, no matter what his political affiliations may be, has reason to rejoice over it, for it is at once a triumph for our methods of selecting Presidential candidates, and an immediate and, we trust, permanent uplifting of the level of our political discussion. It gives assurance that the campaign before us will be one of the most creditable ever conducted in this country. The nomination of no other Democratic candidate could have brought this about, for, without disparaging any of those who were mentioned in opposition to Mr. Cleveland, it is to be said that his personal character stands for more, in the estimation of the people, than that of any other American of his time.

Mr. Cleveland is, in fact, the candidate of the people, as Lincoln was, and as Washington and Jackson had been before him. He has done nothing to secure the nomination, but many things which seemed certain in the eyes of time-servers and trimmers to deprive him of all chance of obtaining it. He has been a private citizen for four years, going into private life after a defeat which he had brought upon himself and his party by his own deliberate act. In his retirement he made a public deliverance on a burning question of the day in which he placed himself squarely in opposition to what was generally believed to be an overwhelming majority of his party. Yet because he was honest and courageous, both in the step which cost him a reëlection and in the subsequent public utterance, he has accomplished the seemingly miraculous feat of converting his party, in practically solid mass, to his way of thinking. He is to-day not merely its nominee, but its platform. He has brought it to his position both on the tariff and on silver, and in doing this has performed a service of inestimable value to the country.

Especially is this true of the silver question. When he wrote his letter to the Cooper Institute meeting in February, 1891, it was known that the huge Democratic majority in the new Congress was overwhelmingly in favor of free and unlimited silver coinage, and there seemed to be no possibility of defeating the passage of a free-coinage bill when that Congress should assemble in the following December. Mr. Cleveland, by putting himself in direct and open opposition to this majority, was supposed by many observers to have ended his political career. It is now plain that he saved the country from the most baleful financial blunder which has ever threatened it, and saved his party also from the consequences of such a blunder. He stopped the passage of the Free-Coinage Bill in Congress, and has now stopped his party from the further consideration of such a bill by bringing it squarely upon a platform which, in plain and unmistakable language, binds it against free and unlimited silver coinage. These are the services and achievements which make all honest men of both parties speak with respect of Mr. Cleveland's character, and which make his candidacy an honor to his party and to American politics. They will constitute his chief strength in the approaching campaign.

There could be no stronger evidence of the public value of his nomination than is found in the tributes which his political opponents pay to it. "We do not," says the Philadelphia *Press*, "underestimate Mr. Cleveland's strength. We are not unmindful that he has won a large measure of confidence in his personal rectitude and purposes. He is a worthy adversary, and insures a battle of principles and not of personalities." "Republicans do not underrate Mr. Cleveland," says the Republican candidate for the Vice-Presidency. "No Republican will disparage either his strength, his sincerity, or his character. His nomination will make it sure that we shall have a clean canvass of discussion and not of vituperation. I do not believe that Mr. Cleveland is as strong as he was in '84, nor even as strong as in '88. Yet I think he enjoys more of the respect of his opponents than he ever did before. And the devotion of his followers is such that they will surely give us a very hard fight." To these high testimonies from representative Republican authorities in the East are to be added equally flattering ones from similar authorities in the West. The Chicago *Inter-Ocean* says: "There is a universal respect for Mr. Cleveland as a man having convictions that he will not sacrifice for his personal aggrandizement. We believe that a large majority of the voters of the United States consider the economic opinions of Mr. Cleveland to be ill-grounded, but we feel sure that a majority of the people feel more kindly towards a man who honestly believes in that which is untrue, than a man who would conceal his own belief and suppress that of his party for the purpose of deceiving the voters." Surely the nomination of such a candidate, against the power of the political machines of his party and without the aid of a particle of patronage of any kind, is an achievement which should inspire new faith in the capacity of the people of this country for popular government. No demagogue ever had a support capable of accomplishing a result like this, which has been won by simple adherence to common honesty and implicit trust in the "brave old wisdom of sincerity."

Whatever the result of the election, the action of both National Conventions combines to assure us a campaign of rational discussion, in which an intelligent citizen can join without loss of either temper or self-respect. Both political parties have succeeded in showing that they are stronger than their self-elected bosses, and are not afraid to go forward in defiance of the latter's wishes. It will not be wise for either party to calculate upon much help for its candidate from the treachery of these baffled and defeated political gamblers in the other. This is to be an election in which "treachery" and "knifing" will play no decisive parts. Both parties are threatened about equally, and the harm which one suffers is likely to be counterbalanced pretty evenly by that of the other. When the time to vote comes, we shall take the ballot for the first time in our history in absolute secrecy, and more free from corrupting and contaminating influences than ever before. All this is as encouraging as it is gratifying to every American who loves his country and has her welfare at heart.

THE DEMOCRATIC PLATFORM.

THE two planks in the platform adopted by the Democratic Convention last week which will above all others fix the attention of the country are those on the tariff and on silver. The corresponding parts of the Republican platform were regarded with equal propriety as the vital articles of the Republican profession of political faith. About them will rage the battle in the next four months. The other planks are of minor or local importance. Our first comments will therefore be upon the remarkable utterances of the Democratic party on the questions of tariff taxation and the currency.

The tariff plank may justly be called remarkable both on account of its tenor and the manner of its adoption. It squarely toes the mark on the great issue that now divides parties in this country. Without any circumlocutions or ambiguities, it declares protective legislation to be class legislation, the "robbery of the great majority of the American people for the benefit of the few." All the vain qualifications about "incidental protection" and "wise adjustments" are for ever abandoned, and the flat-footed demand is made that tariff taxes "shall be limited to the necessities of the Government when honestly and economically administered." Moreover, this "fundamental principle of the Democratic party" is wisely based upon the denial of any constitutional power in the Federal Government to levy protective taxes. This is simply appealing to the underlying idea of all free government—equality before the law. Whatever a partisan Supreme Court may have decided or may yet decide on this question, it will remain an ineradicable conviction of the mass of the people that to interpret into the Constitution the right of one class to enrich itself at the expense of another, is possible only through legal jugglery, and is in defiance of the principles of

equality and even-handed justice on which our Government was founded.

These clear and fearless declarations on the tariff show that the Democratic party has at last found its voice. They involve a more direct and profound comprehension of the inherent injustice of protection than has ever found expression in any party platform in this country. The Democratic party of the forties boldly opposed Whig protectionism, it is true, but Whig protectionism was free trade itself beside the monstrosities that have since fastened themselves on our laws in the name of protection. The Democratic platform of 1876 declared for a tariff for revenue only, but that was only a minor incident of the campaign at the time, as the tariff was not then an issue. Republican State conventions of the period adopted the same plank without debate. But within the last few years the issue has been coming to the front as the arrogant demands of tariff beneficiaries and the wrongs inflicted upon the people under the guise of protection have become more evident. The Democratic party has been headed right for the past three Presidential campaigns, and has declared its position in steadily clearer and more courageous tones. This year it comes out into the open, gives over futile dallying with protection, which it has at last found out to be wholly and altogether "a fraud," and forces the fighting on the entire dishonest system.

It is remarkable that this outspoken plank was put into the platform by the body of the delegates against the wishes of the majority of the Committee on Resolutions. The plank originally reported by that Committee was well enough in its main positions, feebly expressed though they were in comparison with the form of words finally chosen, but was guilty of the incredible stupidity of dragging after it an explanatory appendix in which the old protection devil could easily shelter himself. This was entirely to mistake the temper of the Convention. The timidity of other years clung to the Committee, but the mass of the delegates flung it off completely. They had just been cheering Chairman Wilson's hot denunciations of "law-made wealth," and were in no mood to listen to shuffling words about "industries that have come to rely upon legislation." With a better sense of the righteousness of their cause than many of their leaders, and with a better, because more instinctive, appreciation of the course to which the party is led by political wisdom as well as political honor, they insisted upon for ever renouncing the protection devil and all his works.

The silver plank is of great importance, though it will probably play but a small part in the canvass. It might easily have been of chief importance. If the Democratic party had run violently down a steep place into the sea of free silver, into which it seemed bent on plunging six or even three months ago, nothing that it could have said about the tariff could have saved it. But it has wrought out for itself a great deliverance, and made a currency plank which will leave wholly on its side whatever advantage is to be gained from discussing the silver issue in the campaign. For there can be no question among honest men that the Democratic plank on silver is infinitely better than the Republican. The latter is admitted by the *Tribune* to be capable of meaning free coinage of silver; and Senator Teller says it does mean that, and accepts it as satisfactory for that reason. No one can say the same of the Democratic position, which is that "the dollar unit of coinage of both metals must be of equal *intrinsic* and exchangeable value." Those Republican organs in the East which have been dismayed at the "straddle" of their own party on the silver question, and have been comforting themselves with the thought that the Democrats would be guilty of a worse one, will see that word *intrinsic*, and at once conclude that free coinage is not an issue.

We think ourselves that it will be but a minor issue; but whatever fighting there is on it, and whatever votes on it are gained in doubtful States, will prove to be to the advantage of the Democrats. They have surpassed the most sanguine expectations on this point, and will strengthen the faith of thinking men in the safety of the republic by the new proof they have given of the power of argument and education to break down and destroy a threatening popular delusion.

IS PROTECTION GAINING GROUND?

THE platform adopted by the Republican party reaffirms the "American doctrine of Protection," and calls attention to its growth abroad. It is hardly necessary to say that neither in the theories of protection expounded in this country, nor in the attempted application of these theories in tariffs, is there anything distinctively American. There is not an argument advanced in support of these theories that has not been urged almost from the beginning of time, or that will not, we fear, be heard till the crack of doom. The fear of foreign contamination constitutes a large part of early religion, the jealousy of strangers is the distinguishing feature of early politics, and the prevention of competition has been the end and aim of most commercial regulation and legislation from the dawn of history to the present day. The Phœnicians, the first people to engage extensively in manufacturing and commerce of which history has given us much record, were noted for the savage spirit with which they attacked those who interfered with their monopoly, and Pericles called the attention of the Athenians to the fact that they were the only people who allowed foreigners free access to their markets. Even in England protective duties existed down to 1860, and the policy of free trade has never been acceptable to a considerable portion of her people.

But, disregarding the "question-begging epithet" American, let us inquire whether in fact protection is growing abroad. As to England, attempts have been made and will continue to be made in this country to represent Lord Salisbury's speech as signifying a change in public sentiment if not in commercial policy. But as the comment of the English press reaches us we are struck with the unanimity with which the doctrine of the speech is condemned. It finds approval only among inveterate protectionists, and is condemned even by most of these as injudicious and inopportune. Moreover, it has directed attention to the history of the free-trade movement, with the result not only of showing the vast gain which it has brought to England, but also of exhibiting Lord Salisbury's blunders and misrepresentations of history with such clearness as to make his position extremely humiliating. It will not be foreign to the purpose to review some of the evidence upon this subject.

"Forty or fifty years ago," says Lord Salisbury, "everybody believed that free trade had conquered the world, and they prophesied that every nation would follow the example of England, and give itself up to absolute free trade." But England does not now enjoy absolute free trade, and certainly did not enjoy anything of the kind in 1842. Even in 1852 many protective duties were in force. The example of England at that time, therefore, was merely of a tendency away from protection, and, moreover, this example was generally followed. Furthermore, nobody believed at the period referred to that free trade had conquered the world, owing, perhaps, to the fact that nowhere in the world did it prevail. As to prophecies, it may be granted that Mr. Cobden indulged in some that were highly optimistic, but what is hoped for by an enthusiastic reformer is not accurately described as the prophecy of everybody. The Anti-Corn-Law League in England was made up of members of the middle class and the more intelligent workmen, and it would be more nearly correct to say that forty or fifty years ago "everybody," of social consequence at least, detested its motives and disbelieved its prophecies.

Upon this point it will be instructive to make some quotations, which we take from an admirable work just published by Cassell & Co., entitled 'Industrial Freedom,' by B. R. Wise, formerly Attorney-General of New South Wales. In 1887 Mr. John Bright wrote to Mr. Wise:

> "I never held the opinion that the reform of the tariff would be at once followed by a like change of policy in other countries. If Mr. Cobden expressed such an opinion, of which I have no recollection, I can only say that he had more faith in the common sense of other nations than I had. . . . Further, I would assert without fear of error that our adherence to our free-trade policy is the more necessary and advantageous to us, seeing that other countries have not yet followed our example. Surely, if other nations injure us by their high duties, it would be no compensation to us to put difficulties in the way of our buying what we want. It would be better if we were free to buy and to sell, but

to make it difficult to buy by high duties in our tariff, because foreign tariff makes it difficult to sell, seems to me an idea that can only be entertained by men who are totally unable to reason."

In 1846 Sir R. Peel said in the House of Commons, in a speech on the Corn Laws:

"I fairly avow to you that, in making this great reduction upon the import of articles—the produce and manufacture of foreign countries—I have no guarantee to give you that other countries will immediately follow our example. I give you that advantage in the argument. Wearied with our long and unavailing efforts to enter into satisfactory commercial treaties with other nations, we have resolved at length to consult our own interests, and not to punish those other countries for the wrong they do us in continuing their high duties upon the importation of our products and manufactures by continuing high duties ourselves. . . . You may, therefore, say in opposition to the present plan, What is this superfluous liberality, that you are going to do away with all these duties, and yet you expect nothing in return? I may, perhaps, be told that many foreign countries, since the former relaxation of duties on our part—foreign countries which have benefited by our relaxation—have not followed our example; nay, have not only not followed our example, but have actually applied to the importation of British goods higher rates of duties than formerly. I quite admit it. I give you all the benefit of that argument. . . . But what has been the result upon the amount of your exports? You have defied the regulations of those countries. Your export trade has enormously increased."

In 1849, Mr. Disraeli having laid down the same dogma that Lord Salisbury has just announced, "that you cannot fight hostile tariffs with free imports," Peel replied: "I so totally dissent from that assumption that I maintain that the best way to compete with hostile tariffs is to encourage free imports." It would be easy to multiply these quotations, but we have said enough to show that the protectionist arguments of to-day are the same as of old, that the agitation of "reciprocity" is but the stirring up of a theory deliberately abandoned when free trade was introduced, and that protection has gained ground in England only in the sense that ignorance is constantly gaining ground from education, which is won back again as knowledge is increased. As to commercial legislation on the Continent, we can only say on this occasion that the present tendency is decidedly towards freer trade.

ITALY AND THE TRIPLE ALLIANCE.

THE impression has generally prevailed that the great increase of taxation in Italy has been caused by the enormous armament required by the conditions of the Triple Alliance. This impression is declared to be incorrect by Sig. Crispi, who contributes an article upon the subject to the July number of the *North American Review*. He points out that it was but a generation ago that nearly the whole of Italy was under the rule of despotisms of the most reactionary character. The material progress which distinguishes this century had under these governments scarcely begun, while it is notorious that the expenditure of money for the education of the common people would have been regarded by most of them as an act of suicidal madness. Such railroads as were constructed were principally for strategic purposes, the highways were neglected, telegraphs had scarcely been introduced, and free communication and progress in general were discouraged as having a dangerous tendency to lead to free thought and free speech.

When the new kingdom was created, therefore, it was far behind in the industrial race. What other countries had begun in 1830 it had to begin in 1860, and the expenditure of two generations has been crowded into the lifetime of one. Thus in 1861 Italy had but 2,561 kilometres of railroad, while she has now 15,600, but at an increased expense of 4,300 millions francs. In like manner what we should call the "River and Harbor Bill" demands three times what was wanted in 1862, and has consumed extraordinary appropriations amounting to 678 millions of francs during the last decade. Public education, too, has had to be dealt with from the foundation up, and in many ways the backward condition of the country has had to be remedied at great expense.

Signor Crispi, however, makes very little of this argument. In point of fact, it would be to a considerable extent irrelevant to the question of the financial policy of the Government, because private enterprise would have furnished the railroads at far less cost than the State. English capital rejoices to pour itself forth in waste places, and the money that has with some trepidation been risked in South America, would have been spent most gladly in furnishing Italy with a complete network of railways. Abandoning this argument, therefore, Signor Crispi endeavors to show that the political situation, not the Triple Alliance, compelled Italy to spend enormous sums for military purposes, and that it is this expenditure which has embarrassed her finances.

This situation, according to Sig. Crispi, required arming with a view to resisting attack from France and Austria. These Powers, he says, have more than once sought to dominate Italy. But he fails to answer the question, Will they do so hereafter? The answer to this question shows the folly of the Italian policy. England is exposed to attack all over the world, and a powerful armament is a necessity for her if she is to maintain her position. Austria is obliged to be in readiness for a Russian attack, and Germany for an attack from both Russia and France. But Italy is protected not only by nature, but by the public sentiment of the world. Her territory is defined by the language of its inhabitants and by the mountains and the seas that enclose it. No Power desires to annex any of her provinces, and none has any wish to attack her. She is as secure without a soldier as with an enormous army. Perhaps she is more secure, for, as the recent experience of the United States has shown, people who come into possession of military appliances are anxious to put them to the test of practice. It is true that a certain rancor toward Italy has prevailed in France because Italy did not hasten to her assistance in 1870, but this rancor is not enough to make the French commit the folly of trying to dismember Italy; and unless they attempt that, there is no reason why Italy should keep in arms. Most of this rancor, indeed, is due to Italy's militant attitude and to its entering the Triple Alliance.

While it may be true, as Sig. Crispi says, that "it occurs to no one in old and turbulent Europe that the nation should disarm," it does not follow that "liberty is not secure and the independence of the country is always in danger unless its citizens be armed." "Turbulent Europe" has been peaceful enough for almost a quarter of a century, and when the next war comes, it will be one in which Italy need take no part, so far as her own defence is concerned. Signor Crispi mentions the fact that in 1873 it was ascertained that the navy upon which so much had been spent was worthless, and that the vessels might as well be destroyed. He shows that Italy can mobilize only 1,200,000 men, one-fifth of the number that the three Powers on the frontier can bring against her, while the two seas that wash her shores can be adequately defended only by two fleets. It is evident, therefore, that Italy could not resist a combined attack, while no Power would threaten her territorial integrity by itself. The example of Belgium shows what the public sentiment of Europe can effect in the way of preserving boundaries, and that of Spain shows the effectiveness of unity of language as well as of mountain ranges. Italy is protected by all three. An army and a navy she will of course maintain; but she does not need to overtax herself for this purpose.

The details of the financial situation in Italy are given very imperfectly by Signor Crispi, and his discussion of the taxation of the country is almost unintelligible. It would not be profitable to comment upon what he has to say upon these subjects, but one declaration of his is important if it is correct, viz., that the Triple Alliance imposes no obligation to maintain special armaments. The treaty, he says, is purely defensive, and each nation is to judge for itself as to the size of the force which it will be judicious to maintain. The conclusion is, therefore, unavoidable that the condition of the Italian finances is not due to any international obligations or pressure from other countries, but that the responsibility for it rests entirely with those who have directed the Government of Italy.

STATE OF PARTIES IN FRANCE.

PARIS, June 11, 1892.

SINCE the return of Parliament to work after the Easter recess, the debates have been somewhat dull. Contrary to general expectation, a question addressed to the Government

in reference to the Anarchist arrests fell flat on the attention of the House, and the vote that followed was a foregone victory for the Cabinet. Somehow or other the fighting humor with which both Chambers were inspired before the vacation seems to have melted away while the Deputies were enjoying their holiday; and at present the deliberations, of general or special utility though they be, are certainly without great interest, considered from a political point of view.

Such being the case, it will be wiser to take a look at the relations existing between the various political parties and the country at large. Here is something that merits attention. The tendency which has been now for some time at work in French politics is becoming accentuated every week. The parties of yesterday are non-existent to-day; those of to-day are likely to disappear to-morrow. Such is the order of things at present, and, amid the complicated and seemingly contradictory changes, it would appear that a vital transformation is slowly taking place, and one fraught with vast consequences to the future of the country. All this is for the moment obscure and difficult to analyze. Sufficient, however, can be seen or guessed to furnish at least a partial account of the present situation.

When the Republic was proclaimed in France, the Opposition was composed of a certain number of monarchical parties, classing themselves under three names: Legitimists, or partisans of the Comte de Chambord; Orleanists, who claimed the crown for the Comte de Paris; Bonapartists, who remained faithful to the Empire, and placed their hope in the son of Napoleon III. These anti-republican parties, enrolling themselves under one conservative banner, were numerically stronger than their opponents, and therefore able to hold the Republic in check. But when once it came to forming a definite policy of their own, the differences of opinion between Imperialist and Royalist, and between Royalist and Royalist, made any attempt to resuscitate monarchical institutions vain. The Republic naturally profited by this disunion, and established itself in 1876 by reason of the inability of any other form of government to exist in its place.

By degrees the Republic gained the heart of the country. At succeeding elections the number of Republican votes increased in a steady proportion. For this state of things there was a twofold cause. On the one hand, as has been commonly remarked, the French, with the exception of certain great centres of activity, are conservative of what already exists, dread nothing more than political upheavals, and are consequently disposed to uphold the Government in power, provided only it maintains tranquillity. On the other hand, the rivalries already referred to, which at first redounded to the Republic's advantage, instead of showing signs of diminishing bitterness, increased and multiplied as time went on. Thus, for instance, the death of the Prince Imperial was followed by a quarrel between Prince Jerome Napoleon, the then heir of the Bonapartist claim, and his son Victor, who is now the representative of the dynasty. From that date the Imperialist party was split in two and gradually grew weaker. On the Royalist side the two rival sections were nominally united by the death of one of the claimants, the Comte de Chambord. As luck would have it, however, the Comte de Paris, the surviving claimant, failed to show any of the qualities necessary in a party chief, and above all in one who sought a throne. His action and attitude, on not a few occasions, were characterized by a deplorable lack of political tact and judgment, and the result was to discourage a large number of his supporters.

The conservative party have endeavored now for some years to organize their forces and to consolidate their cause. The means adopted has been the identification of the interests of religion with those of the monarchy. The weapon used against the Government has been the reiterated accusation that its republicanism is the cause of the oppresssion of the Church. And in fine every act of the Republican party has been used as a censure, not of particular men or cabinets, but of the institution which they represent. Fixing in particular on certain laws—such, for instance, as the Public Elementary Education Act and the Military Service Obligation Act—the Conservatives laid it down as a principle that every good Catholic ought to do his utmost to bring about a change in laws which secularized the schools, and compelled candidates for the priesthood to gird on the sword. When it is remembered that France is mainly Catholic, and that the clergy possess immense influence in very many parts of the country, the cleverness of the tactics adopted will appear evident. In taking up the cudgels for the Church, the Conservatives obtained a very considerable share of clerical support, and by that means became possessed of a formidable weapon to be used against the Republic. This weapon has just been taken from them. The blow came from a quarter from which it was apparently least to be expected. It was the Pope who suddenly deprived the Conservatives of their rising power and activity, by officially announcing that the opposition the Catholics were manifesting against the Republic could not be sanctioned by him. He added that the republican form of government was as acceptable to the Church as any other form, and that the first duty of a Christian was to submit absolutely and loyally to the government which was established.

Beaten on the political ground, and seeing the religious ground thus summarily closed against them, the Conservatives are discovering that their dream of overturning the Republic is a vain one. There are still a certain number who do not care to avow the truth. Such, for instance, are the students who voted the other day a resolution of unalterable attachment to the Comte de Paris. Such, too, naturally, is Prince Victor Napoleon, who, in a sort of got-up interview, tried a short time ago to show that France must, in spite of herself, come back to the Empire. On the other hand, a section of the Catholics is endeavoring, by means of subtle distinctions, to prove that obedience to the Pope in the absolute is not incompatible with disobedience in the particular—*i. e.*, the present case. Amid this strife of tongues, one thing is especially visible, to wit, the rapid breaking up of the monarchist parties. One by one the leaders are abandoning their whilom commands. M. le Comte de Mun, for instance, formerly a chief among the Royalists, has recently made a public declaration of his submission to the Republic.

Granting, however, that the Republic seems to be at last definitively established, it is by no means so certain that the triumph will be an uninterrupted, peaceful progress. Fresh troubles are appearing already on the horizon; and, for the moment, it is doubtful if they will gather into a storm or melt away in some happier political breeze. It is scarcely necessary to recall to mind the considerable changes which have come over the Republican spirit during the last fifteen years. Without there being any modification of first principles, the succeeding governments have gradually passed from the Republicanism as understood by M. Thiers to tendencies and sentiments more radical and less conformable to tradition. Men of more advanced views have acceded to power, and the policy of the various cabinets has inclined more and more to the democratic side, less and less to the religious. It is pertinent to ask whether this evolution has been the natural product of the national will. To answer frankly, it is doubtful.

First of all, if comparison is made between the figures of the last few general elections, it will be found that the number of abstentions shows a tendency to increase. It is true that indifference enters largely into the causes which prevent people from recording their vote. But this indifference itself has a motive. In part arising from the national conservative instinct, it is also, in part, the result of a fairly general political scepticism. One government is neither better nor worse than another, is the conclusion which only too many arrive at after a long experience at the polls. Hence, both an unwillingness to vote for a candidate and an equal unwillingness to take the trouble to vote against him. For want of a wider and deeper interest in voting, petty local interests often interfere to decide a parliamentary contest, and the general election may be fairly estimated as lacking that proper national character which it ought to have and to confer on the Legislature.

Of course, this deliberate indifference may break out at any time into an active discontent. No further back than five or six years ago, the Boulangist movement furnished a striking example. Nor does it affect the main argument that Boulangism was a heterogeneous agitation, that the Royalists made use of it to try and restore the monarchy, and that many others were found in its ranks from mere personal ambition. The popularity of Gen. Boulanger, discount made of his individuality, came really from the fact that he represented a wide-felt dissatisfaction against the Government's policy, and his strength was neither more nor less than the temporary concentration in his hands of all the popular discontent. Circumstances so ordered it that the Boulangism of Gen. Boulanger failed to attain its end. But since the discontents which created it are more permanent than the man who personified them, there is a possibility of there being in the near future a Boulangism without Boulanger. Among those hostile to the present Government this idea has already found expression. It wants but a working basis, and an opposition party might quickly organize itself with a reasonable hope of coming into power.

But again, the Conservative party—or rather parties, since for the moment the sections are not properly united—might, in accepting the Republic, wonderfully increase their force. As a matter of fact, to accept the Republic would by no means necessarily be to agree to all its present political doctrines. And in declaring their definitive adhesion to the established rule, they would simply have to make it known that they reserved to themselves the full right to urge their views upon every matter not touching the form of government. Doubtless such an opposition as this, on strictly Constitutional lines, would tell far more against the party in power than an opposition based on revolution, and having to contend against the reluctance of the people. The Liberals and Radicals, thenceforth, deprived of their exclusive claim to the suffrages of the

masses on the ground of law and order, would have to fight against a consolidated Conservative party, that stated a clearly defined policy in opposition to their own; and the Conservatives, profiting, like their neighbors across the Channel, by the shifting opinions and changes of front among their opponents, would succeed sooner or later in seizing the reins of government.

To complete this rapid sketch of the chief political tendencies of the time, notice should be taken of the Socialist movement. But here we are in presence of an agitation so obscurely outlined that intelligent criticism or analysis of it is next to impossible. That the Socialists have succeeded in making themselves a distinct influence in the country it would be futile to deny. To go further than this general confession, and to attempt to estimate what is the Socialist factor in actual legislation, would be to speak without any reliable data. The Socialist party is in no sense at present a homogeneous whole. In addition to several sections, having doctrines peculiar to each, and apparently irreconcilable one with another, there is what might be called an unofficial section obscurely mixed up with the Anarchists, and aiming, like the latter, more at political destruction than at vital reconstruction of the social machine. What is to be the ultimate influence exercised by these incongruous, explosive elements on the main body of the working classes? What effect will they ultimately produce on the general political life of the country? For the moment no reply can be given to these questions; and so long as this is the case, it will be difficult, if not impossible, to read accurately the signs of the times.

To sum up, it appears that in spite of the rout of the Royalists and Imperialists—a rout brought on partly by accidental circumstances, partly by their own divisions and short-sightedness—the Republic is still menaced by a slumbering dissatisfaction in the country, which may at any time become active. Further, it appears that the Royalists and Imperialists have a very good chance of transforming themselves into a legitimate opposition and of snatching the coveted power and leadership from the hands of the present possessors. The struggle on both sides is rendered more doubtful by the presence of an unknown factor—the Socialist vote. What will be the outcome? No one at present can say. S.

Correspondence.

THE PRESIDENCY.

To the Editor of The Nation:

Sir: The lists are cleared, the champions marshalled, and the conflict of four months is about to begin. Foreigners look upon it with unmingled horror. They see in it only uproar and turmoil, disturbance of business and enormous outlay of money, brass-bands and torch-light processions, endless speechmaking, mud-throwing, slander, and political intrigue, and all for no definite purpose whatever. It seems a spectacle to excite only disgust and contempt. They are welcome to their opinion. We believe it to be the grandest event in the world, not merely from a sentimental point of view, but for practical, homely, every-day value; that it is well worth every particle of its cost, whether in time or money.

Once in four years the whole people of the United States turn aside from their money-getting and their personal cares and anxieties to a question of politics, aside from themselves and yet of common interest to them all. In the cabin of the laborer, in the single room of the city tenement, in the palace of the millionaire, the morning paper which reports progress causes every pulse to beat in unison, and moves in every breast the old feeling, *Civis Romanus sum.* The man from Maine who visits Louisiana, the Oregonian sojourning in Florida, will meet at every street corner those with whom he can exchange warm sympathy and interest, not in reverence for a sovereign whose claim rests solely upon being born in a particular family, mostly kept up by the intermarriage of cousins, but as co-workers, at least in theory and however imperfectly the machinery may work, in the choice of their own Chief Magistrate.

The German and French armies are assembled every year at an immense cost, and for no present purpose, simply to keep them in the highest state of efficiency. We, too, have our "autumn manœuvres," not for the purpose of ultimate slaughter and destruction, but in training to give expression to the national will, and to quiet and peaceful submission to the outcome of a vote under the conditions prescribed by law. If we went on for a century with such elections, apparently settling nothing, yet if in one crisis like the civil war it gave us an Abraham Lincoln, the process would have paid for itself a hundred times over.

Among the proofs of wisdom which appear almost more than human in that wonderful instrument the Federal Constitution, not the least is in the fact that it places the chief executive power in the hands of a single President, elected, as it results in practice, directly by the people. It might have intrusted this power to a committee of three or more persons, which would have opened a Pandora's box of political intrigue and trading, and would have destroyed that personal enthusiasm which is the only effective instrument for moving multitudes. It might have made that President or that committee elective by Congress, in which case either would have represented the will of Congress and not the will of the nation, which the experience of the century is showing more and more to be totally different things. It did give us that, like which there is nothing else in the world, and which contains untold possibilities for the future.

How important it is is shown by the two recent conventions. Perhaps there have been none in which meaner and more selfish intrigues were aiming to control the nominations, yet they were swept away like reeds; and necessity, for any chance of success with the people, compelled the prompt nomination of at least the two most respectable candidates who were available. It is hardly entering upon party politics to say that there is in the century of our history hardly a case of more complete poetic justice than the pulverization of Mr. Blaine.

What is the reason of the certainly well-grounded complaint of foreigners that our Presidential elections have no meaning? The simple one is that, having elected a chief magistrate, we proceed to tie his hands and feet. Consider for a moment that this man, elected, and the only one elected, by sixty millions of people, has no direct power over legislation or financial policy, and but very little over administration, which is the outcome of both. Neither of himself nor by any of his chosen officials, has he any voice in shaping the measures of government. That is left to four hundred local representatives, any one of whom has more power in the matter than the President himself, unless the latter chooses to compete in the intrigues of the lobby. Mr. Cleveland probably owes his nomination, and will owe his election, as much as anything to his bold and ringing message on the tariff, and will probably follow it up with another. But, after all, it is only a general expression of opinion, endorsed, no doubt, by the country, but which does nothing towards settling the details upon which the whole question turns. The lobby will continue to govern the country after as before, and so this superb machinery of the Presidency is brought to naught, at least in its objective working, by the grasping ambition of Congress, which hugs its own anarchy and refuses to submit to leaders.

Imagine a President who should address a message not to Congress but to the country, saying to the people in substance: "You have sent me here upon a policy of tariff reform. It is impossible for me to do anything about the matter unless I am authorized to place before Congress a definite measure embodying your and my opinions in detail, and can have an opportunity, through the Secretary of the Treasury, of explaining and defending it before the country. Will you require Congress to receive such a measure?"

How long would it be before that body received a mandate to which it would be compelled to yield? G. B.

Boston, June 25, 1892.

THE RUSSIAN PROFESSORSHIP.

To the Editor of The Nation:

Sir: There is a legitimate question: What is the province of a professor of foreign languages? If it is to inculcate accurate pronunciation, then by all means have only native incumbents. But there is something far more important than that: it is the ability to teach and inspire.

It is the experience of many graduates of colleges that foreign tutors and professors, no matter how learned they may have been, failed in appreciating what their students required. Not having had to learn the language themselves, they could not supply the help which one "not to the manner born" would almost instinctively afford. Who would not prefer to study German, French, Italian, or Spanish with men like Longfellow or Lowell than with any foreign professors that could be named? Students who expect to learn to speak a foreign language must go elsewhere than to the class-room.

Even were a Russian imported to act as professor in some American university, there would be no absolute security that he would be able accurately to pronounce Polish, Bohemian, Wendish, and all the other dialects of Slavonic. If he came from Kieff, he might even pronounce Russian with a Little Russian accent! There would be a large chance, moreover, that he would not understand American wants, and would make as ghastly a failure as Prof. Ko made at Harvard in teaching Chinese.

There is still another point. A professor of Russian would not be likely to be overrun with pupils. A large part of his time would be naturally given to study and research. To any one who has looked into the matter there offer many inviting fields of study—philology, art, poetry—which a man with the leisure granted by such a position might exploit. Would not an American who had been educated for several years in Russia be better

qualified to do good work in these branches than a Russian who would be disqualified from writing idiomatic English?

There is no occasion for any jealousy in the matter. There is room for a dozen to work: the more the merrier. It would be interesting, for instance, if two universities should establish chairs of Russian, one filled by a native, the other by such a man, for instance, as the Hon. Jeremiah Curtin, who not only speaks Russian almost like a native, but is acquainted with Polish and many dialects besides of the noble Slavonic language. It would then be soon easy to see which would be the most successful in attracting students or in furnishing the English-speaking world with a knowledge of the sealed books of the East.

Enthusiasm, good temper, and the genius of teaching are more important than a mere name. NATHAN HASKELL DOLE.

BOSTON, June 21, 1892.

TO THE EDITOR OF THE NATION:

SIR: In your issue of June 16 there is to be found a discussion by Miss Isabel F. Hapgood on the Russian professorship.* I heartily concur with her in advising a careful selection of a professor of Russian; but I must guard the readers of the *Nation* against an erroneous impression which the exalted requirements of the article must produce. A professor of Russian must, above all, be conversant with the Russian language and literature; for the rest, he need possess only a philological and not necessarily a linguistic knowledge of the other Slavic tongues. Do we ask of a professor of German that he should speak or even read Icelandic, Swedish, Anglo-Saxon, Dutch, etc.? Of course not. I can think of only one professor at a European university who speaks fluently three Slavic languages, and that is the great philologist, Prof. Miklositch of Vienna; in fact, the seat of comparative Slavic philology is not in Russia, but in Austria. Miss Hapgood says that the professor in question ought to know, among other things, Servian, Croatian, and Montenegrin. Now Miss Hapgood ought to know that Montenegrin is a mere dialectic form of the Serbian, and that Croatian is treated by nearly all philologists as one with Serbian. One might with equal propriety demand that a professor of German should speak English, American English, and Tennessee English. Further, a knowledge of the Russian dialects is said to be needed. I confess I am at a loss in trying to define such dialects, as the Russian is almost free from dialectic differences. The Ruthenian is, indeed, a distinct dialect, but the study of it is discouraged in Russia for political reasons.

The Russian language is not such a bugbear as some would like to make it; it is scarcely more difficult than Greek. The verb offers no more difficulties than the Hebrew verb, and I have known foreigners who have made very creditable progress in it. There is a chair of Russian at the University of Oxford, ably filled by Prof. Morfill, and I see no reason why an American university could not be successful in establishing a chair for Slavic languages. L. S. WIENER

(A Russian).

KANSAS CITY, Mo., June 24, 1892.

Notes.

MR. R. L. GARNER, who will shortly visit Africa for the purpose of studying in the open the language of apes, will first bring out, through Charles L. Webster & Co., a work embodying his researches on 'The Speech of Monkeys' in confinement, which have already been reported in divers periodicals.

'German and English Sounds,' by C. H. Grandgent, illustrated with diagrams, is in the press of Ginn & Co., Boston.

A new and extensively revised edition of Bryce's 'American Commonwealth' will in no long time be issued by Macmillan & Co. It will, of course, be copyrighted in America.

A 'Life of Ethan Allen,' by the late Henry Hall, will be published at once by D. Appleton & Co.

'A History of Peru,' by Clements R. Markham, will introduce the series on the Latin-American Republics projected by Charles H. Sergel & Co.

A work on novel lines, for schools and for the general reader, is 'England and Its Rulers,' by H. Pomeroy Brewster and Geo. H. Humphrey, shortly to be issued by S. C. Griggs & Co., Chicago, who also announce 'Columbus: An Epic Poem,' by Samuel Jefferson, and 'A Phrase Book of Eclectic Shorthand,' by J. G. Cross.

Roberts Bros. send us two more volumes of their very taking edition of Jane Austen, viz., 'Mansfield Park.' From Harper & Bros. we have the eighth edition of Mr. Laurence Hutton's 'Literary Landmarks of London,' revised in the plates and also supplemented with notes, many of them recording the demolition of old buildings since the first appearance of this work, and one citing Prof. Lounsbury's destructive comments on the Chaucer legends recorded in the text. The publishers have inserted a number of full-page portraits, of varied excellence, but in the sum an enhancement of the value of the work. Macmillan & Co. have brought out still another reprint of the first editions of Dickens's novels, this time of 'Nicholas Nickleby,' with the usual historical and bibliographical introduction by the younger Dickens, with Phiz's illustrations, and with copies of lithographic stage pictures fr m the dramatization of the story. We can but repeat that the cheapness of this series, its excellent typography, and the editorial apparatus should insure it a very wide popularity. The Clarendon Press has very properly undertaken a second edition of the late Mark Pattison's 'Isaac Casaubon,' the first (published by the Messrs. Longman) being out of print. We judged the work, on its appearance, "a model of biography," and it has been bettered in sundry details with the aid of manuscript additions and corrections left by the author, and by the suggestions of friends. The American publishers are Macmillan & Co.

The methods of building construction in iron and steel are well shown in the second volume of Berg's 'Safe Building' (Boston: Ticknor & Co.), the first volume of which we noticed when it appeared some years ago. Like the first, this is made up of articles which were printed in the *American Architect*. It covers ground on which no one can venture a step in practice without special knowledge, and which Mr. Berg had treated but slightly before; consequently he has followed out his subject with minuteness, giving most attention to riveted work, which preponderates in modern building because of its ease of construction, and which has its peculiar risks. The same care and thoroughness that gave value to the former volume appear in this.

For the seventeenth time MM. Édouard Noël and Edmond Stoullig have sent forth their year-book of music and the drama in Paris, *Les Annales du Théâtre et de la Musique* (Paris: Charpentier; New York: F. W. Christern). As on former occasions, they have asked some celebrity of the dramatic or musical world to prepare a preface, this year M. Gustave Larroumet, one of the most learned and acute of French dramatic critics. He devotes himself to a defence of Eugène Scribe, in the course of which he incidentally sets forth more than one of the underlying principles of the dramatic art. Confessing frankly Scribe's deficiencies as a man of letters, he exhibits Scribe's surpassing skill as a man of the theatre. The book which this brilliant paper precedes resembles its predecessors, for as a whole the year 1891 was much like the two or three years just before it; but that the French theatre is alive and vigorous, these four hundred solid pages testify abundantly.

The meeting of the American Institute of Mining Engineers often affords opportunity for the preparation of instructive handbooks. The most recent of these is the 'Guidebook of Baltimore,' for the meeting of last February. The novel element of the book is a contoured map of the region around Baltimore, colored for the geological formations, being a reproduction of one of the first sheets thus prepared by the National Geological Survey. The field-work required for it was done by Prof. G. H. Williams of Johns Hopkins University and N. H. Darton of the Survey. This is hardly a matter of popular interest, as the structure of the region is complicated; but geologists must welcome the publication of such a map as giving good promise of what may be expected for the country at large when the many sheets that are to follow it come to be issued with frequency.

Mr. Henry Gannett's paper on "The Mother Maps of the United States" has been reprinted from the *National Geographic Magazine* (Washington). It briefly enumerates the several Government, State, and private surveys which have furnished the material for original maps, and then indicates what portion of the country can be mapped on the scale of 1, 2, 4, 8, and 16 miles to an inch, respectively. On the largest scale named only four States can be mapped, namely, New Jersey, Connecticut, Rhode Island, and Massachusetts. The scale of two miles to an inch is that on which the Geological Survey is systematically at work, and a scattered area of 460,000 square miles, or from a fifth to a sixth of the whole country, has thus been mapped. Omitting Alaska, which is yet in the stage of exploration, all but about 225,000 square miles of the United States can be mapped on a scale of sixteen miles to an inch—the scale adopted by the Geographic Congress for mapping the whole earth. Mr. Gannett summarizes his data in tabular form, and also graphically on a colored map. It is noticeable how extensively the Appalachian region from the Pennsylvania line southward has been mapped by the Geological Survey, for obvious material reasons.

From the same magazine has been extracted Mr. Harry Fielding Reid's "Studies of Muir Glacier, Alaska," the fruit of an expedition in 1890 prompted by Prof. Wright's description of the glacier in his 'Ice Age in North America.' "Glacier Bay offers the luxury of exploration," says Mr. Reid, owing to its being in weekly communication with the rest of the world by steamship service. A hundred years ago he thinks it might have been in large part filled with ice from the several glaciers, which are now rapidly retreating—Muir Glacier at the rate of a mile in seven years. Mr. Reid's map will be invaluable for noting future changes. His paper, which is written in a

popular style and is interesting reading, is accompanied by numerous striking photographic views of mountain, ice-stream, and buried forest.

The Boston municipal authorities have printed, forty years after date, the 4th of July oration delivered before their predecessors in 1852 by the Rev. Thomas Starr King. The theme, "The Organization of Liberty on the Western Continent," was actually handled without an allusion to slavery, and this makes the oration a real curiosity to-day. Mr. King's subsequent transplanting to the Pacific Coast had, as is well known, important effects in preserving that section to the Union on the outbreak of the slaveholders' rebellion. The pamphlet may be had of Alvah H. Peters, City Messenger, at the Boston City Hall, on application from libraries and collectors.

The June number of the *Inland Printer* (Chicago) contains a report of the banquet given by their employees to the proprietors of the De Vinne Press, on April 30, in acknowledgment of the voluntary profit-sharing allowed upon the business of the past year. The spectacle is not a pleasing one to trade unions; but no one can read Mr. Theodore L. De Vinne's words of honest tribute to his associates and frank discussion of labor controversies without being thankful that here is an establishment where the walking delegate has no occupation, though he must often look through the grille with longing to disturb the happiness within.

Mr. F. Gutekunst, Philadelphia, sends us an imperial panel photograph of Prof. Richard T. Ely of Johns Hopkins University, and an equally speaking but smaller likeness of the late Father Mollinger of faith-cure notoriety.

—In *La Réforme Sociale* for June 1, M. Albert Bordeaux, a mining engineer resident in Bosnia, has an interesting article on the condition of that country under Austrian domination. By the treaty of Berlin, of July 13, 1878, Bosnia, which had been for four centuries one of the provinces of the Ottoman Empire, passed, together with Herzegovina, under the Austrian rule, only a nominal overlordship being left to Turkey. According to M. Bordeaux, the change has been an unmixed benefit, and there is promise of much greater improvement in the future. At the time of the Turkish conquest, the feudal landlords abandoned the Christian faith and became Moslems in order to preserve their estates and privileges, while the tillers of the soil remained Christians and were, in time, reduced to the lowest social stage. Their methods of agriculture were of the most primitive description, while, at the same time, they groaned under a crushing burden of taxation and disqualification. Attempts at reform, principally by abolishing feudal conditions, were made by the Turkish Government in 1859, but were never sincerely enforced by the local authorities, and resulted in no amelioration of the lot of the masses. Even during the first four years of the Austrian domination, the improvement was not perceptible. Since the rising of 1882, however, the Austrian Government has made remarkable progress in organizing the administration of justice on an equitable basis, in rendering life and property secure, in making taxes payable in money instead of in kind, in facilitating communication by building roads (the labor being performed by soldiers), in suppressing brigandage; in short, in converting a feudal State into a modern community. M. Bordeaux goes into some detail in describing the moral improvement in matters pertaining to religion and popular education, and anticipates that much more will be accomplished in the near future. He says that the House of Austria is becoming an Eastern Power, having already more Slavic subjects than it has subjects of any other nationality. The figures as he gives them are: 17,500,000 Slavs, as against 6,000,000 Magyars, 10,000,000 Germans, and 3,600,000 Latins. It should not be forgotten, however, that, for the present at least, the Magyars hold the political balance of power.

— The June Proceedings of the Royal Geographical Society opens with the annual address of Sir M. E. Grant Duff, in which he dwelt especially upon the need of a greater attention to the study of geography in the schools and universities. In order to obtain the necessary time, he advocates the giving up of Greek and Latin composition "as a piece of regular school business," saying that "this bears much the same relation to serious intellectual pursuits as does to the proper works and ways of an intelligent dog the art of jumping through a hoop filled with paper, or that of balancing on his nose a piece of biscuit till he is told that it is 'paid for.'" This is followed by an account of a journey in central Peru by Mr. A. Ross, made with a view to reporting upon its suitability to tropical agriculture. An interesting discussion took place when the paper was read before the Society, in the course of which the Consul-General of Peru claimed that in the northern department of Piura, where it rains once in seven years, cotton yields "two crops, maize four crops, potatoes three crops, coffee and tobacco two crops, a year, and in addition to the quantity you have the quality." Lord Donoughmore referred to the fact that on the sugar plantations of the coast, which is practically rainless, where there is a system of artificial irrigation, so far as sugar cultivation goes you are independent. "You can put your water on the fields when you like and take it off when you like, and plant in any month of the year, reap in any month of the year, and keep your mill going all the year round." Mr. Clements R. Markham dwelt especially on the excellence and value of the products of the country, *e. g.*, rubber and the Peruvian bark, which sells for twice as much as Indian bark. He paid a high tribute to the capacity of the Incas Indians, who are among the most skilful shepherds and farmers the world has ever seen. After centuries of patient and skilful care they domesticated the alpaca, "producing the most silky fleeces that are known." They developed the potato, and have brought maize to such perfection that "one cob of Cuzco maize is equal to five or six of any other kind." And lately they have produced the coca, whose cultivation and curing requires the utmost care and skill. What the country most needs is a larger agricultural population, and more and better roads communicating both with the Pacific Coast and with the navigable affluents of the Amazons. Mr. Markham also contributes a highly appreciative and well-deserved tribute to the late Prof. E. A. Freeman, with especial relation to his services to geography.

—In 'Tanganyika' (London: E. Stanford), Mr. E. C. Hore gives an account of eleven years of pioneer missionary work in Central Africa. A sailor by profession, he devotes himself wholly to descriptions of the practical side of missionary life, the long journeys through the wilderness, the founding of stations, intercourse with the natives, and voyages upon the great lake which he was the first to explore thoroughly. His book is marked by the frank hopefulness characteristic of men of his calling, as well as by the appreciation of what is good in his fellows. The interior natives, for instance, are "neither evil nor degraded," and there is a cordial recognition of the numerous services of the Arabs to the mission, and especially of the much decried Tippu Tib. The few references to the Roman Catholics who, coming later here as in Uganda, must be regarded as intruders, show a kindly feeling very different from that which unfortunately now prevails in the latter kingdom. There is an interesting chapter on Lake Tanganyika or "mixture," in which it is shown to be the "heart of Africa," geographically, politically, and ethnographically. In its surrounding heights are the sources of three of the four great continental rivers, the Nile, the Congo, and the Zambesi. Its shores are not only the meeting-point of the possessions of Great Britain, Germany, and the Congo Free State, but they are the home of twelve tribes, the typical representatives of the aboriginal African races. From Mr. Hore's story we should conclude that the work of the mission has been largely of a civilizing and educating, rather than of a distinctively religious, character. Among other things a steamer, fifty-four feet long, has been transported with immense pains over nearly a thousand miles of roadless wilderness, and successfully launched upon the lake, where it is used in the service of white and black alike.

—Among the "Études Romanes" dedicated by his pupils to Gaston Paris on the twenty-fifth anniversary of his *doctorat ès lettres*, was one by Alexandre Beljame on the curious subject of the pronunciation of the name of John Law, the financier of the South Sea Bubble. "We write it *Law*," says Prof. Beljame, "and we pronounce it *Lass*," though the *aw* sound presents no difficulty to the French vocal organs, and has its equivalent in *mort*, *sort*, *dort*, *tort*, etc. Saint-Simon records the change to "Las," without offering any other explanation than Law's greater notoriety at the time. Louis Moland, the editor of Voltaire, surmised that the possessive "Law's" was so often heard from his English financial associates speaking of his "system" that the genitive was finally mistaken for a nominative. M. Beljame shows that the pronunciation was in vogue in France before the "system" was advertised; and as the form "Lav" is wanting in the various documentary spellings, he concludes that the name was *heard* before it was read. His researches were directed aright by a letter of Steele's addressed "To Mr. John Laws at Paris, Aug. 12, 1719," and he then discovered this form in several places, in manuscript and in print, sometimes accompanied by the ordinary form. Both usages, he is able to prove, prevailed in Law's time. The legal form was "Law," as is evidenced by the birth-register of the financier, and by his invariable signature without the *s*. This suffix, in a great many instances in England, furnishes doublets like Adam and Adams, Andrew and Andrews, Brook and Brooks, Edward and Edwards, etc., and denotes a true genitive signifying "son of," so that "*Laws* is equivalent to *Lawson*." M. Beljame closes his agreeable little monograph by justifying the retention of the French pronunciation *Lass*, especially now that the reason of it is apparent. As a survival of an old Scotch (rather than English) pronunciation, he likens it to the English *Bi'veur* for Belvoir, "souvenir d'une ancienne prononciation française." The pamphlet bears the imprint of Émile Bouillon, Paris.

—Franz Liszt, in his delightful essay on Robert Franz (now incorporated in his 'Gesammelte Schriften,' vol. iv., pp. 207-244), refers to the remarkable fact that America anticipated Europe in the formation of a circle devoted to the songs of Franz—Schubert's greatest successor. This honor was won for America chiefly through the devotion of the late Otto Dresel, at one time Boston's leading pianist. He was a personal friend and enthusiastic admirer of Franz, whom he assisted in the task of writing additional accompaniments to Bach and Handel scores. His pianoforte score of the "Messiah" is based on Franz's edition, and is the best in the market. Of original works Dresel did not compose many, the best being a collection of songs—'Lieder-Album'—just issued by Breitkopf & Härtel (Leipzig and New York). This album includes twenty songs, with German and English words in each case; and for Americans there is this advantage, that some of the *Lieder* were composed to English words. Mr. Dresel's songs cannot be too highly commended to amateurs and professionals. They betray the influence of Franz so strongly that one might often fancy he was listening to a new song by that immortal composer; just as Franz himself constantly suggests Bach in his best mood. Note, for instance, how Dresel's exquisite "O Listen, My Darling," suggests Franz's "Wonne der Wehmuth." There are many other jewels in the collection. Breitkopf & Härtel have also sent us a collection of five "Liebeslieder," by Heinrich Zöllner, praise of which must, however, be pitched in a much lower key. Zöllner is not happy in his modulations.

GEORGE MASON.—II.

The Life of George Mason, 1725-1792. By Kate Mason Rowland. Including his Speeches, Public Papers, and Correspondence. With an introduction by Gen. Fitzhugh Lee. 2 vols. G. P. Putnam's Sons. 1892.

We have seen that, in many of his political opinions, George Mason was far in advance of the common mind among his contemporaries. He had the large discourse of reason which looks before and after. A man of thrift and a slaveholder, he had philosophic insight to see that slavery was as bad in economics as in ethics. He began his economical agitation against slavery as early as 1765, when, in the preface to "a scheme for replevying goods under distress," he expounded the policy of encouraging the importation of free people and discouraging that of slaves. His denunciation of the effect which slavery had on social life and manners was persistent, running as it does through his writings and speeches from 1765 to 1788; and it was so vehement that Miss Rowland feels called to explain to us that George Mason was "no abolitionist." Certainly he was no abolitionist, but John Wesley never said harder things against slavery. Miss Rowland suggests, by way of exception to the sweeping generality of his statements, that he offered in his own courtly person a contradiction of his thesis that "slavery produces the most pernicious effect on manners." If, as Jefferson said, he sometimes dashed his speeches with "cynicism," it may have been a disdain which sprang from a lofty sense of his own personal honor, rather than from contempt for others. If, as Madison thought, the chafe and friction of "little circumstances" in the Federal Convention, arising from impatience of cross opinions in debate, "conspired to whet his acrimony" against the Constitution, it is certain that he proved the sincerity of his opinions as much by the sacrifices he made for them as by the earnestness with which he maintained them.

There are a few things in which the conduct of Mason in the Federal Convention seems scarcely consistent with his general character and antecedents, except on the suspicion that he may have sometimes played the part of a *Frondeur*, and put himself in opposition for opposition's sake. He moved to strike out the clause prohibiting bills of attainder and ex-post-facto laws. He thought bills of attainder had saved the British Constitution! He was unwilling to see the hands of Congress tied against the passage of legal-tender laws, though, as passed by the States, he held them to be the offspring of delusion or fraud. He favored an express provision for the Congressional enactment of sumptuary laws, under color of which the Federal Legislature might have controlled the dress and food of every man, woman, and child in the United States. It would seem that the power of paternalism could no further go. Yet this tribune of the people supposed himself to be the special champion of personal liberty and State rights.

George Mason took little part in public affairs after the ratification of the Constitution. He was appointed to the Senate of the United States after the death of Grayson, but he refused to serve. He naturally drifted away from Washington after the sharp cleavage of their opinions on the subject of the Constitution. They did not come to an open rupture of personal relations, but Washington now called him a "quondam friend." It was natural that as a soured patriot he should soon despair of the republic. In a letter to Jefferson in the early part of 1791, after less than two years of Federalism under the Administration of Washington, he expressed the opinion that there was even then "a particular circumstance, little attended to, which was constantly sapping the republicanism of the United States." Jefferson wrote to ask what this "particular circumstance" was, and as the reply of Mason is lost, Miss Rowland thinks that "for us there is no answer to the query," though she suspects that Mason was hinting dispraise of the Judiciary Act of 1789. It seems to us that the query can be easily answered by a reference to the writings and speeches of Mason as here preserved for us by his accomplished biographer. The "particular circumstance" to which he adverted as being "little attended to," could not have been the Judiciary Act, for that "abomination" of Federalism was constantly looming in the eyes of the Virginian Republicans. We cannot doubt that what seemed to Mason at that moment so menacing to republican simplicity in the United States, was the reëligibility and the actual reëlection of executive and legislative officers alike, under the Federal and the State Governments, so far as opportunity had offered under the new régime. When the section in the Constitution relating to the office and duties of the Federal executive came up for discussion in the Virginia Convention of 1788, Mason used in that body the identical phrase which he now used in writing to Jefferson, and it was to this vice of Presidential reëligibility that he pointed as opening a sap and mine under the very muniments of republicanism. He said: "There is not a more important article in the Constitution than this [the section relating to the office of the President]: the great fundamental principle of responsibility in republicanism is here sapped. The President is elected without rotation. . . . Nothing is so essential to the preservation of republican government as a periodical rotation. . . . It is a great defect in the Senate that they are not ineligible at the end of six years."

This maxim of republicanism was so fundamental in the political dogmatics of George Mason that when the Fairfax Military Company, "composed entirely of gentlemen," was organized at the outbreak of the Revolution, he insisted that all its officers, with the exception of its captain (George Washington), should be newly elected every year. In a constitution drawn up by him for the government of the company, he propounded the following as a universal doctrine: "Wherever any military establishment, or authority, is not by some certain mode of rotation dissolved and blended with the mass from which it was taken, inevitable destruction to the State follows." In the Federal Convention he held it as "an essential point for the preservation of the rights of the people—as the very palladium of civil liberty—that the great officers of state, and particularly the executive, should at fixed periods return to that mass from which they were at first taken." In the Virginia Convention he did but strike the same keynote with a shriller tone, and in view of the fact that all his trumpet-calls had passed unheeded by the American people, he now sounded his alarm in the ears of Jefferson. Jefferson had been absent in Europe while Mason was inveighing against the Constitution. How sincerely Jefferson sympathized with him in this opinion is now known to us all. That George Mason should have mourned in 1791 that this "particular circumstance" was so "little attended to," is easily explained when we remember that in spite of the iteration with which he pressed it, and in spite of the embodiment which he procured for it in the proposition of amendments to the Constitution as made by the Virginia Convention, only two other States could be brought to take any notice of this peril.

We observe that Miss Rowland dismisses as a fable the newspaper story that George Mason, on passing through the town of Alexandria (Va.) on his return from the Philadelphia Convention in 1887, was waited upon by the Mayor and corporation with a notification that "they did *not* come to return him their thanks for his conduct in refusing to sign the Federal Constitution, but to express their abhorrence of it," and with the advice that he should withdraw from the town within an hour, as they could not answer for his safety from an enraged populace. Miss Rowland thinks that the story cannot be true, because George Mason was too much respected by the Mayor and corporation of Alexandria to have received any such treatment, and because neither Gen. Washington nor Mason himself makes any allusion to the alleged incident. But it seems to us, without venturing any positive opinion in the premises, that the "probabilities" of the story are to be measured not so much by the respect in which the Alexandrians had once undoubtedly held the statesman of Gunston Hall, as by the admiring reverence they cherished for Gen. Washington, and by the resentment they were likely to feel at the reflection on him implied in Mason's harsh denunciation of the document which Washington was known to advocate. The county of Fairfax, in which Washington and Mason resided, elected Federalists to the Convention, and Mason, as a candidate for the Convention, was compelled to look for his election to another county than that in which he lived. It is true that Washington makes no distinct reference to such an incident, but he does tell

us that Mason's conduct in the Federal Convention was "reprobated" in his neighborhood ("in this country"), and Mr. Madison recites in a letter to Jefferson about this time that Mason's conduct had given "great umbrage in the County of Fairfax, *and particularly in the town of Alexandria.*" This latter statement shows that, according to Madison's information, there had been some particular manifestation of "unpleasantness" on the part of that town. And if there had been no demonstration of Mason's unpopularity in Alexandria in 1787 and 1788, how does Miss Rowland account for the genesis of the story which she recounts on page 210 in her second volume, and which sounds like an echo of the earlier legend? She doubtless knows that the earlier story had a wide dissemination in the newspaper press of the time, and is not found alone in the journal which she cites. The incident, whether true or false, has no value whatsoever for its bearing on the real greatness of Mason, but it may have an interest as showing the "pillar of cloud" which overhung the steps of "the fathers" in this transition epoch of the republic. It is in this sense alone that the story is worthy of any special wonder.

We are pleased to find that the acute mind of George Mason was early puzzled by the same problem in social and political dynamics to which we have more than once called the attention of our readers, without taking time for its formal discussion. We refer to the question why it was that a social democracy in New England produced the most inveterate type of aristocratic politics ever known in our country, and why it was that a social aristocracy in Virginia produced a democratic order of Federal politics at the very beginning of our history under the Constitution. After his first contact with the delegates composing the Federal Convention, he writes as follows to one of his sons under date of May 20, 1787:

> "What is a very extraordinary phenomenon, we are likely to find the Republicans on this occasion issue from the Southern and Middle States and the anti-Republicans from the Eastern. However extraordinary this may at first seem, it may, I think, be accounted for from a very common and natural impulse of the human mind. Men disappointed in expectations too hastily and sanguinely formed, tired and disgusted with the unexpected evils they have experienced, and anxious to remove them as far as possible, are very apt to run into the opposite extreme; and the people of the Eastern States, setting out with more republican principles, have consequently been more disappointed than we have been."

This solution is drawn simply from a view of facts lying on the surface of recent events, and, besides being in itself, as it seems to us, a hasty and insufficient induction, was perhaps confirmed in Mason's mind by the outgivings of his sympathetic friend and political confederate, Elbridge Gerry. Certain it is that we find Gerry confessing, in the confidence of the Federal Convention debates (as recorded by Madison), that he had at one time "been too republican," but that he had been taught by experience (referring, we presume, to the Shays rebellion) "the danger of the levelling spirit." In fact, we must look much deeper than all this for any adequate explanation of such a curious double antithesis in our national politics. Mason's and Gerry's solution answers only one branch of the compound problem, and leaves unexplained the still more puzzling fact that it was the Southern social system which, in spite of its aristocratic structure, produced "Jeffersonian simplicity" and "Jacksonian vulgarity," as they were called on a notable occasion. We have our views on this subject, but their discussion here would lead us too far afield at the heel of this review.

Miss Rowland certainly does not expect that all her readers will concur with her when she says that the Virginia Convention, by the form under which it ratified the Constitution, "declared the right of secession, as a correlative of accession, for all the thirteen sovereignties." It is known that the Convention, in its formula of ratification, "declared and made known, in the name and in the behalf of the people of Virginia, that the powers granted under the Constitution, being derived from the people of the United States, be resumed by them whensoever the same shall be perverted to their injury or oppression." From the fact that the word "people," as here used, must be taken, with Mr. Madison, to mean "not the people as composing one great body, but the people as composing thirteen sovereignties," Miss Rowland infers that the right of separate State secession is involved in the formula not only as a necessary implication, but as being expressed "in unmistakable terms." That Miss Rowland should make this deduction for all it may be worth in political hermeneutics, or that she should draw it *arguendo*, as the lawyers say, seems to us quite legitimate in what John Taylor of Caroline would call "construction construed"; but, as a matter of cold history, this interpretation of the formula was distinctly repudiated at the time the formula was adopted. We have the express statement of Madison to this effect—a statement not made in after years, when South Carolina politicians were trying to read this interpretation between the lines of the formula, but a statement made by Madison at a date when the ink with which the formula was written had hardly had time to grow dry. Madison, it is known, immediately after the Virginia Convention had adjourned, hastened to New York, and there resumed his seat in the Continental Congress. Alexander Hamilton, sore bestead at Poughkeepsie in his battle for the Constitution against an overwhelming anti-Federalist majority in the New York Convention, wrote to Madison on the 19th of July, 1788, to ask if it would not be possible to ratify the Constitution "with the reservation of a right to recede, in case our [the New York] amendments have not been decided upon . . . within a certain number of years." Madison immediately replied that "the idea of reserving the right to withdraw had been started at Richmond," in the convention called to sit on the Constitution, and had been "abandoned as worse than rejection." "The Constitution," he added, "requires an adoption *in toto* and forever. It has been so adopted by the other States. An adoption for a limited time would be as defective as an adoption of some of the articles only." Such was the understanding alike of the friends and of the enemies of the Constitution in 1788. It was this understanding which inspired its friends to work so earnestly for its ratification. It was this understanding which inspired its enemies to work so earnestly against its ratification. "The battle of giants" in the Virginia Convention is made unintelligible on any other theory, and no other theory was ever propounded, so far as we are advised, until the exigencies of the Nullification controversy, as raised by South Carolina, seemed to call for the extremest doctrine of reserved rights in the individual "sovereignties." Madison, we know, always denied that this doctrine could be found in the "Resolutions of '98," with all the ambiguities which may be justly laid on their heads.

It was inevitable that there should be an occasional slip of the pen in a work so voluminous as that to which Miss Rowland has set her hand. Everybody sees that it is a mere slip of the pen when Councillor Carter of Nomini, so called because he was a member of the Governor's Council, is designated as "Counsellor Carter," on p. 90 in the first volume, or as when the name of John Dickinson of Pennsylvania is sometimes miswritten "Dickerson." We are a little surprised at the free use made of 'Yates's Minutes' of the Federal Convention, without any intimation, so far as we can recall, that their accuracy has been impeached at so many points as to make them practically valueless in disputed questions.

BOOKS ABOUT THE STAGE.

Practical Play-Writing and the Cost of Production. By Alfred C. Calmour. Bristol: J. W. Arrowsmith.

Les Recettes de Cuisine Théâtrales de M. Sésosthène Rabichon. Par Auguste Germain. Paris: Ernest Kolb; New York: F. W. Christern.

A Book of Burlesque. By W. Davenport Adams. [The Whitefriars Library of Wit and Humor.] London: Henry & Co.

Occasional Addresses. Collected by Laurence Hutton and William Carey. New York: The Dunlap Society.

Choses et Gens de Théâtre. Par Paul Ginisty. Paris: Didier; New York: F. W. Christern.

Études d'Histoire et de Critique Dramatiques. Par Gustave Larroumet. Paris: Hachette; New York: F. W. Christern.

Mr. Wm. Davenport Adams contributes a preface to 'Practical Play-Writing,' from which we learn that the author, Mr. A. C. Calmour, is an actor who has written and produced many plays. "Though he has secured most popular approval as a writer of plays written in verse and dealing with poetic *motifs*, he has had much practice in various dramatic methods, and has always devoted much attention to dramatic *technique*." One of his more or less poetic plays was acted a few years ago by Miss Ellen Terry; it was called "The Amber Heart." None of them has as yet been acted in the United States, so far as we know. His little paper on practical play-writing was written to be read at the Play-Goers' Club and also at Prof. Herkomer's School of Art at Bushey. It is scarcely more successful in showing the novice how to write a play than was Prof. Hennequin's elaborate treatise that we reviewed a year or two ago. It is less successful than the rather vulgar book which was reprinted from the London *Stage* four or five years ago as 'Playwriting.' What it contains of most value is derived from Mr. Pinero and Mr. Grundy, who have contributed letters each describing the writer's own methods of dramatic work. These letters may be compared profitably with those which M. Abraham Dreyfus extracted from the leading French dramatists and printed in the *Revue Bleue* several years ago. Of local interest to British dramatists only are Mr. Calmour's statements as to the cost of giving an experimental matinée of a new play in which its author may have faith enough to assume the expenses of setting it before the public. This method is more often adopted in London than in New York, and has its advantages, as Mr. Palmer proved when he gave his series of authors' matinées at the Madison Square Theatre four or five years ago;

but Mr. Calmour's statements show that the cost of introducing a play to the public for a single performance varies from three to five hundred dollars. Thus we see how great a disadvantage the aspiring dramatist is at when compared with the aspiring novelist. Perhaps, however, it is as well that the beginner should not back with his own money his own judgment as to the merits of his play or his book, preferably waiting until a manager or a publisher happens along who can "see money in it."

The advice of Mr. Calmour is meant to be practical. The advice of "M. Sésosthène Rabichon" is meant to be ironic. The recipes for the theatrical kitchen which M. Germain has put into a little pamphlet are "wrote sarcastic." M. Germain is not trying to help the new dramatist, but merely to discredit the old dramatist, the trained theatrical hack who knows all the tricks of the trade. His method is the familiar one: "How to make a Bowery drama: Take a villain double-dyed and a virtuous hero. Add a heroine. Drop in abundant low-comedy characters. Mix to taste," etc., etc. In this spirit and in this manner M. Germain makes fun of the "curtain-raiser," of the *vaudeville à quiproquos*, of comedy, of melodrama, and of all the other forms of the drama as they survive in France to-day. His hand is light and facile, but his tongue is bitter.

Mr. Adams has given to his 'Book of Burlesque' a sub-title: "Sketches of English Stage Travestie and Parody," and he accomplishes his purpose in ten chapters, in which he first outlines the "Beginnings of Burlesque," the "Knight of the Burning Pestle," the "Rehearsal," Fielding's "Tom Thumb," Carey's "Chrononhotonthologos," the "Critic," and "Bombastes Furioso." This brings him to the pieces of pleasantry which Planché wrote, light, easy, witty. Then he traces the slow and steady descent to "The New Burlesque," to which his final chapter is devoted and for which the obvious criticism is that it is most lugubriously unfunny. The New Burlesque is to be seen at its brightest and best in "Little Jack Sheppard" and in "Faust Up to Date," and in "Joan of Arc" and in "Monte Cristo, Junior"—strange productions all of them, rarely humorous, often vulgar, and yet delighting the British public for hundreds and hundreds of nights. Mr. Adams gives extracts from the dialogue of these witless and artless pieces, and they are enough to make mankind blush that such sorry stuff should cause a laugh anywhere out of a lunatic asylum. That they should be offered to the readers of a volume purporting to belong to a "Library of Wit and Humor" is a strange thing; it casts a light on George Eliot's saying that "a difference of taste in jests is a great strain on the affections."

The Dunlap Society has now existed five years, and among the fifteen publications which it has issued, three a year, are reprints of four plays, Tyler's "Contrast," Burk's "Bunker Hill," and Dunlap's "Father" and "André." Among them there are also single volumes devoted to T. A. Cooper, Charlotte Cushman, John Gilbert, and W. E. Burton, besides the most useful series of theatrical biographies contained in the three parts of Mr. William Winter's 'Brief Chronicles.' But none of the publications of the Society is more interesting or in its way more useful than the two volumes of poetical addresses delivered in various American theatres since the first one was opened not a century and a half ago. The volume of 'Opening Addresses' was edited by Mr. Laurence Hutton alone, but in the preparation of the volume of 'Occasional Addresses' he has had the assistance of Mr. William Carey. The verses here gathered together in chronological sequence begin with a poem written by Myles Cooper in 1773, and end with one written by Mr. G. P. Lathrop in 1890. Among the other poets are Sprague, Woodworth, G. P. Morris, A. B. Street, R. G. Conrad, Henry Timrod, John Brougham, Dr. Holmes, Mr. R. H. Stoddard, Mr. William Winter, Mr. George H. Jessop, and Mr. T. W. Parsons. Like all the publications of the Dunlap Society, 'Occasional Addresses' has been printed at the De Vinne Press, with the elegant simplicity for which that press is well known.

M. Paul Ginisty's volume is a haphazard collection of theatrical estrays—reviews of books, some of them, and newspaper articles called forth by some incident of the theatrical season, and even sketches in dialogue. There are nearly a score of them, all neatly turned, all light reading, and some of them worth reading. The best of them, or at least those of most interest, are on a show given by the Compagnie des Sots, on Lenau's "Faust," and on Mme. de Beaumarchais.

M. Larroumet's volume of studies in the history of dramatic literature is a book of another sort altogether. It is made up of articles on Œdipus, on Molière and Marivaux, on Shakspere in France, on Beaumarchais, and on kindred topics, reprinted from the *Revue des Deux Mondes* and from the excellent *Revue Bleue*, all of them marked by solid knowledge and a charming style. Like M. Sarcey and M. Lemaitre, M. Larroumet is a scholar first of all, and, like them, he is intensely fond of the theatre. To him the drama is as a living thing which he loves; therefore he is always investigating its past and always curious as to its future. Perhaps to the general reader in the United States the most interesting of his papers is that on Shakspere, originally delivered as a lecture before the fifty-eighth performance of "Much Ado about Nothing" at the Odéon in 1888. Those among us who think that the Germans are the only foreigners who appreciate Shakspere might read this paper with advantage—and no doubt with surprise.

From the Arctic Ocean to the Yellow Sea. By Julius M. Price, F.R.G.S. Charles Scribner's Sons. 1892.

Records of Siberian travel can hardly, as yet, be considered a drug in the market, but they threaten to rival, in number and in the diversity of views which they express, the works of travel in Africa. Mr. Price accompanied the expedition to the river Yenisei which started from London in July, 1890, with the object of continuing Capt. Wiggins's experiment of 1887—the establishment of a direct line of commerce between England and Siberia through the Kara Sea. In spite of the two unsuccessful attempts to pass the ice, made during the summers of 1888 and 1889, the feasibility of this route may be considered as demonstrated by the trip of the *Biscaya*, on which Mr. Price sailed as correspondent of the London *Illustrated News*, provided a mild season and good fortune supplement the skill of the mariners. That it can never be relied upon as a great commercial highway seems to be proved with equal clearness. Mr. Price's graphic narrative of the dangers, difficulties, and peculiarities of the voyage to Yeniseisk demonstrate this, and remind us of the fact that gallant Capt. Wiggins and his companions on an earlier voyage were shipwrecked and forced to walk a very long distance, amid arctic cold and privations, before they reached help.

The book is founded on the correspondent's letters to the *Illustrated News*, and is, in substance, practically identical with them. Naturally, the reader expects a partisan discussion of the exile system as soon as the writer has fairly landed in Siberia, but all intention to furnish this is distinctly disavowed in the preface; and after noting the author's really impartial and sensible observations on other points which fell under his eye, we cannot refrain from placing a good deal of reliance upon his occasional remarks on the convicts and the system, although they do not coincide with many assertions which have previously been made. As an instance of his discrimination, even when he first arrives in the land and does not thoroughly grasp the situation, we may quote his experience in sketching and painting the peasant family at Kasanskoi. The man understood what was wanted of him, and sat quite rigid while Mr. Price sketched him, after having examined the cottage in detail without interference. When the artist spent the whole of the following day in painting the assembled family, the children were forbidden to talk loud or to go near him; every one went on with his occupations in a way to disturb him as little as possible; no one even showed any curiosity to see the result; and, to crown all, the peasant host prepared a repast of tea and cakes to refresh him in the afternoon. As he suggests, that sort of cavalier proceeding on the part of a stranger, in the midst of an English family, and that sort of treatment following, cannot be imagined. His error consists in attributing their conduct and their lack of curiosity to stolid indifference. Had this not been his first experience with a Russian peasant family, he would have recognized the fact that their conduct arose from inborn kindliness and courtesy.

On numerous occasions, the authorities, voluntarily or on request, furnished Mr. Price with complete facilities for inspecting prisons and prison hospitals. He remarks, after the first of these occasions: "So far as I could judge, the criminals of Siberia have little to complain of. They pass their forced seclusion in absolute idleness, if they so wish, for the work they do, if any, is voluntary. Eating and sleeping, they while away the time as best they can, like so many caged beasts." On another occasion, he notes the remarkable fact that the prisoners are allowed to keep their pet dogs, cats, and pigeons, and are at perfect liberty inside the prison walls. Educated men, who have occupied good positions, and are guilty only of forgery or of petty misappropriations, are not obliged to associate with common criminals, but, though they travel with the same gang, they are kept apart, and may travel in their own conveyance if they have the money to pay for it, and are provided with a room to themselves at the *étapes*.

There is much which deserves quotation, but one of the most significant passages, which cannot be omitted, is the following:

"How any writer who has actually seen a gang of criminal exiles on the march can describe it as a pathetic sight, beats me; and my only astonishment is that convicts of other countries are not also spoken of in the same sentimental way, for they are probably worse off than Siberian criminals, who, as a matter of fact, have a much better time of it, *considering their crimes*, than they would have anywhere else, barring, of course, the trifling discomfort of

having to 'foot it' the whole distance if they are able. If they are footsore or lame, they are permitted to ride on one of the baggage conveyances. The more I learn about the prisoners' life, either on the road or in the *ostrogs* [prisons], the more astonished I am at the humane way in which they are treated, and how little is really known of it in the outer world. I am not referring to the system as a whole, which I am not only convinced is a wrong but a demoralizing one, but to minor details, which show a kindly feeling on the part of the authorities which is somewhat unexpected. For instance, all Jews or Mohammedans receive ten kopeks per day, both on the road and when in prison, so that they can purchase their own food and have it cooked according to their belief, the food and cooking being looked after by one of their own religion deputed by themselves. In a country where it is said that the Jews are so persistently persecuted by the authorities, this comes as rather an astounding revelation, in my opinion. I know nothing whatever about prison life in England, but I am anxious to know whether we treat our convicts in the same way. Political prisoners never march [unless they wish to do so], but are conveyed on telegas or sledges, according to the season, and always follow some distance behind the criminals, with whom they are never associated. [As to this last particular, Mr. Price agrees with the report of another English traveller in Siberia, Mr. de Windt.] For these 'unfortunates,' when not criminal ones, all one's sympathy is due; but the canaille marching on ahead, and who are thus most *en évidence*, in most cases richly deserve more than their fate, and ought to thank their lucky stars that they are Russian and not English convicts."

He also records that prisoners are allowed to work in prison for their own benefit, and describes the result of his getting some cigarettes made by one of them. Having made the discovery that "that most complete device for heating a house that was ever devised, the Russian stove, robs the Siberian winter of many of its terrors," that his thick flannels are intolerable, and that a single thin blanket is sufficient at night, he sensibly applies his observations to the prison rooms of the étapes, and argues that as "the heating arrangements were so complete, no covering was necessary" on the bare sleeping platforms. In the Irkutsk prison he found many men working at all sorts of trades, and working cheerfully. One man, an artist, had been allowed to fit up his solitary-confinement cell as a studio, and to paint what he pleased, and another executed orders for portraits and sacred images. The author remarks that this is permitted pending their sentence (they had already been convicted), but the artist added, with a smile, that "they would probably be able to do a little even at the mines if they behaved themselves." In Kiakhta he found an artist, a political exile under a long term of banishment, who showed him a mass of sketches relating to prisoners' life (a couple being reproduced in this volume), which the man had made during his long march across Siberia. "I could not help being strongly impressed," says Mr. Price, "with the idea that a system which would allow a prisoner to beguile the tedium of the march by following his artistic proclivities cannot, however faulty its theory may be, in practice be so cruelly *disciplinaire* as many would have us believe." Another fact worth noting, in view of the capital made by two recent travellers in Siberia of the filth of the post-houses and the hardships of the journey and the cold, is Mr. Price's praise of the general cleanliness of these houses, and the pleasure and comfort of the journey, except in one or two instances.

Although the author's English is slipshod at times, his book is very interesting, and his illustrations are profuse and good. The portion relating to Siberia is of the most importance, his description of the trip across the Desert of Gobi and China to Pekin being much inferior to Mr. de Windt's record of his journey over the same ground. It is evident, however, that Mr. Price was more favorably impressed with the manners of the wealthy Siberians than was Mr. de Windt, and the question naturally occurs to the reader: Does not this arise from the fact that they met different classes of the rich?

The Kansas Conflict. By Charles Robinson, late Governor of Kansas. Harper & Bros.

MANY have essayed to write the history of the Kansas conflict, but it has not yet been so well done that we can feel that none need make another trial. The earlier annalists were too near to the events to see their relative significance, and they trusted to vague rumor for much that subsequent investigation has entirely changed. Prof. Spring's 'Kansas,' in the series of State histories, was clearly an advance upon its predecessors, but the narrow limits of a single small volume cut off the author from those modifications and elaborations in which the truth of history resides. With Mr. Sanborn the Kansas conflict was but an incident in the personal history of John Brown; and his conception of the stout old Puritan as a person supernaturally inspired and sent was not favorable to a judicial estimate of his part in the general work, though it made it easy for him to accept the facts of Brown's connection with "the Pottawatomie executions" without the least misgiving. But Mr. Sanborn's rendering of the Kansas business was far from satisfactory to many who were concerned in it, and especially to two of the principal actors, the Hon. Eli Thayer, who made a splenetic deliverance two years ago, and the Hon. Charles Robinson, who has now stirred up his pure mind by way of remembrance and brought many strange and doleful things to light. There is much similarity in the temper of Mr. Thayer's book and of Mr. Robinson's. Each glorifies its author's name above all others; each spends most of its force in belittling persons who have been supposed to have something to do with freedom in Kansas and America; each is unsparing of its praise of the great hero of the other. "Without Eli Thayer the emigrants would not have come, and without Charles Robinson it would have been in vain that they did come." These words of the introduction are the common thesis of the two books, and it is maintained with ardor in them both. Thayer finds in Robinson "majesty of mind and humility of heart, stern justice and tender sympathy, heroic will and sensitive conscience, masculine strength and maidenly modesty, leonine courage and womanly gentleness," etc., etc., and Robinson's admiration of Thayer is almost equal to his own: "There was but one such in the nation"; a "David who seemed ready to challenge single-handed the Goliath of slavery"; his "broad, calm brow loomed up" at Emigrant Aid Company meetings with unrivalled splendor. The relations of Profs. Stubbs and Freeman were not more cordial when,

> "——ladling freely from alternate tubs,
> Stubbs buttered Freeman, Freeman buttered Stubbs,"

than those of these compatriots.

But for all the likeness in their books, there is much difference. The objects of their scorn are different. Thayer's are the Garrisonian abolitionists. Robinson's, too, are these, but they are much more violently John Brown and Jim Lane, for whom Thayer also had great contempt. Everything is relative, and in praising Robinson's modesty Thayer was, perhaps, thinking of his own, in comparison with which Robinson's is immense. Not only does it express itself in his exclusive use of the third person singular in speaking of himself, but in a meagreness in the account of his own doings so remarkable that no one would ever suspect from his narrative that he was the man described by Mr. Thayer or the man he actually was. For he was, unquestionably, a very prominent and strong and useful man in the Kansas conflict, second to no other on the ground. But torn asunder between a natural modesty and a nervous anxiety for his reputation, he has wasted his strength in crying others down when a perfectly simple account of the conflict would have shown his *magna pars* in its true light.

A history of Kansas written nearly thirty years ago describes Robinson as made "peevish" by his hard experiences in the civil war, when Lane was preferred to him at Washington. The course of subsequent events has not restored him to his better self. Especially have the histories of Messrs. Sanborn and Thayer aggravated his self-consciousness and increased his vanity and irritation. He has, too, done more to make the Kansas conflict appear poor and mean and sordid than any one else has done or could do. Some of us have thought of it as a conflict in which high courage was involved, and noble generosity; and doubtless it was so, but it is hard to keep the faith while reading these chapters of bickering and recrimination. Every baser element is insisted on with wearisome iteration. If Robinson is to be trusted, the only virtue of the Free-State party was in its Fabian inaction, its refusal to lift a hand against the national Government or the national troops. The wisdom of such virtue was, perhaps, justified of her children, but it was not of a strain to quicken any generous ardor in the reader's breast, especially as it was associated with a hatred of the slave as great as, or even greater than, the hatred of slavery. The proportion of the Free-State party that was in favor of excluding free negroes from the Territory was always large. Gov. Robinson was not one of the negro-haters. In his passion for political equality for all races and both sexes, he came perilously near the sentiments of the abolitionists. But he was an eager politician, and the amount and quality of the politics of the unhappy Territory were melancholy features of the time.

Whatever Robinson's ability to lead the Free State party and to hold it to the policy of passive obedience to the Federal Government, his ability to write an interesting and instructive book about the things he saw and was a part of, is extremely small. One would not believe in advance that the story of events so stirring and important could be made so miserably dull. There is no clearness in the narration, and, if one does not know in advance the order of events, to disentangle it from these fragmentary chapters will be no easy matter. Forty pages are intruded about the author's life in California, which was an excellent preparation for his life in Kansas, but deserving of no such extended exhibition. Contemporary journalism is largely drawn upon, so largely that our sense of relationship with the author (if he should not be called the editor) of the volume is not a constant quantity. Orderly arrangement of his material there is none; for dates he has a great indifference, and the details of printing second the general negligence of his work: for example, the name of Andreas, whom he is always quoting, is written Andrea's in the possessive case oftener than not. But

the worst enemies of Gov. Robinson's historic sense are John Brown and Jim Lane; and Sanborn and Redpath and others who have spoken well of these. Let them come upon the scene, and the course of his narrative is forgotten while he goes off in a fresh tirade against them. His estimate of Lane's moral character is fair enough, but he does no justice to his picturesqueness. A character in which the elements of cowardice and of bravery were so strangely mixed, a man who had so much influence upon others, and so little government of his own spirit, of such fantastic dress and startling speech, with such a varied course and such a tragic end, would be a perfect godsend to an historian able to pounce upon his own with the unerring instinct of his art. For Gov. Robinson, Lane is little more than his personal rival, and all the dramatic possibilities of his wretched career are simply thrown away. That Lincoln, in his mistaken apprehension of Lane's character, favored his ambition in the civil war, is to Gov. Robinson a sufficient reason for putting him in the same pillory with Lane and Brown, and invoking for the three the universal scorn:

"One of these men, not receiving the punishment due for his crimes in Kansas, sought to inaugurate a servile war, the most revolting of all wars, and suffered the penalty prescribed by law. Another was overtaken in his crimes, and executed himself; while the third, although glorified for his proclamation freeing the slaves of the South, has the lustre of his fame and name terribly tarnished by his conduct of the war in the West, if not in the East."

Between Gov. Robinson and John Brown there was no such political rivalry as that between himself and Lane to fill up the measure of his hate, and still it does not lack for copious addition. With Brown alive he had no trouble; it is Brown's fame as one of the liberators of Kansas that infuriates his mind, and resolves him to destroy "the laurels of Miltiades" at whatever cost. So far as he succeeds, he does so at the cost of his own character for intelligence and discrimination. Many of Brown's friends were long in coming at the facts concerning the Pottawatomie massacre. Gov. Robinson was not one of these. As late as 1878 he wrote:

"I never had much doubt that Capt. Brown was the author of the blow at Pottawatomie, for the reason that he was the only man who comprehended the situation, and saw the absolute necessity of some such blow and had the nerve to strike it."

He now contends that the testimony of one Townsley, which Mr. Sanborn calls "true in the main," shows that the Pottawatomie victims were not deserving of their death. If that was so, Gov. Robinson's late discovery of the fact is most remarkable. But that does not affect "the absolute necessity of some such blow." Gov. Robinson now attempts to show that the blow did only harm, stirring up the pro-slavery party to make terrible reprisals. His late opinion here is no sufficient offset to the conviction held for a period of thirty years. He writes as if the disposition of the Missourians had been most amicable, when in fact the sack of Lawrence had happened within a few days. His whole recollection of the purpose and the meaning of events has been distorted by the necessity of depreciating John Brown's character and work in order that he may magnify his own.

Our Life in the Swiss Highlands. By John A. Symonds and his daughter Margaret. London: Adam & Chas. Black; New York: Macmillan. Pp. 366.

FOURTEEN years ago Mr. Symonds wrote for an English magazine an article on "Davos in Winter," in which he sang the praises of his dwelling-place as a resort for sufferers from lung disease. He dwelt on the fact that in this Alpine village, where the thermometer frequently falls to 10° to 15° below zero, "the most sensitive invalids can drive in open sledges with impunity, expose themselves without risk to falling snow through hours of exercise, or sit upon their bedroom balconies, basking in a hot sun, with the world all white around them, and a spiky row of icicles above their heads." At that time the cure of lung disease by Alpine air and sunshine was hardly known in England, and when Mr. Symonds resolved to go to Davos, his doctor replied that if he wished to leave his carcass to the Davos doctors, that was his affair; he had warned him. But Mr. Symonds went, and the result was that he who had, ever since he left school, never remained more than three months in one place, being always in search of a change of air for his health, made thenceforth his home in Davos, to which he has clung to this moment—the epilogue to his book is dated "Davos Platz, Feb. 13, 1892." Under the conditions described not only he has found health, but "the marvellous brain tonic of the mountain air" has enabled him to write about twenty-five books in prose and verse, notwithstanding the distance from literary centres and libraries.

Mr. Symonds, however, as he tells us on page 284, considers life itself a much graver and more important affair than literature, which is simply "an honest, healthful, harmless pastime." Accordingly he has little to say, even in the chapter "A Page of My Life," about his pursuit of literature or health, but devotes himself chiefly to a description of the numerous interesting phenomena which Switzerland presents during that time of the year when the tourists avoid it. Being an invalid, he cannot, of course, thrill the reader wi h narratives of dangerous mountain ascents, like Tyndall or Whymper; still, the description of a midnight journey through the ice and snow of a dangerous mountain pass, when even the driver reproached him for having ever undertaken it, and various other incidents, show that it was not a lack of courage, but a lack of lung power alone that prevented him from following in the footsteps of those famous climbers. The chapters contributed by Miss Symonds, including one on "Tobogganing on a Glacier," and another describing the still more dangerous feat of tobogganing down a snowfield on a bale of hay, show good descriptive power, and a courage that one would hardly expect of any one of her sex but an Englishwoman.

Mr. Symonds has many interesting facts to relate at first hand about the various kinds of avalanches, and about the Föhn wind, which the Swiss call the Schneefresser, or snow devourer, and which is no longer regarded as the sirocco of the Mediterranean coming heated from African deserts, but is believed to be generated in the upper regions under special atmospheric conditions. There are also a number of short sketches of mists, clouds, mountains, and valleys, interspersed with mountain-made sonnets, odes, and anecdotes. Hotel life is only casually dealt with, except in a sort of romance, "The Life of a Swiss Porter," which explains how those functionaries succeed in acquiring so many foreign languages, and finally work their way up to the position of head porter, which is worth $500 to $1,000 a year, although the porter never receives a salary, and often has to pay $150 or more for his place. Strange to say, Mr. Symonds approves of the tipping system which brings about this anomalous state of affairs; but his reasoning on this subject is the least convincing thing in his book.

BOOKS OF THE WEEK.

Austen, Jane. Mansfield Park. 2 vols. Boston: Roberts Bros. $2.50.
Bardoux, A. La Jeunesse de La Fayette. Paris: Calmann Lévy; New York: Christern.
Bates, Arlo. Told in the Gate. Boston: Roberts Bros. $1.25.
Black, W. Madcap Violet. Harpers.
Bosanquet, Bernard. A History of Æsthetic. London: Sonnenschein; New York: Macmillan. $2.75.
Cheal, J. Practical Fruit Culture. London: George Bell & Sons; New York: Macmillan. 75 cents.
Cobb, A. G. Earth-Burial and Cremation. Putnams. $1.
Dolbear, Prof. A. E. Matter, Ether, and Motion. Boston: Lee & Shepard. $1.75.
Duffy, Sir Charles G. Conversations with Carlyle. Scribners. $1.75.
Fletcher, L. The Optical Indicatrix, and the Transmission of Light in Crystal. Macmillan.
Handley Cross; or, Mr. Jorrocks's Hunt. London: Bradbury, Agnew & Co.; Philadelphia: J. B. Lippincott Co. $2.25.
Harrison, Mrs. Burton. Flower de Hundred. Cassell. 50 cents.
Heard, John, Jr. A Charge for France, and Other Stories. Harpers. 50 cents.

Johnston, C. F. H. The Book of St. Basil on the Holy Spirit. Oxford: Clarendon Press; New York: Macmillan.

Fine Arts.

LINTON'S MASTERS OF WOOD-ENGRAVING.

SINCE Mr. Linton ceased from the practice of wood-engraving, some thirteen years ago, he has devoted much time to investigating the history of his craft. We take our date from his paper on "Art in Wood-Engraving" in the *Atlantic Monthly* for June, 1879. This was followed in the same year by a small book entitled 'Some Practical Hints on Wood-Engraving'; in 1882, by the 'History of Wood-Engraving in America.' To write in his leisure a general history, was a task imposed upon him by his personal intimacy (if we may use the expression) with much of the material for such a work. Bewick died in 1828, the very year in which Linton was apprenticed. How fresh everything pertaining to the great "north country master" must have been at this time. But Mr. Linton could also write of what John Thompson may have said about "developments" that were debasing the art in his day, and could report personally of Harvey, S. Williams, Powis, Orrin Smith, and numerous other notabilities who composed, with Mr. Linton himself, the great English school of woodcutters of two generations ago. He was, in fact, included by Chatto—in Jackson's 'History of Wood-Engraving' (1838)—under the caption, "The English wood-engravers now living who, next to Charlton Nesbit and John Thompson, seem best entitled to honorable mention"; and for a full half century since that date he has more than maintained that distinction. All this constituted a pressing, an authoritative call to produce the work before us.* In form it is a small folio, with an ele-

*'The Masters of Wood-Engraving.' By W. J. Linton. New Haven: The Author; London: B. F. Stevens.

gantly simple exterior—heavy covers, in olive-tinted linen, devoid of ornament other than the title in gold. Within we have antique paper and type, the letter-press and illustrations filling 215 pages, and being both provided with indices. The edition is of course limited—to five hundred signed and numbered copies, of which one hundred are on large paper.

Mr. Linton says in his preface:

"Want of any treatment of Wood-Engraving in a manner satisfactory to an engraver is the reason, and may be sufficient occasion, for my book. It is as an engraver and not as a bibliographer that I write. My purpose is not so much to give account of books in which engravings on wood have appeared, as to collect together the finest examples of the art, and to give its history through the exhibition of its Master Works."

After having had free access to the British Museum and other depositories of original prints, Mr. Linton still acknowledges a large indebtedness to Chatto; yet in reviewing the field of his predecessor's research, his own practical experience as an engraver enables him to throw fresh light upon the several topics, detecting a blemish here, and there bringing out a hidden lustre. This exhibition is arranged under three general heads, viz., Knife-work, Graver-work, and Chiaroscuro, the last alone being without subdivision into chapters, and all being accompanied with marginal notes, occasionally illustrated. In the first chapter, on "The Beginnings of Engraving," Mr. Linton goes over familiar ground with independent judgment. Because of the absence of connections for holding the interior portion in place, he discredits the production of monograms like those of Theodoric and Charlemagne from stencils rather than from engraved stamps. In the chapter on "Saints and Playing-Cards," discussing the priority of saint-pictures [*Helgen*] and cards respectively, he writes:

"Taking into consideration all the material for judgment I have been able to collect together, I subscribe to Chatto's conclusion, and cannot but believe that monastic leisure and ability first found opportunity for employment of woodcuts in the service of religion, and that the wage or profit to be had for an article of commerce in growing demand would be the later temptation of the card maker."

Mr. Linton objects, with reason, to judging of the relative antiquity of early prints by the quality of their execution, as the difference may well reside in the skill of the respective workmen. His second chapter is devoted to the "St. Christopher" of 1423, which passes for the earliest authentic woodcut, and "affords a specimen of the combined talent of the *Formschneider*, or wood-engraver, and the *Briefmaler*, or card-colorer." A full-page reproduction of this famous cut serves as a frontispiece to the book, and appears to have been colored, like the original, by hand. It is as near a facsimile as it were possible to give of every detail of every line, showing clearly the traits peculiar to knife-work. In the text the "Brussels Virgin" is introduced before a small copy of the "St. Christopher," as if by way of conceding its claim to priority. The former print was discovered in 1844 and bears the date 1418, but there are evidences of its having been tampered with. The "Annunciation," which was found pasted inside the cover of a manuscript volume with the "St. Christopher," is here reproduced in miniature, along with the "St. Bridget" and the "Berlin Virgin"—both these last, as well as the "Brussels Virgin," being unknown to Chatto.

"These prints may be taken as samples of a numerous series of pictures, popular in the early part of the fifteenth century, perhaps earlier; all of the same character, little varying—altogether unvarying so far as the engraving is concerned. At first only pictures of Saints and Martyrs (illustrations of Bible story came later), they served as pious reminders, and, carrying out a precept of St. Gregory, filled the place of tracts or books to the illiterate multitude."

The Block Books, cut on planks in the manner of the *Helgen*, are next fully shown. Besides many illustrations of detail, there is a reproduction of an important page in each case. The 'Speculum Humanæ Salvationis' is, owing to the apparent use of movable type in connection with it, treated by itself. Comparison is afforded between different prints of the same subject as an aid to determining which is original and which a copy. Qualities of drawing, in Mr. Linton's view, should here outweigh clearness of print. On the debatable ground between wood and metal, we are introduced to the Alphabet in the British Museum, the 'Speculum Humanæ Salvationis,' the Brydenbach title-page, the 'Hypnerotomachia Poliphili,' and a title-page from the 'Heures à l'usage de Chartres' by Simon Vostre (about 1502). The pictures for which the last-named stands as representative, are very refined and beautiful; they display a new treatment in the "killing" an otherwise solid or black surface with *criblé* or dotted work. It has been assumed that these were "the finest possible specimens of early wood-engraving"; but evidences of the use of a stamp in producing the dots determine for our author that they were done on metal after the manner of wood-engraving.

It is a surprise at first to find under the head of Jerome of Nuremberg the work usually attributed to Albert Dürer, and Holbein's under the head Lützelburger. The engravings of Jerome from Dürer's drawings here given are a full-page each of the Holding of the Winds from Dürer's "Apocalypse," the Flight into Egypt from the "Life of the Virgin;" Ecce Homo from the "Greater Passion," and four from the "Triumph of Maximilian." Another page print is "St. Jerome in Penitence," after Cranach. Lützelburger is represented by a number of small engravings after Holbein, principally from the "Dance of Death." They are marvels of exactitude and delicacy in facsimile cutting. It is interesting to study these masterpieces of early craftsmanship so familiarly, and in reproductions so convincingly faithful as to inspire almost the same reverence as the original impressions. Paper and type, too, are in admirable consonance with all this *Formschneider* work; but often the heliotype has been resorted to as conveying better the delicacy of old prints together with the primitive conditions of paper, ink, and press-work—*e. g.*, in the case of the 'Ars Moriendi' and the 'Biblia Pauperum.' Or again, a like imitation has been effected with some of the smaller cuts by printing them on India paper and mounting them in the letter-press. The refinement thus achieved is the appearance of age. The concluding chapter on Knife-work ("Altdorfer to Papillon") contains brief notices of a number of little known and not highly esteemed artists, though Mr. Linton has a good word for Papillon as workman and as author of a "most exact and complete account of engraving with the knife, the method of execution, and all that could be wanted for its instruction."

"Graver Work" brings us in the second chapter to Bewick, from whose 'Fables,' 'Quadrupeds,' and 'Birds' a number of illustrations are selected, and a full page is assigned to the cut entitled "Waiting for Death." These reproductions are far from doing justice to the genius of the father of modern wood-engraving, either because of the paper or because the resources of the pressman were not availed of as they might have been; a fact much to be regretted. Bewick's pupils are treated of in the chapter headed "Clennell and Nesbit," with the exception of his favorite Harvey, who is displaced to reappear in a later chapter—not, however, in token of Mr. Linton's depreciation. Of the "Assassination of Dentatus," our author declares that "it is not only a daring but a really magnificent and unequalled work. . . . This one engraving . . . would entitle Harvey to rank, if not among, yet closely to, our greatest." Branston and Thompson have a chapter with extensive illustrations, which suffer in the same way as Bewick's. Some of Thompson's cuts occur in a copy of the *Westminster Review* for August, 1838, which lies before us, and are beautifully printed, whereas in the 'Masters of Wood-Engraving' there is about them the lack of clearness that suited very well the old, faded-out work of the *Formschneider*. A similar comparison holds good between the clear, bright prints of the Arch of Titus by S. Williams, and Nineveh by Powis, in the *Westminster* collection, and the blurred, unsatisfactory prints in the 'Masters' (chapter "Aftermath"), notwithstanding the India proof. Powis's cut is subsequently referred to by Mr. Linton in controverting Hamerton's appreciation of American wood-engraving: and certainly there is nothing better in what Mr. Linton calls "the American development," nor anything so very different. To represent Orrin Smith, we wish he could have chosen the picture "Elba" in the *Westminster*, instead of the "Thibet Dog." As we recollect Smith's work, he was preëminently a landscape engraver of great excellence, rather than one who "excelled in animals."

The second division of the 'Masters' closes with the chapter "In the Winter," and here Mr. Linton has assigned him elf a place—too low, it might be deemed, and ill-supported by his choice of illustrations from himself: we doubt if a better example of the "near-enough" facsimile "which a well-trained Chinese rat would gnaw out with more nearness," could be found than his Edwin Booth in "Don Cæsar." The page of facsimile by Kretzschmar is unworthy of insertion in a collection of masterpieces. The portrait of Ludwig Richter, excepting the head, which closely resembles Mr. Linton's own manner, is not remarkable engraving. The portrait of Delacroix by Seriakoff is in contravention of all Mr. Linton has had to say about simplicity, being a mere imitation of the effects of copperplate. It is very doubtful, too, if many will share the opinion that Pannemaker is the exponent of a large class of French work; or that Jonnard's work "is of the best"; or that Ligny may be singled out from all the great engravers of Doré, while Pisan ("the Linton of France") deserves no mention. Neither can we see a reason for the "American development" being lugged in here without being allowed to speak for itself in black and white. In this part of his subject Mr. Linton is too near for historical perspective; but to discuss the question with him would lead us too far.

The concluding section, "Chiaroscuro," has reference to pictures produced by a printing from several blocks or metal plates engraved in relief. They are interesting, but of no great account. A page reproduction is given of "Adam and Eve" by Hans Baldung Grun (1511), in two printings.

Schools.

COLLEGE FOR WOMEN.—THE FINEST winter resort in the South; the most beautiful grounds of any boarding-school in the Union. Appointments of Boarding Department first-class in every respect. Advantages in Music, Art, and Literary Departments unsurpassed. For catalogue, apply to the President.
Rev. W. R. ATKINSON, D.D., Columbia, S. C.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classic National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.
For references and circular address
MRS. E. L. HEAD, Germantown, Pa.

THE BOSTON SCHOOL OF ORATORY.—The Leading School of Expression in America. First to teach the system of Delsarte. Send for catalogue to MOSES TRUE BROWN, M.A., Boston, Mass.

Teachers, etc.

A RECENT FELLOW IN PRINCETON College, with thorough knowledge of French and German, wishes to take under his charge one or two young men, for *travel or study in Europe*, during next summer. Address F. & G., *Nation* office.

CHARLES W. STONE Tutor for Harvard, 68 Chestnut Street, Boston.

School Agencies.

THE SCHOOL AND COLLEGE BUREAU, Elmhurst (Chicago), Ill., recommends Professors, Specialists, and Teachers for all departments of instruction. No charge to colleges and schools. Best service guaranteed. Correspondence solicited.

JUST PUBLISHED:

OUTLINES of RHETORIC.

By Prof. J. H. GILMORE, Rochester University.

Leach, Shewell & Sanborn,

NEW YORK, BOSTON, CHICAGO.

Dole's American Citizen.

Treats the duties of citizenship, and shows from the life of the playground, schoolroom and home, how governments grow and why they impose obligation.

This book goes to the heart of the boy and makes him feel his manhood. It stimulates his patriotism, not by glorification of the country he lives in, but by showing him what he owes it.

Cloth, 320 pages. Sample copy, 90 cents.

Published by D. C. HEATH & CO.,
BOSTON, NEW YORK, CHICAGO.

EUROPEAN SUMMER AND WINTER Resort, University town of Innsbruck, Tirol, Austria; 1,900 feet above the sea, with dry, bracing climate. Hotel Tirol, open all the year, Carl Landsee, Proprietor. Large, airy, sunny rooms, well furnished. Elevator. Superior cuisine (table d'hôte or à la carte). Reduced rates in winter. Carriages and sleighs at low rates. Charming excursions made from the hotel at all seasons. Unusual advantages for securing teachers of the languages, history, science, art, music, etc., at very moderate terms. Eminent medical care and skilled nurses if desired. Best English and American references. Illustrated pamphlets sent on application.

G. P. Putnam's Sons,

27 and 29 West 23d St., New York,

HAVE READY THIS WEEK:

Journeys in Persia and Kurdistan, including a summer in the upper Karun region and a visit to the Nestorian Rayahs. By Mrs. ISABELLA BIRD BISHOP (Miss Bird), Honorary Fellow of the Royal Scottish Geographical Society, author of 'Six Months in the Sandwich Islands,' 'Unbeaten Tracks in Japan,' etc., etc. Two volumes, fully illustrated, 8vo, $6.50.

"The letters of which these volumes are composed embrace the second half of journeys in the East, extending over a period of two years. They are believed to be a faithful record of facts and impressions, . . . and I hope that my book may be accepted as an honest attempt to make a popular contribution to the sum of knowledge of a country and people with which we are likely to be brought into close relations."—*Extract from Author's Preface.*

A Selection from the Discourses OF EPICTETUS; with the ENCHEIRIDION. Translated by GEORGE LONG. (No. XXXV in the Knickerbocker Nuggets Series.) $1.00.

School Trustees,
Principals,
Teachers,

And others interested, are invited to consider the advantages offered by the *Nation* as an advertising medium. School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

The *Nation*, in its special field of political and literary criticism, is unlike any other periodical, American or foreign. At least 10,000 copies are circulated weekly, but these figures do not accurately represent the number of its readers. It is taken by reading-clubs and literary associations in a large number of places and may be found on file in every library of importance in the country. There are probably few weekly periodicals whose columns offer so favorable an opportunity for reaching an audience interested in educational matters.

Advertising rates, 15 cents a line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12½ per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 208 Broadway, N. Y.

A Tonic

HORSFORD'S ACID PHOSPHATE.

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

Dr. EPHRAIM BATEMAN, Cedarville, N. J., says:

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION: Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

Special collections formed, and fuller information supplied than from any other house. Books both old and new, and relating to any subject, can readily be supplied at very moderate prices.

Agents for Clubs, Libraries, and all private Collectors.

187 PICCADILLY, LONDON W.

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between

NEW YORK and GENOA, ITALY,

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals;

FULDA, Feb. 6, March 12
WERRA, Jan. 23, Feb. 27, April 2.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

S. B. LUYSTER,

The Nation

VOL. LIV.—NO. 1385. THURSDAY, JANUARY 14, 1892. PRICE 10 CENTS.

Public Library 28½92

BOOKS OF HISTORY

By JOHN FISKE.

The American Revolution.

With Plans of Battles and a new Steel Portrait of Washington from a miniature never before reproduced. 2 vols., crown 8vo, $4.00.

The Beginnings of New England;

Or, The Puritan Theocracy in its Relation to Civil and Religious Liberty. Crown 8vo, $2.

The Critical Period of American History, 1783-1789.

With a Map and Bibliography. Crown 8vo, $2.00.

Speaking of 'The American Revolution,' the *Dial* of Chicago says: "Mr. Fiske's book ought to be in every high-school and college library in the country, and, indeed, bought and read by every one who can afford to buy books at all. There seems no human reason why it should not meet the coveted fate of Macaulay's history—that of supplanting for a week the latest novel from the circulating library on the dressing-table of the young woman of fashion, and it certainly merits the praise that Macaulay received 'for having written a history which workingmen can understand.'"

TEXT-BOOK OF ENGLISH HISTORY.

From the Earliest Times. For Colleges and Schools. By OSMUND AIRY, author of 'The English Restoration and Louis XIV.,' etc., etc. With 15 Maps, $1.50.

CHEMISTRY.

THE PRINCIPLES OF CHEMISTRY.

By D. MENDELEEFF, Professor of Chemistry in the University of St. Petersburg. Translated by GEORGE KAMENSKY, A.R.S.M., of the Imperial Mint, St. Petersburg, and edited by A. J. GREENAWAY, F.I.C., Sub-Editor of the Journal of the Chemical Society. 2 vols., 8vo, $10.00.

"This book is one of the Classics of Chemistry; its place in the history of the sciences is as well assured as the ever memorable work of Dalton. In it is developed the great generalization which is known under the name of the Periodic Law, a generalization which is casting a profound influence on the development of chemical research in all countries in which its study is actively prosecuted."

SOLUTIONS.

By W. OSTWALD, Professor of Chemistry in the University of Leipzig. Being the Fourth Book, with some additions, of the second edition of Ostwald's "Lehrbuch der Allgemeinen Chemie." Translated by M. M. PATTISON MUIR, Fellow of Gonville and Caius College, Cambridge. 8vo, $3.00.

"The work of translation, by Mr. Muir, is excellent. His style is clear and scholarly throughout. The accuracy of the translation is insured by the fact that Ostwald has revised the proofs of the English edition. This translation has appeared at an opportune moment. . . . The book can be heartily recommended to all who are interested in one of the leading scientific discussions of to-day."—*American Chemical Journal.*

PHYSIOLOGY.

AN INTRODUCTION TO HUMAN PHYSIOLOGY.

By AUGUSTUS D. WALLER, M.D., Lecturer on Physiology at St. Mary's Hospital Medical School, London, late External Examiner at the Victoria University. With 292 Figures in the Text, Bibliography, and Index. 624 pages, 8vo, $6.00.

TEXT-BOOK OF CHEMICAL PHYSIOLOGY.

Schools.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classic National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.

For references and circular address
MRS. E. L. HEAD, Germantown, Pa.

COLLEGE FOR WOMEN.—THE FINest winter resort in the South; the most beautiful grounds of any boarding-school in the Union. Appointments of Boarding Department first-class in every respect. Advantages in Music, Art, and Literary Departments unsurpassed. For catalogue, apply to the President.

MATTHEW ARNOLD IN THE "NINETEENTH CENTURY."

"The New York NATION—a newspaper which I read regularly and with profit, a newspaper which is the best, so far as my experience goes, of all American newspapers, and one of the best newspapers anywhere."

THE NATION,

an independent weekly journal, was established in 1865. Its contributors include the most prominent names in literature, science, and art, both in this country and abroad. It is emphatically found in the homes of people of culture and refinement. No intelligent American, desirous of keeping abreast of the best political and literary thought of the day can afford to be without it. Subscription price, $3.00 a year, postpaid.

"Excellent above any publication of the kind in this country."—*The Nation, N. Y.*

Garden and Forest

1892—Fifth Year.

Devoted to the scientific, practical, and beautiful in Horticulture, Landscape Art, and Forestry. Its contents are original throughout, of the highest literary character, and include descriptions of new plants, information and advice for in-door and out-door planting and cultivation, descriptions of country-seats, parks, and rural scenery, with vigorous editorial discussion of all subjects embraced in the scope of the paper.

"Its character is at once dignified and pleasing, and its contents are scholarly and scientific in the exact sense."—*Chicago Evening Journal.*

"Its arrival is the coming of a wise and intelligent and entertaining friend, who enables us to live more happily because more harmoniously with nature."—*Harper's Weekly.*

"The foremost journal of its class, keeping in touch with every advance in the scientific, artistic, and practical phases of horticulture and arboriculture."—*Boston Herald.*

Beautifully illustrated. Published weekly. $4 00 a year.

A Tonic

HORSFORD'S ACID PHOSPHATE.

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

Dr. EPHRAIM BATEMAN, Cedarville, N. J., says:

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION: Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between

NEW YORK and GENOA, ITALY,

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals;

FULDA, Feb. 6, March 12, April 16.
WERRA, Jan. 23, Feb. 27, April 2, May 7.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST. INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

EUROPEAN SUMMER AND WINTER Resort, University town of Innsbruck, Tirol, Austria; 1,800 feet above the sea, with dry, bracing climate. Hotel Tirol, open all the year, Carl Landsee, Proprietor. Large, airy, sunny rooms, well furnished. Elevator. Superior cuisine (table d'hôte or à la carte). Reduced rates in winter. Carriages and sleighs at low rates. Charming excursions made from the hotel at all seasons. Unusual advantages for securing teachers of the languages, history, science, art, music, etc., at very moderate terms. Eminent medical care and skilled nurses if desired. Best English and American references. Illustrated pamphlets sent on application.

ROYAL

BAKING POWDER

Absolutely Pure.

A cream of tartar baking powder. Highest of all in leavening strength.—*Latest U. S. Government Food Report.*

School Trustees, Principals, Teachers,

And others interested, are invited to consider the advantages offered by the *Nation* as an advertising medium. School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

The *Nation*, in its special field of political and literary criticism, is unlike any other periodical, American or foreign. At least 10,000 copies are circulated weekly, but these figures do not accurately represent the number of its readers. It is taken by reading-clubs and literary associations in a large number of places, and may be found on file in every library of importance in the country. There are probably few weekly periodicals whose columns offer so favorable an opportunity for reaching an audience interested in educational matters.

Advertising rates, 15 cents a line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12½ per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 208 Broadway, N. Y.

Schools.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classic National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.

For references and circular address MRS. E. L. HEAD, Germantown, Pa.

Teachers, etc.

A RECENT FELLOW IN PRINCEton College, with thorough knowledge of French and German, wishes to take under his charge one or two young men, for travel or study in Europe, during next summer. Address F. & G., Nation office.

CHARLES W. STONE, Tutor for Harvard, 68 Chestnut Street, Boston.

School Agencies.

NEW BOOKS.

LIFE IN ANCIENT EGYPT AND ASSYRIA.

By G. MASPÉRO, late Director of Archæology in Egypt and Member of the Institute of France. Translated by ALICE MORTON. With 188 Illustrations. 12mo. Cloth, $1.50.

"A lucid sketch, at once popular and learned, of daily life in Egypt in the time of Rameses II., and of Assyria in that of Assurbanipal. . . . As an Orientalist, M. Maspéro stands in the front rank, and his learning is so well digested and so admirably subdued to the service of popular exposition, that it nowhere overwhelms and always interests the reader."—*London Times.*

THE DOG IN HEALTH AND IN DISEASE.

By WESLEY MILLS, M.D., D.V.S., author of "A Text-Book of Animal Physiology," "A Text-Book of Comparative Physiology," etc. With colored plate, 38 full-page cuts, and numerous other illustrations. 12mo. Cloth, $2.25.

The author of this work has undertaken, in a clear, concise, untechnical way, to supply the large class of intelligent dog-owners and breeders, and veterinarians, with the information necessary for the proper care, management, and treatment of the dog in health and disease. His well-known reputation as a writer and lecturer on human and veterinary physiology, his special study of canine diseases, and his long experience as a breeder of dogs, insure a thorough and correct handling of the subject.

For sale by all booksellers, or will be sent by mail on receipt of price by the publishers,

MACMILLAN & CO.'S NEW BOOKS.

MRS. HUMPHRY WARD'S NEW NOVEL,

THE HISTORY OF DAVID GRIEVE.

BY MRS. HUMPHRY WARD.

Author of 'ROBERT ELSMERE,' etc. 12mo, cloth, $1.00. *Just Ready.*

"Ever since the announcement made last winter that the author of 'Robert Elsmere' had a new novel under way, expectation has been eager to know when it would appear and what title it was to bear. Mrs. Ward has shown herself to be a writer of incontestable genius. Her high enthusiasm for the moral elevation of the race has been at one with the artistic impulse that has guided her pen. Like George Eliot she has once more taught us that fiction, far from being a merely superficial representation of passing situations and emotions, may grapple with the greatest problems and teach men noble truths."—*Boston Beacon.*

An Important Contribution to History.

DARK DAYS IN CHILE: An Account of the Revolution of 1891.

By MAURICE H. HERVEY, Special Correspondent of *The Times*. With portrait and illustrations. $3.00.

The New York *Press:*

"In the book 'Dark Days in Chile' Mr. Maurice H. Hervey has made an important contribution to history. Mr. Hervey went to Chili as correspondent of the London *Times*. A man of independent thought and acute observation, he ascertained facts for himself, without permitting his judgment to be influenced by clamor and misrepresentation.

"Mr. Hervey shows clearly enough that the Chilian insurrection was an uprising of the so-called aristocracy against a President who represented liberal views and purposes, and the movement was sustained and advanced to success by foreign nitrate adventurers and foreign mercenary soldiers. Mr. Hervey frankly states that the only objection to Mr. Egan was the fact that the British in Chili could not tolerate him. The Chilian revolutionists seem to have succeeded chiefly in riveting a European collar upon the neck of their country."

The New York *Tribune:*

"It is not a dull book, since it is written in a racy, vivacious style, and it contains some striking illustrations of the naval operations and the battle scenes of the recent war in the west coast of South America; but it is preëminently a humorous work and serves to keep the reader in a constant state of amusement at the author's expense. The rank partisanship which vitiated the correspondent's despatches and exposed his journal to ridicule colors the recital of the causes and events of the war and deprives it of value as a contribution to contemporaneous history. He felt under obligations to make a careful study of the political controversy, to listen patiently to what everybody had to say, to form an independent judgment respecting the abstract merits of the case, and then to direct and influence English opinion. Aided by the official explanation given by Balmaceda and his ministers, the correspondent decided to incline in his despatches and letters to the side of the President."

Uniform with Bryce's "American Commonwealth."

THE PLATFORM: Its Rise and Progress.

By HENRY JEPHSON. Large crown 8vo. 2 vols. *Just Ready.*

Mr. Henry Jephson, private secretary to Mr. Forster and Sir G. Trevelyan, in "The Platform," begins with the days when an open meeting for discussion of public affairs was condemned as scarcely less than overt treason, traces the slow growth of political speechmaking and analyzes the elements in its development. To the student of politics this book should prove of great value and interest.

Uniform with "The Makers of Florence." $3.00.

JERUSALEM: The Holy City—Its History and Hope.

By MRS. OLIPHANT. Author of "The Makers of Venice," "Royal Edinburgh," etc. With 50 illustrations. Crown 8vo, cloth, gilt, $3.00.

"The beauty of romance is thrown about the bones of history with an art which is Mrs. Oliphant's own. It is beautifully interesting; nay, absorbing. It is a finished retelling of the history of that city dear to all who love the Holy Land and those who made it holy. This volume has the stamp of permanent value. A critical student, a mistress of the art literary, one seldom excelled in narrative power, with a deep reverence and love for the places and people revivified, Mrs. Oliphant is equipped as few others to tell the Story of Jerusalem from the days of David the Shepherd to the time of the crucifixion of our Lord."—*Boston Times.*

THE POPULAR SCIENCE MONTHLY

FOR FEBRUARY.

Personal Liberty. By EDWARD ATKINSON and EDWARD T. CABOT. An exhaustive research into the decisions of the courts concerning the right to regulate hours and modes of labor and methods of payment.

The Story of a Strange Land. (Illustrated.) By President DAVID STARR JORDON. A delightful account of how the hot-springs and lava-cliffs of the Yellowstone Park were formed, and what the finny inhabitants of its lakes and streams have experienced.

Urban Population. By CARROLL D. WRIGHT. Facts and figures about the increase of the slum population in cities.

Musical Instruments.—The Piano-forte. American Industries. XII. (Illustrated.) By DANIEL SPILLANE. Describes the development of the piano, and shows how this country has reached its high position in the piano manufacture.

OTHER ARTICLES ON

STILTS AND STILT-WALKING (illustrated); ELECTRICITY IN RELATION TO SCIENCE; NATIONALIZATION OF UNIVERSITY EXTENSION; IS MAN THE ONLY REASONER? AN EXPERIMENT IN EDUCATION, II.; HOMELY GYMNASTICS; NEW OBSERVATIONS ON THE LANGUAGE OF ANIMALS; RECENT OCEANIC CAUSEWAYS; THE UNIVERSE OF STARS; SKETCH OF WEBER (with portrait).

50 cents a number. $5.00 a year.

D. APPLETON & CO., NEW YORK.

D. Appleton & Co.'s New Books.

NOW READY:

THE THIRD VOLUME OF McMASTER'S HISTORY.

HISTORY OF THE PEOPLE OF THE UNITED STATES.

From the Revolution to the Civil War. By JOHN BACH McMASTER. To be completed in five volumes. Vols. I, II, and III now ready. 8vo, cloth, gilt top, $2.50 each.

"It is not a story of the Revolution, nor a dissertation on the science of government, but a history of the rank and file settled in the country from the days of their independence to the civil war. . . . It is even a more satisfactory work than Green's celebrated 'History of the English People,' as it is more exhaustive, not having so large a field to cover."—*N. Y. Journal of Commerce.*

"In choosing a title for his work, Prof. McMaster forecast its essential nature. He has written a history of the people and for the people. There is no hint of any pet scheme, theory, or deduction; no magnifying of political or social figures in disparagement of others."—*N. Y. World.*

"One of the most notable books with which the year opens. . . . The author's plan was to write a history of the people, treating indeed of the same events as have other historians, but approaching them from a different standpoint. This plan, so admirably carried out in the first two volumes, is executed with even increased faithfulness in the volume which has just appeared."—*Boston Traveller.*

NEW FRAGMENTS.

By JOHN TYNDALL, F.R.S., author of "Fragments of Science," "Heat as a Mode of Motion," etc. 12mo, 500 pages. Cloth, $2.00.

Among the subjects treated in this volume are "The Sabbath," "Life in the Alps," "The Rainbow and Its Congeners," "Common Water," and "Atoms, Molecules, and Ether-Waves." In addition to the popular treatment of scientific themes, the author devotes several chapters to biographical sketches of the utmost interest, including studies of Count Rumford and Thomas Young, and chapters on "Louis Pasteur: His Life and Labors," and "Personal Recollections of Thomas Carlyle."

EVOLUTION IN SCIENCE, PHILOSOPHY, AND ART.

A Series of Seventeen Lectures and Discussions before the Brooklyn Ethical Association, by Prof. JOHN FISKE, Rev. J. W. CHADWICK, Dr. LEWIS G. JANES, Prof. E. D. COPE, and others. 466 pages. With 3 Portraits. 12mo. Cloth, $2.00.

These popular essays, by some of the ablest exponents of the doctrine of evolution in this country, will be read with pleasure and profit by all lovers of good literature and suggestive thought. The principle of evolution, being universal, admits of a great diversity of applications and illustrations; some of those appearing in the present volume are distinctively fresh and new.

"The addresses include some of the most important presentations and epitomes published in America. They are all upon important subjects, are prepared with great care, and are delivered, for the most part, by highly eminent authorities."—*Public Opinion.*

THE HORSE:

A study in Natural History. By WILLIAM H. FLOWER, C. B., Director in the British Natural History Museum. The second volume in the MODERN SCIENCE SERIES, edited by Sir JOHN LUBBOCK. 12mo. Cloth, $1.00.

The first volume in this series was "The Cause of an Ice Age," by Sir ROBERT BALL, F.R.S., Royal Astronomer of Ireland. Others to follow are: "The Oak: A Study in Botany," by H. MARSHALL WARD, F.R.S.; "The Laws and Properties of Matter," by R. T. GLAZEBROOK, F.R.S., Fellow of Trinity College, Cambridge. The series is designed to meet the needs of the educated layman. Each book will be complete in itself, and, while thoroughly scientific in treatment, its subject will, as far as possible, be presented in language divested of needless technicalities. Illustrations will be given wherever needed by the text.

LOVE OR MONEY.

By KATHARINE LEE (Mrs. Henry Jenner), author of "A Western Wildflower," "In London Town," etc. No. 86, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"Beyond question a well-written and able novel."—*London Academy.*

For sale by all booksellers; or will be sent by mail on receipt of price by the publishers,

Schools.

SWITZERLAND, Lausanne.

*REV. CHARLES BIELER, HEAD-*Master of the College Galliard, and Madame Bieler, née Merle D'Aubigné, receive into their house a limited number of pupils, who follow the classes of the College. The Head Master's residence forms a part of the College buildings, which stand on high ground in one of the healthiest localities of Lausanne. A large playground and a gymnasium are attached to the house. The boys are expected to talk nothing but French.

The studies, health, and behavior of the boys are individually cared for, and the constant aim is to train them in the fear and love of God.

School fees £8 to £15, according to age. Board £72 per annum (summer holidays not included), to be paid in advance at the beginning of each term.

For further information address M. CHARLES BIELER, Place Chaudron, Lausanne.

Reference may be made to Richard Wood, 1620 Locust Street, Philadelphia.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures the Ecole des Beaux Arts, the Odeon Theatre, which is the Classic National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.

For references and circular address
MRS. E. L. HEAD, Germantown, Pa.

GERMANY, Berlin, 50 Königin Augusta Str,

*YOUNG LADIES' SCHOOL.—THO-*rough instruction in German, French, Music, Belles-Lettres, History, and the usual branches of education. Refers by permission to Hon. W. W. Phelps, U. S. Minister to Germany, Mrs. Murat Halstead, Brooklyn, N. Y., Mrs. Wm. D. Foulke, Richmond, Ind. Frl. HELENE REINBRECHT.

Teachers, etc.

CHARLES W. STONE Tutor for Harvard, 68 Chestnut Street, Boston.

School Agencies.

*THE SCHOOL AND COLLEGE BU-*REAU, Elmhurst (Chicago), Ill., recommends Professors, Specialists, and Teachers for all departments of instruction. No charge to colleges and schools. Best service guaranteed. Correspondence solicited.
Address C. J. ALBERT, Manager, Elmhurst, Ill.

*AMERICAN AND FOREIGN TEACH-*ers' Agency supplies Professors, Teachers, Tutors, Governesses, etc., to Colleges, Schools, and Families. Apply to
Mrs. M. J. YOUNG-FULTON, 23 Union Square, New York.

THE FISK TEACHERS' AGENCIES, 7 Tremont Place, Boston, Mass., 6 Clinton Place, N. Y., 106 Wabash Ave., Chicago, Ill., and 120½ South Spring Street, Los Angeles, Cal. 100-page Agency Manual free. EVERETT O. FISK & Co.

THE NEW AMERICAN TEACHERS' AGENCY.—Teachers seeking positions and those wishing a change at an increased salary, should address C. B. RUGGLES & Co., (Palace Hotel Building), Room C, 237 Vine St., Cincinnati, O.

AMERICAN AND FOREIGN Professors, tutors, governesses, teachers, etc., supplied to Colleges, schools, and families. MIRIAM COYRIERE, 150 5th Av., cor. 20th St., N. Y.

SCHERMERHORN'S TEACHERS' Agency. Oldest and best known in U. S. Established 1855. 3 East 14th St., N. Y.

*EUROPEAN SUMMER AND WIN-*ter Resort, University town of Innsbruck, Tirol, Austria; 1,900 feet above the sea, with dry, bracing climate. Hotel Tirol, open all the year, Carl Landsee, Proprietor. Large, airy, sunny rooms, well furnished. Elevator. Superior cuisine (table d'hôte or à la carte). Reduced rates in winter. Carriages and sleighs at low rates. Charming excursions made from the hotel at all seasons. Unusual advantages for securing teachers of the languages, history, science, art, music, etc., at very moderate terms. Eminent medical care and skilled nurses if desired. Best English and American references. Illustrated pamphlets sent on application.

STUDY AND TRAVEL.

Mrs. Benj. Fuller Smith announces that she will continue to receive into her family in Dresden, Germany, a limited number of young ladies desiring to study abroad.

Mrs. Smith travels with her party during the summer months and holidays.

Information concerning expenses furnished upon application. Trustworthy references given and required. Address Mrs. BENJ. FULLER SMITH. Care Messrs. Thode & Co., Bankers, Dresden.

HOTEL AURORA, RIVA DEGLI Schiavoni, Venice, long and favorably known by Americans, has been enlarged and refitted. It offers well warmed and sunny rooms for the winter, and at all seasons a position unequalled, excellent table, and willing service. Terms are moderate, and include servants' fees.

NEW EDITIONS ARE NOW READY

OF

Prof. Richard T. Ely's Works.

Problems of To-Day.

A discussion of Protective Tariffs, Taxations, and Monopolies. 12mo, $1.50.

"*No man in this country speaks with the same authority, or deserves more earnest attention.*"

The Labor Movement in America.

(Revised, with much new and valuable material added.) 12mo, $1.50.

"No one who wishes to understand the problems of labor and capital can afford to be without Professor Ely's work."—*Rochester Chronicle.*

Taxation in American States and Cities.

12mo, $1.75.

A work of immense research, and presents in a masterly manner the whole complex subject of taxation as well as the inconsistencies which prevail in parts of this country. The volume is made especially valuable by numerous and carefully compiled tables, showing the various methods of levying taxes and the comparative results in every State of the Union, and will appeal especially to tax-payers, lawyers, legislators, and all engaged in public affairs.

Social Aspects of Christianity

12mo, 90 cents.

Professor Ely has no respect for shams; he shows what Christian socialism is, and how wide the gulf is between the professed Christianity of many churches and the Christianity of the Gospel.

MACMILLAN & CO.'S NEW BOOKS.

NOW READY. PRICE, $1.00.

MRS. HUMPHRY WARD'S NEW NOVEL,

THE HISTORY OF DAVID GRIEVE.

BY MRS. HUMPHRY WARD,

Author of 'ROBERT ELSMERE,' etc. 12mo, cloth, $1.00.

"It has movement, interest, and conceptions of character not entirely based on relations to the other world. Often suggestive, and not seldom full of tenderness and beauty. If there be a prevailing note it is not so much thoughtfulness as human passion. She has to sum up many things in a sentence, that indefinable and irresistible charm which the best writers among women have, and the best writers among men never have, or almost never."—*N. Y. Tribune.*

"'David Grieve' is undoubtedly a stronger work than 'Robert Elsmere.' It is more condensed and shows more assured power. The characters are wrought out and expressed with remarkable intelligence and sympathy, and the scenes set forth with all the color and warmth of enthusiasm which the author exhibited in 'Robert Elsmere,' and in that instance served to carry to the popular heart themes and thoughts more elevated than usually form the subjects of popular novels. Quite apart from the great success that the new work will of course have, it is a literary performance of high and marked ability."—*N. Y. World.*

A NEW NOVEL BY CHARLOTTE M. YONGE.

THAT STICK.

BY CHARLOTTE M. YONGE,

Author of 'The Heir of Redclyffe.' 12mo, cloth, $1.00. *Just Ready.*

JUST READY. UNIFORM WITH BRYCE'S 'AMERICAN COMMONWEALTH.'

THE PLATFORM.

Its Rise and Progress.

BY HENRY JEPHSON.

2 vols., large crown 8vo, $4.00.

Mr. Henry Jephson, private secretary to Mr. Forster and Sir G. Trevelyan, in 'The Platform,' begins with the days when an open meeting for discussion of public affairs was condemned as scarcely less than overt treason, traces the slow growth of political speechmaking, and analyzes the elements in its development. To the student of politics this book should prove of great value and interest.

Religious Systems of the World.
A CONTRIBUTION TO THE STUDY OF COMPARATIVE RELIGION. 8vo, $4.50.

Tales and Legends
OF NATIONAL ORIGIN OR WIDELY CURRENT IN ENGLAND FROM EARLY TIMES. With Critical Introductions by W. CAREW HAZLITT. 8vo, $3.50.

THE DILETTANTE LIBRARY.

16mo, 90 cents each.

Browning's Message to His Time. By DR. EDWARD BERDOE. With a Portrait and Facsimile Letters. Second Edition, revised and enlarged.

Dante and His Ideal. By HERBERT BAYNES, M.R.A.S. With a Portrait.

Dante. By OSCAR BROWNING, M.A. With a Portrait.

Henrik Ibsen By the Rev. PHILIP H. WICKSTEED, M.A.

Goethe. By OSCAR BROWNING, M.A. With a Portrait.

BEAST AND MAN IN INDIA.

A popular sketch of Indian Animals in their relations with the people. By JOHN LOCKWOOD KIPLING, C.I.E. With numerous illustrations. 8vo, $6.00.

"'Beast and Man in India' is written with an agreeable sprightliness, and it is interesting to note here and there some phrase or collocation of words which plainly recall the manner of the author's famous son, Rudyard Kipling. A sure indication that a book is interesting is a longing for more on the part of the reader, and this is one of the impressions produced by Mr. Kipling's volume."—*N. Y. Tribune.*

DOD'S PEERAGE, BARONETAGE AND KNIGHTAGE

Of Great Britain and Ireland for 1892. Fifty-second Year. 978 pages. $3.75.

ENGLISH MEN OF ACTION.

NEW VOLUMES

12mo, cloth limp, 60 cents; uncut edges, 75 cents.

MONTROSE. By MOWBRAY MORRIS. | **RODNEY.** By D. G. HANNAY.

MACMILLAN & CO., 112 Fourth Ave., New York.

A Tonic

HORSFORD'S ACID PHOSPHATE.

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

Dr. EPHRAIM BATEMAN, Cedarville, N. J., says:

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

Descriptive pamphlet free.

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION: Be sure the word "Horsford's" is on the label. All others are spurious. Never sold in bulk.

(Now printed for the first time)

By Thomas Carlyle.

LECTURES ON THE

HISTORY OF LITERATURE.

Delivered April to July, 1838. 12mo, 300 pages, $1.00. Copyrighted.

A new classic is unexpectedly added to literature in the publication of this book. The lectures, twelve in number, were delivered in London in 1838. One of the lecturer's hearers took complete notes of the course, with the exception of one lecture, and these are now published for the first time, after careful editing and abundant annotation by Professor J. Reay Greene. The style is as unmistakably Carlyle as the sentiment, and the field covered is the whole course of literature from Homer to Goethe. In manner the lectures recall those on "Heroes," delivered two years later, and the inimitable Edinburgh address.

Two Happy Years in Ceylon.

By C. F. Gordon Cumming. With 19 full-page illustrations and a map. 2 vols., 8vo, $9.00.

"Pleasant and vivid pictures of the beautiful island, and of the occupations and industries of the people. The reader is cleverly kept impressed with the writer's sense of ever fresh enjoyment. The work should be as acceptable to the traveller as to the home reader."—*London Athenæum.*

The Real Japan.

Studies of Contemporary Japanese Manners, Morals, Administration, and Politics. By Henry Norman. With 70 illustrations from photographs taken by the author. Crown 8vo, $3.00.

"The book is intensely readable. It is the first impartial account of the social condition of the Japanese that has found its way into English."—*Boston Beacon.*

SECOND EDITION.

Japonica.

By Sir Edwin Arnold. Illustrated by Robert Blum. Large 8vo, $3.00.

"One of the most charming books. It abounds in grace and color and sympathy. To the charm of the text are added beautiful illustrations."—*Boston Times.*

THE SECOND VOLUME OF

Patrick Henry.

Life, Correspondence, and Speeches. By William Wirt Henry, with Portrait. Eleven hundred sets printed from type. 3 vols., 8vo, *net*, $12.00. Vols. I. and II. *now ready.*

Dr. Moses Coit Tyler to the author: "I believe that your method and tone in the book are just right, and that your work, when laid before the public in its entirety, will be to all students of our history a convincing proof of the greatness and patriotism of Patrick Henry, and will be an imperishable monument to his memory."

The Literature of France.

By H. G. Keene, of Oxford. 12mo, $1.00 *net.*

A popular presentation of the origin, development, and relations to each other of the various schools of French literature from the beginning of the nation to the present, forming a new volume in the University Extension Manuals.

*** Sold by all booksellers, or sent, postpaid, by*

CHARLES SCRIBNER'S SONS,

743-745 Broadway, New York.

Now Ready: A New Edition of

STORY'S EQUITY PLEADING.

Commentaries on Equity Pleadings and the Incidents thereof, according to the Practice of the Courts of Equity of England and America.

By Joseph Story, LL.D. Tenth Edition, Revised, Corrected and Enlarged, by John M. Gould, Ph.D., author of "The Law of Waters," joint author of "Notes on the United States Statutes," etc. One volume. 8vo. Law sheep. Price $6.00.

In preparing the present edition, *every effort has been made to keep this standard treatise on a plane worthy of its great reputation.*

The ninth edition cited 2,600 cases, and *in the tenth about 1,900 have been added, embracing all the more important cases from the Federal, the State, and the English Courts.*

The new edition of this work, in connection with the 13th edition of Story's Equity Jurisprudence, carefully edited by Melville M. Bigelow, may fairly claim to be fullest and best American authority on Equity.

IN PREPARATION:

THE STUDY OF CASES. A course of instruction in Reading and Stating Reported Cases. Comparing Head Notes and Briefs, Criticising and Comparing Authorities and Compiling Digests. By Eugene Wambaugh, Professor in the Law Department of the State University of Iowa. Crown 8vo. Cloth, $3.00 *net.* Law Sheep, $3.50 net.

COMMENTARIES ON SALES. By Jeremiah Travis. 2 vols. 8vo.

ROBERTS BROTHERS'

NEW BOOKS.

A CHEAPER EDITION.

The Story of the Glittering Plain.

Which has also been called the Land of Living Men, or the Acre of the Undying.

Written by William Morris. A new and cheaper edition, reset in modern type. 12mo. Cloth. Gilt top. Price, $1.50. Only a very few copies of the fac-simile edition remain unsold.

"We would bid all men that are good and strong, and all women that are loving and fair, to read this 'Story of the Land of the Glittering Plain.'"—*Independent.*

Pastels of Men.

SECOND SERIES.

By Paul Bourget. Translated by Miss Wormeley. Containing: I., Maurice Olivier; II., A Gambler; III., Another Gambler; IV., Jacques Molan; V., A Lowly One; VI., Corsèques. 16mo. Uniform with first series. Price, $1.00.

"Interesting to all students of modern French literature."—*Literary World.*

Wells of English.

By Isaac Bassett Choate. 16mo. Cloth. Gilt top. Price, $1.50.

A review of the work of the minor writers of England of the 16th and 17th centuries, with brief comments upon their influence upon English Literature. It is written with intelligence, care, and an unusual knowledge of the subject.

A Last Harvest.

Lyrics and Sonnets. From the Book of Love. By Philip Bourke Marston. Edited, with biographical sketch, by Louise Chandler Moulton. 12mo. Cloth. Gilt top. Price, $1.50.

A limited edition. These poems were composed during the last three years of the poet's life.

The Tragic Comedians:

A study in a well-known story. By George Meredith. With an introductory note on Ferdinand Lassalle by Clement Shorter. 16mo. Cloth. Popular edition. Price, $1.50. 12mo. Cloth. Uncut. Uniform with the English edition. Price, $2.00.

The author has chosen a smaller canvas than is his wont, and tells his story with unusual straightforwardness and directness; but the book is masterly in its delineation of character, as well as in the subtlety of its psychological analysis.

At all the Bookstores.

The Graduate.

A periodical for the dissemination of information of importance to graduates and others interested in the history and progress of

HARVARD COLLEGE.

Subscription $1 per annum. ROYAL

BAKING POWDER

Absolutely Pure.

A cream of tartar baking powder. Highest of all in leavening strength.—*Latest U. S. Government Food Report.*

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between

NEW YORK and GENOA, ITALY,

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals;

FULDA, Feb. 6, March 12, April 16.
WERRA, Feb. 27, April 2, May 7.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

WHITING'S MUSIC COURSE.

Common School Readers, 5 numbers, each 25 cents; High School Readers, 54, 75, and 96 cents.

The Supervisor of Music, Public Schools of Indianapolis, Ind., writes: "I have studied them over and over again. They are by far the finest set of Music Readers ever published."

The Charts are now ready, and are as good as the readers. Chart I., $6.00; Chart II. $3.00. Miniature Chart sent free to any one wishing to examine the series.

D. C. HEATH & Co., 5 Somerset St., Boston.

A MANUAL
OF CONGRESSIONAL PRACTICE.
Or, THE U. S. RED BOOK.

By T. H. McKEE (Superintendent Document Room, H. of R.). An outline of the Legislative and Parliamentary Proceedings, or review of daily practice in the Senate and House, showing in minute detail the methods of legislative work, with all the various forms used, in *facsimile*. Highly indorsed by Members and Senators.

Royal 8vo, 398 pages, red roan binding, $3.50.

WESTERN RESERVE UNIVERSITY,
CLEVELAND, OHIO.

Announcements of Adelbert College, Medical College, the (new)

COLLEGE FOR WOMEN,
and the
COLLEGE OF LAW
to be opened September, 1892, are ready.

CHARLES F. THWING, President.

School Trustees,
Principals,
Teachers,

And others interested, are invited to consider the advantages offered by the *Nation* as an advertising medium. School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

The *Nation*, in its special field of political and literary criticism, is unlike any other periodical, American or foreign. At least 10,000 copies are circulated weekly, but these figures do not accurately represent the number of its readers. It is taken by reading-clubs and literary associations in a large number of places and may be found on file in every library of importance in the country. There are probably few weekly periodicals whose columns offer so favorable an opportunity for reaching an audience interested in educational matters.

Advertising rates, 15 cents a line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12½ per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 208 Broadway, N. Y.

OFFICE OF THE
Atlantic Mutual
INSURANCE COMPANY,

NEW YORK, January 25, 1892.

Premiums on Policies not marked off 1st January, 1891.....		1,394,177 87
Total Marine Premiums.....		$5,256,865 84
Premiums marked off from 1st January, 1891, to 31st December, 1891.....		$3,784,723 36
Losses paid during the same period.....	$1,836,325 11	
Returns of Premiums and Expenses.....	$784,790 57	

The Company has the following assets, viz.:

United States and State of New York Stock, City, Bank, and other Stocks...	$7,567,155 00
Loans secured by Stocks and otherwise..	2,009,100 00
Real Estate and Claims due the Company, estimated at.....	1,083,400 36
Premium Notes and Bills Receivable....	1,425,030 93
Cash in Bank.....	193,895 88
Amount.....	$12,278,582 17

Six per cent. interest on the outstanding certificates of profits will be paid to the holders thereof or their legal representatives, on and after Tuesday, the second of February next.

The outstanding certificates of the issue of 1887 will be redeemed and paid to the holders thereof, or their legal representatives, on and after Tuesday, the second of February next, from which date all interest thereon will cease. The certificates to be produced at the time of payment, and cancelled.

A dividend of FORTY PER CENT. is declared on the net earned premiums of the Company for the year ending 31st December, 1891, for which certificates will be issued on and after Tuesday, the third of May next.

By order of the Board,
J. H. CHAPMAN, Secretary.

Author of "Robert Elsmere," etc., etc.
12mo. Cloth, $1.00.

Mrs. Humphry Ward's new story is at once strongly realistic and strikingly and variously illustrative of the currents of modern thought. . . . It deals not only with the religious problems which are being discussed with increasing zest throughout the civilized world, but it brings in question those essentially modern views of the influence of heredity and temperament upon life, which are doing so much to modify the old dogmatic conclusions. It is emphatically a novel of the period, and is informed throughout by the "Zeitgeist," . . . written with surprising strength and fire, . . . deeply interesting throughout, and a very remarkable creation. . . . Finally it must be said that "The History of David Grieve" is a remarkably powerful, well sustained, interesting and well-written novel. It certainly requires some thought in its readers, for much thought has gone to its composition. But it will reward attention, and once read it will be remembered.—*New York Tribune.*

Uniform with Bryce's "The American Commonwealth."
THE PLATFORM.
ITS RISE AND PROGRESS. By HENRY JEPHSON.
Large crown 8vo, 2 vols., $4.00.

Mr. Henry Jephson, private secretary to Mr. Forster and Sir G. Trevelyan, in "The Platform," begins with the days when an open meeting for discussion of public affairs was condemned as scarcely less than overt treason, traces the slow growth of political speechmaking, and analyzes the elements in its development. To the student of politics this book should prove of great value and interest.

A New Novel, by Charlotte M. Yonge,
THAT STICK.
By CHARLOTTE M. YONGE,
Author of "The Heir of Redclyffe," etc.

PUBLICATIONS OF

J. B. Lippincott Co.

A Supplement to Allibone's Critical Dictionary

OF ENGLISH LITERATURE AND BRITISH AND AMERICAN AUTHORS. By JOHN FOSTER KIRK. Two volumes, imperial 8vo. Nearly sixteen hundred pages. Cloth, $15.00; sheep, $17.00; half Russia, $20.00; half calf, $22.00; half morocco, $22.00.

"We have no hesitation in declaring our conviction that it is by far the most satisfactory work of the kind with which we are acquainted. It is ample in its information, it is accurate to a degree very rarely attained, it is catholic as to the persons included, and it is, with all this, eminently readable."—*London Saturday Review.*

"The publication of such a book is of itself an event in the literary history of our day and city. Abroad it would be marked by literary societies joining to confer on the author all the honors in their power to bestow. Here it is left to the newspapers and literary journals to speak for the public, in acknowledging the debt of gratitude due to the editor and to the publishers. Their task has been accomplished in a way that entitles them to a general recognition for success in a labor that has rarely been equalled and never excelled in its scope and perfection."—*Phila. Public Ledger.*

Specimen Pages mailed on application.

Allibone's Dictionary and Supplement complete—Five volumes, cloth, $37.50; sheep, $42.50; half Russia, $50; half calf, $55; half morocco, $55.

Public Library 23½92

MRS. HUMPHRY WARD'S NEW NOVEL

. . . "Is a great advance upon 'ROBERT ELSMERE.'"—*Chicago Tribune.*

THE HISTORY OF DAVID GRIEVE.

BY MRS. HUMPHRY WARD,

Author of 'Robert Elsmere,' etc., etc. 12mo, cloth, gilt, $1.00.

A LIBRARY EDITION IS IN PREPARATION, UNIFORM WITH THE LIBRARY EDITION OF 'ROBERT ELSMERE.'

2 Vols., $3.00.

"*Mrs. Humphry Ward's new story is at once strongly realistic and strikingly and variously illustrative of the currents of modern thought. . . . It deals not only with those religious problems which are being discussed with increasing zest throughout the civilized world, but it brings in question those essentially modern views of the influence of heredity and temperament upon life which are doing so much to modify the old dogmatic conclusions. It is emphatically a novel of the period and is informed throughout by the 'Zeitgeist.'*

"*Written with surprising strength and fire, deeply interesting throughout, and a very remarkable creation.*

"*Finally, it must be said that* 'THE HISTORY OF DAVID GRIEVE' IS A REMARKABLY POWERFUL, WELL-SUSTAINED, INTERESTING AND WELL-WRITTEN NOVEL.

"*It certainly requires some thought in its readers, for much thought has gone to its composition. But it will reward attention, and once read will be remembered.*"—New York Tribune.

"Yet Mrs. Ward has given in this book a work of literary art more valuable and more enduring than ROBERT ELSMERE, while considered as a discussion of current ethical and religious and social problems it is no less superior to the book which was making so extraordinary a sensation two or three years ago. . . .

"Mrs. Ward pictures their life on the farm with a pathos and minuteness that reminds us now of Dickens, now of George Macdonald, and now of George Eliot.

"Mrs. Ward has written this book with purpose and with conscience. It teaches true lessons, it paints real life and experience, and it is a worthy addition to the great English novels of our generation."—*Review of Reviews.*

Schools.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classic National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.

For references and circular address MRS. E. L. HEAD, Germantown, Pa.

SWITZERLAND, Lausanne.

REV. CHARLES BIELER, HEAD- Master of the College Galliard, and Madame Bieler, née Merle D'Aubigné, receive into their house a limited number of pupils, who follow the classes of the College. The Head Master's residence forms a part of the College buildings, which stand on high ground in one of the healthiest localities of Lausanne. A large playground and a gymnasium are attached to the house. The boys are expected to talk nothing but French.

The studies, health, and behavior of the boys are individually cared for, and the constant aim is to train them in the fear and love of God.

School fees £8 to £15, according to age. Board £72 per annum (summer holidays not included), to be paid in advance at the beginning of each term.

For further information address M. CHARLES BIELER, Place Chaudron, Lausanne.

Reference may be made to Richard Wood, 1620 Locust Street, Philadelphia.

Mrs. Smith travels with her party during the summer months and holidays.

Information concerning expenses furnished upon application. Trustworthy references given and required. Address Mrs. BENJ. FULLER SMITH. Care Messrs. Thode & Co., Bankers, Dresden.

A GENTLEMAN INTENDING TO spend the coming year in Europe wishes to take charge of a young man during the summer or winter. Address YALE, Nation office.

IMPORTANT.

Because we have not sufficiently advertised the fact that Hudson's Harvard Shakespeare is his last and greatest work, many are still buying the old edition, edited by him in 1851, thinking that they are buying the Harvard. We would therefore call especial attention to the fact that the Harvard Shakespeare is published only in ten and twenty-volume editions. The notes are put at the bottom of the page for ready reference, so as to save the time of looking up notes elsewhere. The character of these notes is literary rather than philological. It was always Mr. Hudson's idea to explain Shakespeare's meaning, and get students interested in the great author, rather than to make him the means of a study of the English language purely. In disputed points, Mr. Hudson thought he was doing the student the greatest service by giving the advantage of his own judgment in favor of one or the other, rather than by printing several opinions which only tended to confuse the young student.

Selections in English Prose, from Elizabeth to Victoria: 1580–1830. By Professor J. M. Garnett of the University of Virginia. Price, $1.50. The object is to provide students with the text themselves, accompanied by explanatory notes where deemed necessary, of the most prominent writers of English prose for the past three hundred years. The selections are of sufficient length to be characteristic of the author, and, when possible, they are complete works or sections of works.

The Best Elizabethan Plays. Edited, with an Introduction by William R. Thayer. Price, $1.25. This selection furnishes not only the best specimen of dramatic work of each of the five Elizabethan poets who rank next to Shakespeare, but also a general view of the development of English drama from its rise in Marlowe to its last strong expression in Webster.

Minto's Manual of English Prose. By William Minto, M.A., of the University of Aberdeen, Scotland. Price $1.50. Designed to assist in directing students in English composition to the merits and defects of the principal writers of prose, enabling them, in some degree at least, to acquire the one and avoid the other. Exhaustive analyses of De Quincey, Macaulay, and Carlyle are given, and these serve as a key to all the other authors treated.

Minto's Characteristics of English Poets, from Chaucer to Shirley. By William Minto, M.A. Price, $1.50. The chief objects of the author are: (1.) To bring into clear light the characteristics of the several poets; and (2) to trace how far each was influenced by his literary predecessors and his contemporaries.

*** *These books will be sent to teachers, post-paid, on receipt of introduction prices given above.*

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between

NEW YORK and GENOA, ITALY,

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals;

FULDA, March 12, April 16.
WERRA, Feb. 27, April 2, May 7.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

IMPORTANT

Historical Works

The Founding of the German Empire. Based chiefly upon Prussian State Documents, by Heinrich von Sybel. Translated by Marshall Livingston Perrin, assisted by Gamaliel Bradford, Jr. Completed in 5 vols. Cloth, per set, $10.00; half mor., $15.00.

"No more important historical work has appeared in the last decade."—*Nation.*

"Impossible to praise too highly."—*Chicago Standard.*

"A triumph of historical description."—*Detroit Free Press.*

A History of France. By Victor Duruy, member of the French Academy. Abridged and translated from the seventeenth French edition, by Mrs. M. Carey, with an introductory notice and a continuation to the year 1889, by J. Franklin Jameson, Ph.D., Professor of History in Brown University. With 12 engraved colored maps. In one volume. 12mo. Cloth, $2.00. Half calf, $4.00.

"Of all the short summaries of French History, this is probably the best."—*Ex-President Andrew D. White, Cornell University.*

A book widely desired by schools, colleges and libraries, students, and general readers.

Memoirs of Napoleon Bonaparte. By Louis Antoine Fauvelet de Bourrienne, his Private Secretary. Edited by Col. R. W. Phipps. New and revised edition, with 34 full-page portraits and other illustrations. 4 vols. 12mo. Cloth, plain, $5.00. Cloth, gilt top, paper label, $6.00. Half calf, $12.00. Limited edition with over 100 illustrations, gilt top, half leather, $10.00.

The latest American edition, and the only one with a complete index.

"If you want something to read both interesting and amusing, get the 'Memoires de Bourrienne.' These are the only authentic memoirs of Napoleon which have as yet appeared."—*Prince Metternich.*

Recollections of a Private. A Story of the Army of the Potomac. By Warren Lee Goss, author of "Jed." With over 80 illustrations by Chapin and Shelton. Royal 8vo, cloth, $3.25; seal russia, $4.25; half morocco, $5.00.

"No volume of war history has given the reader more graphic descriptions of army life."—*Inter-Ocean.*

"One of the handsomest as well as one of the most valuable works in American war literature."—*Boston Globe.*

Her Majesty's Tower. By W. Hepworth Dixon. New edition, complete in one volume. A history of the Tower of London, from the seventh London edition, with 47 illustrations. Royal 12mo. Cloth, $2.00. Half calf, $4.00.

The result of twenty years' research.

"The best possible introduction a stranger can have to that famous building."—*Christian Union.*

The Narrative of Captain Coignet, Soldier of the Empire, 1776-1850. An autobiographical account of one of Napoleon's Body-Guard. Fully illustrated. 12mo, half leather, $2.50; half calf, $5.00.

"It is meagre praise to say that it is interesting. It is more than that. It is a panorama."—*Minneapolis Journal.*

"As direct as Robinson Crusoe—vivid almost beyond expression."—*Boston Herald.*

A NEW BOOK BY THOMAS CARLYLE

NOW PUBLISHED FOR THE FIRST TIME

Lectures on the History of Literature

Delivered April to July, 1838. 12mo, $1.00. Copyrighted.

"We could have no work from his hand which embodies more clearly and emphatically his literary opinions than this graphic survey of the great writers and great literary epochs of the world. Many will say that it is the clearest and wisest and most genuine book that Carlyle ever produced."—*Julius H. Ward in the Boston Herald.*

The Real Japan

Studies of Contemporary Japanese Manners, Morals, Administration, and Politics. By Henry Norman. With 70 illustrations from photographs taken by the author. Crown 8vo, $3.00.

"The book is intensely readable. It is the first impartial account of the social condition of the Japanese that has found its way into English."—*Boston Beacon.*

English Social Movements

By Robert A. Woods. 12mo, $1.50.

"It is the most common-sense, practically suggestive, and inspiring book that has been written on the subject of philanthropy for ten years."—*Pittsburgh Despatch.*

Two Happy Years in Ceylon

By C. F. Gordon Cumming. With 19 full-page illustrations and a map. 2 vols., 8vo, $9.00.

"The charms of Ceylon have often been described, but never so thoroughly as by Miss Cumming. It is hard to pass over any of its pages, so packed are they with interesting material."—*N. Y. Sun.*

Japonica

By Sir Edwin Arnold. Illustrated by Robert Blum. Large 8vo, $3.00.

"Sir Edwin Arnold in these brilliantly picturesque chapters shows himself just the man to interpret Japan. Perhaps no book has ever been written on Japan so full of color and word-picture, so eloquent as this."—*The Critic.*

The Spirit of Modern Philosophy.

By DR. JOSIAH ROYCE, Assistant Professor of Philosophy at Harvard University, and author of "The Religious Aspect of Philosophy," etc. 8vo, $2.50.

A book of very great value, containing careful studies of some of the more important problems of modern thought, and discussing the views held by Spinoza, Kant, Fichte, Hegel, and Schopenhauer.

Miss Wilton.

A Novel by CORNELIA WARREN. 16mo, $1.25.

Miss Wilton was an American girl, who studied and travelled in Europe, then returned to America for her romance. In characters, plot, incidents, and tone, Miss Warren's novel is one of more than ordinary excellence.

Poems.

By MAURICE THOMPSON, author of "Songs of Fair Weather." Crown 8vo, gilt top, $1.50.

Mr. Thompson includes in this handsome book the "Songs of Fair Weather," adding poems written since the "Songs" appeared. His poems are so well equipped with the imaginativeness, fancy, and lyrical quality which all poems should have, that lovers of poetry will welcome and cherish this handsome library volume.

50 cents a number. $5.00 a year.

D. APPLETON & CO., NEW YORK.

D. APPLETON & CO.'S

NEW BOOKS.

LIFE IN ANCIENT EGYPT AND ASSYRIA.

By G. MASPÉRO, late Director of Archæology in Egypt, and Member of the Institute of France. Translated by ALICE MORTON. With 188 Illustrations. 12mo. Cloth, $1.50.

"A lucid sketch, at once popular and learned, of daily life in Egypt in the time of Rameses II., and of Assyria in that of Assurbanipal. . . . As an Orientalist, M. Maspéro stands in the front rank, and his learning is so well digested and so admirably subdued to the service of popular exposition, that it nowhere overwhelms and always interests the reader."—*London Times.*

"Only a writer who had distinguished himself as a student of Egyptian and Assyrian antiquities could have produced this work, which has none of the features of a modern book of travels in the East, but is an attempt to deal with ancient life as if one had been a contemporary with the people whose civilization and social usages are very largely restored."—*Boston Herald.*

"A most interesting and instructive book. Excellent and most impressive ideas, also, of the architecture of the two countries, and of the other rude but powerful art of the Assyrians are to be got from it."—*Brooklyn Eagle.*

THE DOG IN HEALTH AND IN DISEASE.

By WESLEY MILLS, M.D., D.V.S., author of 'A Text-Book of Animal Physiology,' 'A Text-Book of Comparative Physiology,' etc. With colored plate, 38 full-page cuts, and numerous other Illustrations. 12mo. Cloth, $2.25.

"A practical protest against the treatment of dogs according to the light of the horse-doctor. The book is intended for all persons who breed, keep, or in any way take a special interest in the dog. . . . One-half the book is devoted to the diseases of the dog. The symptoms and treatment are carefully given, and there is added a table of doses of the drugs found most efficacious. The volume is one to be cordially recommended."—*Philadelphia Inquirer.*

"At the outset the dog is pronounced a noble, intelligent, and faithful animal; a friend and helper of man. In disease, especially, it deserves better treatment than it usually receives. . . . This work of over four hundred pages represents long-continued labors with the modern literature of the dog, and original studies and knowledge of importance."—*Cincinnati Times-Star.*

NEW FRAGMENTS.

By JOHN TYNDALL, F.R.S., author of "Fragments of Science," "Heat as a Mode of Motion," etc. 12mo, 500 pages. Cloth, $2.00.

"Tyndall is the happiest combination of the lover of nature and the lover of science, and these fragments are admirable examples of his delightful style and proofs of his comprehensive intellect."—*Philadelphia Bulletin.*

NOT ALL IN VAIN.

By ADA CAMBRIDGE, author of 'The Three Miss Kings,' 'My Guardian,' etc. No. 87, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

The latest previous novel by Ada Cambridge ('The Three Miss Kings') has received the unstinted approval of numerous critics. The quality of work in 'Not All in Vain' shows in some respects a distinct advance in literary merit and vigor of construction.

HOLLAND FICTION SERIES.

ELINE VERE.

By LOUIS COUPERUS. Translated from the Dutch by J. T. GREIN. With an Introduction by EDMUND GOSSE. 12mo. Cloth, $1.00.

Eline Vere, a work crowned by the Dutch Academy, is a story of modern life in The Hague. It is the first novel in the *Holland Fiction Series* announced by D. Appleton & Co., a series which will present the choicest results of the modern literary revival in Holland.

In offering this series to American readers, the publishers feel that that they are opening a field of profit and enjoyment as distinctive and as fresh as the fields of Russian fiction and of Spanish fiction twelve years ago.

For sale by all booksellers; or will be sent by mail on receipt of price by the publishers,

D. APPLETON & CO.,

Schools.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures the Ecole des Beaux Arts, the Odeon Theatre, which is the Classic National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.
For references and circular address

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between

NEW YORK and GENOA, ITALY,

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals:
WERRA, Feb. 27; FULDA, March 12; WERRA, April 2; FULDA, April 16; WERRA, May 7; FULDA, May 28.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

DE POTTER'S

EUROPEAN AND ORIENTAL TOURS.

THIRTEENTH YEAR.

Sun Painting.

The question where to go in order to obtain a good photograph is not a momentous one when it is known that the Studio of Pach Bros., the Artistic Photographers, who have won golden opinions for their skill, is located at 935 Broadway, corner 22d St. Their instantaneous photographs of children are unexcelled. Groups of families and friends a specialty. Pach Bros. point with pride to their selection as class photographers by the leading colleges of the country.

A Tonic

HORSFORD'S ACID PHOSPHATE.

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

Dr. Ephraim Bateman, Cedarville, N. J., says:

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

Descriptive pamphlet free.

Completion of Mr. Gardiner's New Illustrated History of England.

A Student's History of England,

FROM THE EARLIEST TIMES TO 1885.

By SAMUEL RAWSON GARDINER, M.A., LL.D.,

Fellow of All Souls College, Oxford, etc.; Author of "The History of England from the Accession of James I. to 1642," "History of the Great Civil War," etc.

Illustrated under the superintendence of Mr. W. H. St. John Hope, Assistant Secretary of the Society of Antiquaries, and with the assistance in the choice of Portraits of Mr. George Scharf, C.B., F.S.A., who is recognized as the highest authority on the subject.

Published in Three Volumes or Parts (each Part with Index and Table of Contents) as follows:—

VOLUME I.

B. C. 55–A.D. 1509. 410 pp. With 173 Illustrations and Index. Crown 8vo, $1.20.

VOLUME II.

A. D. 1509–1689. 332 pp. With 96 Illustrations and Index. Crown 8vo, $1.20.

VOLUME III.

A. D. 1689–1885. 374 pp. With 109 Illustrations and Index. Crown 8vo, $1.20.

*** *The Work may also be had complete in One Volume, with 378 Illustrations and full Index. Crown 8vo, cloth extra, gilt top, $3.50; or, cloth plain, $3.00 net.*

ALSO JUST READY.

COMPANION ATLAS TO GARDINER'S "STUDENT'S HISTORY OF ENGLAND."

A SCHOOL ATLAS OF ENGLISH HISTORY.

Edited by SAMUEL RAWSON GARDINER, M.A., LL.D.

66 Colored Maps, 22 Plans of Battles, etc., and full Index. Fcap. 4to, $1.50,

GENERAL VIEW OF THE POLITICAL HISTORY OF EUROPE.

By ERNEST LAVISSE, Professor at the Sorbonne. Translated with the author's sanction, by Charles Gross, Ph.D., Instructor in History, Harvard University. Crown 8vo, cloth, $1.25.

"We commend the work as the best little hand-book in this field of which we know."—*New England Magazine.*

EPOCH MAPS OF AMERICAN HISTORY.

Fourteen colored Maps illustrating American History at Various Epochs. Edited by A. B. HART, A.B., Ph.D., Assistant Professor of History in Harvard College. Small 4to, limp cloth, 50 cents, net.

"Every student and teacher must be thankful to Prof. Hart for his 'Epoch Maps.' They are fourteen in number, and bear witness to an immense amount of well-directed research among the sources."—*Nation, N. Y.*

LONGMANS, GREEN & CO., 15 East 16th Street, New York.

The editor of this paper has used the Buffalo Lithia Water freely during the past five or six years for rheumatism, and with the most happy results. Usually after an attack of rheumatism a few bottles would be sufficient to allay the pain, but for a long time past I have used it constantly as a table-water, and although I have tried many others, I like this the best of all. The Buffalo Lithia Water is so perfectly pure that it surpasses in this respect any of our filtered waters, and is very agreeable to the taste. Many of my friends have tried drugs of various kinds for rheumatism, and in some cases when they seemed to experience a benefit in one direction the drugs brought on something worse, or exaggerated other symptoms of disease. I trust to the waters entirely, and never use drugs. I am confident that Nature's Remedy is far the best for rheumatism and all diseases of kindred nature.—*From the Christian at Work—Advt.*

IMPORTANT

Books of History.

Origin and Growth of the English Constitution.

An Historical Treatise in which is drawn out, by the Light of the most recent Researches, the Gradual Development of the English Constitutional System, and the growth out of that System of the Federal Republic of the United States. By Hannis Taylor. *Second Edition.* 8vo, gilt top, $4.50.

The History of Prussia

To the Accession of Frederic the Great, 1134-1740. By Herbert Tuttle, Professor in Cornell University. With a map. Crown 8vo, gilt top, $2.25.

The Economic and Social History of New England, 1620-1789.

By William B. Weeden. 2 vols. Crown 8vo, gilt top, $4.50.

"Full of suggestive and vital information about New England, . . . literally a storehouse of historical data of the utmost value to one who would learn how the New England colonists first subdued the earth, and thus in securing their own fortunes built up the framework on which mighty States were to grow."—*New York Times.*

The Genesis of the United States.

A Narrative of the Movement in England, 1605–1616, which resulted in the Plantation of North America by Englishmen, disclosing the contest between England and Spain for the Possession of the Soil now occupied by the United States of America; the whole set forth through a Series of Historical Manuscripts now first printed, together with a Reissue of Rare Contemporaneous Tracts, accompanied by Bibliographical Memoranda, Notes, Plans, 100 Portraits, and a Comprehensive Biographical Index. Collected, arranged, and edited by Alexander Brown, Member of the Virginia Historical Society, and of the American Historical Association, Fellow of the Royal Historical Society of England. With map. 2 vols, 8vo, $15.00.

History of Prussia

Under Frederic the Great. By Herbert Tuttle. With maps. 2 vols. Crown 8vo, gilt top, $4.50.

"Mr. Tuttle's remarkably wide command of the archive literature of his period and of the innumerable recent elaborations of special portions of its history makes him a safe guide."—*Saturday Review, London.*

The Reconstruction of Europe.

A Sketch of the Diplomatic and Military History of Continental Europe, from the Rise to the Fall of the Second French Empire. By Harold Murdock. With an introduction by John Fiske, and several Maps. Crown 8vo, $2.00.

"An historical work exceedingly interesting in style, and extremely valuable by reason of its scope."—*The Christian Union (N. Y.).*

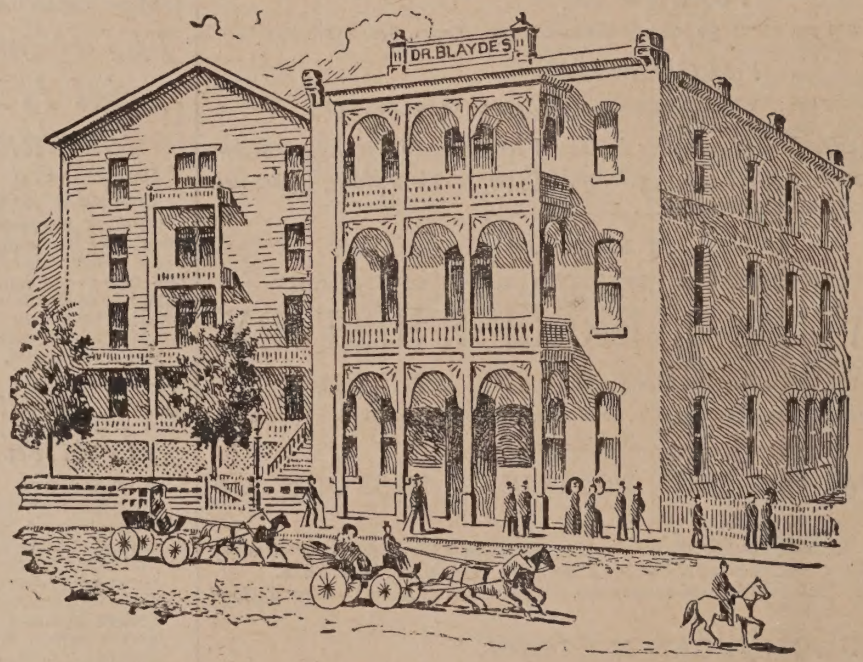
HOUGHTON, MIFFLIN & CO., Boston, 11 East Seventeenth Street, New York.

BUFFALO LITHIA WATER AT HOT SPRINGS, ARKANSAS,

In Gout, Rheumatic Gout, and Rheumatism.

HOT SPRINGS MEDICAL AND SURGICAL INSTITUTE.

DR. JOHN A. BLAYDES, President. *DR. R. O. BLAYDES, Secretary.*



STATEMENT OF THE DRS. BLAYDES:

"We have made use of BUFFALO LITHIA WATER with patients of this institution in many obstinate cases of Gout, Rheumatic Gout, and Rheumatism, with uniformly excellent results, and in diseases generally of Uric Acid Diathesis regard it as an invaluable remedy. Its action in this class of cases indicates certainly the possession of some extraordinary property."

Dr. Algernon S. Garnett, Surgeon (retired) U. S. Navy, Resident Physician, Hot Springs, Ark.:

"My experience in the use of BUFFALO LITHIA WATER is limited to the treatment of GOUT, RHEUMATISM, and that hybrid disease 'RHEUMATIC GOUT' (so called), which is in contradistinction to the RHEUMATOID ARTHRITIS OF GARROD.

"I have had *excellent results* from this Water in these affections, *both in my own person and in the treatment of patients for whom I have prescribed it.* Of course, the remedial agent is its contained ALKALIES and their solvent properties.

"Hence it is a **prophylactic** *as well as a* **remedy** in NEPHRITIC COLIC *and forming* CALCULI *when due to a redundancy of* LITHIC ACID."

The Late Dr. Wm. F. Carrington, Resident Physician, Hot Springs Ark., Surgeon (retired) U. S. Navy, Surgeon Conf. States Navy:

"BUFFALO LITHIA WATER, Spring No. 2, has signally demonstrated its remedial power in GOUT, RHEUMATIC GOUT, RHEUMATISM, URIC ACID GRAVEL, and other maladies dependent upon the URIC ACID DIATHESIS.

"*It not only eliminates from the blood the deleterious agent before it crystallizes, but* DISSOLVES *it in the form of* CALCULI, *at least to a size that renders its passage along the ureters and urethra comparatively easy.*"

Dr. T. B. Buchanan, Resident Physician, Hot Springs, Ark.:

"*Send me five cases* BUFFALO LITHIA WATER, Spring No. 2. I have made use of this Water for GOUT *in my own person and prescribed it for patients similarly suffering, with the most decided beneficial results.* I take pleasure *in advising* GOUTY *patients to these Springs.*"

Dr. G. W. Lawrence, Resident Physician, Hot Springs, Arkansas:

"I prescribe BUFFALO LITHIA WATER with great confidence in all diseases of URIC ACID DIATHESIS. When travelling, it is my habit to use this Water as a guarantee for getting a pure water."

Dr. L. S. Ordway, Resident Physician Hot Springs, Arkansas:

"I have used BUFFALO LITHIA WATER, Spring No. 2, very extensively and successfully, in my practice, in cases of *Rheumatism of the Arthritic* form, especially when complicated with weak, inactive *Kidneys, with inclination to Bright's Disease.* I have also found it an efficient remedy in *Albuminuria of pregnancy.*"

Water, in Cases of One Dozen Half-Gallon Bottles, $5.00, F. O. B. here. ☞Descriptive Pamphlets SENT FREE.

A. C. Armstrong & Son's New Publications.

History of Art in Persia, Phrygia, Lydia, Caria, and Lycia.

By GEORGES PERROT and CHARLES CHIPIEZ.

With about 500 illustrations. Two vols., imperial 8vo, uniform with 'History of Art in Ancient Egypt,' 'History of Art in Chaldea and Assyria,' 'History of Art in Phœnicia,' 'History of Art in Sardinia, Judaea, Syria, and Asia Minor.' Handsomely bound in cloth, gilt top, $14.50; half levant morocco, $22.50.

This *New Work* is the *fifth* in the *Series* on the **"History of Ancient Art,"** the *four previous* works having achieved *remarkable success* and being accepted by the *Highest Authorities as the Standard Works on the Subjects.*

This great history is in many respects the most important contribution of modern times to the literature of art and archæology. As it progresses its value becomes more and more apparent. The illustrations are admirable as illustrative art, and abundant to bring the descriptive text within the comprehension of the ordinary reader, as well as the student.

FROM THE USHER'S DESK TO THE TABERNACLE PULPIT.

THE LIFE AND LABORS OF PASTOR C. H. SPURGEON. By Rev. R. SHINDLER. Profusely illustrated with portraits and views. 12mo, cloth, $1.50.

Published simultaneously in this country and England by arrangement with Mr. Spurgeon's publishers, Passmore & Alabaster, London.

Theodore Christlieb, of Bonn.

Memoir, with Sermons.

Translated by the Revs. Prebendary KINGSBURY, M.A., and Canon GARRATT, M.A. With Portrait. Crown 8vo, cloth, $2.

Stalker's (Rev. Dr. James) New Work.

The Preacher and His Models.

THE

French in America

DURING THE

War of Independence of the United States

1777-1783.

A TRANSLATION BY

THOMAS WILLING BALCH,

OF

Les Francais en Amerique

PENDANT LA

Guerre de L'Independance des Etats-Unis.

PAR

THOMAS BALCH.

1 vol., 8vo, with maps, cloth extra, $2.50.

"Mr. Balch's book gives a complete sketch of the origin and events of the Revolutionary War and a detailed account of the French force under Rochambeau, which contributed so largely to the final result. He supplies a thorough statement of the French regiments and of the officers and volunteers who led them with such distinguished gallantry. It is particularly valuable from the contemporaneous picture of American life as it was seen and described by these cultivated French officers in their letters home and in the journals left by them. The Messrs. Balch, father and son, are alike entitled to the grateful acknowledgment of all who know and appreciate the good work done by them."

PORTER & COATES, Publishers,

AN IMPORTANT NEW BOOK of TRAVEL

AMONG AN ALMOST UNKNOWN PEOPLE.

Across Thibet.

By GABRIEL BONVALOT, author of "Through the Heart of Asia." Translated from the French by C. B. Pitman. With 106 fine illustrations from photographs taken by Prince Henry of Orleans and a large route map in colors. One elegant octavo volume, extra cloth, gilt top, $3.50.

"M. Gabriel Bonvalot has already achieved a high reputation as a Central Asian explorer. 'Across Thibet' is thus recommended alike by the character and literary skill of the explorer, and by the interest and novelty of the regions explored by him. . . . The copious illustrations due to Prince Henry's camera are full of interest, and the translation is excellently done."—*London Times.*

Recollections and Letters of Ernest Renan.

Author of "The Life of Christ," etc., etc. Translated from the French by ISABEL F. HAPGOOD. 1 vol., 12mo, extra cloth, gilt top, $1.50.

It is unnecessary to urge the importance of a work from the pen of M. Renan. The present volume is one of uncommon interest, both from the character of its contents and from the fact that it is, without doubt, the author's final collection of personal reminiscences.

The book loses nothing in its translation by Miss Isabel F. Hapgood, so widely known for her own rare literary gifts.

Rose and Ninette.

A Story of the Morals and Manners of the Day. By ALPHONSE DAUDET. Translated by Mary J. Serrano. 1 vol., 12mo, cloth, 75 cents; paper, 50 cents.

M. Daudet regards this story as the supreme effort of his life. It deals with the subject of divorce, and is written with a power that indicates the author's deep feeling on this leading social problem.

The Book of Pity and of Death.

A Collection of Stories by PIERRE LOTI. Translated from the French by T. P. O'Connor, M.P., author of "Parnell and the Irish Movement," etc., etc. 1 vol., 12mo, cloth, 75 cents; paper, 50 cents.

Every one who admires literary style, every one who enjoys good stories, will hail with delight this volume of pathetic and touching tales.

NEW VOLUMES IN THE "UNKNOWN" LIBRARY.

Back from the Dead.

A Story of the Stage. By SAQUI SMITH. 1 vol., 12mo, unique cloth binding, 50 cents.

Through the Red-Litten Windows, and The Old River House.

By THEODOR HERTZ-GARTEN. 1 vol., 12mo, unique cloth binding, 50 cents.

FOR SALE BY ALL BOOKSELLERS.

Cassell Publishing Company

104 and 106 Fourth Avenue, New York.

Macmillan & Co.'s

NEW BOOKS.

Now Ready. A Library Edition, uniform with the Library Edition of 'Robert Elsmere.' 2 vols., $3.00.

Mrs. Humphry Ward's New Novel.

. . . "Is a great advance upon 'Robert Elsmere.'" —*Chicago Tribune.*

THE HISTORY OF DAVID GRIEVE.

By Mrs. HUMPHRY WARD, author of 'Robert Elsmere," etc., etc. 12mo, Cloth, gilt, $1.00.

"What sorrows, what repentances, sufferings, sins, heart-searchings, and brain-cudgellings David passes through we leave to our readers to find out for themselves. They will find more than this. They will find thoughts which stimulate and passages which burn. . . . They will find a fearless grappling with the things that are, treated as only a woman, high-minded and sincere, can treat these things."—*Saturday Review.*

"'*The History of David Grieve*' *is a remarkably powerful, well-sustained, interesting and well-written novel.*

"It certainly requires some thought in its readers, for much thought has gone to its composition. But it will reward attention, and once read it will be remembered."—*New York Tribune.*

"We have been under the spell of this book, and must acknowledge its power as a romance. The pulse of genius throbs in it, and the glamour of a great imagination plays over it."—*Independent.*

Jules Bastien-Lepage

and his Art. A Memoir, by ANDRÉ THEURIET. With which is included Bastien-Lepage as artist, by George Clausen, A.R.W.S., Modern Realism in Painting, by Walter Sickert, N.E.A.C., A Study of Marie Bashkirtseff, by Matilde Blind.

Short Sermons.

By the Rev. STOPFORD A. BROOKE. 12mo, cloth, $1.75.

Now Ready, Uniform with Bryce's American Commonwealth.

The Platform.

Its Rise and Progress. By HENRY JEPHSON. 2 vols., large crown 8vo, cloth, gilt, $4.00.

"Dr. Henry Jephson has struck a new vein in political history, and has worked it certainly with diligence, and we think his readers will say with success. He claims that among the great political agencies the Platform has hitherto been overlooked. His remarks have an interest for all communities under parliamentary or elective government. . . . A very useful, as well as a very interesting addition to political literature."—*Washington Post.*

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between

NEW YORK and GENOA, ITALY,

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals:
WERRA, Feb. 27; FULDA, March 12; WERRA, April 2; FULDA, April 16; WERRA, May 7; FULDA, May 23.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

The editor of this paper has used the Buffalo Lithia Water freely during the past five or six years for rheumatism, and with the most happy results. Usually after an attack of rheumatism a few bottles would be sufficient to allay the pain, but for a long time past I have used it constantly as a table-water, and although I have tried many others, I like this the best of all. The Buffalo Lithia Water is so perfectly pure that it surpasses in this respect any of our filtered waters, and is very agreeable to the taste. Many of my friends have tried drugs of various kinds for rheumatism, and in some cases when they seemed to experience a benefit in one direction the drugs brought on something worse, or exaggerated other symptoms of disease. I trust to the waters entirely, and never use drugs. I am confident that Nature's Remedy is far the best for rheumatism and all diseases of kindred nature.—*From the Christian at Work, February 11, 1892.*—*Advt.*

Sea-Shore Properties.

ISLAND ON THE MAINE COAST.

FOR SALE.—One of the most beautiful islands on this coast, consisting of several hundred acres of fine high land: woodland and open grass land; cliffs and beaches; bordering on perfect harbors; extended mountain and island views—convenient to regular steam communication; taxes nominal. This property, situated in the central part of Penobscot Bay in the midst of the most beautiful scenery of the Maine Coast and forty miles nearer Boston and the West than Bar Harbor, is one of the very few islands left for sale at farm values and must be sold to settle a joint ownership account.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

ALFRED BOWDITCH, }
HENRY PARKMAN, } Trustees,
J. MURRAY HOWE, }
27 School St., Boston, Mass.

MASSACHUSETTS SHORE.

FOR SALE.—On the north shore of Massachusetts Bay (commonly known as the Beverly Shore), one of the most finely situated improved estates on this line of coast, consisting of 20 acres of high table-land, commanding broad and beautiful ocean views. The land fronts on the shore, has fine beach, rocks, and is convenient to good anchorage for yachts. Large, substantially built mansion-house, stable, greenhouse, gardener's cottage, gardens, orchard avenues, and a great variety of fine trees, lawns, and shrubbery. One hour's ride from Boston. This property will be sold at a low price to settle an estate.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

The undersigned act as agents for the purchase and rental, and offer for sale and lease properties on all parts of the New England Coast. Descriptions of the list estates available in any section desired given. The Maine and Massachusetts Coast a specialty.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

THE
WASHINGTON LIFE INSURANCE COMPANY OF NEW YORK.

The thirty-second annual statement of The Washington shows substantial progress, and will be read by its policy-holders and the public with much interest. Its report last year was a strong one. It must afford the officers of the company great satisfaction to present a yet stronger statement this year.

The assets of The Washington on the 1st of January were $11,459,639, showing an increase during the past year of $669,305. The statement also shows a gain in income and interest, and in insurance written. The bond and mortgage investments show a material increase, and the surplus a proportionate increase in amount.

The assets of The Washington have always been of a character to make the fact of its solidity absolute. The proportion invested in bonds and mortgages (first liens on improved and productive real estate) on the 1st of January was over 83 per cent.; probably the largest per centum held by any of the life insurance companies of this country.

The regard in which bond and mortgage investments are held by life insurance companies is shown by the prominence given them in their schedules of assets. They are recommended, moreover, by State insurance officials in their reports to the several departments as the best class of securities. The Commissioner of Massachusetts, in the thirty-second annual report, goes so far in his approval of *sound investments* as to put them above every other consideration. In a paper read before the "National Insurance Commissioners' Convention" by the Actuary of the Department of Maine, on September 30, 1891, are these words: "Loans upon real estate have ever been the principal investment for life insurance assets. . . . The very low rate upon national securities, and the uncertainty of railroad and corporation stocks and bonds, *practically exclude these for insurance purposes.*"

The *United States Review* says: "The question of careful investments lies at the foundation of the work equally with the securing of business and the collection of premiums. . . . The question arises as to how the funds of this character should be invested. The evident reply is, only in the choicest securities. The aim should be safety rather than a high rate of interest. . . . For years we have been of the opinion that loans secured by mortgage of real estate furnish the best possible avenues for the investment of funds."

A leading company made a strong point in its weekly statement a few months since in proving its alleged superiority over two other companies that are close competitors by comparing the amounts on bond and mortgage held by each of the three companies. The company making the comparison claimed that 42 per cent. of its assets were thus invested, and its two rivals 22 and 17, respectively. At the same time The Washington held, and still holds, more than 83 per cent.

It will be noted that The Washington maintains superiority on this strong ground, namely, sound assets and enough of them.

A life insurance policy carried to maturity is obviously a long contract; hence correct methods and careful management in the company he selects is of vital importance to the insurer. This knowledge may be had by using the care and common sense exercised in any legitimate business transaction.—*From the Christian Advocate of New York, Feb. 4, 1892.*

Students prepared for college. Ample grounds for outdoor exercise.

PENNSYLVANIA, Philadelphia, 1350 Pine St.

MISS ANABLE'S BOARDING AND Day School for Young Ladies will reopen Sept. 28.

Schools.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classical National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.

For references and circular address

MRS. E. L. HEAD, Germantown, Pa.

THE BOSTON SCHOOL OF ORATORY. —The Leading School of Expression in America. First to teach the system of Delsarte. Send for catalogue to MOSES TRUE BROWN, M.A., Boston, Mass.

Teachers, etc.

A CLASSICAL TEACHER OF MUCH experience and skill desires an engagement for next year; conditions favorable, he would buy.

RHEUMATISM AND GOUT are cleaned out from the system by BUFFALO LITHIA WATER.—*Advt.*

DODD, MEAD & CO.,

753 and 755 Broadway, New York,

HAVE JUST IMPORTED:

The Grammar of the Lotus,

A New History of Classic Ornament as a Development of Sun Worship,

With Observations on the "Bronze Culture" of Prehistoric Europe, as derived from Egypt, based on the Study of Patterns.

By WM. H. GOODYEAR, M.A. (Yale, 1867). The Proofs revised by

Prof. REGINALD STUART POOLE, LL.D., of the British Museum.

From the London Times.

"Mr. Goodyear propounds a new theory of the origin and symbolism of the main features of Egyptian and classical ornamentation. His method and conclusions deserve the attention and dispassionate consideration of all competent archæologists."

From the London Academy.

"A work of the first importance as regards the history and development of art in the ancient East."

From the Manchester Guardian.

"A sumptuous expansion and correction of Owen Jones's Grammar of Ornament. The author appears to have proved most of his points. Mr. Goodyear's book is full of ethnological interest."

From Prof. Reginald Stuart Poole of the British Museum.

"A luminous collection of instances which are archæologically of high value."

Miss Amelia B. Edwards, LL.D., Secretary of the Egypt Exploration Fund, says:

"I am delighted with the very favorable impression which the announcement of Mr. Goodyear's discoveries has made in England and upon my friends at the British Museum. . . . It is very important that the favor with which these discoveries have been received by English *savants* should be well known in America."

Royal Quarto, Boards, 400 pp., and upwards of 1,200 Illustrations, in 67 pages of Plates and 200 text cuts. Price, $15.00.

JUST PUBLISHED.

INTERNATIONAL LIBRARY No. 24.

CONSCIENCE.

By HECTOR MALOT. Translated by LITA ANGELICA RICE. Illustrated with photogravures. 1 vol., 12mo, ½ Rox., $1.25. Paper, 75 cents.

A fine study of one of the leading French novelists, realistic but pure, depicted with the author's customary skill and vigor.

WORTHINGTON CO., 747 B'way, N. Y.

A RARE ENGRAVING, WITH KEY, will be sold to the highest offer. "The Declaration of Independence of the United States of America, July 4, 1776," engraved by A. B. Durand. Copyright secured according to the Act of Congress, Dec. 20, 1820. Apply to SAMUEL REES LLOYD, Ty Cymro, Meridian Road, Cotham, Bristol, England.

BACK NUMBERS OF MAGAZINES and Reviews, early and recent. Correspondence solicited. A. H. ROFFE & Co., Boston, Mass.

Houghton, Mifflin & Co.'s New Books.

A Golden Gossip.

A Neighborhood Story, showing the excellent effect of *good* gossip, with a kind motive. By Mrs. A. D. T. WHITNEY, author of 'The Gayworthys,' 'Faith Gartney's Girlhood,' etc. 12mo, artistically bound, $1.50; also uniform with Mrs. Whitney's other books, $1.50.

Equatorial America.

A book full of information, describing a Visit to St. Thomas, Martinique, Barbadoes, and the Principal Capitals of South America. By MATURIN M. BALLOU, author of 'Due West,' 'Due South,' 'Due North,' 'Under the Southern Cross,' 'The New Eldorado,' 'Aztec Land,' etc. Crown 8vo, $1.50.

Roger Hunt.

A Novel, bringing out in a striking way the possible gains and losses in a married life of thorough selfishness. By CELIA P. WOOLLEY, author of 'Rachel Armstrong,' and 'A Girl Graduate.' 16mo, $1.25.

The Rationale of Mesmerism.

An interpretation of mesmeric phenomena, by A. P. SINNETT, author of 'The Occult World,' 'Esoteric Buddhism,' etc. 16mo, $1.25.

New and Charming Books.

THE POT OF GOLD. by MARY E. WILKINS, Square 12mo, finely illustrated. $1.50.

This first volume of Miss Wilkins' juvenile stories will attract not only young people but older readers. Some of the stories are in a fanciful vein, full of quaint conceits and delicious humor. Nothing could be more amusing than "The Christmas Masquerade," "Dill," "The Pumpkin Giant," and others of this class. The rest are realistic, and give delightful pictures of New England child-life in the olden times.

The book is exquisitely illustrated and bound.

MY LADY LEGEND. By DR. ALBREKT SEGERSTEDT. Translated by Anna von Rydingsvard (Baroness von Proschwitz). 12mo, $1.25.

Mrs. Rydingsvard has so thoroughly caught the spirit of these dainty "prose poems," that they seem to take on new beauty. Their quaint humor and genial moral happily represent the character of the author, who has been called the Hans Christian Andersen of Sweden.

"These folk-stories are simple in construction, and some of them are ideally exquisite in spiritual thought."—*Phila. Inquirer.*

CHRIST HIMSELF. By Rev. ALEXANDER McKENZIE, D.D. 12mo, white and gold, $1.00.

"The title is no misnomer; from every page Christ is breathed forth. We have seen few recent books with such a richness, such a fragrance of meaning, yet written in such entire simplicity of language."—*Presbyterian, Philadelphia.*

IMMORTAL HOPES. Compiled by Mrs. MARY J. C. FOSTER. Introduction by J. M. BUCKLEY, D.D. 24mo, cloth, gold and silver die, 50 cents.

Exquisite poems, such as "There is no Death," "The Undiscovered Country," "There is a land mine eye hath seen," etc., with beautiful full-page illustrations. A lovely Easter offering.

At the bookstores, or sent, postpaid, by

HENRY B. HYDE, President.
JAMES W. ALEXANDER, Vice-Pres't.

His Great Self.

A New Novel. By MARION HARLAND, author of "Alone," "True as Steel," etc. 16mo, cloth, $1.25.

"A story of great beauty and of historical value. It is historical in the double sense that it introduces real characters of colonial Virginia and is one of the few novels of the day that will stand the test of time and remain a mark of the progress of American fiction. It is a stately and elegant composition from beginning to end, reproducing with fine tact the grace and charm of that courtly Southern life of long ago which only one to the manor born can describe without caricature. . . . The author has studied her characters well and successfully and in the most minute detail she has given to her story no awkward touch. She has painted ladies and gentlemen to perfection and has vivified her drama with conversational phraseology distinctive of that epoch."—*N. Y. World.*

LIPPINCOTT'S SERIES OF SELECT NOVELS.

12mo, paper, 50 cents; cloth, 75 cents.

Only Human; or Justice.

The Latest Number. By JOHN STRANGE WINTER, author of "The Other Man's Wife," "Bootle's Baby," etc. Published by arrangement with the author and *copyrighted in the United States.*

"This is one of the best, if not *the* best, novels yet produced by this popular writer. The plot is highly dramatic, and the interest thoroughly sustained. The pathos which crops up here and there is genuine, and the love scenes are most delicately handled."—*Public Opinion.*

Other Issues in the Series are:

THE NEW MISTRESS. By GEORGE MANVILLE FENN.
A DIVIDED DUTY. By IDA LEMON.
DRAWN BLANK. By Mrs. JOCELYN.
MY LAND OF BEULAH. By Mrs. L. ADAMS.
MARY ST. JOHN. By ROSA N. CAREY.
QUITA. By CECIL DUNSTAN.
A LITTLE IRISH GIRL. By the "DUCHESS."
LADY PATTY. By the "DUCHESS."
TWO ENGLISH GIRLS. By MABEL HART.
THE PLUNGER. By HAWLEY SMART.
THE OTHER MAN'S WIFE. By JOHN STRANGE WINTER.
ONLY HUMAN. By JOHN STRANGE WINTER.
A HOMBURG BEAUTY. By Mrs. EDWARD KENNARD.
JACK'S SECRET. By Mrs. H. LOVETT CAMERON.
A DAUGHTER'S HEART. By Mrs. H. LOVETT CAMERON.
HERIOT'S CHOICE. By ROSA N. CAREY.
TWO MASTERS. By B. M. CROKER.
Etc., etc.

MRS. A. L. WISTER'S POPULAR TRANSLATIONS.

Countess Erika's Apprenticeship.

From the German of OSSIP SCHUBIN. 12mo, cloth, $1.25.

"Countess Erika has beauty, talent, and hosts of admirers, and of course there are many little plots and intrigues about her among the young men and the match-making women. She has, however, one true lover, who, after all the complications, succeeds in making her and himself happy. A preface by the author compliments Mrs. Wister on her translation of other of his books, and handsomely authorizes this new one."—*Philadelphia Evening Bulletin.*

Other Recent Translations by Mrs. Wister.

"O THOU, MY AUSTRIA!" By OSSIP SCHUBIN. 12mo, extra cloth, $1.25.
ERLACH COURT. By OSSIP SCHUBIN. $1.25.
THE ALPINE FAY. By E. WERNER. $1.25.
THE OWL'S NEST. By E. MARLITT. $1.25.
PICKED UP IN THE STREETS. By H. SCHOBERT. $1.25.

Direct Fast Express Route
TO THE MEDITERRANEAN.
First-class Passenger Steamer Service between
NEW YORK and GENOA, ITALY,
BY THE
NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals:
FULDA, March 12; WERRA, April 2; FULDA, April 16; WERRA, May 7; FULDA, May 28; WERRA, June 18.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

Sun Painting.

The question where to go in order to obtain a good photograph is not a momentous one when it is known that the Studio of Pach Bros., the Artistic Photographers, who have won golden opinions for their skill, is located at 935 Broadway, corner 22d St. Their instantaneous photographs of children are unexcelled. Groups of families and friends a specialty. Pach Bros. point with pride to their selection as class photographers by the leading colleges of the country.

MATTHEW ARNOLD IN THE "NINETEENTH CENTURY."

"The New York NATION—a newspaper which I read regularly and with profit, a newspaper which is the best, so far as my experience goes, of all American newspapers, and one of the best newspapers anywhere."

THE NATION,

an independent weekly journal, was established in 1865. Its contributors include the most prominent names in literature, science, and art, both in this country and abroad. It is emphatically found in the homes of people of culture and refinement. No intelligent American, desirous of keeping abreast of the best political and literary thought of the day, can afford to be without it. Subscription price, $3.00 a year, postpaid.

It will pay you to find out by writing to C. L. WEBSTER & CO., 67 Fifth Ave., New York.

Sea-Shore Properties.

ISLAND ON THE MAINE COAST.

FOR SALE.—One of the most beautiful islands on this coast, consisting of several hundred acres of fine high land: woodland and open grass land; cliffs and beaches; bordering on perfect harbors; extended mountain and island views—convenient to regular steam communication; taxes nominal. This property, situated in the central part of Penobscot Bay in the midst of the most beautiful scenery of the Maine Coast and forty miles nearer Boston and the West than Bar Harbor, is one of the very few islands left for sale at farm values and must be sold to settle a joint ownership account.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

ALFRED BOWDITCH,
HENRY PARKMAN,
J. MURRAY HOWE, } Trustees,
27 School St., Boston, Mass.

MASSACHUSETTS SHORE.

FOR SALE.—On the north shore of Massachusetts Bay (commonly known as the Beverly Shore), one of the most finely situated improved estates on this line of coast, consisting of 20 acres of high table-land, commanding broad and beautiful ocean views. The land fronts on the shore, has fine beach, rocks, and is convenient to good anchorage for yachts. Large, substantially built mansion-house, stable, greenhouse, gardener's cottage, gardens, orchard avenues, and a great variety of fine trees, lawns, and shrubbery. One hour's ride from Boston. This property will be sold at a low price to settle an estate.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

The undersigned act as agents for the purchase and rental, and offer for sale and lease properties on all parts of the New England Coast. Descriptions of the list estates available in any section desired given. The Maine and Massachusetts Coast a specialty.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

Charles Scribner's Sons

NEW BOOKS.

Vain Fortune.

By GEORGE MOORE, author of "Impressions and Opinions," "A Mummer's Wife," etc. 12mo, $1.00.

Mr. Moore's novel is a powerful study of the character and temperament of an emotional, jealous woman in her love for a young playwright, whose portrait is drawn with an equally firm hand.

Youth of the Duchess of Angouleme.

A new volume on the Famous Women of the French Court. From the French of Imbert de Saint-Amand. 12mo, with Portrait, $1.25.

"This is the first of three volumes on the Period of the Restoration. The other two will deal with the Duchess of Angouleme at a later period, and the Duchess of Berry. The present volume relates to a period of intense interest, and abounds in those marvellous bits of descriptive writing in which the author so greatly excels."—*Philadelphia Telegraph.*

The Elements of Ethics.

An Introduction to Moral Philosophy. By J. H. MUIRHEAD, Lecturer in Mental and Moral Science, Royal Halloway College, Egham. University Extension Series. 12mo, $1.00 *net.*

Prof. Muirhead's book deals, in a thoroughly modern spirit, with the historical development and present state of the science of Ethics. The treatment is clear, concise, popular; the scope of the book broad.

Hand-book of Greek Archæology.

By A. S. MURRAY, Keeper of Greek and Roman Antiquities in the British Museum. With 20 colored plates and 118 other illustrations. 8vo, $6.00.

Mr. Murray's book treats of sculpture, vases, bronzes, gems, terra-cottas, architecture, mural paintings, etc., tracing the historical development of each art in a scholarly and yet popular manner. The illustrations are of great variety and beauty, those in colors being especially rich, and all serving to illuminate the text.

A Dictionary of Hymnology.

Edited by JOHN JULIAN, F.R.S.L., Vicar of Wincobank. Large 8vo, 1632 pages, $10.00 *net.*

This great work sets forth the origin and history of the Christian Hymns of all ages and nations, with special reference to those contained in the hymn-books of English-speaking countries and now in common use; together with biographical and critical notices of their authors and translators, and historical articles on national and denominational hymnody, etc., etc.

The Pauline Theology.

A study of the Original Correlation of the Doctrinal Teachings of the Apostle Paul. By Professor GEORGE B. STEVENS, Ph.D., D.D., of Yale University. Cr., 8vo, $2.00.

This study of the teachings of the great apostle is chiefly designed to aid the reader in determining for himself what materials his writings furnish for a theological system.

Germanic Origins.

A study in Primitive Culture. By FRANCIS B. GUMMERE, Ph.D., Professor of English in Haverford College. Cr., 8vo, $2.00.

Prof. Gummere's book presents a graphic and interesting picture of the government, religious beliefs, home life, and customs of the founders of the English-speaking race, showing what elements in our life and literature are traceable to Germanic sources.

The Oriental Religions and Christianity.

Ely Lectures for 1891. By FRANK F. ELLINWOOD, D.D. 12mo, $1.75.

The object of this book is to present in a popular form, for the benefit of Christians of every denomination, and particularly for those interested in missionary work, a comparative study of the great religious faiths in India, China, Turkey, and Persia with Christianity.

27 and 29 West 23d St., New York.

RECENT AND FORTHCOMING PUBLICATIONS.

Questions of the Day Series.

LXIX.—MONEY, SILVER, AND FINANCE. By J. HOWARD COWPERTHWAIT. $1.25.

"It is, in effect, an exceedingly valuable epitome of the late internal financial history of the country, and it affords as well an important view of the monetary relations of the United States with foreign nations. . . . It is a timely and helpful contribution to the economic literature of the day."—*N. Y. Press.*

"It is an excellent book of the sort that a man of ordinary mentality may read without confusion, yet showing a thorough understanding of economic laws."—*N. Y. Journal.*

LXX.—THE QUESTION OF SILVER. By LOUIS R. EHRICH of Colorado. (Nearly ready.) $1.

The Industrial and Commercial

HISTORY OF ENGLAND. A Series of Lectures by the late JAMES E. THOROLD ROGERS, Professor of Political Economy in the University of Oxford, author of 'Six Centuries of Work and Wages,' 'The Economic Interpretation of History,' etc. 8vo, $3.00.

Writers and Readers.

By GEORGE BIRKBECK HILL, D.C.L., editor of Boswell's 'Life of Johnson.' The volume comprises a series of lectures given in Oxford in 1891. 12mo, gilt top, $1.75.

"This little volume should be carefully read by all youthful writers who hold with a student whom the author met at Oxford, that owing to the greater subtlety of thought nowadays, the tongue of Shakespeare and Milton is unequal to the demands made upon it by modern thinkers."—*London Spectator.*

Journeys in Persia and Kurdistan,

including a summer in the upper Karun region and a visit to the Nestorian Rayahs. By Mrs. ISABELLA BIRD BISHOP (Miss Bird), Honorary Fellow of the Royal Scottish Geographical Society, author of 'Six Months in the Sandwich Islands,' 'Unbeaten Tracks in Japan,' etc., etc. Two volumes, fully illustrated, 8vo, $6.50.

"In spite of all the disadvantages arising from the loss of her notes, and the circumstances under which it was written, Mrs. Bishop's book is one of the most entrancing works of travel of the season."—*The Scotsman, London.*

"One lays aside the work with a hearty admiration for the author and for the missionaries of whom she speaks, and with respect for many qualities exhibited by the Persians and Kurds, but with the conviction that probably no other portion of the world is more thoroughly uncomfortable in which to travel."—*Boston Congregationalist.*

"One feels that these were written among the surroundings which they describe, and that gives the reader a fresher view of the people and the places."—*N. Y. Recorder.*

A Dream of Other Days.

A Romantic Poem. By Lieut.-Col. FIFE-COOKSON, author of 'With the Armies of the Balkans,' etc., etc. 16mo, cloth, gilt top, $1.00.

7,000 Words Often Mispronounced

A complete handbook of difficulties in English Pronunciation, including an unusually large number of proper Names, and words from Foreign Languages. By WILLIAM HENRY P. PHYFE. Tenth Edition, 16mo, cloth. Popular Edition, 75 cents.

"This is one of the most acceptable and useful handbooks which have come to hand for a long time."—*Brooklyn Standard-Union.*

"It may safely be said to be the best work of the kind that has yet appeared."—*Washington Public Opinion.*

**** Notes on New Books sent regularly upon application.

The Nation

Public Library 28592

"*The most important literary event of the season.*"—NEW YORK COMMERCIAL ADVERTISER.

NOW READY. THE FIRST VOLUME OF THE

MEMORIAL HISTORY OF THE CITY OF NEW YORK.

Edited by Gen. JAMES GRANT WILSON.

The work will be prepared on the coöperative plan, the following well-known writers being contributors to its pages:

Hon. JOHN BIGELOW.	Mr. ROBERT LUDLOW FOWLER.	Mr. GEORGE PELLEW.	Dr. JOHN GILMARY SHEA.
Mr. MONCURE D. CONWAY.	Hon. JAMES W. GERARD.	Bishop HENRY C. POTTER.	Mr. JOHN AUSTIN STEVENS.
Hon. CHARLES P. DALY.	Mr. ANDREW H.. GREEN.	Gen. JOHN MEREDITH READ.	Mr. WILLIAM L. STONE.
Rev. B. F. DE COSTA, D.D.	Mr. CHAS. R. HILDEBURN.	Dr. SAMUEL S. PURPLE.	Mr. BAYARD TUCKERMAN.
Rev. MORGAN DIX, S.T.D.	Gen. O. O. HOWARD, U. S. A.	Gen. T. F. RODENBOUGH, U.S.A.	Rev. ASHBEL G. VERMILYE, D.D.
Dr. THEODORE W. DWIGHT.	Hon. JOHN JAY.	Hon. THEODORE ROOSEVELT.	Gen. ALEXANDER S. WEBB.
Mr. BERTHOLD FERNOW.	Prof. EUGENE LAWRENCE.	Rev. PHILIP SCHAFF, D.D.	

The entire work will consist of four royal octavo volumes of about 600 pages each, and illustrated with not less than 1,000 portraits, views of historic houses, scenes, statues, tombs, monuments, maps, and facsimiles of autographs and ancient documents, printed by the De Vinne Press.

In every respect the most elaborate work ever prepared on an American city.

PRESS ENDORSEMENTS.

"Of the books called forth by the approaching celebration of the discovery of the New World, none will commend itself more strongly than the 'Memorial History of the City of New York.' We are at last to have a narrative not unworthy of the theme in respect of exhaustive, luminous, and trustworthy treatment."—*New York Sun,*

"In paper, typography, illustrations, and binding it is unsurpassed by any previous publication of the kind from any press in this city. It is as perfect as the printer, artist, and engraver can make it."—*New York Commercial Advertiser.*

"A book of the greatest beauty and substantial usefulness."—*The Independent.*'

"It will be welcomed not only by the people of the great metropolis, but by the citizens of the country generally."—*New York World.*

"It will be a permanent literary treasure."—*The New York Observer.*

"A work any New Yorker would be glad to have in his library."—*New York Herald.*

F. W. BALL, Fort Worth, Texas.

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between
NEW YORK and GENOA, ITALY,
BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals:
FULDA, March 12; WERRA, April 2; FULDA, April 16; WERRA, May 7; FULDA, May 28; WERRA, June 18.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

Breakfast Cocoa

from which the excess of oil has been removed,

Is absolutely pure and it is soluble.

No Chemicals are used in its preparation. It has *more than three times the strength* of Cocoa mixed with Starch, Arrowroot or Sugar, and is therefore far more economical, *costing less than one cent a cup.* It is delicious, nourishing, strengthening, EASILY DIGESTED, and admirably adapted for invalids as well as for persons in health.

Sold by Grocers everywhere.

W. BAKER & CO., Dorchester, Mass.

Back Numbers of "The Nation."

In response to frequent inquiries from subscribers:

An incomplete set of THE NATION has little or no market value. Partial sets, bound and unbound, are always obtainable (usually lacking the earliest volumes), and do not command high rates. The bindings generally count for nothing, owing to great diversity of styles. Volume I. has readily brought $10 and upward when complete, bound or unbound, but will bring very little in proportion if a single number is missing. Volumes II. and III. are also scarce, but not so high-priced as the first.

Complete sets, both bound and unbound, have sold for $100, with tolerably quick bidders, and have an increasing value year by year.

Single numbers not more than a year old can usually be supplied by the publishers at 10 cents each. For numbers more than a year old purchasers are referred to Mr. J. W. Christopher, 47 Dey St., Mr. A. S. Clark, 34 Park Row, H. Williams, 195 West Tenth Street, New York; or A. H. Roffe & Co., Boston, Mass.

The publishers no longer undertake to buy or sell numbers or volumes more than a year old, and can only recommend sellers or purchasers to negotiate with a dealer or to advertise in THE NATION.

[Publication was begun July 1, 1865, Vol. I. comprising the last half year. Two volumes per year have since been issued, Vol. LII. comprising the first half-year of 1891.]

BACK NUMBERS OF MAGAZINES and Reviews, early and recent. Correspondence solicited. A. H. ROFFE & Co., Boston, Mass.

What is The Library of American Literature By E. C. Stedman and E. M. Hutchinson.

It will pay you to find out by writing to C. L. WEBSTER & CO., 67 Fifth Ave., New York.

THE NATIONAL CONSERVATORY OF MUSIC OF AMERICA,

126 and 128 East Seventeenth Street, New York.

OFFICERS:

Mrs. JEANNETTE M. THURBER, President. Hon. HENRY W. CANNON, Treasurer.
CHAS. INSLEE PARDEE, A.M., Secretary.

To American Composers and Authors:

The National Conservatoay of Music of America, desirous of emphasizing the engagement of Dr. Antonin Dvorak as its Director by a special endeavor to give an additional impulse to the advancement of music in the United States, proposes to award prizes for the best Grand or Comic Opera (Opera Comique), for the best Libretto for a Grand or Comic Opera (Opera Comique), for the best Piano or Violin Concerto, and for the best Symphony, Oratorio and Suite, or Cantata, each and all of these works to be composed or written by composers and librettists born in the United States and not above thirty-five years of age. The prizes shall be as follows:

SUBJECTS AND PRIZES.

For the best Grand or Comic Opera (Opera Comique), words and music,	$1,000
For the best Libretto for a Grand or Comic Opera (Opera Comique),	500
For the best Symphony,	500
For the best Oratorio,	500
For the best Suite or Cantata,	300
For the best Piano or Violin Concerto,	200

GENERAL CONDITIONS.

1. Each work must be in manuscript form and absolutely new to the public.
2. Its merits shall be passed upon by a special jury of five or more competent judges.
3. The works to which the prizes shall be awarded shall be made known to the public under the auspices of the National Conservatory of Music of America, whose operatic conductors, vocalists, instrumentalists, choral forces, etc., insure an ensemble that must add largely to the effectiveness of the compositions.
4. The National Conservatory of Music of America reserves the right to give three public performances of the works to which prizes shall be awarded; these shall afterwards be the property of the composers and authors.
5. Manuscripts shall be sent for examination to the above address between September 1 and October 15, 1892. The award of prizes will be made on or about November 15, 1892.

NEW BOOKS.

READY MARCH 15th:

Whymper's New Book, Travels Amongst the Great Andes

of the Equator. By EDWARD WHYMPER. With 150 illustrations engraved by the Author. Large 8vo, $6.00.

After a long delay, Edward Whymper's new book is at last definitely announced for the 15th. It is the story of his adventurous ascent and exploration of several of the highest peaks among the Equatorial Andes, told with all the dash, spirit, and humor that give such zest to his account of his "Scrambles Amongst the Alps." The volume is beautifully and copiously illustrated by many full-page and smaller wood engravings.

JUST PUBLISHED.

Sir Edwin Arnold's New Book, Potiphar's Wife,

and Other Poems. 12mo, $1.25.

The distinguished author of "The Light of Asia" finds in the romantic life of Egypt and Japan the themes for nearly half of the poems in this volume. They have all the throbbing intensity of passion, the glowing Oriental imagery, and the melodious rhythm which have given extraordinary popularity to the author's other poems; while the others, equally graceful, give an agreeable variety of subject to a charming volume. The advance orders for the book have made a second edition necessary before the day of publication.

Vain Fortune.

By GEORGE MOORE, author of "Impressions and Opinions," "A Mummer's Wife," etc. 12mo, $1.00.

Mr. Moore's novel is a powerful study of the character and temperament of an emotional, jealous woman in her love for a young playwright, whose portrait is drawn with an equally firm hand.

Youth of the Duchess of Angouleme.

A new volume on the Famous Women of the French Court. From the French of Imbert de Saint-Amand. 12mo, with Portrait, $1.25.

"This is the first of three volumes on the Period of the Restoration. The other two will deal with the Duchess of Angouleme at a later period, and the Duchess of Berry. The present volume relates to a period of intense interest, and abounds in those marvellous bits of descriptive writing in which the author so greatly excels."—*Philadelphia Telegraph.*

Germanic Origins.

A study in Primitive Culture. By FRANCIS B. GUMMERE, Ph.D., Professor of English in Haverford College. Cr., 8vo, $2.00.

"A work as fascinating in manner as it is comprehensive in scope and authoritative in detail. In spite of its wealth of erudition it has not a dull page in it."—*Boston Beacon.*

Hand-book of Greek Archæology.

By A. S. MURRAY, Keeper of Greek and Roman Antiquities in the British Museum. With 20 colored plates and 118 other illustrations. 8vo, $6.00.

Mr. Murray's book treats of sculpture, vases, bronzes, gems, terra-cottas, architecture, mural paintings, etc., tracing the historical development of each art in a scholarly and yet popular manner. The illustrations are of great variety and beauty, those in colors being especially rich, and all serving to illuminate the text.

JUST PUBLISHED.

Impressions of Italy.

By PAUL BOURGET. Translated by Mary J. Serrano. 1 vol., 12mo, cloth, gilt top, $1.50.

A delightful and unconventional volume. Cathedrals, paintings, landscapes, dress, customs—all these and more are the subjects of its pages. M. Bourget has the rare art of omitting needless details; his readers are thus presented with a series of pictures that must be retained long after the book is laid aside.

My Lady's Dressing Room.

A Manual of the Toilet. Adapted from the French of the Baronne Staffe, with an Introduction and Notes by HARRIET HUBBARD AYER. With Portrait. Dainty cover, gilt top. 1 vol., 12mo, $1.50.

With the Baronne Staffe's book as an admirable and authoritative basis for her own work, Mrs. Ayer has prepared a valuable manual of the toilet that will be found especially adapted to the needs of American women.

"Infinite riches in a little room."

Cassell's Complete Pocket Guide to Europe.

EDITION FOR 1892.

Edited by E. C. STEDMAN.

1 vol., leather binding. Price, $1.50.

This complete and real POCKET GUIDE has now been tested by ten years of steadily increasing use, It contains ROUTES and DETAILS for travel in all portions of Europe usually covered in a single tour. It is fuller and more specific than many guide-books of larger proportions. It can be carried in a man's coat or hip-pocket, or in a woman's dress-pocket or muff.

For the present issue a special revision has been made to the latest practicable date. New maps and other improvements have been added. The publishers recommend it as a model book of its kind.

AN IMPORTANT NEW BOOK of TRAVEL

AMONG AN ALMOST UNKNOWN PEOPLE.

Across Thibet.

By GABRIEL BONVALOT, author of "Through the Heart of Asia." Translated from the French by C. B. Pitman. With 106 fine illustrations from photographs taken by Prince Henry of Orleans and a large route map in colors. One elegant octavo volume, extra cloth, gilt top, $3.50.

"M. Gabriel Bonvalot has already achieved a high reputation as a Central Asian explorer. 'Across Thibet' is thus recommended alike by the character and literary skill of the explorer, and by the interest and novelty of the regions explored by him. . . . The copious illustrations due to Prince Henry's camera are full of interest, and the translation is excellently done."—*London Times.*

Recollections and Letters of Ernest Renan.

Author of "The Life of Christ," etc., etc. Translated from the French by ISABEL F. HAPGOOD. 1 vol., 12mo, extra cloth, gilt top, $1.50.

It is unnecessary to urge the importance of a work from the pen of M. Renan. The present volume is one of uncommon interest, both from the character of its contents and from the fact that it is, without doubt, the author's final collection of personal reminiscences.

The book loses nothing in its translation by Miss Isabel F. Hapgood, so widely known for her own rare literary gifts.

Rose and Ninette.

A Story of the Morals and Manners of the Day. By ALPHONSE DAUDET. Translated by Mary J. Serrano. 1 vol., 12mo, cloth, 75 cents; paper, 50 cents.

M. Daudet regards this story as the supreme effort of his life. It deals with the subject of divorce, and is written with a power that indicates the author's deep feeling on this leading social problem.

FOR SALE BY ALL BOOKSELLERS.

Cassell Publishing Company

104 and 106 Fourth Avenue, New York.

MACMILLAN & CO.'S NEW BOOKS.

Now Ready. A New Novel by Hon. Emily Lawless, author of 'Hurrish,' etc. 12mo, cloth, $1.00.

GRANIA: The Story of an Island.

By Hon. Emily Lawless, author of 'Hurrish.' 12mo, cloth, $1.00.

Now Ready. Third Edition. 12mo, cloth, $1.00.

MRS. HUMPHRY WARD'S NEW NOVEL.

Also, the Library Edition, printed in larger type, on better paper. 2 vols., 12mo, cloth, in box, $3.00.

THE HISTORY OF DAVID GRIEVE.

By Mrs. Humphry Ward, author of 'Robert Elsmere,' etc. Also in one volume, 12mo, cloth, $1.00.

"What sorrows, what repentances, sufferings, sins, heart-searchings, and brain-cudgellings David passes through we leave to our readers to find out for themselves. They will find more than this. They will find thoughts which stimulate and passages which burn. . . . They will find a fearless grappling with the things that are, treated as only a woman, high-minded and sincere, can treat these things."—*Saturday Review.*

"Mrs. Humphry Ward's new story is at once strongly realistic and strikingly and variously illustrative of the currents of modern thought. . . . It deals not only with the religious problems which are being discussed with increasing zest throughout the civilized world, but it brings in question those essentially modern views of the influence of heredity and temperament upon life which are doing so much to modify the old dogmatic conclusions. It is emphatically a novel of the period, and is informed throughout by the 'Zeitgeist.' . . . Written with surprising strength and fire. . . . Deeply interesting throughout, and a very remarkable creation. . . . Finally it must be said that 'The History of David Grieve' is a remarkably powerful, well-sustained, interesting, and well-written novel. It certainly requires some thought in its readers, for much thought has gone to its composition. But it will reward attention, and once read it will be remembered."—*New York Tribune.*

Uniformly Bound. NEW NOVELS. Price, $1.00 each

THE LESSON OF THE MASTER, and Other Stories. By Henry James, author of 'The Europeans.'

MARIAM: Or, Twenty-one Days. By Horace Victor.

DENZIL QUARRIER. By George Gissing, author of 'Demos,' 'The Nether World,' etc.

ZOROASTER. By F. Marion Crawford, author of 'Witch of Prague,' etc. New and cheaper edition.

Now Ready. New Edition. Uniform with "The Makers of Florence." $3.00.

JERUSALEM:

The Holy City—Its History and Hope. By Mrs. Oliphant. Author of "The Makers of Venice," "Royal Edinburgh," etc. With 50 illustrations. New edition. Crown 8vo, cloth, gilt, $3.00.

"The beauty of romance is thrown about the bones of history with an art which is Mrs. Oliphant's own. It is beautifully interesting; nay, absorbing. It is a finished telling of the history of that city dear to all who love the Holy Land and those who made it holy. This volume has the stamp of permanent value. A critical student, a mistress of the art literary, one seldom excelled in narrative power, with a deep reverence and love for the places and people revivified, Mrs. Oliphant is equipped as few others to tell the Story of Jerusalem from the days of David the Shepherd to the time of the crucifixion of our Lord."—*Boston Times.*

THE STATESMAN'S YEAR BOOK, 1892.

Statistical and Historical Annual of the States of the Civilized World. Edited by J. Scott Keltie. Librarian to the Royal Geographical Society. Twenty-ninth annual issue. 12mo, cloth, $3.00.

"The Manual is the best work of its kind extant, and an indispensable companion for the writer as well as for the statesman."—*Commercial Bulletin, Boston.*

"It is the most compact and available statistical and historical annual we have of the States of the world."—*Independent.*

"*The clearest and truest picture that ever has been presented of the real Government of Great Britain.*"—Review of Reviews.

THE PLATFORM—ITS RISE AND PROGRESS.

By Henry Jephson. Two volumes. Large crown 8vo, $4.00.

"Dr. Henry Jephson has struck a new vein in political history, and has worked it certainly with diligence, and we think his readers will say with success. He claims that among the great political agencies the Platform has hitherto been overlooked. His remarks have an interest for all communities under parliamentary or elective government. . . . A very useful as well as a very interesting addition to political literature."—*Washington Post.*

RECOLLECTIONS OF A HAPPY LIFE.

BEING THE AUTOBIOGRAPHY OF MARIANNE NORTH. Edited by her sister, Mrs. John Addington Symonds. With Portraits. 2 vols., 8vo, $7.00.

"The Autobiography of Marianne North is an entertaining book. This lady never lacked courage. Her book is full of it, as her life was; and full of the energy of overflowing life, and of original, or, at any rate, individual views. The autobiography is a record of her passion for travel . . . Marianne North has bequeathed a really charming book to the world which was so cordial and pleasant to her."—*New York Tribune.*

HISTORICAL ESSAYS.

By Edward A. Freeman, M.A., D.C.L., LL.D. Fourth Series. 8vo, cloth, $3.50.

THE HELL OF DANTE ALIGHIERI.

Edited, with Translation and Notes, by Arthur John Butler, late Fellow of Trinity College, Cambridge. 12mo, cloth, $3.50.

JULES BASTIEN-LEPAGE

AND HIS ART. A Memoir, by André Theuriet. With which is included 'Bastien-Lepage as Artist,' by George Clausen, A.R.W.S., 'Modern Realism in Painting,' by Walter Sickert, N.E.A.C., 'A Study of Marie Bashkirtseff,' by Matilde Blind. Royal 8vo, cloth, gilt top, $3.50.

"Theuriet's graceful memoir of J. Bastien-Lepage and his art deserves to be universally read. The book is exquisitely mounted, and has almost a personal charm in its revelations of individual character."—*Philadelphia Ledger.*

"The book is one of the handsomest art books I have seen. The illustrations are excellent, and the letterpress is everywhere interesting."—*The Speaker.*

MACMILLAN & CO., 112 Fourth Ave., New York.

Sea-Shore Properties.

ISLAND ON THE MAINE COAST.

FOR SALE.—One of the most beautiful islands on this coast, consisting of several hundred acres of fine high land: woodland and open grass land; cliffs and beaches; bordering on perfect harbors; extended mountain and island views—convenient to regular steam communication; taxes nominal. This property, situated in the central part of Penobscot Bay in the midst of the most beautiful scenery of the Maine Coast and forty miles nearer Boston and the West than Bar Harbor, is one of the very few islands left for sale at farm values and must be sold to settle a joint ownership account.

27 School St., Boston, Mass.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

ALFRED BOWDITCH,
HENRY PARKMAN,
J. MURRAY HOWE, } Trustees,
27 School St., Boston, Mass.

MASSACHUSETTS SHORE.

FOR SALE.—On the north shore of Massachusetts Bay (commonly known as the Beverly Shore), one of the most finely situated improved estates on this line of coast, consisting of 20 acres of high table-land, commanding broad and beautiful ocean views. The land fronts on the shore, has fine beach, rocks, and is convenient to good anchorage for yachts. Large, substantially built mansion-house, stable, greenhouse, gardener's cottage, gardens, orchard avenues, and a great variety of fine trees, lawns, and shrubbery. One hour's ride from Boston. This property will be sold at a low price to settle an estate.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

The undersigned act as agents for the purchase and rental, and offer for sale and lease properties on all parts of the New England Coast. Descriptions of the list estates available in any section desired given. The Maine and Massachusetts Coast a specialty.

THE

Popular Science Monthly

FOR APRIL.

Agassiz at Penikese. By Prof. DAVID STARR JORDAN. A graphic pen-portrait of a great teacher of scienec.

New Chapters in the Warfare of Science. Astronomy. Part II. By ANDREW D. WHITE, LL.D. An authentic account of the treatment which the doctrine of the revolution of the earth, as put forth by Galileo, received from the Catholic and Protestant Churches.

Involuntary Movements. (Illustrated.) By Prof. JOSEPH JASTROW. An interesting investigation of the unconscious motions which guide the "muscle-reader."

Orchestral Musical Instruments. (Illustrated.) By DANIEL SPILLANE. Describes the progress in making the smaller musical instruments that has been achieved in America.

Rapid Transit. Lessons from the Census. VI. By CARROLL D. WRIGHT. Contains much valuable information bearing upon the growth of mileage, relative economy of motive powers, operating expenses, etc.

OTHER ARTICLES ON

SCIENCE AND FINE ART; BACTERIA IN OUR DAIRY PRODUCTS; VARIATIONS IN CLIMATE; THE GREAT EARTHQUAKE OF PORT ROYAL (illustrated); BAD AIR AND BAD HEALTH; SKETCH OF JOHN AND WILLIAM BARTRAM.

50 cents a number. $5.00 a year.

D. APPLETON & CO., NEW YORK.

D. APPLETON & CO.'S

NEW BOOKS.

SOCIAL STATICS.

By HERBERT SPENCER. New and revised edition, including "The Man *versus* the State," a series of essays on political tendencies heretofore published separately. 12mo. 420 pages. Cloth, $2.00.

Having been much annoyed by the persistent quotation from the old edition of "Social Statics," in the face of repeated warnings, of views which he had abandoned, and by the misquotation of others which he still holds, Mr. Spencer some ten years ago stopped the sale of the book in England and prohibited its translation. But the rapid spread of communistic theories gave new life to these misrepresentations; hence Mr. Spencer decided to delay no longer a statement of his mature opinions on the rights of individuals and the duty of the State.

MORAL TEACHINGS OF SCIENCE.

By ARABELLA B. BUCKLEY, author of "The Fairy-Land of Science," "Life and Her Children," etc. 12mo. Cloth, 75 cents.

"The book is intended for readers who would not take up an elaborate philosophical work—those who, feeling puzzled and adrift in the present chaos of opinion, may welcome even a partial solution, from a scientific point of view, of the difficulties which oppress their minds."—*From the Preface.*

MANUAL OF CHEMICAL TECHNOLOGY.

By RUDOLF VON WAGNER, translated and edited by WILLIAM CROOKES, F.R.S., from the thirteenth enlarged German edition. With 596 illustrations. 8vo. Cloth, $7.50.

The present English version differs so widely from that which appeared in 1872, that it may be regarded as substantially a new work. It is founded on the thirteenth German edition of 1888, brought out by Dr. Ferdinand Fischer, and remodeled in accordance with the many important changes which have been recently effected in chemical industry.

THE OAK:

A Study in Botany. By H. MARSHALL WARD, F.R.S. The third volume in the Modern Science Series, edited by Sir JOHN LUBBOCK. With 53 Illustrations. 12mo. Cloth, $1.00.

"The Modern Science Series" is designed primarily for the educated layman who needs to know the present state and result of scientific investigation, and who has neither time nor inclination to become a specialist on the subject which arouses his interest. Each book will be complete in itself, and, while thoroughly scientific in treatment, its subject will, as far as possible, be presented in language divested of needless technicalities. Illustrations will be given wherever needed by the text.

IT HAPPENED YESTERDAY.

By FREDERICK MARSHALL, author of "Claire Brandon," "French Home Life," etc. No. 88, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

This story shows a subtle and admirable literary art; it is a story, in some respects, characteristic of "the end of the century," but one which, unlike many of the latter-day essays in what may be termed psychological fiction, succeeds in arresting and holding the reader's attention. In some respects the author shows a gain upon "Claire Brandon," which will be remembered as a work of admirable quality.

MY GUARDIAN.

By ADA CAMBRIDGE, author of "The Three Miss Kings," "Not All in Vain," etc. Illustrated. No. 89, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"A story which will, from first to last, enlist the sympaathies of the reader by its simplicity of style and fresh, genuine feeling. . . . The author is *au fait* at the delineation of character."—*Boston Transcript.*

"The *dénoûment* is all that the most ardent romance-reader could desire."—*Chicago Evening Journal.*

MRS COMEGYS AND MISS BELL'S English, French, and German Boarding-School for young ladies reopens Sept. 28, 1891.
Students prepared for college. Ample grounds for outdoor exercise.

PENNSYLVANIA, Philadelphia, 1350 Pine St.

MISS ANABLE'S BOARDING AND Day School for Young Ladies will reopen Sept. 28.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classical National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.
For references and circular address
MRS. E. L. HEAD, Germantown, Pa.

GERMANY, Schwerin (3 hours from Hamburg).

Is to-day, as it ever has been, the Leading Typewriter. Carefully tested improvements are constantly added to this famous machine.

SEND FOR AN ILLUSTRATED CATALOGUE AND PRICE LIST OF OUR "PARAGON" TYPEWRITER RIBBONS.

JUST PUBLISHED:

ANABASIS DICTIONARY. An Illustrated Dictionary to Xenophon's Anabasis. Prepared by John Williams White, Professor of Greek in Harvard University, and Morris H. Morgan, Assistant Professor of Latin and Greek in Harvard University. viii+290 pages. Bound with the Text and Notes of Goodwin & White's Anabasis. Introduction price, $1.50; by mail, postpaid, $1.65.

This is the illustrated vocabulary to the Anabasis for which teachers have been waiting now a number of years, and it is believed that it will be found to fully justify the high expectations which have been entertained of it in advance. It is not a compilation from other vocabularies, but was made on the basis of a new collection and examination of all the words in the Anabasis itself. Special attention has been paid to the connection of the Greek words with the related words in Latin and in English. The facts are brought out in one hundred and twenty-four groups of such words, arranged conveniently for study at the end of the book.

Direct Fast Express Route
TO THE MEDITERRANEAN.
First-class Passenger Steamer Service between
NEW YORK and GENOA, ITALY,
BY THE
NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals:
WERRA, April 2; FULDA, April 16; WERRA, May 7; FULDA, May 28; WERRA, June 18; FULDA, July 2.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

EUROPEAN SUMMER AND WINTER Resort, University town of Innsbruck, Tirol, Austria; 1,900 feet above the sea, with dry, bracing climate. Hotel Tirol, open all the year, Carl Landsee, Proprietor. Large, airy, sunny rooms, well furnished. Elevator. Superior cuisine (table d'hôte or à la carte). Reduced rates in winter. Carriages and sleighs at low rates. Charming excursions made from the hotel at all seasons. Unusual advantages for securing teachers of the languages, history, science, art, music, etc., at very moderate terms. Eminent medical care and skilled nurses if desired. Best English and American references. Illustrated pamphlets sent on application.

STUDY AND TRAVEL.

Sea-Shore Properties.

ISLAND ON THE MAINE COAST.

FOR SALE.—One of the most beautiful islands on this coast, consisting of several hundred acres of fine high land: woodland and open grass land; cliffs and beaches; bordering on perfect harbors; extended mountain and island views—convenient to regular steam communication; taxes nominal. This property, situated in the central part of Penobscot Bay in the midst of the most beautiful scenery of the Maine Coast and forty miles nearer Boston and the West than Bar Harbor, is one of the very few islands left for sale at farm values and must be sold to settle a joint ownership account.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots.

For plans, circulars, and details address

ALFRED BOWDITCH,
HENRY PARKMAN,
J. MURRAY HOWE, } Trustees,
27 School St., Boston, Mass.

MASSACHUSETTS SHORE.

FOR SALE.—On the north shore of Massachusetts Bay (commonly known as the Beverly Shore), one of the most finely situated improved estates on this line of coast, consisting of 20 acres of high table-land, commanding broad and beautiful ocean views. The land fronts on the shore, has fine beach, rocks, and is convenient to good anchorage for yachts. Large, substantially built mansion-house, stable, greenhouse, gardener's cottage, gardens, orchard, avenues, and a great variety of fine trees, lawns, and shrubbery. One hour's ride from Boston. This property will be sold at a low price to settle an estate.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

The undersigned act as agents for the purchase and rental, and offer for sale and lease properties on all parts of the New England Coast. Descriptions of the best estates available in any section desired given. The Maine and Massachusetts Coast a specialty.

Charles Scribner's Sons

NEW BOOKS.

Whymper's New Book, Travels Amongst the Great Andes

of the Equator. By EDWARD WHYMPER. With 150 illustrations engraved by the Author. Large 8vo, $6.00.

HON. THEODORE ROOSEVELT WRITES:

"Mr. Whymper was not content merely with the conquest of mighty Chimborazo; he also campaigned against the greatest of its fellow peaks. The story of his travels, of the hardships he endured, and the triumphs he achieved, is of interest not only to mountaineers, but also to all lovers of manly adventure."

*** A SUPPLEMENTARY APPENDIX to Mr. Whymper's book contains contributions from fifteen zoölogists and other scientists on the collection of birds, insects, reptiles, fishes, etc., which the author brought from the Andes. Of these specimens, ninety-six species were new to science. [8vo. $5.00 *net.*] A pamphlet, by Mr. Whymper, is also published on "HOW TO USE THE ANEROID BAROMETER." [8vo. 75 cents *net.*]

THIRD EDITION READY.

Sir Edwin Arnold's New Book, Potiphar's Wife,

and Other Poems. 12mo, $1.25.

The extraordinary demand for Sir Edwin Arnold's new volume of poems, just published, on Egyptian, Japanese, and other themes, is evidence of the popularity of the author of "The Light of Asia," whose poetic gift finds full expression in this fresh volume of verse.

Lectures on the History of Literature.

By THOMAS CARLYLE. Delivered April to July, 1838. 12mo, $1.00. *Now published for the first time.*

"We could have no work from his hand which embodies more clearly and emphatically his literary opinions than this graphic survey of the great writers and great literary epochs of the world. Many will say that it is the clearest and wisest and most genuine book that Carlyle ever produced."—*Julius H. Ward, in the Boston Herald.*

Vain Fortune.

By GEORGE MOORE, author of "Impressions and Opinions," "A Mummer's Wife," etc. 12mo, $1.00.

"It is a fascinating story, and very strong. The details are worked out with great vigor and impressiveness.—*Boston Beacon.*

Youth of the Duchess of Angouleme.

A new volume on the Famous Women of the French Court. From the French of Imbert de Saint-Amand. 12mo, with Portrait, $1.25.

"This is the first of three volumes on the Period of the Restoration. The other two will deal with the Duchess of Angouleme at a later period, and the Duchess of Berry. The present volume relates to a period of intense interest, and abounds in those marvellous bits of descriptive writing in which the author so greatly excels."—*Philadelphia Telegraph.*

Hand-book of Greek Archæology.

By A. S. MURRAY, Keeper of Greek and Roman Antiquities in the British Museum. With 20 colored plates and 118 other illustrations. 8vo, $6.00.

Mr. Murray's book treats of sculpture, vases, bronzes, gems, terra-cottas, architecture, mural paintings, etc., tracing the historical development of each art in a scholarly and yet popular manner. The illustrations are of great variety and beauty, those in colors being especially rich, and all serving to illuminate the text.

Germanic Origins.

A study in Primitive Culture. By FRANCIS B. GUMMERE, Ph.D., Professor of English in Haverford College. Cr., 8vo, $2.00.

"A work as fascinating in manner as it is comprehensive in scope and authoritative in detail. In spite of its wealth of erudition it has not a dull page in it, and the least learned person with fair intelligence could hardly fail to derive immense advantage from it."—*Boston Beacon.*

Sciatica and Lumbago are usually relieved by the use of BUFFALO LITHIA WATER.—*Advt.*

"The weary brain requires some nerve sustaining element as food."—HERBERT SPENCER.

Crosby's Vitalized Phosphites.

The vital principle of animal and vegetable life isolated from the ox brain and wheat germ.

The loss of memory, the tired and exhausted feeling, the dull, unrefreshed sleep, or nervous sleeplessness, brain weariness, depressed vitality, are simply the brain and nervous system calling for their necessary food. In this condition the Vitalized Phosphites give great relief. It restores the true protagon, the brain phosphoid, increases brain and nerve power by specially feeding the nerve centres. It reinvigorates brain and body.

For thirty years endorsed by leading physicians, and the world's best brain-workers. Formula on the label. Pamphlet free to those who write for it. Druggists or by mail, $1.00. 56 West 25th St., New York.

None genuine without signature. F. Crosby Co.

A New Edition de Luxe.

Victor Hugo's WORKS.

LIMITED TO 1,000 COPIES.

The first and ONLY *fine edition of Hugo's Works, including all the romances and travels, and the principal poems and dramas, ever made in the English language.*

Victor Hugo is beyond question the greatest of the French writers of fiction, and is now esteemed both in Europe and America as one of the foremost writers of the Nineteenth Century. He was also a most gifted poet, and as a dramatist his great plays "Ruy Blas," "The Fool's Revenge," etc., etc., have been wonderfully successful.

This edition is embellished with over 200 superb etchings and photogravures by the best artists in France, the latter being mainly executed by the great firm of Goupil & Co. of Paris. All of these illustrations are proofs on Imperial Japanese Government paper.

The manufacture of the book is perfect.

The type is large and new, and set in a fine open page. The margins are ample and the paper a beautiful natural tint laid paper. The volume is a small 8vo, easy to handle, and the binding is vellum cloth, gilt tops, slightly trimmed. Complete in **30 vols.,** *issued at the rate of about 2 vols. per month, at* **$2.50 per volume.** *Prospectus and specimen pages showing type, page, and paper with sample illustration, sent on application.*

Longmans, Green & Co.'s New Books

HALF-HOURS WITH THE MILLIONAIRES.

Showing how much easier it is to make a million than to spend it. Edited by B. B. WEST. Crown 8vo, $1.50.

"A score of extremely droll sketches of imaginary philanthropy. . . . The book as a whole is amusing and not without some truths hidden in its agreeable persiflage. People who are not millionaires will enjoy it, but it is not certain that people who are millionaires will not enjoy it most of all—perhaps they will likewise derive a few very wholesome truths from its perusal."—*Boston Beacon.*

BEGGARS ALL: A Novel.

By Miss L. DOUGALL. In 1 vol., crown 8vo, $1.50.

"'Beggars All' is an unusually strong and impressive story throughout. It opens with a vigorously-conceived 'landscape with figures,' and to the last chapter it fulfils the promise of its opening. . . . The book is full of delicate work, while it has firmness as well as fineness of delineation. Hubert Kent is a masterly piece of portraiture."—*Anti-Jacobin.*

"This is one of the strongest as well as most original romances of the year. . . . The plot is extraordinary. . . . The close of the story is powerful and natural; . . . a masterpiece of restrained and legitimate dramatic fiction."—*Literary World.*

ENGLAND AND ROME.

A History of the Relations between the Papacy and the English State and Church from the Norman Conquest to the Revolution of 1688. By T. DUNBAR INGRAM, LL.D. Pp. xxii–430. 8vo, $4.50.

GENERAL VIEW OF THE POLITICAL HISTORY OF EUROPE.

By ERNEST LAVISSE, Professor at the Sorbonne. Translated with the author's sanction, by CHARLES GROSS, Ph.D., Instructor in History, Harvard University. Crown 8vo, cloth, $1.25.

WITH AXE AND ROPE IN THE NEW ZEALAND ALPS.

By GEORGE EDWARD MANNERING, Member of the Alpine Club, Member of the New Zealand Alpine Club, Member of the Royal Geographical Society of Australasia, and Member of the Philosophical Institute of Canterbury, N. Z. With Map and 18 full-page Illustrations from photographs. 8vo, $3.50.

RICHARD WISEMAN.

Surgeon and Sergeant-Surgeon to Charles II.: A Biographical Study.

By Surgeon-General Sir T. LONGMORE, C.B., F.R.C.S., etc. With Portrait and Illustration. 8vo, pp. xx–210, $3.50.

MISS ANABLE'S BOARDING AND Day School for Young Ladies will reopen Sept. 28.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classical National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.
For references and circular address
MRS. E. L. HEAD, Germantown, Pa.

Richmond and West Point Terminal Railway and Warehouse Co.

NEW YORK, MARCH 17, 1892.

To the Holders of Securities of the Richmond and West Point Terminal Railway and Warehouse Company and of its Auxiliary Corporations:

The Committee appointed on behalf of the Stockholders of the TERMINAL COMPANY submits for your approval a plan of reorganization, dated March 1, which is lodged with the CENTRAL TRUST COMPANY of New York. Under this plan the following new securities of a consolidated corporation are to be issued:

SECURITIES TO BE ISSUED.

FOUR PER CENT. 35-YEAR GOLD BONDS, TO BE SECURED BY FIRST MORTGAGE ON ALL THE PROPERTY AND EQUIPMENT OF A NEW COMPANY, INTEREST PAYABLE QUARTERLY	$170,000,000
FIVE PER CENT. PREFERRED STOCK (NON-CUMULATIVE), VOTE OF MAJORITY OF PREFERRED STOCK REQUISITE TO AUTHORIZE ANY ADDITIONAL MORTGAGE ON PROPERTY COVERED BY FIRST MORTGAGE	70,000,000
COMMON CAPITAL STOCK	110,000,000
TOTAL	$350,000,000

Holders of securities of the RICHMOND TERMINAL COMPANY, *the* RICHMOND AND DANVILLE RAILROAD COMPANY, *and the* EAST TENNESSEE, VIRGINIA AND GEORGIA RAILWAY COMPANY, *and their allied corporations are invited to deposit the same with the CENTRAL TRUST COMPANY (against its negotiable certificates, which are to be listed on the Stock Exchange) and to become parties to the plan.*

The method of exchange and of distribution of the new securities is set forth in detail in the Plan of Reorganization.

Holders of Richmond Terminal Preferred and Common Stock and Richmond Terminal Five Per Cent. Collateral Trust Bonds are invited to subscribe to the cash fund of **$14,588,640**, which is to be applied to meet the cash requirements of the plan, upon the following terms:

Each holder of 100 shares of said Common or Preferred Stock, and each holder of ten one-thousand-dollar Five Per Cent. Collateral Trust Bonds is entitled to subscribe for $1,600 of said fund. For each $1,600 of such cash subscription the subscriber is to receive $2,000 of the new Fours, and $700 of the new Preferred Stock.

Holders of lesser amounts than 100 shares or ten thousand dollars of bonds may subscribe and become entitled to new securities in the same proportion.

Subscribers must sign and deliver to the CENTRAL TRUST COMPANY a form of acceptance of right to subscribe, which will be furnished by the Trust Company.

All subscriptions must be made on or before the 14th day of April, 1892, and at the time of making such subscription the holder of the bonds or stock on which the subscription is made must deposit the same with the Central Trust Company and become a party to the Plan of Reorganization. The names of the subscribers will be registered by the Central Trust Company, and the right to the subscription shall belong to the registered subscriber and shall not follow a sale of the bond or of the stock or of the receipts representing the same. If on the 14th day of April, 1892, any portion of said cash fund shall remain unsubscribed, the Committee charged with the execution of this plan will offer to the registered subscribers the right to subscribe to the unsubscribed balance of the said fund upon such terms as the Committee may fix. The right to make such additional subscription must be exercised on or before April 25, 1892.

The allotment of subscriptions shall be made by the Committee at the expiration of the period last referred to, the Committee reserving the right to allot from any unsubscribed balance of said fund an amount less than the amount of the additional subscription.

Holders of said Five Per Cent. Collateral Trust Bonds and of the Preferred and Common Stock may deposit their securities with said depository, and become parties to the reorganization plan without subscribing to the $14,588,640 cash fund, if they shall elect to do so.

A bankers' syndicate has been formed which has guaranteed the entire subscription.

When in the judgment of the Committee sufficient securities have been deposited, the Committee will announce by advertisement that the plan has become effective.

Moneys arising from the subscription shall not be used by the Committee until such announcement shall have been made.

Copies of the Plan of Reorganization and forms of acceptance and assignment of right to subscribe may be obtained at the CENTRAL TRUST COMPANY, 54 Wall Street.

Deposits of securities under the plan must be made on or before April 14, 1892, unless the Committee shall extend the time therefor.

Application will immediately be made to list the reorganization certificates of deposit on the Stock Exchange.

NEW YORK, March 17, 1892.

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between *NEW YORK and GENOA, ITALY,*

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN during the FALL and WINTER months by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA at regular intervals:

WERRA, April 2; FULDA, April 16; WERRA, May 7; FULDA, May 28; WERRA, June 18; FULDA, July 2.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route during the Fall and Winter months, without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Opportunity is offered the Winter sojourner in ITALY or in Southern France to return to AMERICA by the same route in the early Spring from GENOA, thus entirely avoiding the rigorous climate of Northern latitudes. Apply to

OELRICHS & CO., 2 Bowling Green.

STUDY AND TRAVEL.

Mrs. Benj. Fuller Smith announces that she will continue to receive into her family in Dresden, Germany, a limited number of young ladies desiring to study abroad.

Mrs. Smith travels with her party during the summer months and holidays.

Information concerning expenses furnished upon application. Trustworthy references given and required. Address Mrs. BENJ. FULLER SMITH,
Care Messrs. Thode & Co., Bankers, Dresden.

MACMILLAN & Co.'s NEW BOOKS.

TO BE PUBLISHED MARCH 29:

A NEW VOLUME BY ALFRED, LORD TENNYSON.

THE FORESTERS: Robin Hood and Maid Marian.

BY ALFRED, LORD TENNYSON.

Uniform with the Library Edition of Works, 8 volumes. 16mo, cloth, $1.25.

"Lord Tennyson has touched the myth and tradition of Robin Hood with the magic wand of his genius and made them glow with the fire and semblance of reality."—*N. Y. Sun.*

Now Ready. A New Novel by the author of 'Hurrish.' 12mo, cloth, $1.00.

GRANIA: The Story of an Island.

By Hon. EMILY LAWLESS, author of 'Hurrish.' 12mo, cloth, $1.00.

"Whoever begins reading this story will, aye must, follow it to the end. It is a conjuring tale, thoroughly original and uncommonly entertaining. He who reads this story will have in his mind's eye the wind-swept rocky isles of Aran and in his heart the memory of Grania O'Malley."—*N. Y. World.*

"A strong and original story. To say that 'Grania' is a remarkable novel is but to state a truism, It is marked by originality, freshness, insight, a rare graphic power, and as rare a psychological perception. It is, in fact, a better story than 'Hurrish,' and that is saying a great deal."—*New York Tribune.*

Mrs. Humphry Ward's New Novel.

The History of David Grieve.

By Mrs. HUMPHRY WARD, author of 'Robert Elsmere,' etc. 12mo, cloth, $1.00.

A New Volume by Henry James.

The Lesson of the Master

and Other Stories. By HENRY JAMES, author of 'The Europeans.' 12mo, cloth, $1.00.

Now Ready. New Edition. Uniform with "The Makers of Florence." $3.00.

Jerusalem:

The Holy City—Its History and Hope. By Mrs. OLIPHANT. Author of "The Makers of Venice," "Royal Edinburgh," etc. With 50 illustrations. New edition. Crown 8vo, cloth, gilt, $3.00.

"The beauty of romance is thrown about the bones of history with an art which is Mrs. Oliphant's own. It is beautifully interesting; nay, absorbing. It is a finished telling of the history of that city dear to all who love the Holy Land and those who made it holy. This volume has the stamp of permanent value. A critical student, a mistress of the art literary, one seldom excelled in narrative power, with a deep reverence and love for the places and people revivified, Mrs. Oliphant is equipped as few others to tell the Story of Jerusalem from the days of David the Shepherd to the time of the crucifixion of our Lord."—*Boston Times.*

The Religious Systems of the World.

A Contribution to the Study of Comparative Religion. 8vo, cloth, $4.50.

"It is an interesting and valuable volume, both for the theologian and the general reader. It is almost an encyclopædia of the religions of the world."—*Christian Union.*

By Mrs. SUTHERLAND ORR. Sixth Edition, Revised. 16mo, $1.75.

A Primer on Browning.

By F. MARY WILSON. 16mo, cloth, 75 cents.

A Primer of the Gothic Language.

With Grammar Notes and Glossary. By JOSEPH WRIGHT, Ph. D., Deputy Professor of Comparative Philology in the University of Oxford. 16mo, cloth, $1.25.

Life of Christopher Columbus.

Discoverer of America. By SIR ARTHUR HELPS. 12mo, cloth, $1.75.

Horae Sabbaticae.

Reprint of articles contributed to the *Saturday Review* by Sir JAMES FITZJAMES STEPHEN, Bart., K.C.S.I. First Series, 12mo, cloth, $1.50. Second Series, 12mo, cloth, $1.50.

MACMILLAN & Co., 112 Fourth Avenue, New York.

SCRIBNER'S MAGAZINE,

(*PUBLISHED MARCH* 25,)

for April, contains the first of a notable series of articles by high authorities on

THE POOR IN GREAT CITIES.

There will be given in these articles an accurate and comprehensive account of the actual life and conditions of the poor in large centres and the means which are being employed to better them.

The Illustrations

will be a feature of great importance. All are drawn by artists from life or from photographs taken under the supervision of the authors.

The Social Awaking in London,

by Robert A. Woods, is the opening chapter in the series, and to many readers the extent of the work among the London poor described by Mr. Woods, who lived for some time at Toynbee Hall, will be a revelation. The illustrations (numbering 25) are drawn by Hugh Thompson, the English artist.

Further Articles:

The Children of the Poor in New York, by Jacob A. Riis. (May.)

Life in New York Tenements, as Seen by a City Missionary, by Rev. William T. Elsing. (June.)

The Andover House Work in Boston, by Prof. Wm. J. Tucker.

Among the Poor in Chicago, by Joseph Kirkland, author of "Zury." (July.)

The Schools for Street Arabs in Paris, by Edmund R. Spearman.

The Poor in the Great Cities of Italy, by Madam Mario.

Laws and Agencies to Protect the Poor and Prevent Pauperism, by Oscar Craig.

A London Riverside Parish, by Walter Besant.

ANOTHER IMPORTANT SERIES IS BEGUN IN THE APRIL ISSUE, ENTITLED

HISTORIC MOMENTS.

The aim of which is to give brief pen-pictures of important events in politics, history, and invention, by eye-witnesses and participants in them. These articles are to be instantaneous photographs, as it were, of the culmination of events. The first article is entitled "THE IMPEACHMENT TRIAL," and is by Edmund G. Ross, ex-Senator from Kansas, who was one of the seven Republican Senators who voted "Not Guilty" with the Democrats, and so secured the acquittal of President Andrew Johnson.

Among other subjects to be treated will be:

THE CHICAGO FIRE—THE FIRST NEWS MESSAGE BY TELEGRAPH—THE FIRST WORD BY TELEPHONE—THE LAST SPIKE OF THE UNION PACIFIC—THE RESUMPTION OF SPECIE PAYMENT.

AMONG OTHER ARTICLES IN THIS NUMBER ARE:

"Golden Mashona Land,"

In South Africa—"The future gold fields of the world." Illustrated.

Another fully illustrated article is E. S. Nadal's account of

"The New Parks of New York."

"Charles Keene of Punch."

By George Somes Layard. Illustrated,

"Paris Theatres and Concerts"

is the third of William F. Apthorp's papers.

The Fiction

of the number includes a second instalment of Robert Grant's good-natured satire, "The Reflections of a Married Man," and another instalment of Stevenson's "Wrecker," which brings the story up to the narrative of the mysterious man on whom the plot of the tale hinges. There are besides two short stories—"A Case of Conscience," by Beatrice Witte, and "Of the Blood Royal," by William Maynadier Browne.

The Point of View

discusses "Spare Time," "Politics and Public Opinion," and "Maupassant."

25 CENTS A COPY. $3.00 A YEAR.

CHARLES SCRIBNER'S SONS,

J. B. Lippincott Co.'s

PUBLICATIONS.

THE TEMPEST.

Volume IX. of the *Variorum Edition* of Shakespeare. Edited by Horace Howard Furness, Ph.D., LL.D., L.H.D. Royal octavo. Superfine toned paper, extra cloth, uncut edges, gilt top, $4.00.

"For the study of the play, Mr. Furness's edition will henceforth be as invaluable as indispensable."—*New York Tribune.*

"To enjoy Shakespeare thoroughly, there is but one edition will suffice, and that is Dr. Furness's own. It is the result of a lifetime of study by the most eminent Shakespearian scholar in America." *Philadelphia Public Ledger.*

"America has the honor of having produced the very best and most complete edition, so far as it has gone, of our great national poet. For text, illustration, commentary, and criticism, it leaves nothing to be desired. The editor, Mr. Horace Howard Furness of Philadelphia, combines with the patience and accuracy of the textual scholar an industry which has overlooked nothing of value that has been written about Shakespeare by the German and French as well as English commentators and critics; and, what is of no less moment, he possesses in himself a rare delicacy of literary appreciation and breadth of judgment, disciplined by familiarity with all that is best in the literature of antiquity as well as of modern times, which he brings to bear on his notes with great effect."—*Blackwood's Edinburgh Magazine.*

The volumes previously issued are "As You Like It," "The Merchant of Venice," "Othello," "Romeo and Juliet," "King Lear," "Macbeth," "Hamlet" (2 vols.). Uniform in style and binding, $4.00 per volume.

THE NEW

CHAMBERS'S ENCYCLOPÆDIA.

New Type, New Subjects, New Illustrations, New Maps.

A Complete Dictionary of Art, Science, History, Literature, Fable, Mythology, Biography, Geography, etc. Handsomely Illustrated with Maps and numerous Wood Engravings. Eight volumes now ready. The two remaining volumes to be issued during 1892. Price per vol.: Cloth, $3.00; Cloth, uncut, $3.00; Sheep, $4.00; Half morocco, $4.50.

"'Chambers's Encyclopædia,' in spite of the claims of other similar works, still continues to hold its own as a standard reference for the home or school. The new revision brings its articles well up to date, and introduces a large number of entirely new subjects. No expense has been spared in obtaining the coöperation of the best authorities in the special lines, and the result is a complete and comprehensive dictionary of useful knowledge. 'Chambers's' has an undisputed title to be considered one of the most accurate, reliable, convenient, and useful encyclopædias now on the American market."—*Boston Journal of Education.*

Specimen pages mailed on application.

FICTION.

His Great Self.

By MARION HARLAND, author of "Alone," "True as Steel," etc. 12mo. Cloth, $1.25.

"One of the best, if not, indeed, really the best product of her pen. The graphic and picturesque descriptions of the social customs, and the nice sense of honor which characterized the first families of Virginia combine to make the volume a delightful one."—*Boston Traveller.*

Corinthia Marazion.

By CECIL GRIFFITH, author of 'Victory Deane,' etc. The latest issue in *Lippincott's Series of Select Novels.* 12mo. Paper, 50 cents; cloth, 75 cents.

"The premature death of Cecil Griffith," says the London *Saturday Review*, "cut short a literary career of considerable promise. This, her last work, was decidedly her best. It is a novel which one cannot read without expressing admiration for the writer's courage, candor, cultivated style, and her calm reasoning power."

*** *For sale by all Booksellers, or will be sent by the Publishers, free of expense, on receipt of the price.*

G. P. Putnam's Sons,

27 and 29 West 23d St., New York.

HAVE NOW READY:

Julius Cæsar and the Foundation OF THE ROMAN IMPERIAL SYSTEM. By W. Warde Fowler, M. A., Lincoln College, Oxford. With maps, seven portraits of Cæsar, and thirty-three other illustrations. Heroes of the Nations, Volume VI. 12mo, Cloth, extra, $1.50; Half-Morocco, $1.75.

The author takes the ground in his Preface that the organization of the Roman Empire was due in part to preëxisting tendencies, and was in part the result of the extraordinary intellect and force of Cæsar. . . . The two leading themes of his book are, therefore, the tendencies of the age and the development of Cæsar's character.

It is believed that this work, which embodies the results of the latest scholarship, will be accepted as the most trustworthy, as well as the most attractive, presentation of the dramatic events of the period that has ever been published in brief compass.

"A volume of original importance, if only on account of its view of the relation of Cæsar to the political and social demands of the Roman world of his time."—*Boston Globe.*

"An admirable volume, forming a most attractive addition to a series of exceptional value and interest."—*Philadelphia Bulletin.*

"An attractive narrative, beautifully printed and richly illustrated."—*Brooklyn Eagle.*

The Question of Silver. By Louis R. Ehrich of Colorado. (No. LXX. in the Questions of the Day Series.) 75 cents.

Politics and Pen Pictures at Home AND ABROAD. By Henry W. Hilliard. 8vo, gilt top, with Portrait, $3.

Three Hundred and Sixty-six DINNERS. Suggested by Mary E. Nicol. It will be noticed that the compiler has not forgotten that the volume is to be published in leap year. 16mo. Gilt top, $1.25.

The New Illustrated National DICTIONARY OF THE ENGLISH LANGUAGE. With an appendix of abbreviations, Foreign Words and Phrases, List of Geographical Names, Scripture Proper Names, Forms of Addresses, etc. With 350 engravings. 16mo. 75c.

A Dream of Other Days. A Romantic Poem. By Lieut.-Col. Fife-Cookson, author of 'With the Armies of the Balkans,' etc., etc. 16mo, cloth, gilt top, $1.00.

"Melodious verse. . . . A stirring poem. Will certainly be read with pleasure."—*Court Journal, London.*

*** Descriptive prospectus of the "Questiosb of the Day," "Heroes of the Nations," and of the companion series of the "Story of the Nations" sent on application, as also copies of Putnam's quarterly bulletin, "Notes on New Books."

An Educational Directory.

I. THE NATION has the largest circulation of any literary and political journal published in this country. The 10,000 copies printed every week represent but a small part of the actual circulation, as THE NATION goes to all the principal libraries and reading-rooms, and into thousands of families.

II. The circulation is chiefly among the thinking and well-to-do classes—lawyers, physicians, bankers, and other professional men—and in the homes of cultivated people, where the education of children is a matter of careful consideration.

III. The School List in THE NATION has been a representative one for many years. It includes cards of most of the prominent educational institutions everywhere, during the season of school advertising, and a considerable number are inserted in the paper throughout the year.

School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

Advertising rates, 15 cents an agate line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12 1-2 per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

The Nation, 206 to 210 Broadway, N. Y.

A New Edition de Luxe.

Victor Hugo's WORKS.

LIMITED TO 1,000 COPIES.

The first and ONLY *fine edition of Hugo's Works, including all the romances and travels, and the principal poems and dramas, ever made in the English language.*

Victor Hugo is beyond question the greatest of the French writers of fiction, and is now esteemed both in Europe and America as one of the foremost writers of the Nineteenth Century. He was also a most gifted poet, and as a dramatist his great plays "Ruy Blas," "The Fool's Revenge," etc., etc., have been wonderfully successful.

This edition is embellished with over 200 superb etchings and photogravures by the best artists in France, the latter being mainly executed by the great firm of Goupil & Co. of Paris. All of these illustrations are proofs on Imperial Japanese Government paper.

The manufacture of the book is perfect.

The type is large and new, and set in a fine open page. The margins are ample and the paper a beautiful natural tint laid paper. The volume is a small 8vo, easy to handle, and the binding is vellum cloth, gilt tops, slightly trimmed. Complete in **30 vols.,** *issued at the rate of about 2 vols. per month, at* **$2.50 per volume.** *Prospectus and specimen pages showing type, page, and paper with sample illustration, sent on application.*

Sea-Shore Properties.

ISLAND ON THE MAINE COAST.

FOR SALE.—One of the most beautiful islands on this coast, consisting of several hundred acres of fine high land: woodland and open grass land; cliffs and beaches; bordering on perfect harbors; extended mountain and island views—convenient to regular steam communication; taxes nominal. This property, situated in the central part of Penobscot Bay in the midst of the most beautiful scenery of the Maine Coast and forty miles nearer Boston and the West than Bar Harbor, is one of the very few islands left for sale at farm values and must be sold to settle a joint ownership account.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

ALFRED BOWDITCH,
HENRY PARKMAN,
J. MURRAY HOWE, } Trustees,
27 School St., Boston, Mass.

MASSACHUSETTS SHORE.

FOR SALE.—On the north shore of Massachusetts Bay (commonly known as the Beverly Shore), one of the most finely situated improved estates on this line of coast, consisting of 20 acres of high table-land, commanding broad and beautiful ocean views. The land fronts on the shore, has fine beach, rocks, and is convenient to good anchorage for yachts. Large, substantially built mansion-house, stable, greenhouse, gardener's cottage, gardens, orchard, avenues, and a great variety of fine trees, lawns, and shrubbery. One hour's ride from Boston. This property will be sold at a low price to settle an estate.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

The undersigned act as agents for the purchase and rental, and offer for sale and lease properties on all parts of the New England Coast. Descriptions of the best estates available in any section desired given. The Maine and Massachusetts Coast a specialty.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

Houghton, Mifflin & Co.'s New Books.

The Discovery of America.

With some Account of Ancient America and the Spanish Conquest. By JOHN FISKE. With a steel portrait of Mr. Fiske, reproductions of many old maps, several modern maps, facsimiles, and other illustrations. 2 vols., crown 8vo, gilt top, $4.00.

This forms the beginning of Mr. Fiske's History of America. It is the most important single portion yet completed by him, and gives the results of vast research. The discovery of America has never before been treated with the fullness and the wonderful charm of narrative which characterize this work.

A Day at Laguerre's and Other Days.

By F. HOPKINSON SMITH, author of "Col. Carter of Cartersville," "A White Umbrella in Mexico," etc. 16mo, $1.25.

Nine delightful sketches and stories, full of interesting incidents, and written with admirable humor and literary charm. The book is peculiarly attractive, being printed on special Riverside paper from a beautiful new type made for this book, and bound in an exceptionally tasteful style.

San Salvador.

By MARY AGNES TINCKER, author of "Two Coronets," etc. 16mo, $1.25.

A story of peculiar interest, describing an ideal method and order of society and of life. It is not fantastic, but inspired by a lofty purpose to make life nobler and every way better.

The Unseen Friend.

By LUCY LARCOM. 16mo. $1.00.

A little book emphasizing and illustrating the great idea of the immediate presence of God among men. Like her previous book, "As it is in Heaven," this is singularly lofty and sweet in tone, and will at once uplift and charm its readers.

The House of the Seven Gables.

By NATHANIEL HAWTHORNE. Popular Edition. $1.00.

This is a very desirable inexpensive edition of one of the greatest and best known of Hawthorne's novels.

Sold by Booksellers. Sent, postpaid, by

MISS ANABLE'S BOARDING AND Day School for Young Ladies will reopen Sept. 28.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classical National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.

For references and circular address
MRS. E. L. HEAD, Germantown, Pa.

GERMANY, Schwerin (3 hours from Hamburg).

TWO GERMAN LADIES, CLERGY- man's daughters, wish to receive as boarders a few young ladies desirous of studying German, Music, Painting, etc. First-class masters obtainable. Court opera and theatre. For prospectus apply to Professor T. M. DROWN, Institute of Technology, Boston, or address Fräulein WALTER, Lübsche Strasse, 65, Wismar, Mecklenberg-Schwerin.

THE BOSTON SCHOOL OF ORATORY. —The Leading School of Expression in America. First to teach the system of Delsarte. Send for catalogue to MOSES TRUE BROWN, M.A., Boston, Mass.

Teachers, etc.

A LADY, SPEAKING BOTH FRENCH and Italian perfectly, is desirous of accompanying a family abroad after May 1, in the capacity of teacher, companion, or chaperone. Has had a large experience in travelling in foreign countries, and would be willing to act as guide. Has been giving lessons in several branches, particularly in French and Italian, in this city for several years, and has the very best of references. Address LISBON, care of Publisher of the *Nation.*

Three Important New Books

ALL COPYRIGHTED UNDER THE NEW LAW

Travels Amongst the Great Andes of the Equator

By EDWARD WHYMPER. With Maps and 140 Original Illustrations, drawn by various artists and engraved by the author. 8vo, $6.00.

Mr. Whymper's great book is now ready. It was announced for publication last fall, but it was found impossible to issue it at the time expected. The value of the book, both as a narrative of thrilling adventure and as a record of scientific discoveries, is such as to give it the widest popularity; and it will increase still further the reputation of the author of the famous 'Scrambles Amongst the Alps.'

Hon. THEODORE ROOSEVELT writes: "The story of his travels, of the hardships he endured, and the triumphs he achieved, is of interest not only to mountaineers, but also to all lovers of manly adventure."

The History of Literature

By THOMAS CARLYLE. Lectures delivered April to July, 1838. 12mo, $1.00. *Now published for the first time.*

"Many will say that it is the clearest and wisest and most genuine book that Carlyle ever produced."—JULIUS H. WARD, in the *Boston Herald.*

"It abounds in luminous criticism, elevated moral reflections, and keen suggestions."—*Boston Beacon.*

"Written in Carlyle's best manner."—*N. Y. Times.*

"Delightful reading throughout."—*Phila. Press.*

"Of exceptional interest."—*Hartford Courant.*

THIRD EDITION READY

Potiphar's Wife, and Other Poems

By Sir EDWIN ARNOLD. 12mo, $1.25.

The distinguished author of 'The Light of Asia' finds in the romantic life of Egypt and Japan the themes for nearly half of the poems in this volume. They have all the throbbing intensity of passion, the glowing Oriental imagery, and the melodious rhythm which have given extraordinary popularity to the author's other poems.

An Educational Directory.

I. THE NATION has the largest circulation of any literary and political journal published in this country. The 10,000 copies printed every week represent but a small part of the actual circulation, as THE NATION goes to all the principal libraries and reading-rooms, and into thousands of families.

II. The circulation is chiefly among the thinking and well-to-do classes—lawyers, physicians, bankers, and other professional men—and in the homes of cultivated people, where the education of children is a matter of careful consideration.

III. The School List in THE NATION has been a representative one for many years. It includes cards of most of the prominent educational institutions everywhere, during the season of school advertising, and a considerable number are inserted in the paper throughout the year.

School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

Advertising rates, 15 cents an agate line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12 1-2 per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 206 to 210 Broadway, N. Y.

A LADY OF POSITION WOULD personally conduct a party of ladies wishing to make a trip west, as far as California or Mexico, stopping en route at places of interest, returning to New York early in June. Or would chaperone a young lady to the West or elsewhere. Particulars and references with Mrs. MIRIAM COYRIERE, 150 5th Avenue, New York. Teachers' Agency.

THE CAMPAIGN FOR GOOD ROADS.

From a photograph taken near Cleveland city limits.

The April 'Century'

(Ready everywhere Friday, April 1st)

Contains "Our Common Roads," a fully illustrated article by Isaac B. Potter, editor of the magazine "Good Roads," and a practical engineer, pointing out the enormous loss to the country through the present condition of the roads, and offering suggestions for their bettering,—chapters on "Dirt Roads," "Macadam," "Rolling," etc.

The April *Century* contains also an article on Solar Eclipses by Prof. Holden, of Lick Observatory; "Fishing for Pearls in Australia," the experiences of a diver; "The Ocean Postal Service," by Ex-Postmaster-General James; two illustrated papers by Mr. and Mrs. Joseph Pennell; A Yankee Sea-Fight in Japan; "Did the Greeks Paint their Sculptures?"; "What is Poetry?" by Edmund Clarence Stedman; stories, poems, Open Letters, etc., etc. Single numbers 35 cents; on every newsstand Friday, April 1st. Subscriptions ($4.00) may begin at any time. Published by

THE CENTURY CO., NEW YORK.

Direct Fast Express Route TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between
NEW YORK and GENOA, ITALY,
BY THE
NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch at regular intervals two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA:

WERRA, April 2; FULDA, April 16; WERRA, May 7; FULDA, May 28; WERRA, June 18; FULDA, July 2.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Passengers for the Italian Lakes, Switzerland, and the Tyrol will find this route the most direct, easiest, and most comfortable. Switzerland can be reached in six hours from Genoa.

A NEW EDITION DE LUXE.

VICTOR HUGO'S WORKS.

LIMITED TO 1,000 COPIES.

The first and ONLY *fine edition of Hugo's Works, including all the romances and travels, and the principal poems and dramas, ever made in the English language.*

Victor Hugo is beyond question the greatest of the French writers of fiction, and is now esteemed both in Europe and America as one of the foremost writers of the Nineteenth Century. He was also a most gifted poet, and as a dramatist his great plays "Ruy Blas," "The Fool's Revenge," etc., etc., have been wonderfully successful.

This edition is embellished with over 200 superb etchings and photogravures by the best artists in France, the latter being mainly executed by the great firm of Goupil & Co. of Paris. All of these illustrations are proofs on Imperial Japanese Government paper.

THE MANUFACTURE OF THE BOOK IS PERFECT.

The type is large and new, and set in a fine open page. The margins are ample and the paper a beautiful natural tint laid paper. The volume is a small 8vo, easy to handle, and the binding is vellum cloth, gilt tops, slightly trimmed. Complete in 30 VOLS., *issued at the rate of about 2 vols. per month, at* $2.50 PER VOLUME. *Prospectus and specimen pages showing type, page, and paper with sample illustration, sent on application.*

Local representatives and salesmen wanted.

Sea-Shore Properties.

ISLAND ON THE MAINE COAST.

FOR SALE.—One of the most beautiful islands on this coast, consisting of several hundred acres of fine high land: woodland and open grass land; cliffs and beaches; bordering on perfect harbors; extended mountain and island views—convenient to regular steam communication; taxes nominal. This property, situated in the central part of Penobscot Bay in the midst of the most beautiful scenery of the Maine Coast and forty miles nearer Boston and the West than Bar Harbor, is one of the very few islands left for sale at farm values and must be sold to settle a joint ownership account.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

ALFRED BOWDITCH,
HENRY PARKMAN,
J. MURRAY HOWE, } Trustees,
27 School St., Boston, Mass.

MASSACHUSETTS SHORE.

FOR SALE.—On the north shore of Massachusetts Bay (commonly known as the Beverly Shore), one of the most finely situated improved estates on this line of coast, consisting of 20 acres of high table-land, commanding broad and beautiful ocean views. The land fronts on the shore, has fine beach, rocks, and is convenient to good anchorage for yachts. Large, substantially built mansion-house, stable, greenhouse, gardener's cottage, gardens, orchard, avenues, and a great variety of fine trees, lawns, and shrubbery. One hour's ride from Boston. This property will be sold at a low price to settle an estate.

J. MURRAY HOWE & BRADLEE,
27 School St., Boston, Mass.

The undersigned act as agents for the purchase and rental, and offer for sale and lease properties on all parts of the New England Coast. Descriptions of the best estates available in any section desired given. The Maine and Massachusetts Coast a specialty.

Students prepared for college. Ample grounds for outdoor exercise.

PENNSYLVANIA, Philadelphia, 1350 Pine St.

MISS ANABLE'S BOARDING AND Day School for Young Ladies will reopen Sept. 28.

FRANCE, Paris, 69 Boulevard St. Michel.

MRS. VAN PELT'S AMERICAN Pension.—These apartments are spacious, face the gardens of the Luxembourg, and being in a corner house, all the rooms are sunny. The proximity of the Sorbonne, where are given free lectures, the Ecole des Beaux Arts, the Odeon Theatre, which is the Classical National Theatre, and two of the best art schools, makes this locality especially desirable for students. Mrs. Van Pelt has secured the services of a refined lady (a thorough French and music teacher) who will assist her in making French the language of the family and will also accompany ladies to the lectures and assist them in taking notes. Those who do not wish to speak French will have a separate table.

For references and circular address
MRS. E. L. HEAD, Germantown, Pa.

GERMANY, Blankenburg am Harz.

MARTINI INSTITUTE.—GERMAN, French, and English Boarding and Day School for Young Ladies and Children. Location for health and beauty of scenery unsurpassed. Address

Undoubted Success, Useful to All,

is a multiple copying device provided, simple, efficient and inexpensive. THE EXPRESS DUPLICATOR is that apparatus; reproduces a large number of exact copies on any paper, from any and every writing, different, quicker, and better than any other processes. Note size, $3.75. Legal cap size, $6.00. Free specimens and information of C. BENSINGER & CO., 627 Dey Street, corner Broadway, New York City.

10 to 150 copies within 20 minutes, without preparation.

HARVARD UNIVERSITY.

SUMMER COURSES OF INSTRUCTION.

During the summer of 1892 courses of instruction will be given as follows:

Chemistry, four courses, viz.: Fundamental Principles of Chemistry; Qualitative Analysis; Quantitative Analysis; Organic Chemistry.
Botany, two courses, viz.: Vegetable Morphology and Physiology and Microscopical Anatomy of Phaenogams; Cryptogamic Botany.
Engineering, three courses, viz.: Topographical Surveying; Railway Surveying; Electrical Engineering.
Physics, two courses.
Physical Training, two courses.
American History.
Trigonometry.
English.
French, two courses.
Elocution.
Courses at the Medical School.
Geology, three courses.
Physiology and Hygiene, Socialism and Social Problems.
Horticulture.
German, two courses.
History and Art of Teaching.
Draughting and Descriptive Geometry.
Mechanical Drawing.

Women as well as men are admitted to these courses, except those in the Medical School, those in Engineering and the two more advanced courses in Geology.

Circulars descriptive of these courses and other information may be obtained on application to *The Secretary of Harvard University, Cambridge, Mass.*

In addition to the above-mentioned courses, certain lectures on methods of instruction will be given by teachers in the several departments represented by the schools. These lectures will be open, without charge, to the persons who are enrolled as members of any of the summer schools in the University.

In general these courses are adapted to the needs of those who intend to be teachers in the several subjects. Several of the more elementary, however, are intended to meet the needs of beginners, and may be taken by students in lieu of the corresponding courses in the College and in the Lawrence Scientific School, and may be counted towards a degree.

During the session of the schools the College Library will be open from 9 A. M. till 5 P. M. The Museum of Comparative Zoölogy, the Peabody Museum, and the Mineralogical Collection are also accessible to students during the summer vacation.

In general the fees for the above-mentioned courses, except those in Chemistry, Engineering, Physical Training, and Elocution, are $20 for each course.

Board and lodging may be obtained in Cambridge during the summer vacation at a cost of from $5 to $10 per week.

Lawrence Scientific School.

This School, which is under the control of the Faculty of Arts and Sciences of Harvard University, offers seven courses of study leading to the degree of Bachelor of Science, viz.:

I. *Civil Engineering.*
II. *Chemistry.*
III. *Geology.*
IV. *Biology.*
V. *Electrical Engineering.*
VI. *General Course in Science.*
VII. *Anatomy, Physiology, and Physical Training.*

The last-named course is especially designed for those who intend to study Medicine or Physical Training.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

ELLWANGER & BARRY,
MT. HOPE NURSERIES, ROCHESTER, New York.

MACMILLAN & Co.'s NEW BOOKS.

F. MARION CRAWFORD'S NEW NOVEL.
Published April 8. Cloth, $1.00.

THE THREE FATES.

By F. MARION CRAWFORD, author of 'The Witch of Prague,' etc. 12mo, cloth, $1.00.

Now Ready. In the new Uniform Edition of F. MARION CRAWFORD'S *Novels. Published monthly:*

MR. ISAACS.....Cloth, $1 00 | **ZOROASTER**.....Cloth, $1 00
DOCTOR CLAUDIUS.....Cloth, $1 00 | **THE THREE FATES**.....Cloth, $1 00

Now Ready. A New Novel by Hon. Emily Lawless, author of 'Hurrish,' etc.

GRANIA: The Story of an Island.

By the Hon. EMILY LAWLESS, author of 'Hurrish,' etc. 12mo, cloth, $1.00.

"The highest point in imaginative and descriptive art has been reached by the author; human sympathy could never be more perfectly touched than by her simple methods."—*Philadelphia Record.*

"He who reads this story will for many a day have in his mind's eye the wind-swept rocky Isles of Anan, and in his heart the memory of Grania O'Malley."—*N. Y. World.*

"Both in description and character-drawing 'Grania' is finished and very artistic. There is so much real life in the story that one never ceases to be interested, and, as the end approaches, interest increases to absorption. 'Grania' is a story to be read."—*Boston Times.*

Fourth Edition Just Ready in 1 vol., cloth. $1.00.
MRS. HUMPHRY WARD'S NEW NOVEL.
Also the Library Edition printed in larger type, on better paper. 2 vols., 12mo, cloth, in box, $3.00.

THE HISTORY OF DAVID GRIEVE.

By Mrs. HUMPHRY WARD, author of "Robert Elsmere," etc., etc. Fourth edition. In one volume. 12mo, cloth, gilt, $1.00.

"Mrs. Ward has written this book with purpose and with conscience. It teaches true lessons, it paints real life and experience, and it is a worthy addition to the great English novels of our generation."—*Review of Reviews.*

"Written with surprising strength and fire, deeply interesting throughout, and a very remarkable creation."—*New York Tribune.*

Now Ready. LORD TENNYSON'S New Book.

THE FORESTERS: Robin Hood and Maid Marian.

By ALFRED, LORD TENNYSON. 16mo, cloth, $1.25. Uniform with the library edition of his works in 8 volumes.

"Lord Tennyson has touched the myth and tradition of Robin Hood with the magic wand of his genius and made them glow with the fire and semblance of reality."—*New York Sun.*

"Character, poetry, philosophy, humor, and suggestion it contains. It aims only to create and sustain a pleased condition; and that aim it has accomplished. It depicts a central character in action, and it tells a representative love story—a story in which the oppressive persecutor of impoverished age is foiled and discomfited, in which days of danger end at last in days of blissful peace."—*New York Tribune.*

Just Published, With 100 Illustrations. 2 vols., 8vo, $7.00.

THE REMAINS OF ANCIENT ROME.

By J. HENRY MIDDLETON, Director of the Fitzwilliam Museum, author of "The Engraved Gems of Classical Times," etc. With 100 Illustrations. 2 vols, 8vo. $7.00.

"The present work is a revised and greatly enlarged version of the former one-volume books entitled 'Ancient Rome in 1885 and in 1888.' A great part has been rewritten, accounts of the recent discoveries have been added, and a large number of new illustrations have been introduced."—*Author's Preface.*

THE WORKS OF WILLIAM WINTER.

SHAKESPEARE'S ENGLAND.

New Edition, cloth, 18mo, 75 cents.

"The book is delightful reading. . . . It is a delicious view of England which this poet takes. It is indeed the noble, hospitable, merry, romance-haunted England of our fathers—the England which we know of in song and story."—*Scribner's Monthly.*

GRAY DAYS AND GOLD.

18mo, cloth, 75 cents.

"Much that is bright and best in our literature is brought once more to our dulled memories. Indeed, we know of but few volumes containing so much of observation, kindly comment, philosophy, and artistic weight as this unpretentious little book."—*Chicago Herald.*

A New Edition with all the original illustrations, $1.00.

THE POSTHUMOUS PAPERS OF THE PICKWICK CLUB.

By CHARLES DICKENS. A reprint from new plates of the First Edition, with all the original illustrations, and an introduction, Biographical and Bibliographical, by Charles Dickens, the Younger. 12mo, cloth, $1.00.

*** The most popular of Charles Dickens's novels will follow in monthly volumes uniform with the above.

Now Ready. Part II. Beeke–Chamberlayne. 8vo, $1.00.

DICTIONARY OF POLITICAL ECONOMY.

Containing articles on the main subjects dealt with by economic writers, with explanations of legal and business terms which may be found in their works and short notices of deceased American, English, and foreign economists and their chief contributions to economic literature. Edited by R. H. INGLIS PALGRAVE, F.R.S.

Part II. Beeke-Chamberlayne, 8vo. $1.00.

A new book by Prof. Alfred Marshall. 12mo, $1.00.

Elements of Economics of Industry.

Being the first volume of Elements of Economics. By ALFRED MARSHALL, Professor of Political Economy in the University of Cambridge, sometime Fellow of Balliol College, Oxford. 416 pages, 12mo, $1.00.

MACMILLAN & Co., 112 Fourth Avenue, New York.

TEACHERS.

We have books you want to know, we want you to know them. Examine this list, and, if it contains anything interesting, send for circulars and sample pages:

Meiklejohn's English Language. An English Grammar, a history of the English Language, and a history of English Literature in one. Erudition combined with utmost clearness and simplicity; the substance of many large volumes in one small one. $1.20. *Meiklejohn's English Grammar*, bound separately, .80.

Hawthorne and Lemmon's American Literature. The only one published which gives, within reasonable dimensions, a clear survey from a literary standpoint. $1.12.

Sheldon's History of the United States. An exceedingly interesting book, declared by leading college professors and presidents to be the best school history ever written. $1.12.

Sheldon's General History. If the student wishes to understand history he should master this book. By no other half dozen books will he get such a real insight into history. $1.60.

Teachers' Manual to General History, giving key to system. .80.

Dole's American Citizen. For grammar and high schools. Takes up the rights and duties of the American citizen, prepares for intelligent citizenship. The best book to be found for instruction in morals. .90.

We make a specialty of French and German books. *Our catalogue free.*

INTERNATIONAL LIBRARY No. 25.

THE HOUSEHOLD IDOL.

By MARIE BERNHARD, author of "The Rector of St. Luke's." 1 vol., 12mo, ½ Rox., $1.25; paper, 75 cents.

A charming story of life among the highest circles of society. The characters are drawn with singular clearness and fidelity, especially the character of the heroine, the beauty and belle of all Hamburg, idolized by parents and friends, is particularly attractive.

WORTHINGTON Co., 747 B'way, N. Y.

THE ETHICS OF MUSIC;

Plain Facts for Students. By EDITH V. EASTMAN

This little volume consists of four lectures, delivered before the Philadelphia Musical Academy, in the autumn and winter of 1891-92.

The subjects are as follows:

ART AS AFFECTED BY CHARACTER;
LEGITIMATE USES OF MUSIC;
CHARACTER AS AFFECTED BY ART;
FASHION AND TASTE IN MUSIC.

16mo, Cloth, gilt top, 75 cents.

Published by DAMRELL & UPHAM, BOSTON, MASS.

An Educational Directory.

I. THE NATION has the largest circulation of any literary and political journal published in this country. The 10,000 copies printed every week represent but a small part of the actual circulation, as THE NATION goes to all the principal libraries and reading-rooms, and into thousands of families.

II. The circulation is chiefly among the thinking and well-to-do classes—lawyers, physicians, bankers, and other professional men—and in the homes of cultivated people, where the education of children is a matter of careful consideration.

III. The School List in THE NATION has been a representative one for many years. It includes cards of most of the prominent educational institutions everywhere, during the season of school advertising, and a considerable number are inserted in the paper throughout the year.

School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

Advertising rates, 15 cents an agate line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12 1-2 per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

Direct Fast Express Route
TO THE MEDITERRANEAN.
First-class Passenger Steamer Service between
NOW YORK and GENOA, ITALY,
BY THE
NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch at regular intervals two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA:

FULDA, April 16; WERRA, May 7; FULDA, May 28; WERRA, June 18; FULDA, July 2; WERRA, July 23.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Passengers for the Italian Lakes, Switzerland, and the Tyrol will find this route the most direct, easiest, and most comfortable. Switzerland can be reached in six hours from Genoa.

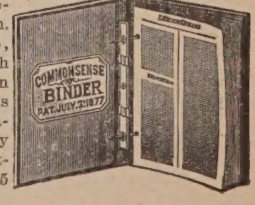
EUROPEAN SUMMER AND WINTER Resort, University town of Innsbruck, Tirol, Austria; 1,900 feet above the sea, with dry, bracing climate. Hotel Tirol, open all the year, Carl Landsee, Proprietor. Large, airy, sunny rooms, well furnished. Elevator. Superior cuisine (table d'hôte or à la carte). Reduced rates in winter. Carriages and sleighs at low rates. Charming excursions made from the hotel at all seasons. Unusual advantages for securing teachers of the languages, history, science, art, music, etc., at very moderate terms. Eminent medical care and skilled nurses if desired. Best English and American references. Illustrated pamphlets sent on application.

A LADY OF POSITION WOULD personally conduct a party of ladies wishing to make a trip west, as far as California or Mexico, stopping en route at places of interest, returning to New York early in June. Or would chaperone a young lady to the West or elsewhere. Particulars and references with Mrs. MIRIAM COYRIERE, 150 5th Avenue, New York. Teachers' Agency.

HOTEL AURORA, RIVA DEGLI Schiavoni, Venice, long and favorably known by Americans, has been enlarged and refitted. It offers well warmed and sunny rooms for the winter, and at all seasons a position unequalled, excellent table, and willing service. Terms are moderate, and include servants' fees.

To receive the current numbers in a convenient (temporary) form. Substantially made, bound in cloth, with THE NATION stamped on the side in gold. Holds about one volume. Papers easily and neatly adjusted. Sent, postpaid, on receipt of 75 cents.



LATIN AMERICAN REPUBLICS.

Under this general title Charles H. Sergel & Co. beg to announce a series of histories of the South American and Central American Republics, countries which are known to English and American readers only through the medium of books of travel and histories of limited periods. Closer commercial relations with these countries, their enormous resources, and the many thrilling incidents in their histories make most opportune this series of books, giving a complete presentation of their past and present national life. Each volume is being written by a foremost authority, will cover the period from pre-Columbian times to 1892, and will be profusely illustrated. The first number of the series is

A HISTORY OF PERU.

By CLEMENTS R. MARKHAM, author of "War Between Chile and Peru," "Peru and India," "Cuzco and Lima," etc. 1 vol. 8vo, cloth, with twenty-five full-page illustrations and five maps. $2.50.

This is the first book in English giving a complete *history* of the country from the conquest to the present time; and it concludes with an exhaustive and accurate picture of the present condition of Peru and the Peruvians.

Volumes on Chile, Paraguay, Brazil, Argentine, etc., are in preparation.

MUSIC AND ITS MASTERS.

By ANTON RUBINSTEIN. 1 vol. 16mo, vellum, $1.00.

"This little book is the sensation of the hour in Germany. Great composers are expected in our times to write not only scores, but books as well. The writings of Berlioz, Schumann, Liszt, Wagner, and others fill many volumes, but Rubinstein has not hitherto made any contributions to literature. But now we have a genuine book from Rubinstein's own pen, which has fallen like a bombshell into two camps at once—that of the worshippers of Handel, Haydn, and Mozart on the one side, and that of the followers of Wagner, Liszt, and Berlioz on the other."—*The Nation.*

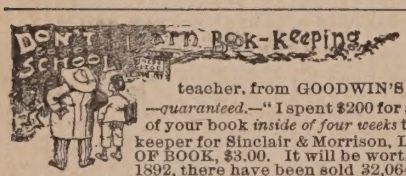
MARTYRDOMS OF LITERATURE.

By ROBERT H. VICKERS. 1 vol., 8vo, half leather, $2.50.

"A book of no ordinary importance. The martyrdoms are not of men, but of libraries; of books and manuscripts, not of flesh and blood. What is surprising about the book is its immense range. It covers pagan no less than medieval and modern times. It embraces not only Europe, but the countries of Spanish-America and the lands of the Orient. It offers one of the most astonishing collections of material that we have ever seen."—*Chicago Evening Journal.*

Sold by all booksellers, or sent postpaid on receipt of price by

CHARLES H. SERGEL & CO., Publishers, Chicago.



WHEN you can learn it *at home*, within 100 hours' study, without the aid of a teacher, from GOODWIN'S IMPROVED BOOK-KEEPING AND BUSINESS MANUAL —*guaranteed.*—"I spent $200 for a course in a Business College, and got more information out of your book *inside of four weeks* than in the entire course at that college."—E. A. DEAN, bookkeeper for Sinclair & Morrison, Lima, Ohio, Feb. 5, 1892. 3,032 similar testimonials. PRICE OF BOOK, $3.00. It will be worth $1,000 to you—a clear gain of $997! Up to Friday, April 1, 1892, there have been sold 32,064 copies of this work, and can it be possible that *you* do not yet possess a copy? If you do not, you are *fifty years behind the age!* Scrape together three good dollars, send them on to me, and you will get something in return which will show you the royal road to prosperity and *wealth!* J. MARY E. WILKINS'S NEW BOOK.

THE POT OF GOLD.

Sixteen delightful stories by this favorite author, written for young people, but fascinating to older readers. The first ten are in a fanciful vein, full of quaint conceits and delicious humor. Others like "The Bound Girl," "Deacon Thomas Wales' Will," and "The Adopted Daughter," give graphic pictures of early New England life.

Square 12mo, illustrated by Taylor, Hassam, etc., $1.50.

A New "Peppers" Book

By MARGARET SIDNEY.

FIVE LITTLE PEPPERS GROWN UP.

The Latest in the famous Pepper Series.

Sequel to "Five Little Peppers Midway."

All who have read the first two books will seize with avidity upon this third volume, for which they have been eagerly waiting. The "Peppers" are simply irresistible, and the story of their young manhood and maidenhood is filled with delightful incidents and healthful, inspiring thoughts.

12mo, fully illustrated, cloth, $1.50.

OTHER NEW BOOKS.

THE STORY OF NEW MEXICO. By HORATIO O. LADD, A.M. 8vo, fully illustrated, $1.50.

"No American Commonwealth has a more intensely interesting and romantic history than New Mexico, and Mr. Ladd tells his wonderful story in a style that for graphic clearness leaves nothing to be desired."—*Boston Traveller.*

THE STORY OF MASSACHUSETTS. "Story of the States Series." By EDWARD EVERETT HALE. 8vo, fully illustrated, $1.50.

"It would be a novelty for Dr. Hale to write a dull book, but this is in his best vein. It is real history, for it reveals the spirit of the people. No State in the Union had done more national educating work than Massachusetts; from its three centuries of history Dr. Hale selects twenty-one occasions of critical interest, crystallizing each into a chapter."—*Inter-Ocean.*

MY LADY LEGEND. By Dr. ALBREKT SEGERSTEDT. Translated by ANNA VON RYDINGSVARD (Baroness von Proschwitz). 12mo, $1.25.

Dr. Segerstedt has been called the Hans Christian Andersen of Sweden. There is a genial moral running through these charming prose-poems, many of which are ideally exquisite in spiritual thought.

BOSTON.

MATTHEW ARNOLD IN THE "NINETEENTH CENTURY."

"The New York NATION—a newspaper which I read regularly and with profit, a newspaper which is the best, so far as my experience goes, of all American newspapers, and one of the best newspapers anywhere."

THE NATION,

an independent weekly journal, was established in 1865. Its contributors include the most prominent names in literature, science, and art, both in this country and abroad. It is emphatically found in the homes of people of culture and refinement. No intelligent American, desirous of keeping abreast of the best political and literary thought of the day, can afford to be without it. Subscription price, $3.00 a year, postpaid.

WEBSTER'S INTERNATIONAL DICTIONARY

THE INTERNATIONAL,
NEW FROM COVER TO COVER,
IS THE ONE TO BUY.

It is a thorough revision of the authentic "Unabridged," fully abreast of the times.

The work of revision occupied over ten years, more than a hundred editors being employed and over $300,000 expended before the first copy was printed.

"This work, well used in a family, will be of more advantage to the members thereof than *hundreds of dollars* laid up in money."

Sold by all Booksellers.

VOL. LIV.—NO. 1398. THURSDAY, APRIL 14, 1892. PRICE 10 CENTS.

Public Library 23-92

VALUABLE NEW AND RECENT BOOKS.

LARGE-PAPER EDITION OF

Bancroft's History of the United States.

From the Discovery of the Continent to the Establishment of the Constitution in 1789. *Edition de Luxe*, on large paper, limited to one hundred sets, numbered. Complete in 6 volumes, with a portrait of the author. 8vo. $50.00.

It would be superfluous to dwell upon the rank of the late George Bancroft as a historian, or to cite any of the commendations bestowed for so many years upon his work. The publishers believe that a limited large-paper edition of this great History will be appreciated by those who desire to possess the finest edition, and by those who will wish to use large-paper volumes for extra illustration. Collectors of Americana are aware of the opportunities offered by such an edition for the use of portraits and old prints relating to American history.

The Third Volume of McMaster's History.

History of the People of the United States.

From the Revolution to the Civil War. By JOHN BACH MCMASTER. To be completed in five volumes. Vols. I., II., and III. now ready. 8vo, cloth, gilt top, $2.50 each.

"The welcome accorded to Prof. McMaster's earlier volumes of his history of the people of this country will cause general satisfaction over the appearance of Vol. III. If the long delay attending its publication has been borne with some impatience, readers will readily understand that to write history as this author writes it is a task beset with research and investigations of a laborious character."—*New York Times.*

A History of England in the Eighteenth Century.

By WILLIAM E. H. LECKY. Complete in 8 volumes. 8vo, gilt top. Per set, cloth, $20.00; half calf, $36.00.

"A work of such scholarly excellence as this is not to be lightly read or dismissed with a commendatory word. It calls for careful perusal, is worthy of trust."—*Philadelphia Press.*

"A thoughtful, conscientious, and philosophical work."—*Brooklyn Daily Eagle.*

"Its frankness, candor, vigor, and splendor of coloring have combined to place its author among the first historians of this century."—*Chicago Times.*

Justice.

By HERBERT SPENCER. Being Part IV. of "The Principles of Morality." 12mo. Cloth, $1.25.

"A strong, grave, logical discussion of the relations which should exist between man and man. Mr. Spencer's style is so lucid that to study political economy of him is rather a pleasure than a task."—*Chicago Tribune.*

Social Statics.

By HERBERT SPENCER. New and revised edition, including "The Man *versus* The State," a series of essays on political tendencies heretofore published separately. 12mo. 420 pages. Cloth, $2.00.

Life in Ancient Egypt and Assyria.

By G. MASPÉRO, late Director of Archæology in Egypt, and Member of the Institute of France. Translated by ALICE MORTON. With 188 Illustrations. 12mo. Cloth, $1.50.

"This translation from the French of M. Maspéro, superbly printed and profusely illustrated, will no doubt be welcomed by that large number of readers who, without being profound students of archæology, yet desire to have something more than a mere general idea of human life as it was lived in the nations of old."—*Cincinnati Commercial Gazette.*

An Utter Failure.

By MIRIAM COLES HARRIS, author of "Rutledge." 12mo. Cloth, $1.25.

"Those who were attracted by 'Rutledge' will give hearty welcome to this story, and find it fully as enjoyable as that once immensely popular novel."—*Boston Saturday Evening Gazette.*

"The pathos of this tale is profound, the movement highly dramatic, the moral elevating."—*New York World.*

Eline Vere.

By LOUIS COUPERUS. Translated from the Dutch by J. T. GREIN. With an Introduction by EDMUND GOSSE. 12mo. Cloth, $1.00.

"Most careful in its details of description, most picturesque in its coloring."—*Boston Post.*

"A vivacious and skilful performance, giving an evidently faithful picture of society and evincing the art of a true story-teller."—*Philadelphia Daily Evening Telegraph.*

By the author of 'Uncle Remus.'

On the Plantation.

By JOEL CHANDLER HARRIS. With 23 Illustrations by E. W. KEMBLE, and Portrait of the Author. 12mo. Cloth, $1.50.

The most personal and in some respects the most important work which Mr. Harris has published since 'Uncle Remus.' Many will read between the lines and see the autobiography of the author. In addition to the stirring incidents which appear in the story, the author presents a graphic picture of certain phases of Southern life which have not appeared in his books before. There are also new examples of the folk-lore of the negroes, which became classic when presented to the public in the pages of 'Uncle Remus.'

The Faith Doctor.

By EDWARD EGGLESTON, author of "The Hoosier Schoolmaster," "The Circuit Rider," etc. 12mo. Third edition. Cloth, $1.50.

"The author of the 'Hoosier Schoolmaster' has enhanced his reputation by this beautiful and touching study of the character of a girl to love whom proved a liberal education to both of her admirers."—*London Athenæum.*

"'The Faith Doctor' is worth reading for its style, its wit, and its humor, and not less, we may add, for its pathos."—*London Spectator.*

MODERN SCIENCE SERIES.

The Cause of an Ice Age. By Sir ROBERT BALL, LL.D., F.R.S., Royal Astronomer of Ireland, author of "Starland." 12mo. Cloth, $1.00.

"Of the various ages traced and located by scientists, none is more interesting or can be more so than the Ice age, and never have its phenomena been more clearly and graphically described, or its causes more definitely located, than in this thrillingly interesting volume."—*Boston Traveller.*

The Horse: A Study in Natural History. By WILLIAM H. FLOWER, C.B., Director in the British Natural History Museum. With 27 Illustrations. 12mo. Cloth, $1.00.

"The volume gives a large amount of information, both scientific and practical, on the noble animal of which it treats."—*New York Commercial Advertiser.*

The Oak: A Study in Botany. By H. MARSHALL WARD, F. R. S. With 53 illustrations. 12mo. Cloth, $1.00.

"Prof. Ward gives a short account of what is most worth attention in the anatomy and physiology of the oak as a forest tree, and from a purely scientific point he makes the story as an object of life but little less fascinating than its folk-lore."—*New York World.*

For sale by all booksellers, or will be sent by mail on receipt of price by the publishers,

ROSE LIBRARY, NO. 13.

Felix Lanzberg's Expiation

By OSSIP SCHUBIN, author of "Asbein." Translated by Elise L. Lathrop. With Photogravures. 1 vol., 12mo, cloth, $1.00; paper, 50 cents.

A powerful story of high-class Viennese society, wonderfully well told, describing a young man of good family, who, after first getting into trouble over a Spanish dancer, finally marries another girl, through which great sorrow comes upon him, as a consequence of a former act of guilt done in a moment of weakness.

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between *NOW YORK and GENOA, ITALY,*

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch at regular intervals two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA:

FULDA, April 16; WERRA, May 7; FULDA, May 28; WERRA, June 18; FULDA, July 2; WERRA, July 23.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Passengers for the Italian Lakes, Switzerland, and the Tyrol will find this route the most direct, easiest, and most comfortable. Switzerland can be reached in six hours from Genoa.

OELRICHS & CO., 2 Bowling Green.

NO. 59 WALL STREET, NEW YORK.

SOME BOOKS.

Wells of English.

By ISAAC BASSETT CHOATE. 16mo, cloth, gilt top. Price, $1.50.

A review of the work of the minor writer, of England of the 16th and 17th centuriess with brief comments upon their influence upon English Literature. It is written with intelligence, care, and an unusual knowledge of the subject.

How to Write Clearly.

RULES AND EXERCISES ON ENGLISH COMPOSITION. By the Rev. EDWIN A. ABBOTT, M.A., Head Master City of London School. 1 vol., 16mo, cloth. Price, 60 cents.

How to Tell the Parts of Speech.

AN INTRODUCTION TO ENGLISH GRAMMAR. By the Rev. EDWIN A. ABBOTT, D.D., Head Master of the City of London School. American Edition. Revised and enlarged by JOHN G. R. MCELROY, Professor of the English Language in the University of Pennsylvania. 1 vol., 16mo, cloth. Price 75 cents.

How to Parse.

AN ATTEMPT TO APPLY THE PRINCIPLES OF SCHOLARSHIP TO ENGLISH GRAMMAR. With appendices in Analysis, Spelling, and Punctuation. By EDWIN A. ABBOTT, M.A., Head Master of the City of London School. 16mo, cloth. Price $1.00.

English Lessons.

FOR ENGLISH PEOPLE. By the Rev. EDWIN A. ABBOTT, M.A., Head Master of the City of London School, and J. R. SEELEY, M.A., Professor of Modern History in the University of Cambridge. Part I., Vocabulary. Part II., Dictionary. Part III., Meter. Part IV., Hints on Selections and Arrangement. Appendix. 1 vol., 16mo, cloth. Price, $1.50.

A Memoir of Honoré de Balzac.

Compiled and written by KATHARINE PRESCOTT WORMELEY, translator of Balzac's works. With Portrait, taken one hour after death, by Eugène Giraud. 12mo, half Russia. Price, $1.50.

A complete life of Balzac can probably never be written. The object is to present Balzac to American readers—a presentation of the man, and not of his work. The portrait was considered by Mme. de Balzac the best likeness of her husband.

Our new Descriptive and Educational Catalogues can be had free on application.

ROBERTS BROTHERS,

BOSTON.

J. B. Lippincott Co.'s

Standard Publications.

Supplement to Allibone's Dictionary

OF ENGLISH LITERATURE AND BRITISH AND AMERICAN AUTHORS. By JOHN FOSTER KIRK. Two volumes. Imperial 8vo. Nearly 1,600 pages. Cloth binding, $15.00; sheep, $17.00; half Russia, $20,00; half calf or half morocco, $22.00.

"We have no hesitation in declaring our conviction that it is by far the most satisfactory work of the kind with which we are acquainted. It is ample in its information; it is accurate to a degree very rarely attained; it is catholic as to the persons included, and it is, with all this, eminently readable."—*London Saturday Review.*

"Mr. Kirk's volumes contain not only the results of the years of painstaking labor directed to the task in hand, but also show the work of a life spent in literary studies, and that scholarship of the very highest order of excellence has been used in perfecting and completing a book that is now more than ever valuable to every one who needs a reference handbook for the names and works and life of all who have contributed to the vast stores of English literature."—*Philadelphia Public Ledger.*

Allibone's Dictionary and Supplement

Complete in five volumes. The entire work containing the names and history of over 83,000 authors. Cloth, $37.50; sheep, $42.50; half Russia, $50.00; half calf, $55.00; half morocco, $55.00.

"It can hardly be doubted that Allibone's Dictionary of English Literature and British and American Authors, taken as a whole, embracing as it does in its original three volumes the names of over 46,000 authors, and in its Supplement those of 37,183 authors—with notices of their several hundred thousand books—will long remain without a rival as a bibliography of the literature of the English tongue."—*Boston Literary World.*

"No dictionary of the authors of any language has ever before been undertaken on so grand a scale. For convenience and trustworthiness this work is probably not surpassed by any similar production in the whole range of modern literature."—*New York Tribune.*

The New Chambers's Encyclopædia.

New type. New subjects. New illustrations. New maps. A complete dictionary of art, science, history, literature, fable, mythology, biography, geography, etc. Handsomely illustrated with maps and numerous wood engravings. Eight volumes now ready. The two remaining volumes to be issued during 1892. Price per volume: Cloth, $3.00; cloth, uncut, $3.00; sheep, $4.00; half morocco, $4.50.

"'Chambers's Encyclopædia,' in spite of the claims of other similar works, still continues to hold its own as a standard reference for the home or school. The new revision brings its articles well up to date, and introduces a large number of entirely new subjects. No expense has been spared in obtaining the coöperation of the best authorities in the special lines, and the result is a complete and comprehensive dictionary of useful knowledge. 'Chambers's' has an undisputed title to be considered one of the most accurate, reliable, convenient, and useful encyclopædias now on the American market."—*Boston Journal of Education.*

The Tempest.

Volume IX. of the *Variorum Edition* of Shakespeare. Edited by HORACE HOWARD FURNESS, Ph.D., LL.D., L.H.D. Royal Octavo. Superfine toned paper, extra cloth, uncut edges, gilt top, $4.00.

"One of the most notable contributions to Shakespeare literature in the present century."—*Manchester (Eng.) Guardian.*

The volumes previously issued are "As You Like It," "The Merchant of Venice," "Othello," "Romeo and Juliet," "King Lear," "Macbeth," "Hamlet" (2 vols). Uniform in style and binding, $4.00 per vol.

*** *For sale by all Booksellers, or will be sent postpaid, on receipt of the price.*

HAVE JUST READY:

THE MARBOT MEMOIRS.

AUTHORIZED TRANSLATION.

The Memoirs of the Baron de Marbot

Late Lieutenant-General in the French Army.

Translated from the French by ARTHUR JOHN BUTLER, late Fellow of Trinity College, Cambridge.

In two Volumes, Demy 8vo, 940 pages, with two Portraits and Maps. $6.00.

*** "These volumes are another of the innumerable works which illustrate the great epic of war that fills the first years of the present century, and we do not hesitate to say that they are inferior to none of the series in animation, veracity, and interest. Few books of our time have acquired so great and immediate a popularity. . . . The personal side of General Marbot's narrative is its most striking and interesting part; and the many well-chosen anecdotes he recounts, in a simple and natural manner, place clearly before us the living images of Napoleon in his tent, his camp, and his closet, of the company of his ennobled marshals, and of the Grand Army."—*Edinburgh Review*, January, 1892.

A NEW POETICAL WORK BY THE LATE EARL OF LYTTON.

MARAH.

By OWEN MEREDITH. Crown 8vo, cloth extra, gilt top, $1.50.

"According to the preface, the poet's idea was to keep a consecutive gamut of the deepest and highest feeling, and the preface is justified by the book. The volume runs the whole scale of the emotional chord of love, and runs it with extraordinary insight and dexterity. . . . The world has lost in Lord Lytton . . . a very real poet."—*Saturday Review.*

"The wealth of imagination, the opulence of the poet's vocabulary, and the art with which he vivifies his own weird impressions, affect the reader almost equally. 'Marah' is a volume of true and often noble poetry, and must add to the well-earned fame of the author of 'Lucile.'"—*New York Tribune.*

"It is one of the most remarkable volumes of verse we have had submitted to us for some time. Remarkable because characteristic. They reveal the man. . . . The felicities of thought and dainty phrase contained in the volume are amongst the daintiest Owen Meredith has given us."—*Philadelphia Bulletin.*

SECRET SERVICE UNDER PITT.

By W. J. FITZPATRICK, F.S.A., Knight of St. Gregory the Great; Hon. Member of the Royal Academy of Arts, Dublin; M.R.I.A.; Author of 'Correspondence of Daniel O'Connell, with Notices of his Life and Times,' 'Ireland before the Union,' &c. 8vo. $4.50.

"This book may be commended alike for its historical importance and for its intrinsic interest. . . . Mr. FitzPatrick clears up some long-standing mysteries with great sagacity, and by means of his minute and profound knowledge of documents, persons, and events, succeeds in illuminating some of the darkest passages in the history of Irish conspiracy, and of the treachery so constantly associated with it. On almost every page he throws an authentic and instructive light on the darker sides of the Irish history with which he is dealing."—*Times.*

LONGMANS, GREEN & CO., 15 East 16th Street, New York.

LATIN AMERICAN REPUBLICS.

Under this general title Charles H. Sergel & Co. beg to announce a series of histories of the South American and Central American Republics, countries which are known to English and American readers only through the medium of books of travel and histories of limited periods. Closer commercial relations with these countries, their enormous resources, and the many thrilling incidents in their histories make most opportune this series of books, giving a complete presentation of their past and present national life Each volume is being written by a foremost authority, will cover the period from pre-Columbian times to 1892, and will be profusely illustrated. The first number of the series is

A HISTORY OF PERU.

By CLEMENTS R. MARKHAM, author of "War Between Chile and Peru," "Peru and India," "Cuzco and Lima," etc. 1 vol. 8vo, cloth, with twenty-five full-page illustrations and five maps. $2.50.

This is the first book in English giving a complete *history* of the country from the conquest to the present time; and it concludes with an exhaustive and accurate picture of the present condition of Peru and the Peruvians.

Volumes on Chile, Paraguay, Brazil, Argentine, etc., are in preparation.

MUSIC AND ITS MASTERS.

By ANTON RUBINSTEIN. 1 vol. 16mo, vellum, $1.00.

"This little book is the sensation of the hour in Germany. Great composers are expected in our times to write not only scores, but books as well. The writings of Berlioz, Schumann, Liszt, Wagner, and others fill many volumes, but Rubinstein has not hitherto made any contributions to literature. But now we have a genuine book from Rubinstein's own pen, which has fallen like a bombshell into two camps at once—that of the worshippers of Handel, Haydn, and Mozart on the one side, and that of the followers of Wagner, Liszt, and Berlioz on the other."—*The Nation.*

MARTYRDOMS OF LITERATURE.

By ROBERT H. VICKERS. 1 vol., 8vo, half leather, $2.50.

"A book of no ordinary importance. The martyrdoms are not of men, but of libraries; of books and manuscripts, not of flesh and blood. What is surprising about the book is its immense range. It covers pagan no less than medieval and modern times. It embraces not only Europe, but the countries of Spanish-America and the lands of the Orient. It offers one of the most astonishing collections of material that we have ever seen."—*Chicago Evening Journal.*

Vols. I.-V., Now Ready. 12mo, cloth. Price, $1.75 per volume. The Series will consist of Six Volumes.

"There is something of interest for the student in every item of the contents of these volumes."—*London Academy.*

ORDER IN THE PHYSICAL WORLD, and its first cause according to modern science. From the French. 12mo, cloth.....,$1 00

"A good translation of a work which has attracted much attention in France."

"This work contains one of the elegant demonstrations of the existence of God and His providence that has been realized in our day."

14 AND 16 ASTOR PLACE, NEW YORK.

A. C. McClurg & Co.'s Important New Books.

THE LIFE OF JOSHUA R. GIDDINGS.

By the Hon. GEORGE W. JULIAN, author of "Political Recollections." 2 portraits, 8vo, gilt top, $2.50.

"The importance of the life of Joshua R. Giddings centres entirely in his warfare against slavery. To this he dedicated himself with absolute singleness of purpose and the whole strength of his nature. It was this fervor of spirit and perfect concentration of energy which armed him with his power and enabled him to link his name imperishably with a cause which vitally involved the fortunes of the Republic and the progress of liberty throughout the world."—*From the Author's Preface.*

"GROUND ARMS!"

The Story of a Life. From the German of the Baroness BERTHA VON SUTTNER by ALICE A. ABBOTT. 12mo, $1.00.

"*This is not a mere book; it is an event.*" So writes a German critic of this book. It has created the most profound impression in Germany. "It is frankly a novel of tendency, and pleads with an eloquence that has rarely been given to the subject for the disarmament of nations, and the inauguration of a new era of peace."

COLUMBUS AND BEATRIZ.

A Novel. By CONSTANCE GODDARD DU BOIS, author of "Martha Corey, a Tale of the Salem Witchcraft." 12mo, $1.00.

Miss Du Bois has skilfully used the scant materials which exist regarding the second marriage of the great discoverer, and must be credited with having well rounded out a chapter of his career that has baffled all his biographers. She has made the *motif* of her novel identical with the great motive of his life, and has given a fresh interpretation of his character; yet the scholar has not usurped the place of the novelist, for the story itself is singularly fascinating and absorbing.

THE BEST LETTERS OF CHARLES LAMB.

Edited, with an Introduction, by EDWARD GILPIN JOHNSON. "The Laurel-Crowned Letters Series." 16mo, gilt top, $1.00.

The style of Lamb's letters is always highly characteristic, and their matter delightful. Mr. Johnson has succeeded admirably in selecting "the best" of these racy letters, and has furnished a graceful Introduction, sketching rapidly and vividly the leading events of Lamb's literary and private life.

THE EVOLUTION OF LOVE.

By EMORY MILLER, D.D., LL.D. Crown 8vo, gilt top, $1.50.

This volume is of more than ordinary significance and may be briefly characterized as *a philosophical work with a practical application.* Says the *Advance:* "This is one of the most clearly, rigidly, lucidly thought-out essays on the essential philosophy of being and of religion that has recently appeared."

MASTERPIECES OF FOREIGN AUTHORS.

Comprising Translations of the Works of many of the Best Known European Writers, some of which have never been presented in an English Dress. 16mo, cloth, per vol., 75 cents *net;* half vellum, gilt top, per vol., $1.25 *net.*

Comedies of Carlo Goldoni. 1 vol.
Portraits of Women. By C. A. SAINTE-BEUVE. Portrait. 1 vol
Portraits of Men. By C. A. SAINTE-BEUVE. Portrait. 1 vol.
Doctor Antonio. By G. D. RUFFINI. 1 vol.
Novalis: His Life, Thought, and Works. 1 vol.
The Morals and Manners of the 17th Century. Being the characters of La Bruyere. Portrait. 1 vol.
Goethe's Wilhelm Meister. Carlyle's Translation. Portrait. 2 vols.

A. C. McCLURG & CO., CHICAGO.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

INGERSOLL'S SNEER REFUTED.

NOT ON CALVARY.

Although just issued, this little book is already the literary religious sensaton of the day.

"It is, we are told, a Layman's Plea for Mediation in the Temptation in the Wilderness. . . . There can be no question that his view does shed some light on questions which all Christians find deeply mysterious. . . . It is a treatment of the question so reverent, so full of love to God, so profoundly impressed with the solemn importance of the subject, that it deserves a careful reading."—*N. Y. Evangelist.*

"It is an earnest and impressive plea for another view of the Redemption than the common. It begins with offering 'theory of our Lord's exposure to Satan all through his life,' aiming to show that 'not through the Crucifixion alone came man's redemption,' and that 'the Crucifixion was only the wreaking of vengeance, the last spiteful injury in the chagrin of thwarted temptations.' The author writes with a reverent solemnity."—*New York Times.*

"'Not on Calvary' is a little book intended to help those who have gone down into the dark valley of doubt. It is beautifully written; and will do great good to many."—*Toledo Blade.*

Important Publications in Political Science.

THE GERMAN BUNDESRATH.

A Study in Comparative Constitutional Law. By JAMES HARVEY ROBINSON, Ph.D., Lecturer in European History in the University of Pennsylvania. Price, Seventy-five Cents.

Historically and legally the *Bundesrath* is the centre and core of the existing form of government in Germany. Hence, the study of this institution inducts one most quickly and easily into a knowledge of the entire constitutional system, and furnishes at once an explanation and a justification of many of the peculiarities which characterize this interesting federation.

THE THEORY OF DYNAMIC ECONOMICS

By SIMON N. PATTEN, Ph.D., Professor of Political Economy in the University of Pennsylvania. Price, One Dollar.

The aim of this work is not to present the classical theory in a new form, but it attempts to carry the science to a further stage of development.

Important consequences flow from the theory that the causes of poverty, of low wages and of high rents do not lie in the objective environment, but in the subjective conditions of producers.

The above are Nos. 10 and 11 of the series of monographs on *Political Economy and Public Law* published by the *University of Pennsylvania.*

Charles Scribner's Sons

NEW PUBLICATIONS.

A New Book by Dr. Briggs.

The Bible, the Church, and the Reason:

The Three Great Fountains of Divine Authority. By Prof. CHARLES A. BRIGGS, D.D. Cr. 8vo, $1.75.

In order to set forth more fully the views expressed in his recent inaugural address, Dr. Briggs has written this volume, which aims principally to define his position with regard to the validity of the Church and the Reason as sources of divine authority. The other subjects discussed are the Higher Criticism, the Inerrancy of Scripture, Biblical History, and the Messianic Ideal.

The Governor,

And Other Stories. By GEORGE A. HIBBARD. Cloth, $1.00; paper, 50 cents.

The best of Mr. Hibbard's popular magazine stories of recent years are included in this volume. Mr. Howells refers to Mr. Hibbard's work as having "a certain felicity of execution and a certain ideal of performance which are not common."

A New Book by Mr. Stevenson.

Across the Plains.

With Other Essays and Memories. By ROBERT LOUIS STEVENSON. 12mo, $1.25.

Especial interest attaches to this volume by reason of the autobiographic character of several of the essays, while the others, "Fontainebleau," "The Lantern Bearers," "The Old Pacific Capital," "Dreams," "Beggars," etc., will rank with the author's finest work in this field of literature.

Essays on German Literature.

By Prof. H. H. BOYESEN. 12mo, $1.50.

The spirit and animating forces of German literature are admirably set forth in this book, the personal and anecdotal element bringing the leading figures well into the foreground. The different phases of the genius of Goethe and of Schiller, the evolutions of the German novel, and the influence of the Romantic School, are the principal themes.

The Duchess of Angoulême

And the Two Restorations. From the French of Imbert de Saint-Amand. Famous Women of the French Court. 12mo, with portrait, $1.25.

"It is not merely a portrait, but a great historical panoramic painting which brings before us stirring scenes and romantic episodes with a bold and artistic touch, and with rich coloring and pulsing vitality."—*Philadelphia Record.*

An Entirely New Work on Sales.

COMMENTARIES

ON THE

LAW OF SALES

AND

COLLATERAL SUBJECTS.

By JEREMIAH TRAVIS, LL.B.

In two volumes, 8vo, law sheep. Price, $12.00.

☞ This is an absolutely new treatise on sales, not a rehash of Blackburn, Benjamin, or any other writer.

☞ The author has examined the questions of which he treats with absolute candor and perfect fearlessness, and has throughout aimed to state the law as it actually is.

☞ His work is an original investigation and analysis of all the cases bearing on the questions discussed included in the entire body of American, English, and Canadian Reports down to date, and of the principles of the civil law.

☞ The cases are stated with clearness, and with the most scrupulous accuracy.

☞ The very full and accurate analytical indxe of 150 pages is an important feature of the work,

☞ In considering what he believed to be unsound decisions, tha author has not hesitated to point out and to show with all the distinctness and conclusiveness in his power that they are not well decided, and are not law, and the work can hardly fail to have a beneficial effect on the future decisions of important and difficult questions connected with the law of sales.

☞ Those interested in railroad law will find much in the work of importance to them.

☞ The total number of pages embraced in the two volumes is 1,556.

☞ The total number of cases cited is nearly eight thousand.

LITTLE, BROWN & CO.,

PUBLISHERS,

254 Washington Street, Boston, Mass.

G. P. Putnam's Sons,

27 and 29 West 23d St., New York,

HAVE NOW READY:

The Life of George Mason of Virginia, 1726-1792. Edited by KATE MASON ROWLAND. Including his Speeches, Public Papers, and Correspondence, with an Introduction by General FITZHUGH LEE. 2 vols. 8vo, with portrait of Mason and facsimile of the Bill of Rights. $8.

"Mason's great labors may not be as widely established in the public mind as those of some others of the same period, because he persistently declined public positions in the Federal councils, where his conspicuous talents would easily have kept him in the front rank of public knowledge and esteem. In the hearts of the student of his country's history, his name and fame occupy a place second to none."—*Extract from the Introduction.*

The Life of Thomas Paine, with a History of his Literary, Political, and Religious Career in America, France, and England. By MONCURE DANIEL CONWAY, author of 'Omitted Chapters of History Disclosed in the Life and Papers of Edmund Randolph,' etc. To which is added a sketch of Paine by William Cobbett, hitherto unpublished. (Ready next month.) 2 vols. 8vo, illustrated, $5.00.

No real biography of Paine has ever appeared. The so-called Lives of Paine have been mainly the controversial works of pamphleteers, turning chiefly on his religious heresies. Mr. Conway has personally searched such records in Europe and America, and has obtained from these fresh light, not only on Paine, but on various eminent figures in American and European history with whom he was associated. A large amount of unpublished correspondence is included.

JOHN RUSKIN: His Life and Teaching.

By J. MARSHALL MATHER. *Third edition revised.*

This volume is not a criticism, but simply an outline of Ruskin's life and teaching, intended for those who purpose a careful and detailed study of his works.

"The tendency of Ruskin's influence is to purify and ennoble, to enthrone duty, reveal goodness, and encourage hope and love."—*The World, N. Y.*

***

Now ready, 12mo, cloth, $1.25. An entirely new edition (the sixth) of

FOOD AND FEEDING.

By SIR HENRY THOMPSON, F.R., C.S.

Sir Henry Thompson, besides being one of the leading London physicians, is also a most graceful writer. The above book is at once a delightful gossipy companion, and a learned and exhaustive treatise on dietetics and the *cuisine*, and probably contains Sir Henry's final corrections and revisions.

***

A NEW EDITION OF

A TOUR ROUND MY GARDEN.

Translated from the French of ALPHONSE KARR. Revised and edited by the Rev. J. G. WOOD, M.A. A new edition with illustrations. 8vo, cloth, gilt. $1.50.

A great deal of wit, and no little wisdom, are contained in these delightful letters by this elegant French writer.

***

In Crown 8vo, cloth. Price, $1.75.

PRACTICAL HOUSEHOLD COOKERY.

Containing 1,000 Original and other Recipes. By E. DURET, ex-Manager of St. James Hall, etc.

"Practical Household Cookery," while being comprehensive and complete, offers something novel in the variety of its savory dishes, Italian cookery, macaronis and rices, etc."

"The directions are simple and intelligible; the variety of recipes is charming and enormous; the dishes, their garnishing, their concoction, are all set forth with such clearness that even a maid-of-all-work can grasp the writer's intention. We used to give our dinner parties at the 'club,' but since we have obtained Mr. Duret's 'Household Cookery,' we entertain at home."—*St. Stephen's Review.*

"Perhaps the strongest points in the book are those relating to soups, gravies, and macaroni. No expert chef who wants directions about these preparations should be without this book."—*Hotel Register.*

Of all booksellers, or mailed free on receipt of price, by the publishers,

No 3 Cooper Union, 4th Ave., New York.

Why not
buy SENSE with your CENTS?

It will do you more good than pills and plasters, liver-pads and prizes! You can make plenty of money as an accountant, a teacher or a business man, if you will purchase and study (at home) a copy of "**Goodwin's Improved Book-keeping and Business Manual.**" 293 pages; printed in red and black; richly bound; good, heavy, cream-tint paper. 32,264 copies have been sold and 3,044 testimonials received up to Tuesday, April 12, 1892. "*Worth* $500!" says one. **Price of Book, $3.00.** No person is in business for *fun*. Why not spend dollars for sense and success rather than cents for "free snaps" and uncertainties? Be sensible—buy sense! Cut this out and save it, as you will probably never see it again. (Send at once for pamphlet describing above-mentioned book.)

SELECT LIST of Standard Works

For Public and Private Libraries, and the General Reader.

Corson's Introduction to Shakespeare. A critical study of Shakespeare's Art, with examination questions upon special plays. $1.50.

"Altogether so excellent a volume of Shakespearean criticism has not been put forth by an American scholar in many a day."—*The N. Y. Nation.*

Corson's Introduction to Browning. A guide to the study of Browning's poetry. Also has 37 poems, with notes, portrait, bibliography, etc. $1.50.

"The best model of what the introduction to a writer should be that I have seen in connection with any author."—*R. G. Moulton, Cambridge, Eng.*

George's Selections from Wordsworth. 168 poems chosen with a view to illustrate the growth of the poet's mind and art. $1.50.

"The list is the best possible for a text-book in schools."—*Aubrey de Vere.*

George's Wordsworth's Prelude. Annotated for High School and College. Never before published alone. $1.25.

"It is in every way admirable. To say that the editing is worthy of the text is saying a great deal, yet hardly too much."—*Prof. M. B. Anderson, Iowa State Univ.*

George's Burke's American Orations. Three orations on the American Revolution. With notes. 60 cts.

Simonds' Sir Thomas Wyatt and his POEMS. With Biography and critical analysis of his poems. 75 cts.

Hodgkins' 19th Century Authors. Gives full lists of aids for studying the leading authors. $1.00.

"Intended for the use of literary classes in Academy or College. To literary clubs it will be almost a *sine qua non.*"

Meiklejohn's English Language. Treats salient features with a master's skill and with the utmost clearness and simplicity. $1.50.

Wilson's The State. Elements of historical and practical politics. The organization and functions of government. $2.00.

"It is by all odds the most complete and valuable study of the kind that has ever appeared in the English language."

Hall's Beowulf. A translation from the Anglo-Saxon, with introduction. Just issued. $1.00.

Hawthorne and Lemmon's American LITERATURE. A fresh stimulating book, keen and original; the only short history of American literature that within reasonable limits gives a critical estimate of authors.

For sale by booksellers, or sent by mail, postpaid, on receipt of price.

William R. Jenkins, *Publisher and Importer of French Books*, 851-853 6th Av., N.Y.

KINDERGARTEN and School Supplies } J. W. Schermerhorn & Co 3 East 14th St., New York.

BOOKS

On Civics and Political Economy. For Schools and Colleges.

DOLE'S AMERICAN CITIZEN. For grammar and high schools. Takes up the rights and duties of a citizen, and his relations to men, institutions, his own and other countries. Nothing so simple and practical has ever been written on the subject. Cloth, 320 pp., 90 cents.

"Dole's American Citizen is an admirable piece of work, and, so far as I know, nothing of the sort exists elsewhere. The author has made the matter as simple as it safely can be, clear too, and constantly attractive."—*Prof. G. H. Palmer of Harvard College.*

"I should think it most serviceable and important for the work it was meant to do, and it fills a place which, so far as I know, is entirely empty of literature."—*Prof. Francis G. Peabody of Harvard College.*

GIDE'S PRINCIPLES OF POLITICAL ECONOMY. For colleges and academies. Cloth, 598 pp. Price $2.00. Professor Gide makes his readers think for themselves, and accept no conclusion without following out the process that leads to it. He lays a just emphasis on the need of impartiality and freedom from preconceptions. It is a book written for real students of the subject, and the truth is told without reserve or fear of consequences.

"I am prepared to pronounce it beyond a doubt the best single text-book for advanced classes in Political Economy that I have yet seen in English. The style being French, is, of course, irreproachable. I think Prof. Gide can in a short chapter turn to view more facts of an economic institution (like credit, inequality of wealth or distributive justice) than any living economist."—*Prof. E. A. Ross, Indiana University.*

"I find in it so much intelligence, candor, moderation, originality in treatment, illustration, fairness and love of truth, that I am convinced it must take a high place in the public and esteem. I wish for it a large success.—*Prof. James Monroe, Oberlin College.*

WOODROW WILSON'S THE STATE: or Elements of Historical and Practical Politics. Cloth, 720 pp. Price $2.00.

Adapted to serve as a text-book for advanced classes in High Schools and Colleges.

It exhibits the actual organization and administrative practice of the chief modern Governments in proper relations with the practice of Governments in the past, and with the general principles of jurisprudence and politics, as these have been developed by historical criticism.

"It has been adopted as a standard book of reference in Constitutional Government."—*A. B. Hart, Asst. Prof. of Hist., Harvard College.*

WOODROW WILSON'S STATE AND FEDERAL GOVERNMENTS OF THE UNITED STATES. 140 pages, reprinted from the above, price 55 cents.

WENZEL'S COMPARATIVE VIEW OF THE EXECUTIVE AND LEGISLATIVE DEPARTMENTS OF THE GOVERNMENTS OF THE UNITED STATES, FRANCE, ENGLAND, AND GERMANY. 26 pages, price 20 cents.

This book consists of outlines of the four great constitutional Governments, arranged, in parallel columns, in such a way that similar topics are grouped together.

Any of these sent postpaid on receipt of these prices.

Published by D. C. HEATH & CO.,
Boston, New York, Chicago.

HIGHER-GRADE TEXT-BOOKS AND WORKS OF REFERENCE.

THE PLATFORM: Its Rise and Progress.

By HENRY JEPHSON. Large Crown 8vo, 2 vols., $4.00.

MR. GLADSTONE in the *Nineteenth Century* says: "Mr. Jephson could not perhaps have found a better designation for his novel and hardy undertaking, which is nothing less than to exhibit a political history of his country in constant and close association with the gradual development of a power that had had a main share in framing it."

New Uniform Edition of Works of Dr. ALFRED RUSSEL WALLACE. 12mo, cloth, $1.75.

ISLAND LIFE.

Or, The Phenomena and Causes of Insular Faunas and Floras. Including Revision and attempted Solution of the Problem of Geological Climates. By ALFRED RUSSEL WALLACE, LL.D., F.L.S., author of "Darwinism," etc. With illustrations and maps. New and cheaper edition. 12mo, cloth, $1.75.

THE SOTERIOLOGY OF THE NEW TESTAMENT.

By WILLIAM PORCHER DU BOSE, M.A., S.T.D., Professor of Exegesis in the University of the South, Sewanee, Tenn. *Just Ready.*

This work is a reëxamination of the Christian doctrine of Salvation in the light of the facts of human nature, and of the teaching of the New Testament. The work as a whole is a fresh, and to some extent a novel, presentation of a great subject which while necessarily old must nevertheless be always new.

New Books by the Author of "Forty Years in a Moorland Parish."

WALKS AND TALKS, TRAVELS AND EXPLOITS OF TWO SCHOOLBOYS.

By the Rev. J. C. ATKINSON, D.C.L., Canon of York. 12mo, cloth. $1.25.

MACMILLAN & Co., 112 Fourth Avenue, New York.

Charles Scribner's Sons

NEW PUBLICATIONS.

A New Book by Mr. Froude.

The Spanish Story of the Armada,

AND OTHER ESSAYS. By J. A. Froude. 12mo, $1.50.

In the title essay Mr. Froude unfolds a fresh page of history, and the story of the Armada, as narrated by the Spanish participators in the expedition, is as picturesque and romantic as it is seriously valuable. The other papers, "Antonio Perez: An Unsolved Historical Riddle," "Saint Theresa," "The Templars," "The Norway Fjords," and "Norway Once More," are made equally entertaining by the author's delightful style.

The Great Educators.

Edited by NICHOLAS MURRAY BUTLER, Ph.D. Each 12mo, $1.00 *net:*

ARISTOTLE AND THE ANCIENT EDUCATIONAL IDEALS. By THOMAS DAVIDSON, LL.D.

LOYOLA AND THE EDUCATIONAL SYSTEM OF THE JESUITS. By THOMAS HUGHES, S. J., of Detroit College.

The series of volumes, of which the foregoing are the first two, aims to give concise, comprehensive accounts of the leading movements in educational thought, grouped about the great historic figures that have influenced them. The treatment of each theme is thus individual and biographic, as well as institutional.

The Song of the Sword,

And Other Verses. By W. E. HENLEY. 16mo, $1.00.

Mr. Henley's new volume reveals his strong individuality, his intense earnestness, and his finished literary art in a marked degree.

The Dead Nymph,

And Other Poems. By CHARLES HENRY LÜDERS. 12mo, $1.25.

This collection of the late Mr. Lüders' verse, made by his friend, Frank Dempster Sherman, is the product of an imaginative, reflective, and genuinely poetic temperament.

A New Book by Dr. Briggs.

The Bible, the Church, and the Reason:

The Three Great Fountains of Divine Authority. By Prof. CHARLES A. BRIGGS, D.D. Cr. 8vo, $1.75.

In order to set forth more fully the views expressed in his recent inaugural address, Dr. Briggs has written this volume, which aims principally to define his position with regard to the validity of the Church and the Reason as sources of divine authority. The other subjects discussed are the Higher Criticism, the Inerrancy of Scripture, Biblical History and the Messianic Ideal.

The Governor,

And Other Stories. By GEORGE A. HIBBARD. Cloth, $1.00; paper, 50 cents.

The best of Mr. Hibbard's popular magazine stories of recent years are included in this volume. Mr. Howells refers to Mr. Hibbard's work as having "a certain felicity of execution and a certain ideal of performance which are not common."

*** *Sold by all booksellers, or sent postpaid, by*

CHARLES SCRIBNER'S SONS,

743-745 Broadway, New York.

DODD, MEAD & COMPANY'S

ROBERT FULTON. By Prof. R. H. THURSTON.
THOMAS HOOKER. By GEORGE L. WALKER, D.D.

GEORGE AND CECILIUS CALVERT, by WM. HAND BROWNE; JAMES EDWARD OGLETHORPE, by HENRY BRUCE; ALEXANDER HAMILTON, by Prof. SUMNER of Yale University; FRANCIS HIGGINSON, by THOMAS WENTWORTH HIGGINSON.

After May 1st next the price of all the books in this series will be $1.00.

In the Giunta Series. (*Daintily printed on fine paper from French type.*)

HAZLITT'S ESSAYS ON THE ENGLISH POETS. In buff cloth, with gilt top, or blue cloth, uncut. With Portrait, $1.25.

William Hazlitt was one of the first, and remains one of the foremost English critics. In this volume he covers comprehensively the development of English poetry during the present century, characterizing with great distinctness the work of each poet, giving a clear impression of his personality, and indicating his particular contribution to the poetic movement of the time.

ALREADY PUBLISHED IN THIS SERIES.

CHRISTIE JOHNSTONE. By CHARLES READE.
PEG WOFFINGTON. By CHARLES READE.
THE CITATION OF WILLIAM SHAKSPEARE. By WALTER SAVAGE LANDOR.
JOURNAL OF MAURICE DE GUERIN. Translated from the twentieth French edition by JESSIE P. FROTHINGHAM.
FOUR FRENCHWOMEN. By AUSTIN DOBSON.
THE DRAMATIC ESSAYS OF CHARLES LAMB. Edited with an introduction by BRANDER MATTHEWS.
PRISON JOURNALS DURING THE FRENCH REVOLUTION. By the DUCHESSE DE DURAS, *née* NOAILLES.

Portia Series. (*Books which go to the making of the model woman.*)

THE ART OF ENTERTAINING. By M. E. W. SHERWOOD, author of "Manners and Social Usages." Price, $1.50.

No one is more competent than the author of this book to discourse upon the art of entertaining. In it she has given the results of her immense experience and knowledge, and her suggestions will prove of value, not only to those to whom money is nothing, but to all who entertain.

ALREADY PUBLISHED IN THE SERIES.

PHYSICAL DEVELOPMENT AND EXERCISE FOR WOMEN. With many illustrations. By Dr. MARY TAYLOR BISSELL.
CHATS WITH GIRLS ON SELF-CULTURE. By ELIZA CHESTER, author of "Girls and Women."

A HOUSE OF POMEGRANATES By OSCAR WILDE. With designs and decorations by C. Ricketts and C. H. Shannon. Price, $5.00.

The author calls this a book of Fairy Tales, but it is not for young people; it is rather a book of parables. The printing, illustration, and cover decoration have all been done under the immediate supervision of the author, and are harmonious and original to the last degree.

THE UNIVERSAL ATLAS. Containing 82 maps of all Countries of the World, including new county maps of the United States and a Statistical Appendix. Price, $3.00.

The United States maps are of special value, containing the names and locations of all post-offices, and having the railroad routes printed upon them in red. The maps are mounted on guards, and the Atlas is in octavo size, so that it will go upon the library shelf.

NEW NOVELS.

LOVE FOR AN HOUR IS LOVE FOREVER. By AMELIA E. BARR. Price, $1.25.

The scène of Mrs. Barr's new story is laid both in the old world and the new. It is quite unlike many of her previous works, but possesses the same charm of style, the keen insight into character and beauty of description which characterize them all.

A COLONY OF GIRLS. By KATE LIVINGSTON WILLARD. Price, $1.00; paper, 50 cents.

The characters are all cultivated and charming people, jolly, witty, good, with much individuality. There are at least three love cases in the story. A thoroughly delightful book.

A HIGHLAND CHRONICLE. By S. BAYARD DOD. Price, $1.00; paper, 50 cents.

A strong and exceedingly interesting tale of the times of the last attempt of the Stuart Pretender in Scotland. While the story is historical, it is not entirely so. The hero is a remarkable character. The picture of gypsy life is novel and truthful. A book of unusual interest and power.

PRINCE SEREBRYANI. An historical novel of the Times of Ivan the Terrible and of the Conquest of Siberia. By Count ALEXIS TOLSTOI. Translated from the Russian by Jeremiah Curtin. Price, $1.50.

Count Alexis Tolstoi, the author of this work, was an elder brother of Count Leo Tolstoi, the famous novelist and philanthropist. His historical novel translated by Mr. Curtin (translator of "The Deluge" and "Fire and Sword") shows the pen of a master. As an historical sketch it is brilliant. As a novel it is of absorbing and even terrible interest. It would be difficult to find anything in fiction equal in power to the two chapters, "The Frost of Ivan" and the "Tsar's Jester."

DODD, MEAD & COMPANY, Publishers,

753 & 755 Broadway, New York.

LONGMANS, GREEN & CO.'S

RECENT EDUCATIONAL WORKS.

HISTORY.

Epochs of American History.

1. **The Colonies, 1492-1750.** By REUBEN GOLD THWAITES, author of 'Historic Waterways,' etc. With marginal notes, bibliographies, index, and four colored maps. 322 pages. $1.25.
2. **Formation of the Union, 1750-1829.** By ALBERT BUSHNELL HART, A.B., Ph.D., the editor of the series. *[In the Press.*

Epoch Maps of American History.

Fourteen colored Maps illustrating American History at Various Epochs. Edited by A. B. HART, A.B., Ph.D., Assistant Professor of History in Harvard College. Small 4to, 50 cents, net.

"Every student and teacher must be thankful to Professor Hart for his 'Epoch Maps.' They are fourteen in number, and bear witness to an immense amount of well-directed research among the sources."—*Nation*, N. Y.

Gardiner's Student's History of England

FROM THE EARLIEST TIMES TO 1885.

By SAMUEL RAWSON GARDINER, M.A., LL.D. Illustrated under the superintendence of Mr. W. H. St. John Hope.

Published in Three Volumes or Parts, each Part with Index and Table of Contents. Crown 8vo, $1.20.

*** Complete in one volume, with full Index. Crown 8vo, cloth plain, $3.00 net.

Airy's Text-Book of English History.

From the Earliest Times. For Colleges and Schools. By OSMUND AIRY, author of 'The English Restoration and Louis XIV.,' etc., etc. With 15 Maps, $1.50.

General View of the Political History of Europe.

By ERNEST LAVISSE, Professor at the Sorbonne. Translated with the author's sanction, by CHARLES GROSS, Ph.D., Instructor in History, Harvard University. Crown 8vo, cloth, $1.25.

GEOGRAPHY.

Longmans' New School Atlas.

Consisting of 28 quarto and 10 octavo Colored Maps (and 20 Insets). Edited by G. G. CHISHOLM, M.A., B.Sc., and C. H. LEETE, A.M., Ph.D. Engraved by EDWARD STANFORD. With a full Index of Names. Imp. 8vo, $1.50.

"A commendable piece of work. The maps are not covered with a mass of detail or blackened with the names of insignificant towns. In addition to the usual geographical details, there are maps to illustrate the ocean currents, magnetic variation, density of population, and geological structure. No atlas of equal practical value has been issued."—*Educational Review, New York.*

Longmans' School Geography.

By GEORGE G. CHISHOLM, M.A., and C. H. LEETE, A.M. Second edition, revised, large 12mo, with 70 illustrations, 384 pages, $1.25.

Questions Based on Longmans' School Geography.

By G. G. CHISHOLM, M.A., and C. H. LEETE, A.M. Large 12mo, 40 cents.

*** These three books are intended to form the basis for geography study in schools where more than elementary work is done. The books relate to one another, the maps of the Atlas and the topics of the Text-Book corresponding to each other, while the Questions form a guide to both map and textual study. A general Prospectus, giving fuller particulars of the plan and scope of the series, may be had of the publishers,

FRENCH.

Episodes From Modern French Authors.

Edited by W. E. RUSSELL, M.A., Assistant Master at Haileybury College.

*** The aim of the series is to choose stories which are simple and interesting, and that each volume, while continuous enough to sustain interest, shall not be of greater length than can be finished in a term or two of ordinary work. Each volume consists of a detached portion of some French novel or story of good style, or of a series of portions of the same story pieced together by short "arguments" in English, so as to keep up the thread of the narrative, and preserve continuity of interest in the tale. The want of such reading-books for boys in Lower and Middle Forms of Schools has been felt by many teachers of French.

Malot's Sans Famille. Edited by W. E. RUSSELL, M.A. 16mo. 156 pp. 40 cents.

Dumas' Pepin et Charlemagne. Edited by J. D. WHYTE, M.A., Chief Master of Modern Languages at Haileybury College. 16mo. 116 pp. 40 cents.

Dumas' Adventures de Lyderic, Edited by A. K. COOK, A.M., Assistant Master at Winchester College. 16mo, 163 pp. 40 cents.

Dumas' La Bouillie de la Comtesse BERTHE. Edited by CORMELL PRICE, M.A., Headmaster of the United-Service College, Westward Ho. 16mo. 113 pp. 40 cents.

Dumas' Le Chateau D'If. Edited by D. B. KITCHIN, M.A. 16mo. 190 pages. 40 cents.

Prosper Merimee's Mateo Falcone, Tamango, and l'Enlevement de la Redoute. Edited by W. E. RUSSELL, M.A. 16mo. 81 pp. 40cts

Longmans' French Grammar.

By T. H. BERTENSHAW, B.A.

Part I. Up to and including Regular Verbs, with Copious Exercises and Vocabularies, etc. 30 cents.

Part II. Including Pronouns, Reflexive Adverbs, Verbs, Irregular Verbs, the Subjunctive Mood, the Infinitive, and Participles, with Vocabularies, etc. 30 cents.

Complete in one volume, 60 cents.

Cassell Publishing Company

104 and 106 Fourth Avenue, New York.

Fiction, Fact, and Fancy Series.

NO. 3 NOW READY.

THE GERMAN EMPEROR AND HIS EASTERN NEIGHBORS.

By Poultney Bigelow. Interesting personal notes of the Emperor's boyhood and education are given by his old playmate, together with a description of the Emperor's army, his course and policy since accession, and the condition of affairs on the Russian and Roumanian frontiers. All these facts have been obtained by personal observation.

12mo, Cloth, Gilt Title, etc., 75 Cents.

ALSO, IN THE SAME SERIES.

Merry Tales.

By Mark Twain. 12mo, bound in fine cloth, gilt titles, 75 cents.

This volume contains some of Mark Twain's most entertaining sketches, of which several have not appeared before in book-form. Of the latter are his personal reminiscences of the war in "The History of a Campaign that Failed"; a short story entitled "Luck," and his popular farce, "Meisterschaft."

Selected Poems by Walt Whitman.

12mo, bound in fine cloth, gilt titles, 75 cents.

The edition of Walt Whitman's "Selected Poems," chosen and edited by Arthur Stedman, was in the binder's hands at the time of his death. The poet occupied himself, shortly before that event, in giving his last wishes and final approval with respect to its publication.

For sale by all booksellers, or sent by mail, prepaid, on receipt of price by the publishers.

FIFTH THOUSAND.

The Discovery of America.

By JOHN FISKE.

With a steel Portrait, many Maps, etc. 2 vols. Crown 8vo, gilt top, $4.00.

HOUGHTON, MIFFLIN & CO.,

BOSTON AND NEW YORK.

LATIN AMERICAN REPUBLICS.

Under this general title Charles H. Sergel & Co. beg to announce a series of histories of the South American and Central American Republics, countries which are known to English and American readers only through the medium of books of travel and histories of limited periods. Closer commercial relations with these countries, their enormous resources, and the many thrilling incidents in their histories make most opportune this series of books, giving a complete presentation of their past and present national life. Each volume is being written by a foremost authority, will cover the period from pre-Columbian times to 1892, and will be profusely illustrated. The first number of the series is

A HISTORY OF PERU.

By Clements R. Markham, author of "War Between Chile and Peru," "Peru and India," "Cuzco and Lima," etc. 1 vol. 8vo, cloth, with twenty-five full-page illustrations and five maps. $2.50.

This is the first book in English giving a complete *history* of the country from the conquest to the present time; and it concludes with an exhaustive and accurate picture of the present condition of Peru and the Peruvians.

Volumes on Chile, Paraguay, Brazil, Argentine, etc., are in preparation.

MUSIC AND ITS MASTERS.

By Anton Rubinstein. 1 vol. 16mo, vellum, $1.00.

"This little book is the sensation of the hour in Germany. Great composers are expected in our times to write not only scores, but books as well. The writings of Berlioz, Schumann, Liszt, Wagner, and others fill many volumes, but Rubinstein has not hitherto made any contributions to literature. But now we have a genuine book from Rubinstein's own pen, which has fallen like a bombshell into two camps at once—that of the worshippers of Handel, Haydn, and Mozart on the one side, and that of the followers of Wagner, Liszt, and Berlioz on the other."—*The Nation.*

MARTYRDOMS OF LITERATURE.

By Robert H. Vickers. 1 vol., 8vo, half leather, $2.50.

"A book of no ordinary importance. The martyrdoms are not of men, but of libraries; of books and manuscripts, not of flesh and blood. What is surprising about the book is its immense range. It covers pagan no less than medieval and modern times. It embraces not only Europe, but the countries of Spanish-America and the lands of the Orient. It offers one of the most astonishing collections of material that we have ever seen."—*Chicago Evening Journal.*

Sold by all booksellers, or sent postpaid on receipt of price by

August 22nd, 1889.

The pictures have come, and the 6 large seated and body ¾ please me perfectly—as well as any I ever sat for (& that's saying a good deal, for I have sat to all the dons in New York—and in all the cities too from Boston to New Orleans). But I want a *dozen* of them, not 6 as you sent.

Please print me *six more*, same style, on the large plain cards, and I will send over for them in about a week.

The Weekly Bulletin of Newspaper and Periodical Literature.

WHAT IT IS: A Table of Principal Contents of the English Periodical Press of the United States and the British Provinces of North America.

WHAT IT DOES: It presents each week a *classified* index of the best articles appearing in the dailies, weeklies, monthlies, and quarterlies, numbering each article, giving the name of the author (when known), the name and date of the periodical in which the article appeared, and its approximate length. For the further convenience of its readers it supplies the articles thus catalogued at a reasonable price.

ITS VALUE: It is no difficult task to estimate the value of such a guide. To any one interested in some special line of reading or study it is indispensable. Specialists pronounce it invaluable.

The subscription price is but one dollar per year. Sample copies are free. Address,

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between

NOW YORK and GENOA, ITALY,

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch at regular intervals two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA:

WERRA, May 7; FULDA, May 28; WERRA, June 18; FULDA, July 2; WERRA, July 23; FULDA, Aug. 6.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Passengers for the Italian Lakes, Switzerland, and the Tyrol will find this route the most direct, easiest, and most comfortable. Switzerland can be reached in six hours from Genoa.

GINN AND COMPANY

HAVE RECENTLY PUBLISHED:

Ben Jonson's Timber: or Discoveries made upon men and matter, as they have flowed out of his daily reading; or had their reflux to his peculiar notions of the times. Edited, with introduction and notes, by FELIX E. SCHELLING, *Professor in the University of Pennsylvania.* 12mo, Cloth. xxxviii+166 pages. Price, 90 cents.

This is the first attempt to edit a long-neglected English classic, which needs only to be better known to take its place among the best examples of the height of Elizabethan prose. The text has been very carefully restored, and the introduction and copious notes supply all needed illustration.

Professor Francis B. Gummere, Haverford College, Pa.: It is admirably worked out, and especially in the notes shows the mark of careful scholarship and wide reading.

Five Short Courses of Reading in English Literature. With Biographical and Critical References. By C. T. Winchester, Professor of English Literature in Wesleyan University. Sq. 16mo. Cloth. v+99 pages. Price, 45 cents.

As the winnowed suggestions of a college instructor who has given unusual attention to this subject, this book will be found of the greatest value by all teachers and students of English Literature.

O. F. Emerson, Assistant Professor of English, Cornell University: Such a book as Professor Winchester's is just what is needed to accompany a course of lectures and assist students to know what they should read.

Shakespeare's Tragedy of Hamlet.—For the use of Colleges, High Schools, Academies and Clubs. By Carroll Lewis Maxcy, A.B., Associate Principal and Instructor in English in Troy (N. Y.) Academy. Sq. 16mo, cloth. 200 pages. Price, 50 cents.

The special merit of this edition of Hamlet lies in the questions and the method of study which they imply and illustrate.

Barrett Wendell, Assistant Professor of English, Harvard University: I thoroughly like the sympathetic spirit of the book. It is a refreshing relief from the pedantry that pervades so many school editions of English texts.

Whitney & Lockwood's English Grammar. Whitney's Essentials of English Grammar, revised for younger pupils by Mrs. Sara E. H. Lockwood, under the direction of Dr. Whitney. 12mo. Cloth. 259 pages. Price, 80 cents.

This book presents the highest scholarship and authority in English in a form admirably suited for text-book use. It has long been needed.

G. J. Smith, Washington (D. C.) High School: The arrangement is good, the added exercises suitable, the treatment accurate and scholarly, the result an excellent grammar for school use.

Xenophon's Hellenica, Books V.-VII. Edited on the basis of the edition of Büchsenschütz by Charles E. Bennett, Professor of Classical Philology in Brown University. Sq. 8vo., 240 pages. Prices: cloth, $1.50; paper, $1.20.

This is the latest volume in the College Series of Greek Authors, which includes Xenophon's Hellenica, Books I.-IV., edited by I. J. Manatt, recently Chancellor of the University of Nebraska.

La Famille De Germandre. Par George Sand. In the International Modern Language Series. Adapted and annotated by Augusta C. Kimball, Teacher in the Girls' High School, Boston. 12mo. Cloth. x+108 pages. Price, 56 cents.

A charming story most attractively told and admirable in language and style, for the early part of a course in French.

Theodore Benze, High School, Erie, Pa.: I regard it as one of the most charming additions to the number of books available for school use. The notes, though seemingly few, contain all that is necessary.

Soll und Haben. Von Gustav Freytag. In the International Modern Language Series. Edited and annotated by Ida W. Bultmann, Teacher of German in the Free Academy, Norwich, Conn. 12mo. Cloth. v+218 pages. Price, 70 cents.

This edition presents in excellent form for the school-room a book which, thus modified, is almost ideally excellent for such a use. In place of omitted portions, short *résumés* are given.

Original Texts. *Edited by Professor Böcher of Harvard University.* Price, 25 cents each.

MONTAIGNE. De l'Institution des Enfans. (Texte original de 1580.)
MOLIERE. Le Misantrope. (Texte original.)
RACINE. Andromaque. (Texte de 1697.)

A Straight Road to Cæsar. For beginners in Latin. By George H. White, A.M., Principal Oberlin College Preparatory School, and George W. Waite, Superintendent Oberlin Public Schools. Sq. 12mo. Cloth. xiv+223 pages. Price, $1.25.

The title of this book indicates its special peculiarity. The aim of the authors has been to provide as short and direct a route to college preparatory Latin as possible.

William McAfee, Prof. of Greek and Latin, Claverack College, N. Y.: It has some excellent and original features and must give the pupil an excellent preliminary drill for the first Latin author.

College Requirements in Algebra: A Final Review. By GEORGE PARSONS TIBBETS, A. M., Instructor in Mathematics, Williston Seminary, Easthampton, Mass. 12mo. Cloth. 46 pages. Price, 55 cents.

A little book that will be found very useful by teachers who are preparing their students for college examinations.

W. P. Durfee, Professor of Mathematics, Hobart College, Geneva N. Y.: I am very much pleased with it and shall take great pleasure in recommending it to men preparing for college and to their teachers.

The Story of Our Continent. A Reader in the Geography and Geology of North America. By N. S. SHALER, Professor of Geology in Harvard University. 12mo. Cloth. 296 pages. Price, 85 cents.

A book of unique value. A side-light on both geography and geology. It is especially designed for the upper grades of grammar schools, but will be wanted by all who are interested in the subject.

E. A. Sheldon, Principal State Normal and Training School, Oswego, N. Y.: It is an admirable book, well adapted to supplementary reading in connection with science work in our public schools. This is the use we make of it, and we find it very helpful.

Sent by mail, postpaid, on receipt of the prices given above.

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

D. APPLETON & CO., NEW YORK.

D. Appleton & Co.'s New Books.

By the author of 'Uncle Remus.'

ON THE PLANTATION.

By JOEL CHANDLER HARRIS. With 23 Illustrations by E. W. KEMBLE, and Portrait of the Author. 12mo. Cloth, $1.50.

The most personal and in some respects the most important work which Mr. Harris has published since 'Uncle Remus.' Many will read between the lines and see the autobiography of the author. In addition to the stirring incidents which appear in the story, the author presents a graphic picture of certain phases of Southern life which have not appeared in his books before. There are also new examples of the folk-lore of the negroes, which became classic when presented to the public in the pages of 'Uncle Remus.'

"Those who never tire of Uncle Remus and his stories—with whom we would be accounted—will delight in Joe Maxwell and his exploits."—*London Saturday Review.*

"The story is well told throughout, and is certain to rank amongst Mr. Harris's best works. To say the least, it is the most interesting literature of the kind recently published."—*Richmond, Va., Times.*

"A charming little book, tastefully gotten up. . . . Its simplicity, humor, and individuality would be very welcome to any one who was weary of the pretentiousness and the dull obviousness of the average three-volume novel."—*London Chronicle.*

THE HUMAN MIND.

A Text-Book of Psychology. By JAMES SULLY, M.A., LL.D., Examiner in Mental and Moral Science in the University of London, author of 'Illusions,' 'Pessimism,' etc. 2 vols. 8vo. Cloth, $5.00.

The present work is an expansion and further elaboration of the doctrine set forth in the author's 'Outlines of Psychology.' Although the mode of arrangement and of treatment is in the main similar, the book may be described as a new and independent publication. It is especially intended for those who desire a fuller presentment of the latest results of psychological research than was possible in a volume which aimed at being elementary and practical.

AMETHYST; The Story of a Beauty.

By CHRISTABEL R. COLERIDGE, author of 'Lady Betty,' 'Jack o' Lanthorn,' etc. No. 91, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

A graphic picture of the English society life of the day, with a central character who enlists and holds the sympathy and interest of the reader.

WHAT TO DO.

A Companion to 'Don't.' By Mrs. OLIVER BELL BUNCE. Small 18mo. Cloth, gilt, uniform with Boudoir Edition of 'Don't.' 30 cents.

A dainty little book, containing helpful and practical explanations of social usages and rules. It tells the reader how to entertain and how to be entertained, and it sets forth the etiquette of engagements and marriages, introductions and calls.

MODERN SCIENCE SERIES.

Edited by Sir JOHN LUBBOCK, Bart.

The MODERN SCIENCE SERIES is designed primarily for the educated layman who needs to know the present state and result of scientific investigation, and who has neither time nor inclination to become a specialist on the subject which arouses his interest. The volumes thus far issued are:

The Cause of an Ice Age. By Sir ROBERT BALL, LL.D., F.R.S., Royal Astronomer of Ireland, author of 'Starland.' 12mo. Cloth, $1.00.

The Horse: A Study in Natural History. By WILLIAM H. FLOWER, C.B., Director in the British Natural History Museum. 12mo. Cloth, $1.00.

The Oak: A Study in Botany. By H. MARSHALL WARD, F. R. S. 12mo. Cloth, $1.00.

For sale by all booksellers; or will be sent by mail on receipt of price by the publishers,

CAPE ROSIER, MAINE.

FOR SALE.—The lands of the Cape Rosier Associates, consisting of upwards of 1,000 acres of most beautiful lands with 10 miles of nearly continuous shore front. Cape Rosier shares with the island of Mt. Desert the most rugged and picturesque characteristics of the shore; is 50 miles nearer Boston than the latter; has good regular steam communication, unsurpassed mountain and island views, bold, rocky shores interspersed with beautiful beaches, and has a great variety of fine trees. These lands have been carefully and artistically laid out by competent landscape gardeners; roads, wharves, and other conveniences constructed, and the lands are offered for sale in lots of from 5 to 10 acres and upwards, presenting an exceptional opportunity to purchase for small sums fine and perfectly protected seashore estates. The lands will not be sold for speculation or in small lots. For plans, circulars, and details address

ALFRED BOWDITCH,
HENRY PARKMAN,
J. MURRAY HOWE,
} Trustees,

27 School St., Boston, Mass.

VALUABLE HISTORY.

PRIME MOVERS OF THE REVOLUTION

Known to the Author.

By Rev. A. B. MUZZEY, D.D.

The late Dr. Muzzey was a friend of many of the survivors of the Revolution and their families, and had access to historical notes of especial value to the present generation. His book combines biography and history, and is delightful reading.

Catalogue envoyé franco sur demande.

THE BAKER & TAYLOR CO., 740 Broadway, N.Y.

can completely fill at the lowest rates all orders for School or Miscellaneous Books wherever published, and promptly forward same in a single shipment. Catalogues of and estimates for School and Library Books on application.

Professors and Instructors who are considering the question of changing Text-Books for the coming year are cordially invited to consider the following Books,

PUBLISHED BY HARPER & BROTHERS:

ANGLO-SAXON. Attention is invited to the following Anglo-Saxon studies by Francis A. March, LL.D.: A Comparative Grammar of the Anglo-Saxon Language, in which its forms are illustrated by those of the Sanskrit, Greek, Latin, Gothic, Old Saxon, Old Friesic, Old Norse, and Old High German, Price $1.80; An Anglo-Saxon Reader with Philological Notes, a Brief Grammar, and a Vocabulary, Price $1.10, and A Method of Philological Study of the English Language, Price 55 cents.

BIBLE STUDY. Of the books published in this branch of study the reader's attention is invited to Smith's Old Testament and New Testament History, Price $1.25 each, and Smith's Smaller Scripture History, Price 60 cents. These books are published in the Student's Series and are recognized authorities on the subject. Thayer's Greek-English Lexicon of the New Testament, Price $6.50, Westcott & Hort's Greek-English Testament, Price $3.50, and Westcott & Hort's Greek New Testament, Student's Edition, Price $1.00, are all standard works and are largely used by Bible students.

CIVIL GOVERNMENT. The Government of the United States, by W. J. Cocker, is a clear and concise presentation of the influences and conditions that rendered our present Constitution a necessity, and a description of the powers and limitations of our form of government. Price 72 cents.

DICTIONARIES. Harper's Series of Latin and Greek Dictionaries have been recognized as the standard authorities for many years. Their enterprise in this direction stands without a parallel in the history of book-making the world over. A complete descriptive circular of these and other dictionaries will be forwarded on request.

ENGLISH LITERATURE. The Studies in English Literature by Prof. Wm. Swinton is a remarkably popular text-book. The author's fine faculty of discrimination, which has contributed so largely to his success as a maker of text-books, is shown to good advantage in the preparation of this work. Although a large volume of over 700 pages, the price is but $1.20, making it one of the cheapest text-books published. Miss Phillips's Manual of English Literature in two volumes is a remarkably complete presentation of the entire subject. Price $2.00 per volume.

ENGLISH WORDS. This book is an Elementary Study of Derivations, by Prof. Chas. F. Johnson of Trinity College, Hartford, being in fact the result of the author's many years' experience in the class-room. The writer has aimed at making etymology suggestive and interesting and at presenting the subject in a form to stimulate to further investigation and lead to a more correct and literary use of words. Price, 84 cents.

HISTORY. The Student's Series of Histories is well and favorably known everywhere. Nearly each and every one of the twenty-five neat and attractive volumes which make up the series is acknowledged to be the best summary in our language of the particular branch of knowledge to which it belongs. Greece, Rome, France, Germany, Middle Ages, Modern Europe, Queens of England, Ancient History, Church History, and the History of the East are all treated in a masterly manner by well-known writers. They are text-books *par excellence*, and range in price from 60 cents to $1.50 each. Full particulars of this series will be forwarded on request.

PSYCHOLOGY. For a good practical working text-book, the reader is recommended to examine Dr. John Dewey's Psychology, Price $1.25. The author has developed the subject in a clear and well-defined manner, and his book is logical throughout. For a further investigation of the subject, Prof. Borden P. Bowne's Introduction to Psychological Theory, Price $1.75, and his Metaphysics—A Study in First Principles, are offered.

RHETORIC. Five different text-books are offered for the consideration of instructors in this subject. Each book treats the subject from a different standpoint and each possesses a value particularly its own. For a good general text-book on the Principles of Rhetoric and their Application that of Prof. Adams Sherman Hill of Harvard University may be recommended. Price 80 cents.

SHAKESPEARE. No edition of Shakespeare so well answers the needs of the class-room as that prepared by Dr. Wm. J. Rolfe of Cambridge, Mass. Dr. Rolfe is not only a conscientious, but a brilliant worker, and has a wide reputation as a Shakespearan scholar of great ability. This series is complete in forty volumes, Price 56 cents each.

Messrs. Harper & Brothers invite Principals of Schools, Professors, and Instructors to correspond with them in regard to School Text-Books for class use, and the special rates made for first introduction.

HARPER & BROTHERS, Franklin Square, New York.

BY MRS BURTON HARRISON.

A Daughter of the South,

And Other Tales. By Mrs. BURTON HARRISON, author of "The Anglomaniacs," "Flower de Hundred," etc. 1 vol., 12mo, extra cloth, $1.00.

"A Daughter of the South" is one of the most charming and characteristic of Mrs. Harrison's stories. It has all the pathos of "Flower de Hundred," with the sprightliness and wit of "The Anglomaniacs." The other tales forming the volume include an interesting range of subjects, and exhibit on every page the gifted and versatile hand of their highly popular author.

BY MAX O'RELL.

English Pharisees, French Crocodiles,

And other Anglo-French Typical Characters. By MAX O'RELL, author of "A Frenchman in America," "Jonathan and His Continent," etc., etc. 1 vol., 12mo, cloth, gilt top, $1.50.

Never was our friendly critic more delightfully humorous, never more skilful at probing shams than he appears in this new volume, devoted to showing up the weaknesses as well as setting forth the good points of his native land and the land of his adoption.

BY EDWARD EVERETT HALE.

Sybil Knox;

Or, Home Again. A Story of To-day. By EDWARD EVERETT HALE, author of "The Man Without a Country," etc., etc. 1 vol., 12mo, cloth, $1.00.

No American author is known to a wider circle of readers than Edward Everett Hale. A new book from his pen is sure of a hearty and well-deserved welcome.

Record of Scientific Progress for the Year 1891.

By ROBERT GRIMSHAW, M.E., Ph.D., author of "Hints to Power Users," etc. 1 vol., 12mo. Complete index. Extra cloth, $1.50.

"Infinite riches in a little room."

Cassell's Complete Pocket Guide to Europe.

EDITION FOR 1892.

Edited by E. C. STEDMAN.

1 vol., leather binding. Price, $1.50.

"Its handy form, large type, frequent maps, and flexible binding are among its meritorious points."—*Nation*, New York.

New Volumes in Cassell's Sunshine Series.

BY ROBERT BARR (Luke Sharp)

In a Steamer Chair,

And other Shipboard Stories. By ROBERT BARR (Luke Sharp). 1 vol., 12mo, cloth, 75 cents; paper, 50 cents.

Mr. Robert Barr is the latest, but not the least, of latter-day humorists. His wit is typically American (although he is a Canadian), which means that it is spontaneous and convincing. His book is bubbling over with fun, and will make many a dull hour merry.

BY "AN IDLE EXILE."

By a Himalayan Lake.

By "AN IDLE EXILE," author of "Indian Idyls," "In Tent and Bungalow," etc., etc. 1 vol., 12mo, cloth, 75 cents; paper, 50 cents.

BY "Q."

I Saw Three Ships,

And Other Winter Tales. By "Q," author of "Dead Man's Rock," "The Splendid Spur," "The Blue Pavilions," etc., etc. 1 vol., 12mo, cloth, 75 cents; paper, 50 cents.

FOR SALE BY ALL BOOKSELLERS.

Cassell Publishing Company

104 and 106 Fourth Avenue, New York.

Our New Books.

LATIN AMERICAN REPUBLICS.

Under this general title Charles H. Sergel & Co. beg to announce a series of histories of the South American and Central American Republics, countries which are known to English and American readers only through the medium of books of travel and histories of limited periods. Closer commercial relations with these countries, their enormous resources, and the many thrilling incidents in their histories make most opportune this series of books, giving a complete presentation of their past and present national life Each volume is being written by a foremost authority, will cover the period from pre-Columbian times to 1892, and will be profusely illustrated. The first number of the series is

A HISTORY OF PERU.

By CLEMENTS R. MARKHAM, author of "War Between Chile and Peru," "Peru and India," "Cuzco and Lima," etc. 1 vol. 8vo, cloth, with twenty-five full-page illustrations and five maps. $2.50.

This is the first book in English giving a complete *history* of the country from the conquest to the present time; and it concludes with an exhaustive and accurate picture of the present condition of Peru and the Peruvians.

Volumes on Chile, Paraguay, Brazil, Argentine, etc., are in preparation.

MUSIC AND ITS MASTERS.

By ANTON RUBINSTEIN. 1 vol. 16mo, vellum, $1.00.

"This little book is the sensation of the hour in Germany. Great composers are expected in our times to write not only scores, but books as well. The writings of Berlioz, Schumann, Liszt, Wagner, and others fill many volumes, but Rubinstein has not hitherto made any contributions to literature. But now we have a genuine book from Rubinstein's own pen, which has fallen like a bombshell into two camps at once—that of the worshippers of Handel, Haydn, and Mozart on the one side, and that of the followers of Wagner, Liszt, and Berlioz on the other."—*The Nation.*

MARTYRDOMS OF LITERATURE.

By ROBERT H. VICKERS. 1 vol., 8vo, half leather, $2.50.

"A book of no ordinary importance. The martyrdoms are not of men, but of libraries; of books and manuscripts, not of flesh and blood. What is surprising about the book is its immense range. It covers pagan no less than medieval and modern times. It embraces not only Europe, but the countries of Spanish-America and the lands of the Orient. It offers one of the most astonishing collections of material that we have ever seen."—*Chicago Evening Journal.*

Sold by all booksellers, or sent postpaid on receipt of price by

CHARLES H. SERGEL & CO., Publishers, Chicago.

Our Catalogue for 1892 is now ready. It contains the announcement of forthcoming educational works, as well as a descriptive list of those already published. Our list embraces a goodly number of the best books in the several branches of which they treat. All correspondence will have prompt and careful attention.

LEACH, SHEWELL & SANBORN,

NEW YORK. BOSTON. CHICAGO.

A NEW BOOK in the BERCY SERIES.

LE FRANÇAIS PRATIQUE.

By PAUL BERCY, B.L., L.D. 12mo, Cloth, 196 pages, $1.00.

This volume will help beginners to acquire a rapid knowledge of the French language, and will enable teachers to lighten their work by using it as a first book for the instruction of pupils who do not care to devote much time to a thorough study of French, yet are anxious to understand and comprehend when travelling abroad. *Specimen pages on application.*

NEW EDITIONS ARE NOW READY OF

Prof. Richard T. Ely's Works.

Problems of To-Day.

A discussion of Protective Tariffs, Taxations, and Monopolies. 12mo, $1.50.

"*No man in this country speaks with the same authority or deserves more earnest attention.*"

The Labor Movement in America.

(Revised, with much new and valuable material added.) 12mo, $1.50.

"No one who wishes to understand the problems of labor and capital can afford to be without Professor Ely's work."—*Rochester Chronicle.*

Taxation in American States

AND CITIES. 12mo, $1.75.

A work of immense research, and presents in a masterly manner the whole complex subject of taxation as well as the inconsistencies which prevail in parts of this country. The volume is made especially valuable by numerous and carefully compiled tables, showing the various methods of levying taxes and the comparative results in every State of the Union, and will appeal especially to taxpayers, lawyers, legislators, and all engaged in public affairs.

Social Aspects of Christianity

12mo, 90 cents.

Professor Ely has no respect for shams; he shows what Christian socialism is, and how wide the gulf is between the professed Christianity of many churches and the Christianity of the Gospel.

THE FORUM, New York. 50c. a copy; $5 a year.

G. P. Putnam's Sons,

27 and 29 West 23d St., New York,

PUBLISH THIS WEEK:

Pratt Portraits. Sketched in a New England Suburb. By ANNA FULLER. 16mo. $1.00.

The Test Pronouncer. By W. H. P. PHYFE. A companion volume to "7,000 Words Often Mispronounced," containing the identical list of words found in the larger work, arranged in groups of ten, without diacritical marks for convenience in recitations. 16mo, 50 cents.

Summer-Fallow. Poems. By CHARLES BUXTON GOING. 12mo, $1.00.

New Chapters in Greek History. Based upon the Latest Archæological Discoveries. By PERCY GARDNER, Professor of Classical Archæology and Art, Oxford. 8vo. (*Ready next week.*) $5.00.

RECENTLY ISSUED:

Julius Cæsar and the Foundation OF THE ROMAN IMPERIAL SYSTEM. By W. WARDE FOWLER, M.A., Lincoln College, Oxford. With maps, seven portraits of Cæsar, and thirty-three other illustrations. Heroes of the Nations, Volume VI. 12mo, Cloth, extra, $1.50. Half-Morocco, $1.75.

"I must thank you at once for your beautiful life of Julius Cæsar. I have nearly completed the perusal of it. I had not thought of reading it at once, but have found it too interesting to lay aside. The plan is carried out exceedingly well. The proportions are well maintained—often a difficult thing—and it is instructive, and in spite of the necessary condensation, highly readable and attractive. Your 'Heroes of the Nations' I consider a great success. I had previously read 'Gustavus Adolphus' and 'Nelson,' and mean to read more of them."—*Professor James Monroe, Oberlin College, Ohio.*

Methods of Industrial Remuneration. By DAVID F. SCHLOSS. 8vo, $1,50.

"In Mr. Schloss's volume we have for the first time a detailed and exact description of the various methods of remuneration actually in existence in modern industry, with a careful analysis of their results. . . . No economist will henceforth deal with questions of wages or profit-sharing without making use of Mr. Schloss's labors."—*London Speaker.*

Nos. 43-47 E. 10th St., New York.

An Educational Directory.

I. THE NATION has the largest circulation of any literary and political journal published in this country. The 10,000 copies printed every week represent but a small part of the actual circulation, as THE NATION goes to all the principal libraries and reading-rooms, and into thousands of families.

II. The circulation is chiefly among the thinking and well-to-do classes—lawyers, physicians, bankers, and other professional men—and in the homes of cultivated people, where the education of children is a matter of careful consideration.

III. The School List in THE NATION has been a representative one for many years. It includes cards of most of the prominent educational institutions everywhere, during the season of school advertising, and a considerable number are inserted in the paper throughout the year.

School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

Advertising rates, 15 cents an agate line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12 1-2 per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 206 to 210 Broadway, N. Y.

OFFICE OF THE

Atlantic Mutual

INSURANCE COMPANY,

NEW YORK, January 25, 1892.

Direct Fast Express Route
TO THE MEDITERRANEAN.
First-class Passenger Steamer Service between
NOW YORK and GENOA, ITALY,
BY THE
NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch at regular intervals two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA:

WERRA, May 7; FULDA, May 28; WERRA, June 18;
FULDA, July 2; WERRA, July 23; FULDA, Aug. 6.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Passengers for the Italian Lakes, Switzerland, and the Tyrol will find this route the most direct, easiest, and most comfortable. Switzerland can be reached in six hours from Genoa.

GINN AND COMPANY

WILL PUBLISH DURING THE SPRING AND SUMMER:

GREEK.

Goodwin's Greek Grammar. Revised by the author, Prof. W. W. Goodwin of Harvard University. *About June* 1.

The Grammar has been revised throughout, and in many parts rewritten, and it is hoped that in many important particulars it will be found still more satisfactory than the former editions as a class-room text-book, and also as a work of reference.

Anabasis Dictionary. Illustrated Dictionary to Xenophon's Anabasis, with groups of words etymologically arranged. By John Williams White, Professor of Greek, and Morris H. Morgan, Assistant Professor of Greek and Latin, Harvard University. *May.*

This Dictionary has already been issued bound with Goodwin & White's Anabasis and notes, and has received the highest praise of scholars and teachers.

LATIN.

Catullus Edited by Professor ELMER T. MERRILL of Wesleyan University, Middletown, Conn. *Summer.*

In the College Series of Latin Authors.

Livy, Books XXI. and XXII. Edited, with Introduction and Notes, by Professor J. B. GREENOUGH of Harvard University and Professor TRACY PECK of Yale University. *Summer.*

In the College Series of Latin Authors.

Harvard Studies in Classical Philology. VOLUME III. Edited by a Committee of the Classical Instructors of Harvard University. *Just ready.*

Contains important articles by Professors J. H. Wright, C. L. Smith, T. D. Seymour, and W. A. Hammond; with notes.

HIGHER ENGLISH.

Analytics of English Prose and Poetry. By L. A. Sherman, Professor of English Literature in the University of Nebraska. *June.*

The aim of this book is to make criticism begin on less vague and more exact foundations, and it is designed to accompany instruction in English literature according to the laboratory method.

A Primer of English Verse. By Hiram Corson, Professor of English Literature in Cornell University. *Just ready.*

Designed to introduce the student to the æsthetic and organic character of English verse—to cultivate his susceptibility to verse as an inseparable part of poetic expression.

Addison's Criticisms on Paradise Lost. Edited by Albert S. Cook, Professor of the English Language and Literature in Yale University. *May* 15.

The text of this edition is believed to be more correct than any other published in this century. Professor Cook's index will enable the student to find Addison's comments on any particular passage with the least possible trouble.

ELEMENTARY ENGLISH.

Manual for Teachers of Language. By H. S. Tarbell, Superintendent of Schools, Providence, R. I., and author of Tarbell's Lessons in Language. *May.*

This will begin with the first year of the child's school life and show how his instruction in language should be managed from that point to the close of his grammar-school course.

Language Lessons and Grammar Lessons Hints for Language Lessons and Plans for Grammar Lessons. By Dr. J. A. MacCabe, Principal of Government Normal School, Ottawa, Canada. *Middle of May.*

This is a book with a very practical and direct purpose and, though small, will be found of great value.

The Children's First Reader. By Ellen M. Cyr. Illustrated. *July.*

This is designed to follow The Children's Primer by the same author and to complete the work of the first year in school.

Stickney's Fifth Reader. Illustrated. *June.*

It is enough of this to say that it completes Stickney's Series of Reading Books and carries out, like the other books, the classic ideal of the course.

Selections for Memorizing. For Primary, Grammar, and High-School Grades. Compiled by Superintendent SHERMAN WILLIAMS, Glens Falls, N. Y., and Superintendent L. C. FOSTER, Ithaca, N. Y. *Summer.*

This will be found a very choice collection, though a small one, and one just suited for use in schools.

HISTORY.

Beginner's American History. By D. H. Montgomery, Author of the Leading Facts of History Series. Illustrated. *June* 1.

This book will, it is believed, recommend itself both by its plan and by its details. It will be very interesting and at the same time a book of sterling merit and value. It will be fully illustrated and will give the young folks an excellent introduction to the history of their country.

MATHEMATICS.

Business Book-keeping: High School Edition. Including Single and Double Entry. By George E. Gay, Principal of High School, Malden, Mass. Illustrated. *May.*

The distinctive feature of this work is indicated by its title. It is based upon business methods and prepares for business work. The Grammar School Edition, comprising Single Entry only, is ready.

GERMAN.

German Grammar. A German Grammar for High Schools and Colleges. By George Hempl, Ph.D., Assistant Professor in Michigan University, and formerly Instructor in German in Johns Hopkins University. Part I. *August* 1.

A sufficient manual for the ordinary student of German, and an introductory book for such as wish to lay a foundation for a scholarly study of the language.

German and English Sounds. By C. H. Grandgent, Director of Modern Language Instruction, Boston Public Schools. *June.*

In the International Modern Language Series.

NEW PERIODICALS.

The American Meteorological Journal. Edited by Robert DeC. Ward of Harvard University.

The Yale Review. Edited by the Faculty of Yale University.

THE NORTH AMERICAN REVIEW,

3 East 14th Street, New York.

INTERESTING COMMENTS

OF THE PRESS

on the MAY NUMBER of the

NORTH AMERICAN REVIEW.

"The May number is an excellent example of the *North American Review's* fixed steady policy of keeping its articles well abreast of current public questions. It opens with a series on the Presidential contest, entitled 'The Man or the Platform,' to which men from whom readers will be glad to hear contribute."—*The New York Times.*

"The rounded and ample manner in which important matters are analyzed by men of distinction, whose opinions are authoritative, and to whom the public eagerly listen, gives peculiar weight to the May number of the *North American Review*. . . . It is an admirable number."—*The Union, Brooklyn, N. Y.*

"Abounding in political articles of great and timely interest. . . . "—*The Post, Washington, D. C.*

"A number crowded with interesting statement and discussion."—*Brooklyn Eagle.*

"Significant, entertaining, and instructive expressions of opinion are to be found from Senators Quay and Vest, and Representatives Boutelle, Burrows, Wilson, and Kilgore."—*Boston Traveller.*

"In a discussion on the sealing question between Gen. B. F. Butler and the Marquis of Lorne, the doughty General trenchantly maintains the rights of the United States in Behring Sea. One of Gen. Butler's characteristics is that he never writes without saying things of interest to intelligent readers. John Russell Young, ex-United States Minister to China, contributes an exceptionally able and instructive article on the vexed 'Chinese Question.'"—*New York Press.*

"It is quite natural that Senator Quay's contribution to the symposium on 'The Man or the Platform?' in the May number of the *North American Review* should attract wide attention, especially in Pennsylvania. . . . Leaders like Mr. Quay are of all men the most competent to judge of the trend of public sentiment."—*The Commercial Gazette, Pittsburgh, Pa.*

"Senator Quay's views will be read with interest. His judgment of the national campaigns of '84 and '88 is based upon knowledge. . . . The article is interesting throughout, and its conclusions will be generally accepted as wise."—*The Inquirer, Philadelphia, Pa.*

"Senator Quay's *North American Review* article on the Presidency will attract general attention. . . . He is one of the most thoroughly informed men in the country on American history and politics, and possesses a library rich in the documentary material of our history. Moreover, the position he occupies in the party, and his intimate knowledge of all the springs of political action give peculiar interest to his views."—*Chron. Telegraph, Pittsburgh, Pa.*

"The *North American Review* for May contains a series of articles from men eminent in politics in their respective parties. As the opinions of experts they are worthy of reading, as setting forth their ideas as to whether the man or the platform is or should be the preponderating element in a political campaign."—*The Ledger, New Albany, Ind.*

"Which is Stronger, the Man or the Party; or rather, Which is More Potential in Influencing Voters, the Candidate or the Platform? is the subject of an entertaining article in the May number of the *North American Review*, which embraces expressions of opinions from several representative Democrats and Republicans."—*The Chronicle, Augusta, Ga.*

"The article contributed by Senator Quay to the current number of the *North American Review* will be read with interest by every thinking Republican and Democrat. The subject treated by Senator Quay is one on which no one possesses more information. . . . The paragraphs that touch the question of personality versus party issues are thoughtful and logical, and should be read by every citizen in the country."—*The News, Philadelphia.*

"The article as a whole is full of sound sense, and shows that Mr. Quay has an insight into the theory and philosophy of politics and the broad underlying principles of party management. It is not often in recent years that Mr. Quay uses his pen, but when he does so, he writes interestingly and well."—*The Bulletin, Philadelphia, Pa.*

NEW PUBLICATIONS.

China Collecting in America.

By ALICE MORSE EARLE, author of "The Sabbath in Puritan New England." With 75 illustrations. Square 8vo, $3.00.

For years Mrs. Earle has been a persistent china-hunter, and this book is a narrative, fresh, spirited, and humorous, of her experiences and adventures in this fascinating pursuit. Every phase of this neglected subject is discussed entertainingly and with the full knowledge of an expert.

The Colonial Era.

By Prof. GEORGE P. FISHER, D.D., of Yale. With Maps. *The American History Series.* 12mo, $1.25.

Prof. Fisher's work is the first in a series of four, which together will give a compact, graphic history of the American people from the earliest discoveries to the present time. In Prof. Fisher's narrative manners, customs, and phases of intellectual progress are entertainingly discussed, along with the political events which led up to the Revolutionary War.

Sevenoaks.

By Dr. J. G. HOLLAND. 12mo, Yellow Paper Cover Series, 50 cents.

The wonderful popularity of Dr. Holland's works is steadily maintained from year to year. Already the sale of his books has reached the enormous total of 679,314 copies. "Sevenoaks" is the most popular of his novels.

New Volumes of Essays

By James Anthony Froude.

THE SPANISH STORY OF THE ARMADA, AND OTHER ESSAYS. 12mo, $1.50.

"The men and women of the sixteenth century live again on his canvas. Their faces, their acts, motives, methods, environments, are visible or conceivable to him who reads these luminous pages."—*G. W. Smalley in N. Y. Tribune.*

By Robert Louis Stevenson.

ACROSS THE PLAINS, WITH OTHER ESSAYS AND MEMORIES. 12mo, $1.25.

"The volume has all the grace, the magic, and the distinction which characterized the volumes that preceded it."—*Brooklyn Times.*

By Prof. H. H. Boyesen.

ESSAYS ON GERMAN LITERATURE. 12mo, $1.50.

"The book throughout is thoughtful, free from the conventionalities of criticism, and written in an extremely attractive manner."—*Boston Beacon.*

New Volumes of Verse

By Sir Edwin Arnold.

POTIPHAR'S WIFE, AND OTHER POEMS. Third Edition. 12mo. $1.25.

"To say that they are charming is faint praise."—*Boston Times.*

By W. E. Henley.

THE SONG OF THE SWORD, AND OTHER VERSES. 16mo. $1.00.

By Charles Henry Luders.

THE DEAD NYMPH, AND OTHER POEMS. 12mo. $1.25.

By George Parsons Lathrop.

DREAMS AND DAYS. Post 8vo. $1.75.

CHARLES SCRIBNER'S SONS,

743-745 Broadway, New York.

MACMILLAN & CO.'S NEW BOOKS.

Just Published, with 100 Illustrations. 2 vols., 8vo. $7.00.

THE REMAINS OF ANCIENT ROME.

By J. HENRY MIDDLETON, Director of the Fitzwilliam Museum, author of "The Engraved Gems of Classical Times," etc. With 100 Illustrations. 2 vols., 8vo. $7.00.

"Students of Roman art and of Rome as a town will value this work the more they read it. The labors of many years have gone into it, and the researches of an army of excavators, students of coins, water-pipes, and Roman literature were needed ere so noble a record of what Rome was could be brought within compass of these volumes. It is magnificent testimony to the value of that zeal and scholarship which have worked so patiently among the seven hills of the town of Romulus during the past thirty years."—*N. Y. Times.*

Now Ready. A New Book by Dr. DuBose, Professor of Exegesis in the University of the South.

THE SOTERIOLOGY OF THE NEW TESTAMENT.

By WILLIAM PORCHER DUBOSE, M.A., S.T.D., Professor of Exegesis in the University of the South. 12mo, $1.50.

CONTENTS:

Upon the Meaning of Salvation.
Upon the Meaning of Salvation in the New Testament.
Of Jesus Christ as Our Salvation.
Of Christ as Our Reconciliation or Atonement.
Of Christ as Our Redemption.
Of Christ, both Objectively and Subjectively, Our Redemption and Righteousness.
Of Christ as Our Resurrection.
Of Christ as Our Propitiation or Expiation.
Of the End or Final Cause of the Incarnation.
Of the Human Personality of Jesus Christ.
Of the Divine Sonship of Our Lord.
Of the Human Birth and Sonship of Jesus Christ.
Of the Human Sinlessness of Jesus Christ.
Of the Sinlessness of Jesus Christ.
Of the Human Nature of Jesus Christ.
Of the Flesh and the Spirit in Relation to Our Lord.
Of the Work of Jesus Christ upon Earth.
Of Jesus Christ as the Way.
Of the Sacrifice of Jesus Christ.
Of Jesus Christ as Our High Priest.
Of Salvation in the Church.
Of Baptism.
Of the Lord's Supper.

Now Ready. A New Volume of Poems by RUDYARD KIPLING.

BALLADS AND BARRACK-ROOM BALLADS.

By RUDYARD KIPLING, author of 'Life's Handicap,' 'Plain Tales from the Hills,' etc. 12mo, cloth, $1.25.

Mr. Rudyard Kipling has revised his verses contributed to various magazines during the past few years. These, together with the poems by "Yussuf," published in Macmillan's Magazine, and a *number of new pieces now printed for the first time,* form the above volume.

"The ballads are exceedingly spirited."—*N. Y. Times.*

F. MARION CRAWFORD'S NEW NOVEL. THIRD EDITION. JUST READY. CLOTH, $1.00.

THE THREE FATES.

By F. MARION CRAWFORD, author of 'The Witch of Prague,' etc. 12mo, cloth, $1.00.

"We do not know of any one to-day who can make his men and women talk love more naïvely and sweetly than does Mr. Crawford. Tenderness and delicacy are at their best, and every now and then there are passages of true passion. 'The Three Fates' is a delightful bit of fiction—very elaborate as to facts, for there are many, well cut and polished—and we deem it among the cleverest romances of this season."—*N. Y. Times.*

Now Ready. In the new Uniform Edition of F. MARION CRAWFORD'S *Novels. Published monthly:*

A TALE OF A LONELY PARISH. 12mo, cloth, $1.00.

ZOROASTER. 12mo, cloth, $1.00.

THE STORY OF DICK.

By Major GAMBIER PARRY. 12mo, cloth. $1.00.

Just published by the author of 'Hurrish.'

GRANIA: The Story of an Island.

By Hon. EMILY LAWLESS, author of 'Hurrish,' etc. 12mo, cloth. $1.00.

Fourth Edition. Now ready.

THE HISTORY OF DAVID GRIEVE.

By Mrs. HUMPHRY WARD. 12mo, cloth. $1.00. Library Edition, 2 vols. $3.00.

A New and Revised Edition, 18mo, cloth, gilt, 75 cts.

SHAKESPEARE'S ENGLAND.

By WILLIAM WINTER, author of "Gray Days and Gold," "Wanderers," etc. 18mo, cloth, gilt, 75 cents.

"The book is delightful reading. . . . It is a delicious view of England which this poet takes. It is indeed the noble, hospitable, merry, romance-haunted England of our fathers—the England which we know of in song and story."—*Scribner's Monthly.*

GRAY DAYS AND GOLD. 18mo, cloth, 75 cents.

WANDERERS. 18mo, cloth, 75 cents.

THE NOVELS OF CHARLES DICKENS.

NEW EDITION. ILLUSTRATED. 12mo. $1.00.

Messrs. Macmillan & Co. beg to announce that they have made arrangements to publish the most popular of *the Novels of Charles Dickens.* These will be in all cases accurate reprints of the texts of the first editions, and will be accompanied by *all* the original illustrations. There will also be prefixed in each volume a short introduction written by Mr. Charles Dickens, the novelist's eldest son, giving a history of the writing and publication of each book, together with other details, biographical and bibliographical, likely to be of interest to the reader.

OLIVER TWIST. 12mo. Cloth, $1 00. | **PICKWICK PAPERS.** 12mo. Cloth, $1.

Just Published. With numerous Illustrations. 8vo. $2.60.

The Microscope

In Theory and Practice. Translated from the German of Prof. CARL NAEGELI and Prof. S. SCHWENDENER. With *numerous illustrations.* 8vo. $2.60.

A new book by Canon Bernard.

The Central Teaching of Christ.

Being a Study and Exposition of St. John, Chapters xiii. to xvii., inclusive. By T. D. BERNARD, Canon of Wells. 12mo, cloth. *Just Ready.*

THE ENTIRE REMAINDER OF THE STOCK

OF "HANSARD'S PARLIAMENTARY DEBATES."

Odd Volumes and Runs of recent years supplied.

London, Eng.: P. S. KING & SON, Parliamentary and General Booksellers, 5 King Street, Westminster, S.W.

Francis Parkman's New Work,

(NEARLY READY)

A Half-Century of Conflict.

Two volumes, 8vo, cloth, $5.00.

The publication of 'A Half-Century of Conflict' completes the series which bears the general title of "France and England in North America," and makes it form a continuous history of the efforts of France to occupy and control the American Continent. The new work takes up the narrative at the close of the author's 'Count Frontenac and New France under Louis XIV.,' filling the gap between that work and 'Montcalm and Wolfe.'

List of Mr. Parkman's Writings.

LIBRARY EDITION.

THE CONSPIRACY OF PONTIAC AND THE INDIAN WAR AFTER THE CONQUEST OF CANADA. Two volumes, 8vo, cloth $5 00

THE OREGON TRAIL.—SKETCHES OF PRAIRIE AND ROCKY-MOUNTAIN LIFE. 8vo, cloth..... 2 50

An Educational Directory.

I. THE NATION has the largest circulation of any literary and political journal published in this country. The 10,000 copies printed every week represent but a small part of the actual circulation, as THE NATION goes to all the principal libraries and reading-rooms, and into thousands of families.

II. The circulation is chiefly among the thinking and well-to-do classes—lawyers, physicians, bankers, and other professional men—and in the homes of cultivated people, where the education of children is a matter of careful consideration.

III. The School List in THE NATION has been a representative one for many years. It includes cards of most of the prominent educational institutions everywhere, during the season of school advertising, and a considerable number are inserted in the paper throughout the year.

School advertisements are printed in a uniform typography, with the address in the first line, classification being made by States, alphabetically, unless especially ordered displayed on other pages.

Advertising rates, 15 cents an agate line each insertion, with the following discounts: 5 per cent. on four insertions, 10 per cent. on 8 insertions, 12 1-2 per cent. on 13 insertions, 15 per cent. on 26 insertions, 20 per cent. on 39 insertions, 25 per cent. on 52 insertions.

The *Nation* is sent free while advertisement continues.

Orders may be forwarded through any responsible advertising agency, or directly to

THE NATION, 206 to 210 Broadway, N. Y.

Deer Park and Oakland

ON THE CREST OF THE ALLEGHANIES,

3,000 Feet Above Tide-Water.

SEASON OPENS JUNE 22, 1802.

JUNE 22, 1892.

These famous mountain resorts, situated at the summit of the Alleghanies, and directly upon the main line of the Baltimore and Ohio Railroad, have the advantage of its splendid vestibuled express-train service both east and west, and are therefore readily accessible from all parts of the country. All Baltimore and Ohio trains stop at Deer Park and Oakland during the season.

Electric lights have been introduced throughout the houses and grounds; Turkish and Russian baths and large swimming pools provided for ladies and gentlemen; suitable grounds for lawn-tennis; bowling-alleys and billiard-rooms are here; fine riding and driving-horses, carriages, mountain-wagons, tally-ho coaches, etc., are kept for hire; in short, all the necessary adjuncts for the comfort, health, or pleasure of patrons.

Rates, $60, $75, and $90 a month, according to location

ALL COMMUNICATIONS should be addressed to GEORGE De SHIELDS, Manager Baltimore and Ohio Hotels, Cumberland, Md., up to June 10, after that date, either Deer Park or Oakland, Garrett County, Md

Direct Fast Express Route

TO THE MEDITERRANEAN.

First-class Passenger Steamer Service between

NOW YORK and GENOA, ITALY,

BY THE

NORTH GERMAN LLOYD STEAMSHIP CO.

TIME, LESS THAN ELEVEN DAYS.

To meet the demand of the American public for some direct and expeditious means of reaching the shores of the MEDITERRANEAN by steamers of the same standard of speed, comfort, excellence of service, and cuisine that marks the Express service of the NORDDEUTSCHER LLOYD S. S. CO. between New York, Southampton, and Bremen, this Company have decided to despatch at regular intervals two of their well-known Express steamers from NEW YORK to GENOA, ITALY.

The fine, fast steamers FULDA and WERRA of 5,000 tons and 7,000 horse-power have been designated for this service, and will sail from NEW YORK for GIBRALTAR and GENOA:

WERRA, May 7; FULDA, May 28; WERRA, June 18; FULDA, July 2; WERRA, July 23; FULDA, Aug. 6.

The time from NEW YORK to GENOA by these Express Steamers is less than ELEVEN days.

The traveller can reach ITALY and the shores of the Mediterranean by this route without braving the Northern latitudes of the ATLANTIC, without crossing the Channel, and without tedious railroad travel.

From GENOA the traveller can proceed to CANNES, NICE, SAN REMO, MENTONE, MONTE CARLO, or any other health resort on the RIVIERA and to all points in ITALY, in a comparatively short time by rail.

Travellers bound for EGYPT, INDIA, CHINA, JAPAN, and AUSTRALIA, can make connection at GENOA with the fine NORDDEUTSCHER LLOYD IMPERIAL MAIL STEAMERS that touch at that port on their way to the EAST, INDIA, CHINA, and AUSTRALIA.

Passengers for the Italian Lakes, Switzerland, and the Tyrol will find this route the most direct, easiest, and most comfortable. Switzerland can be reached in six hours from Genoa.

SCHOOL OF APPLIED ETHICS.

Second Annual Session, PLYMOUTH, MASS., July 6–Aug. 17, 1892.

Dean, CRAWFORD H. TOY, Harvard University. Secretary, S. BURNS WESTON. Office of the School, 118 South Twelfth Street, Philadelphia.

A printed bibliography of the lectures will be ready at the opening of the session, and a Reference Library will be placed at the disposal of the students. One day in the week—Wednesday—is set apart for conferences with the lecturers, and in addition to this provision will be made for those desiring to do special work in any department.

"Plymouth has a rare combination of the attractions that make up a pleasant summering place. Its quaintness, and its many historic relics and places give it somewhat of the old-world charm. Its sea views are beautiful; its opportunities for sailing, bathing, and fishing are all that need be asked; its walks and drives are exhaustless; its woods and ponds and inland attractions are only less attractive than its sea front."—*Review of Reviews.*

Tuition, $20; for any two departments, $15; for single department, $10. *Board* at reasonable rates. Program, giving full particulars, may be had upon application to the Secretary of the School.

COURSES OF LECTURES FOR THE SESSION OF 1892.

I.—Department of Economics.

Director, Professor H. C. ADAMS, University of Michigan.

It is the purpose of the lectures in the Department of Economics, for the session of 1892, to bring into clear light the theory of social progress, especial emphasis being placed on the industrial phase of society.

1. *Changes in the Theory of Political Economy since Mill.*

July 7–13. Prof. H. C. ADAMS,

Adam Smith as Representing the Political Economy of the Last Half of the Eighteenth Century.
John Stuart Mill as Representing the Political Economy of the First Half of the Nineteenth Century.
Changes in Fundamental Economic Conceptions.
Changes in Fundamental Economic Doctrines.
Changes in the Relation of Economy to Other Branches of Social Study.

2. *The Theory of Social Progress: A Study in Sociology.*

July 14–20. Prof. FRANKLIN H. GIDDINGS. Bryn Mawr College.

The Fact and Interpretation of Progress.
The Conditions on which Progress Depends.
The Relation of Progress to Social Classes.
The Relation of Progress to Social Evils.
The Ethics of Progress.

3. *Self-Help and Legislation for Promoting It.*

July 21–27. Prof. F. W. TAUSSIG, Harvard University.

Distributive and Credit Coöperation.
Productive Coöperation, and Profit Sharing.
Workingmen's Insurance.
Mr. EDWARD CUMMINGS, Harvard University.
Trades Unions.
Arbitration and Conciliation.

4. *The Function of Philanthropy in Social Progress.*

July 28–Aug. 3. Miss JANE ADDAMS, "Hull House," Chicago.

The Subjective Necessity of a Social Settlement.
The Objective Value of a Social Settlement.
Father J. O. S. HUNTINGTON, "The Holy Cross," New York.
Philanthropy: Its Success and Failure.
Philanthropy and Morality.
Mr. ROBERT A. WOODS, "Andover House," Boston.
The University Settlement Idea.

5. *Statistical Presentation of Industrial Problems.*

Aug. 4–10. Hon. C. D. WRIGHT, Commissioner of Labor, Washington, D. C.

Progress of Industrial Statistics in the United States.
Statistics Pertaining to Production and the Efficiency of Labor.
Statistics Pertaining to Wages and Prices.
Statistics Pertaining to the Cost of Living.
Statistics Pertaining to Strikes and Lockouts.

6. *A Critical Study of the Labor Problem and of the Monopoly Problem.*

Aug. 11–17. Prof. H. C. ADAMS.

The Genesis of the Labor Problem.
The Genesis of the Monopoly Problem.
Consideration of Popular Solutions.
Socialism and Communism as a Solution.
The Principle of Industrial Responsibility as a Solution.

II.—Department of History of Religions.

Director, Professor C. H. TOY, Harvard University.

This department will be devoted this year to the study of the religious ideas of the Hebrews.

1. *The Prophets.*

July 7–13. Prof. GEORGE F. MOORE, D.D., Andover Theological Seminary.

The Religion of Israel Before the Prophets.
The Eighth Century.
The Seventh Century to the Return from Babylon.
The Restoration.
Retrospective Survey of the Prophetic Teaching.

2. *The Religion of Ancient Persia and Its Relations to Judaism.*

July 13–20. Prof. A. V. WILLIAMS JACKSON, L.H.D., Ph.D., Columbia College.

The Sacred Books of Ancient Persia.
Zoroaster, the Prophet of Iran.
Ormazd and Ahriman.
The Ethics of Zoroastrianism.
The Ancient Persian Doctrine of a Future Life.

3. *The Ritual Law.*

July 21–27. Prof. MORRIS JASTROW, Jr., Ph.D., University of Pennsylvania.

The Documents for the Study of the Ritual Law, and Their Relation to One Another.
Priests and Levites.
The Festivals.
Sacrifice.
Worship.

4. *The Psalter.*

July 28–Aug. 8. Dr. JOHN P. PETERS, New York.

The Hymn-Book of the Jewish Church.
Early Religious Ideas Surviving in the Psalter.
The Conceptions of the Justice and Loving Kindness of God, and the Special Relation of God to Israel.
Ritual and Law in the Psalter, and the Combination of Conflicting Legal and Prophetical Conceptions.
The State After Death.

5. *The Wisdom-Books.*

Aug. 4–10. Prof. CRAWFORD H. TOY, Harvard University.

General Course of Israelitish Thought.
The Question of the Nature of Human Virtue, and Its Relation to the World.
The Practical Conduct of Life.
Contact of the Jews with Greek Thought.
Wisdom of Solomon.

6. *The Talmud.*

Aug. 11–17. Dr. EMIL G. HIRSCH, Chicago.

(Special subjects will be announced later.)

SUNDAY AFTERNOON LECTURES.

These lectures will deal in general with the relation of religion to modern life and thought.

Judge W. C. ROBINSON, Yale University, *Religion as a Social Force.*

President ORELLO CONE, Buchtel College, Akron, O., *The Relations of New Testament Criticism to Religious Belief.*

Professor B. P. BOWNE, Boston University, *Ethics and Religion.*

Father J. O. S. HUNTINGTON, New York. (Subject announced later.)

Two Sundays not yet provided for.

III.—Department of Ethics.

Director, Professor FELIX ADLER, New York.

The shorter courses in this departmeut will deal with different phases of political ethics.

1. *Variations of Moral Standards and Ideals, in Connection with the History of National Life and Thought.*

July 7–29. Prof. WILLIAM WALLACE, Oxford, England.

Philosophy in Its Relations with Life.
Greek Ethics and Politics in their Bearing on Modern Problems.
Aristocratic and Democratic Ideals of Life.
Plato; the Theory of Social Organization.
Aristotle; the Virtues of the Individual.
Stoics and Epicureans.
Theological Ethics; the Moral Principles of Christianity.
Problems of Law and Conscience in English Moral Philosophy.
Utilitarianism versus Moral Sentiment.
Characteristics of European Ethics in the Eighteenth Century.
German Idealism; Its Critical and Revolutionary Period.
German Idealism; the Period of Reconstruction.
History of the Development of Moral Ideas.
Variations of the Moral Standard.
Indications of Progress—Recapitulation.

2. *The Moral Evolution of Our Political Institutions.*

July 16, 23, 30. Mr. W. L. SHELDON, St. Louis.

Thomas Jefferson; His Life and Work as Applied to Present Conditions.
Alexander Hamilton; His Opinions and Work in Reference to the Political Problems of To-day.
Daniel Webster; His Life and Opinions Applied to the Close of the Nineteenth Century.

3. *The Temperance Question.*

August 1–2. General A. B. NETTLETON, Washington, D. C.

The History of Temperance Reform.
The Relation of the State to the Temperance Question.

4. *The Relations of the Church to Civil Government, Historically and Legally Considered.*

Aug. 4–13. Prof. J. W. BURGESS, Columbia College.

The Church and the Frankish Kingdom.
The Church and the Carolingian Empire.
The Feudal System and the Church.
The Peace of Westphalia and the Church.
The French Revolution and the Church.
The Influence of the Religious Reaction at the Beginning of the Nineteenth Century upon European Politics.
The "Cultur Kampf" in Prussia.
The Legal Relations of Religious Organizations in the Modern State.

5. *The Idea of Justice, with Its Political and Economic Applications.*

August 15–17. Mr. WM. M. SALTER, Philadelphia.

The Idea of Justice.
Justice and the State.
Justice and the Industrial Order.

Rare Engravings and Etchings.

FREDERICK KEPPEL & CO.,

20 EAST 16TH ST., NEW YORK.

A large collection of fine Colored Prints by Bartolozzi and his pupils has just been received from Europe; also a number of rare old Mezzotints and other Engravings. Correspondence invited; pictures sent for inspection free of charge.

N. B.—Illustrated Catalogue No. 9, descriptive of Modern Etchings, ready this month; free by mail on receipt of ten cents in stamps.

ALLIBONE'S DICTIONARY OF AUTHORS.

SUPPLEMENT.

By JOHN FOSTER KIRK. Two volumes. Imperial 8vo. Nearly 1,600 pages. Cloth binding, $15.00; sheep, $17.00; half Russia, $20.00; half calf or half morocco, $22.00.

"The work ought to be not only in every library, but in every school in which English literature is taught."—*New York Nation.*

"We have no hesitation in declaring our conviction that it is by far the most satisfactory work of the kind with which we are acquainted. It is ample in its information, it is accurate to a degree very rarely attained, it is catholic as to the persons included, and it is, with all this, eminently readable."—*London Saturday Review.*

"Mr. Kirk's volumes contain not only the results of the years of painstaking labor directed to the task in hand, but also show the work of a life spent in literary studies, and that scholarship of the very highest order of excellence has been used in perfecting and completing a book that is now more than ever valuable to every one who needs a reference handbook for the names and works and life of all who have contributed to the vast stores of English literature."—*Philadelphia Public Ledger.*

ALLIBONE'S DICTIONARY AND SUPPLEMENT.

Complete in Five Volumes.

The entire work containing the names and history of over 83,000 authors. Cloth, $37.50; sheep, $42.50; half Russia, $50.00; half calf, $55.00; half morocco, $55.00.

"It can hardly be doubted that Allibone's Dictionary of English Literature and British and American authors taken as a whole, embracing, as it does in its original three volumes, the names of over 46,000 authors, and in its Supplement those of 37,183 authors—with notices of their several hundred thousand books—will long remain without a rival as a bibliography of the literature of the English tongue."—*Boston Literary World.*

"No dictionary of the authors of any language has ever before been undertaken on so grand a scale. For convenience and trustworthiness this work is probably not surpassed by any similar production in the whole range of modern literature."—*New York Tribune.*

*** *For sale by all Booksellers, or will be sent by the Publishers, free of expense, on receipt of the price.*

Deer Park and Oakland

ON THE CREST OF THE ALLEGHANIES,

3,000 Feet Above Tide-Water.

SEASON OPENS JUNE 22, 1802.

JUNE 22, 1892.

These famous mountain resorts, situated at the summit of the Alleghanies, and directly upon the main line of the Baltimore and Ohio Railroad, have the advantage of its splendid vestibuled express-train service both east and west, and are therefore readily accessible from all parts of the country. All Baltimore and Ohio trains stop at Deer Park and Oakland during the season.

Electric lights have been introduced throughout the houses and grounds; Turkish and Russian baths and large swimming pools provided for ladies and gentlemen; suitable grounds for lawn-tennis; bowling-alleys and billiard-rooms are here; fine riding and driving-horses, carriages, mountain-wagons, tally-ho coaches, etc., are kept for hire; in short, all the necessary adjuncts for the comfort, health, or pleasure of patrons.

Rates, $60, $75, and $90 a month, according to location

ALL COMMUNICATIONS should be addressed to GEORGE De SHIELDS, Manager Baltimore and Ohio Hotels, Cumberland, Md., up to June 10, after that date, either Deer Park or Oakland, Garrett County, Md.

LONGMANS, GREEN & CO.'S

NEW BOOKS.

THE

Memoirs of Baron de Marbot

Late Lieutenant-General in the French Army. Translated from the French by ARTHUR JOHN BUTLER, late Fellow of Trinity College, Cambridge. In two volumes, demy 8vo, 940 pages, with two Portraits and Maps. $6.00.

"Baron de Marbot's Memoirs are truly characterized by the translator as in some respects the most interesting book that has appeared in France for a generation. His book ought to be popular, for it is full of thrilling adventures, gallant deeds, perils encountered, lofty patriotism, and frank and manly spirit. Marbot was a brave and capable soldier, a man of unblemished honor, and an annalist whose veracity is not likely to be called in question."—*N. Y. Daily Tribune.*

"No first-hand contemporary testimony concerning the Napoleonic time is more valuable than this . . . veritably packed with historical and geographical material."—*N. Y. Sun.*

"We cannot recall a work of fiction or of fact so overcharged with thrilling adventures and escapes. . . . Not only is the genuineness of the memoirs incontestable, but the main and even the minute facts of the narrative are historical and generally confirmed by clouds of witnesses.

"Works on the campaigns of Napoleon have been common enough, but these Memoirs of Marbot seem to us to be unique."—*London Times.*

GAMES, ANCIENT AND ORIENTAL, AND HOW TO PLAY THEM:

Being the Games of the Ancient Egyptians, the Hiera Gramme of Greeks, the Ludus Latrunculorum of the Romans, and the Oriental Games of Chess, Draughts, Backgammon, and Magic Squares.

By EDWARD FALKENER. With colored Plates, Photographs, and numerous Diagrams, etc. Demy 8vo, pp. 440, $6.00.

FAMILIAR STUDIES IN HOMER.

By AGNES M. CLERKE. Crown 8vo, $1.75.

*** Certain of the latest results of recent investigation are here set in order most interestingly. Especially novel are the chapters on Homeric astronomy, botany, and zoölogy, with the separate papers on the dog and the horse in the two great Grecian poems. The book is written with the thorough knowledge and the direct style which characterized Miss Clerke's 'System of the Stars.'

LECTURES ON THE HISTORY OF EDUCATION, WITH A VISIT TO GERMAN SCHOOLS.

By the late JOSEPH PAYNE, the first Professor of the Science and Art of Education in the College of Preceptors, London. Edited by his son, Joseph Frank Payne, M.D., late Fellow of Magdalen College, Oxford. With Portraits. 8vo, $2.50.

CHEAPER EDITION OF DR. NANSEN'S GREENLAND.

THE FIRST CROSSING OF GREENLAND.

By Dr. FRIDTJOF NANSEN. New and cheaper Edition, abridged. With numerous Illustrations and a Map. In one vol., crown 8vo, $2.50.

NEW NOVELS.

NADA THE LILY.

By H. RIDER HAGGARD, author of 'She,' 'Allan Quatermain,' etc. With 23 full-page Illustrations. By C. H. M. KERR. 12mo, cloth, ornamental, $1.00.

*** In this book Mr. Haggard has returned to South Africa, the scene of his greatest successes, and has produced a book that will rival in interest 'She' and 'Allan Quatermain.' All who have read the latter book cannot fail to be interested in the deeds of that doughty fighter, "Umslopogaas." In 'Nada the Lily' we have an account of his early life up to the time of his meeting with Allan Quatermain.

A NEW STORY BY MRS. WALFORD.

THE ONE GOOD GUEST

A Novel. By L. B. WALFORD, author of 'Mr, Smith,' 'The Baby's Grandmother,' etc., etc. 12mo, cloth, ornamental, $1.00.

*** This is one of Mrs. Walford's pleasant and cheerful stories of English country-house life, illumined by many touches of gentle humor, and carried on by a group of hearty and wholesome young men and maidens.

NEW BOOK BY THE AUTHOR OF 'MADEMOISELLE MORI.'

THE YOUNGER SISTER.

A Tale. Crown 8vo, $1.25.

NEW POETRY.

A NEW POETICAL WORK BY THE LATE EARL OF LYTTON.

MARAH.

By OWEN MEREDITH. Crown 8vo, cloth, extra, gilt top, $1.50.

"It has much of the charm which is characteristic of all the writer's work, and admirers of Owen Meredith's earlier productions will accord it a high, if not, perhaps, the highest place in their regard."—*Mr. H. D. Traill in the Graphic.*

"'Marah' will be found of supreme interest, as well as inexpressibly touching by all who knew Lord Lytton, either personally or as the young love-poet he was to readers in his days of Owen Meredith. . . . 'Marah' stands almost unique in English literature."—*Mr. Wilfrid Scawen Blunt in the Nineteenth Century.*

"The wealth of imagination, the opulence of the poet's vocabulary, and the art with which he vivifies his own weird impressions, affect the reader almost equally . . . 'Marah' is a volume of true and often noble poetry, and must add to the well-earned fame of the author of 'Lucile.'"—*N. Y. Tribune.*

"It is one of the most remarkable volumes of verse we have had submitted to us for some time. Remarkable because characteristic. They reveal the man. . . . The felicities of thought and dainty phrase contained in the volume are amongst the daintiest Owen Meredith has given us."—*Evening Bulletin, Philadelphia.*

A NEW VOLUME OF POETRY BY E. NESBIT.

LAYS AND LEGENDS.

Second Series. By E. NESBIT (Mrs. Hubert Bland.) With Portrait. Crown 8vo, $1.75.

LONGMANS, GREEN & CO., 15 East 16th St., New York.

Houghton, Mifflin & Co.'s New Books.

Evolution of Christianity.

By LYMAN ABBOTT, D.D. $1.25.

Dr. Abbott has carefully revised the lectures he gave last winter in Boston, which attracted great audiences and caused a great deal of of discussion, and the book is one of the most interesting and noteworthy of recent contributions to religious thought.

Henry Boynton Smith.

Volume VI. of American Religious Leaders. By the late Professor LEWIS F. STEARNS of Bangor Theological Seminary. 16mo, $1.25.

Henry B. Smith was widely recognized as one of the ablest, wisest, and most distinguished of American Presbyterians. His excellent work and admirable character are finely portrayed in this volume.

Paradise.

Part III. of Dante's Divine Comedy. Translated into admirable English prose by Professor CHARLES ELIOT NORTON. 12mo, gilt top, $1.25. The entire work in three volumes, 12mo, gilt top, in a box, cloth, $3.75; half calf, gilt top, $7.50.

Cardinal Manning.

By A. W. HUTTON. With a Portrait. 12mo, $1.00.

A careful, discriminating, and readable account of Cardinal Manning's career, written from the point of view of an Anglican, but just and liberal.

Sweetser's Guide-Books.

Carefully revised. $1.50 each.

NEW ENGLAND. 6 maps, 11 plans.

THE WHITE MOUNTAINS. 6 maps, 6 panoramas.

THE MARITIME PROVINCES. 4 maps, 4 plans.

"Incomparable handbooks for the tourist."—*N. Y. Evening Post.*

The Scarlet Letter.

By NATHANIEL HAWTHORNE. New Illustrated Edition. With photogravures of Darley's Twelve Outline Designs. Uniform with the Holiday Edition of the 'Marble Faun.' 8vo, cloth, gilt top, with slip cover, $2.50.

Hawthorne's wonderful romance has never been more effectively and satisfactorily illustrated than in the outline designs of Mr. Darley, which in this book are admirably reproduced in photogravures.

Sold by Booksellers. Sent postpaid by

Houghton, Mifflin & Co., Boston,

11 East Seventeenth St., New York.

TO COLLECTORS OF HISTORICAL Data, Colleges, Literary Institutions, etc.—A complete file of the London *Times*, from Oct. 25, 1805, down to date. Apply, with offers, to THE SECRETARY, Kings College, London, England.

MACMILLAN & Co.'s NEW BOOKS.

Just Published. A New Book by Mr. WILLIAM WINTER.

SHADOWS OF THE STAGE.

BY WILLIAM WINTER.

Uniform with the new edition of 'Shakespeare's England.' 18mo, cloth, 75 cents.

BY THE SAME AUTHOR.

SHAKESPEARE'S ENGLAND.

A New and Revised Edition. 18mo, cloth, gilt, 75 cents.

"The book is delightful reading. . . . It is a delicious view of England which this poet takes. It is indeed the noble, hospitable, merry, romance-haunted England of our fathers—the England which we know of in song and story."—*Scribner's Monthly.*

GRAY DAYS AND GOLD. 18mo, cloth, 75 cents.

WANDERERS. 18mo, cloth, 75 cents.

Just Published. A New Novel. 12mo, cloth. $1.50.

CALMIRE.

12mo, cloth. $1.50.

*** "Calmire" (a name of French origin, pronounced Calmēre), is an exposition, through the medium of a story, of that scientific explanation of the basis of morals for which many are seeking outside of the historic creeds.

It is entirely distinct in theory and mode of treatment from the widely-read novels touching on the religious question, and will take a place among the books most thoughtfully discussed by that increasing class of readers, which finds in the insistent problems of religion and the proletariat the most absorbing interests of the day.

Now Ready. A New Volume of Poems by RUDYARD KIPLING.

BALLADS AND BARRACK-ROOM BALLADS.

By RUDYARD KIPLING, author of 'Life's Handicap,' 'Plain Tales from the Hills,' etc. 12mo, cloth, $1.25.

Mr. Rudyard Kipling has revised his verses contributed to various magazines during the past few years. These, together with the poems by "Yussuf," published in Macmillan's Magazine, and a *number of new pieces now printed for the first time*, form the above volume.

"The ballads are exceedingly spirited."—*N. Y. Times.*

F. MARION CRAWFORD'S NEW NOVEL. THIRD EDITION. NOW READY. CLOTH, $1.00.

THE THREE FATES.

By F. MARION CRAWFORD, author of 'The Witch of Prague,' etc. 12mo, cloth, $1.00.

"We do not know of any one to-day who can make his men and women talk love more naïvely and sweetly than does Mr. Crawford. Tenderness and delicacy are at their best, and every now and then there are passages of true passion. 'The Three Fates' is a delightful bit of fiction—very elaborate as to facts, for there are many, well cut and polished—and we deem it among the cleverest romances of this season."—*N. Y. Times.*

Now Ready. In the new Uniform Edition of F. MARION CRAWFORD'S *Novels. Published monthly:*

A TALE OF A LONELY PARISH. 12mo, cloth, $1.00.

ZOROASTER. 12mo, cloth, $1.00.

THE STORY OF DICK.

By Major GAMBIER PARRY. 12mo, cloth. $1.00.

"The book is a charming one."—*Boston Beacon.*

"There is a touching and unusual naturalness and depth of feeling in it which make it notable."—*Boston Courier.*

Just published by the author of 'Hurrish.'

GRANIA: The Story of an Island.

By Hon. EMILY LAWLESS, author of 'Hurrish,' etc. 12mo, cloth. $1.00.

Fourth Edition. Now ready.

THE HISTORY OF DAVID GRIEVE.

By Mrs. HUMPHRY WARD. 12mo, cloth. $1.00. Library Edition, 2 vols. $3.00.

Now Ready. A New Book by Dr. DuBose, Professor of Exegesis in the University of the South.

THE SOTERIOLOGY OF THE NEW TESTAMENT.

By WILLIAM PORCHER DUBOSE, M.A., S.T.D., Professor of Exegesis in the University of the South. 12mo, $1.50.

Just Published. 12mo, cloth, $2.60.

A New English Grammar.

Logical and Historical. By HENRY SWEET, M.A., Ph.D., LL.D. Part I. Introduction, Phonology, and Accidence. 12mo, cloth, $2.60.

MACMILLAN & Co., 112 Fourth Avenue, New York.

TWO NOTABLE BOOKS.

Men and Events of Forty Years.

By JOSIAH B. GRINNELL. 8vo, cloth, $2.50.

It was Mr. Grinnell to whom Horace Greeley gave his famous injunction, "Go West, young man, go West." The young man *went* West, established a town, was the founder of several others, of Grinnell University, State Senator, Representative to Congress, and chairman of numerous important commissions.

The intimate friend of Sumner, Wilson, Wendell Phillips, Whittier, Beecher, and many other representative men, his book abounds in incidents, as well as valuable historical data.

Prime Movers of the Revolution

Known to the Author.

By Rev. A. B. MUZZEY, D.D. 8vo, cloth, $2.00.

The late Dr. Muzzey was a friend of many of the survivors of the Revolution and their families, and had access to historical notes of especial value to the present generation.

His style is delightful, and the record of important events is happily interspersed with personal reminiscences.

The Old South:

Essays Social and Political. By THOMAS NELSON PAGE. 12mo, with portrait, $1.25.

CONTENTS:—The Old South—Authorship in the South before the War—Life in Colonial Virginia—Social Life in Virginia before the War—Two Old Colonial Places—The Old Virginia Lawyer—The South's Need of a History—The Negro Question.

Mr. Page's essays treat, with sympathy, insight, historical truth, and an unerring literary sense, of the salient types and characteristics of the civilization of the Old South.

A Tramp Across the Continent.

By CHARLES F. LUMMIS. 12mo, $1.25

In his journey on foot across the Continent, his route lying in some of the wildest parts of Colorado, New Mexico, and Arizona, Mr. Lummis had many exciting and some humorous adventures, all of which he describes in a crisp, racy, breezy, and exhilarating manner. His pictures of this little known region, and of the inhabitants, are as entertaining as they are unhackneyed.

A History of Water Color Painting in England.

By GILBERT R. REDGRAVE. Illustrated, cr. 8vo, $2.

A new volume in the valuable series of art textbooks, edited by Edward J. Poynter, R. A,

BY JULIEN GORDON.

MARIONETTES.

A Novel. By JULIEN GORDON, author of "A Diplomat's Diary," "Vampires," "A Puritan Pagan," etc., etc. 1 vol., 12mo, cloth, $1.00.

Julien Gordon (Mrs. Van Rensselaer Cruger) has in "Marionettes" written the strongest novel that has yet come from her pen. Like her other stories, its interest is contemporaneous and human. The scene is laid on the Long Island coast and shifts for a moment to Paris, then back to New York. The characters, though few, are well limned. Whether they are portraits from the life or not is for the reader to say, but in either case it must be pronounced a story of absorbing interest.

A Literary Novelty.

THE FATE OF FENELLA.

By Helen Mathers, Justin H. McCarthy, M.P., Frances Eleanor Trollope, A. Conan Doyle, May Crommelin, F. C. Phillips, "Rita," Joseph Hatton, Mrs. Lovett Cameron, Bram Stoker, Florence Marryat, Frank Danby, Mrs. Edward Kennard, Richard Dowling, Mrs. Hungerford, Arthur a' Beckett, Jean Middlemass, Clement Scott, Clo. Graves, H. W. Lucy, Adeline Sergeant, G. Manville Fenn, "Tasma," and F. Anstey. 1 vol., 12mo, cloth, unique binding, $1.00.

Each chapter in this volume was written by a different author without any consultation regarding the development of the plot. That a story written by twenty-four writers of as widely different styles as those here represented should be so well rounded and so natural in its progress is a matter of no small wonder, and "The Fate of Fenella" deserves a conspicuous place among the successes as well as among the curiosities of literature.

HELEN BRENT, M.D.

A Social Study. 1 vol., 12mo, cloth. Uniform with "Shall Girls Propose?" Dainty binding, gilt top, 75 cents.

A book that is likely to attract more than ordinary attention, touching as it does upon a subject of vital importance in modern life. The author, although still young, has taken a leading part in the cause of the higher education for women. While, however, "Helen Brent, M.D.," is a "story with a purpose," it richly deserves to be read as well for the story's sake.

BY WILLIAM C. HUDSON
(Barclay North).

ON THE RACK.

By WILLIAM C. HUDSON (Barclay North), author of the "Diamond Button," "Jack Gordon, Knight Errant," "The Man with a Thumb," etc. 12mo, cloth, 75 cents; paper, 50 cents.

This is one of Mr. Hudson's clever detective stories—full of action and exciting incident. The plot is most ingenious and is worked out in entirely new lines. Mr. Hudson never repeats himself, but in this story he scarcely suggests himself.

A New Volume in the "Unknown" Library.

THE SINNERS' COMEDY.

By JOHN OLIVER HOBBES, author of "Some Emotions and a Moral." 1 vol., unique cloth binding, 50 cents.

A bright, witty, worldly-wise, and yet a pathetic story. It can be read at a sitting, which is fortunate, for when once begun, it cannot be laid down until finished.

A New Edition of

A WINDOW IN THRUMS.

By J. M. BARRIE, author of "Auld Licht Idylls," "My Lady Nicotine," etc.

1 vol., 12mo, paper, 25 cents.
Also in extra cloth, gilt top, $1.50.

FOR SALE BY ALL BOOKSELLERS.

Cassell Publishing Company

104 and 106 Fourth Avenue, New York.

D. APPLETON & CO.,
NEW YORK.

D. Appleton & Co.'s New Books.

THE LAST WORDS OF THOMAS CARLYLE.

Including "Wotton Reinfred," Carlyle's only essay in fiction; the "Excursion (Futile Enough) to Paris"; and Letters from Thomas Carlyle and Mrs. Carlyle. With Portrait. 12mo. Cloth, gilt top, $1.75.

"Wotton Reinfred" is Carlyle's only novel. The "Excursion (Futile Enough) to Paris" is a most characteristic account of a journey to Paris in 1851 in company with the Brownings, and a visit to Lord Ashburton, furnishing a singularly vivid picture of Carlyle's personality and peculiarities. The letters from Carlyle describe the preparation of his "Frederick the Great." This important addition to Carlyle's works is the first of his books to have an American copyright.

"The interest of 'Wotton Reinfred' to me is considerable, from the sketches which it contains of particular men and women, most of whom I knew and could, if necessary, identify. The story, too, is taken generally from real life, and perhaps Carlyle did not finish it, from the sense that it could not be published while the persons and things could be recognized. That objection to the publication no longer exists. Everybody is dead whose likenesses have been drawn, and the incidents stated have long been forgotten."—JAMES ANTHONY FROUDE.

"'Wotton Reinfred' is interesting as a historical document. It gives Carlyle before he had adopted his peculiar manner, and yet there are some characteristic bits—especially at the beginning—in the Sartor Resartus vein. I take it that these are reminiscences of Irving and of the Thackeray circle, and there is a curious portrait of Coleridge, not very thinly veiled. There is enough autobiography, too, of interest in its way."—LESLIE STEPHEN.

"No complete edition of the Sage of Chelsea will be able to ignore these manuscripts."—*Pall Mall Gazette.*

THE JEW AT HOME.

By JOSEPH PENNELL. With numerous Illustrations by the Author. 12mo, Cloth, $1.00.

This brilliant artist-author has visited and studied the Jewish towns of Hungary, Austria, and the Russian frontier, and the results of his observations will be found both in his text and in a series of striking illustrations. Mr. Pennell's work in art is so well known that it is unnecessary to emphasize the value of these studies of a life with which Americans are being brought into close relations. There has been no presentation of the subject of equal force.

MEN, MINES, AND ANIMALS IN SOUTH AFRICA.

By Lord RANDOLPH S. CHURCHILL. With Portrait, Sixty-five Illustrations, and a Map. 8vo, 337 pages. Cloth, $5.00.

An individual and entertaining book of travels. It contains picturesque and humorous descriptions of scenes in the diamond-mines and gold-fields, of hunting in Bechuanaland and life in Mashonaland, and adventures with lions and elephants are interspersed among many characteristic comments upon people, manners, and customs, and practical resources. The large number of illustrations are a most helpful reënforcement to the text.

DON BRAULIO.

By JUAN VALERA, author of "Pepita Ximenez," "Doña Luz," etc. Translated from the Spanish of "Pasarse de Listo," by CLARA BELL. No. 92, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"There is no doubt at all that 'Pepita Ximinez' is one of the best stories that have appeared in any country of Europe for the last twenty years."—GEORGE SAINTSBURY, *in The New Review.*

"The fascination of 'Doña Luz' and her history is that of a most tender and tragic beauty. We know hardly any figure in fiction more lovely and affecting. . . . It is all very fine and masterly work, scarcely to be matched in the contemporary fiction of our language, if that is not putting the case too faintly."—W. D. HOWELLS, *in Harper's Magazine.*

For sale by all booksellers; or will be sent by mail on receipt of price by the publishers.

HAVE NOW READY:

Pratt Portraits: Sketched in a New England Suburb. By ANNA FULLER. 16mo, $1.

"Abounding in humor of a quaint and refreshing quality, crisp and palatable from its unforced originality, there are also hidden springs of pathos which contribute to the beauty of the author's work."—*Rochester Herald.*

"It is just the book for an hour's leisure, but, more than that, it is a book to read over and over again, either through and through or with here a dip and there another, and one well worthy a favorite place in the home library."—*N. Y. Standard.*

From Palm to Glacier, with an Interlude. BRAZIL, BERMUDA, ALASKA. By ALICE W. ROLLINS. Quarto, gilt top, with 13 full-page illustrations. $1 75.

"A fascinating new book of travels. . . . Only a woman, and a poet at that, could write so delightfully about common things. . . . There are bits of metaphor that sparkle like gems. . . . Outside and away from metaphor Mrs. Rollins gives very full and accurate impressions of the countries."—*Boston Transcript.*

Diagnosis of Diseases of the Nervous System. By CHRISTIAN A. HERTER, M.D. *Fully illustrated*, $3.00.

This book is designed for the use of the student and general practitioner, and aims to present concisely the leading facts that relate to neurological diagnosis. Chapter I. deals with the Structure and Functions of the Nervous System; Chapter II., with the Symptomatology of Nervous Disease; Chapter III., with the Diagnosis of the Position of the Lesion (Localization), and Chapter IV., with the Diagnosis of the Nature of the Lesion; Chapter V. contains a brief description of the Clinical Types of Nervous Disease; Chapter VI. deals with the Distinction of Functional and Organic Disease. The Examination of the Patient is described in Chapter VII., and Chapter VIII. consists of Illustrations of Diagnosis.

PUBLISH NEXT WEEK:

The Life of Thomas Paine, with a History of His Literary, Political, and Religious Career in America, France, and England. By MONCURE DANIEL CONWAY, author of 'Omitted Chapters of History Disclosed in the Life and Papers of Edmund Randolph,' etc. To which is added a sketch of Paine by William Cobbett, hitherto unpublished. 2 vols., 8vo, illustrated, $5.00.

No real biography of Paine has ever appeared. The so-called Lives of Paine have been mainly the controversial works of pamphleteers, turning chiefly on his religious heresies. Mr. Conway has personally searched such records in Europe and America, and has obtained from these fresh light, not only on Paine, but on various eminent figures in American and European history, with whom he was associated. A large amount of unpublished correspondence is included.

The Story of the Byzantine Empire. By C. W. C. OMAN, author of 'War in the Middle Ages.' (No. XXXIII. in the Story of the Nations Series.) 12mo, fully illustrated, $1.50; half leather, gilt top, $1.75.

Materialism and the Modern Physiology of the Nervous System. By WILLIAM H. THOMSON, M.D., Prof. of Materia Medica and Diseases of the Nervous System in University Medical College, New York. 12mo, with five illustrations, 75 cents.

Who Pays Your Taxes? A Consideration of the Question of Taxation. By DAVID A. WELLS, JULIEN T. DAVIES, THOMAS G. SHEARMAN, JOSEPH DANA MILLER, BOLTON HALL, and others. Edited by BOLTON HALL; and issued on behalf of the New York Tax Reform Association. (No. LXXI. in the Questions of the Day Series.) $1.25.

Serampore Letters: Being the Unpublished Correspondence of William Carey and Others with John Williams. 1800–1816. Edited by LEIGHTON and MORNAY WILLIAMS. 12mo, with 8 illustrations and facsimile letter, $1.50.

*** Notes on New Books, Vol. II., No. I., and Prospectus of the Story of the Nations Series, sent on application.

"The weary brain requires some nerve sustaining element as food."—HERBERT SPENCER.

Crosby's Vitalized Phosphites.

The vital principle of animal and vegetable life isolated from the ox brain and wheat germ.

The loss of memory, the tired and exhausted feeling, the dull, unrefreshed sleep, or nervous sleeplessness, brain weariness, depressed vitality, are simply the brain and nervous system calling for their necessary food. In this condition the Vitalized Phosphites give great relief. It restores the true protagon, the brain phosphoid, increases brain and nerve power by specially feeding the nerve centres. It reinvigorates brain and body.

For thirty years endorsed by leading physcians, and the world's best brain workers. Formula on the label. Pamphlet free to those who write for it. Druggists or by mail. $1.00. 56 W. 25th St., N. Y.

Deer Park and Oakland

ON THE CREST OF THE ALLEGHANIES,

3,000 Feet Above Tide-Water.

SEASON OPENS JUNE 22, 1892.

JUNE 22, 1892.

These famous mountain resorts, situated at the summit of the Alleghanies, and directly upon the main line of the Baltimore and Ohio Railroad, have the advantage of its splendid vestibuled express-train service both east and west, and are therefore readily accessible from all parts of the country. All Baltimore and Ohio trains stop at Deer Park and Oakland during the season.

Electric lights have been introduced throughout the houses and grounds; Turkish and Russian baths and large swimming pools provided for ladies and gentlemen; suitable grounds for lawn-tennis; bowling-alleys and billiard-rooms are here; fine riding and driving-horses, carriages, mountain-wagons, tally-ho coaches, etc., are kept for hire; in short, all the necessary adjuncts for the comfort, health, or pleasure of patrons.

Rates, $60, $75, and $90 a month, according to location

ALL COMMUNICATIONS should be addressed to GEORGE De SHIELDS, Manager Baltimore and Ohio Hotels, Cumberland, Md., up to June 10, after that date, either Deer Park or Oakland, Garrett County, Md

BUSINESS LAW.

A Manual for Schools and Colleges and for Every-Day Use. By A. R. WEED, of the Boston Bar.

"No rule of law is perhaps better established than that no one is excused because of his ignorance of the law. It would certainly seem necessary, therefore, that young men about to engage in business should know something of the responsibilities they are to assume and of the rights they may acquire. The aim of this little book is to meet this need with a brief and simple statement of the common principles of the laws which govern business."

The Compendious Manual
OF
QUALITATIVE CHEMICAL ANALYSIS
Of C. W. ELIOT and F. H. STORER.
As revised by W. R. Nichols. Sixteenth Edition, newly revised by W. B. LINDSAY, A.B., B.S., Professor of Chemistry in Dickinson College.
Preface to the Sixteenth Edition.
"This edition has been carefully revised with the coöperation of Prof. F. H. Storer. The alterations and additions are such as an experience of several years' use of the book has suggested, and it is hoped they will add to its utility. W. B. LINDSAY,
"Dickinson College, Carlisle, Penn., Nov., 1891."

INTERNATIONAL LIBRARY No. 25.
THE HOUSEHOLD IDOL.
By MARIE BERNHARD, author of 'The Rector of St. Luke's.' 1 vol., 12mo, half Rox, $1.25; paper, 75 cents.
A charming story of life among the highest circles of society. The characters are drawn with singular clearness and fidelity, especially the character of the heroine, the beauty and belle of all Hamburg, idolized by parents and friends, is particularly attractive.

MATTHEW ARNOLD IN THE "NINETEENTH CENTURY."
"The New York NATION—a newspaper which I read regularly and with profit, a newspaper which is the best, so far as my experience goes, of all American newspapers, and one of the best newspapers anywhere."
THE NATION,
an independent weekly journal, was established in 1865. Its contributors include the most prominent names in literature, science, and art, both in this country and abroad. It is emphatically found in the homes of people of culture and refinement. No intelligent American, desirous of keeping abreast of the best political and literary thought of the day, can afford to be without it. Subscription price, $3.00 a year, postpaid.

MACMILLAN & CO.'S NEW BOOKS.

Just Ready. Third Edition, Revised and Corrected Throughout. 5 vols., 8vo, $20.00.

THE DIALOGUES OF PLATO.

Translated into English, with Analyses and Introductions,

By B. JOWETT, M.A.

Master of Balliol College, Regius Professor of Greek in the University of Oxford, Doctor of Theology of the University of Leyden, LL.D. of the Universities of Edinburgh and Cambridge.

In five volumes. Revised and Corrected Throughout. With Marginal Analyses and other additions, and an Index of Subjects and Proper Names. Third Edition. 8vo, cloth, gilt top, $20.00. *Just Ready.*

Fourth Edition. Now Ready in 1 vol., Cloth, $1.00.

THE HISTORY OF DAVID GRIEVE.

By MRS. HUMPHRY WARD, author of "Robert Elsmere," etc., etc. Fourth edition. In one volume, 12mo, cloth, gilt, $1.00. Also the Library Edition, printed in larger type, on better paper. 2 vols., 12mo, cloth, in box, $3.00.

"Mrs. Ward with her 'Robert Elsmere' and 'David Grieve' has established with extraordinary rapidity an enduring reputation as one who has expressed what is deepest and most real in the thought of the time. . . . They are dramas of the time vitalized by the hopes, fears, doubts, and despairing struggles after higher ideals which are swaying the minds of men and women of this generation. . . . It is because every thoughtful man can recognize in David Grieve a living brother-man of his time and generation, of the common clay, and with the same restless, informing, and ennobling spirit, that the author writes with masterly power."—*New York Tribune.*

F. MARION CRAWFORD'S NEW NOVEL. THIRD EDITION. NOW READY. CLOTH, $1.00.

THE THREE FATES.

By F. MARION CRAWFORD, author of 'The Witch of Prague,' etc. 12mo, cloth, $1.00.

"We do not know of any one to-day who can make his men and women talk love more naïvely and sweetly than does Mr. Crawford. Tenderness and delicacy are at their best, and every now and then there are passages of true passion. 'The Three Fates' is a delightful bit of fiction—very elaborate as to facts, for there are many, well cut and polished—and we deem it among the cleverest romances of this season."—*N. Y. Times.*

Now Ready. In the new Uniform Edition of F. MARION CRAWFORD'S *Novels. Published monthly:*

A TALE OF A LONELY PARISH. 12mo, cloth, $1.00.

WITH THE IMMORTALS. 12mo, cloth, $1.00.

Just Published. A New Book by Mr. WILLIAM WINTER.

SHADOWS OF THE STAGE.

By WILLIAM WINTER. Uniform with the new edition of 'Shakespeare's England.' 18mo, cloth, 75 cents.

BY THE SAME AUTHOR.

SHAKESPEARE'S ENGLAND.

A New and Revised Edition. 18mo, cloth, gilt, 75 cents.

"The book is delightful reading. . . . It is a delicious view of England which this poet takes. It is indeed the noble, hospitable, merry, romance-haunted England of our fathers—the England which we know of in song and story."—*Scribner's Monthly.*

GRAY DAYS AND GOLD. 18mo, cloth, 75 cents.

WANDERERS. 18mo, cloth, 75 cents.

A New Volume of Poems by RUDYARD KIPLING.

BALLADS AND BARRACK-ROOM BALLADS.

By RUDYARD KIPLING, author of 'Life's Handicap,' 'Plain Tales from the Hills,' etc. 12mo, cloth, $1.25.

"It is distinguished by other and higher qualities which we should not have expected from his prose, or the prose of any living English writer, they are so purely poetical, so admirable, so noble, so exquisite."—*Richard Henry Stoddard in the Mail and Express.*

Just Published. A New Novel. 12mo, cloth. $1.50.

CALMIRE.

12mo, cloth. $1.50.

Now Ready. A New Book by Dr. DuBose, Professor of Exegesis in the University of the South.

THE SOTERIOLOGY OF THE NEW TESTAMENT.

By WILLIAM PORCHER DUBOSE, M.A., S.T.D., Professor of Exegesis in the University of the South. 12mo, $1.50.

A New Book by Professor MASSON.

Edinburgh Sketches and Memories.

By DAVID MASSON, Professor of English Literature in the University of Edinburgh. 8vo, $3.75.

Our Life in the Swiss Highlands.

By JOHN ADDINGTON SYMONDS and his daughter MARGARET. Illustrated. 12mo, $2.50.

Studies in Secondary Education.

Edited by ARTHUR H. D. ACLAND, M.P., and H. LLEWELLYN SMITH, M.A., with an Introduction by JAMES BRYCE, M.P. 12mo, $1.75.

Pauperism, a Picture;

And The Endowment of Old Age: an Argument. By CHARLES BOOTH. 12mo, cloth, $1.25.

An Introduction to Modern Therapeutics.

The Cronian Lectures, 1889. By T. LAUDER BRUNTON, M.D., F.R.S. 8vo, $1.50.

Woodwork.

(The English Sloyd.) By S. BARTER, with 302 illustrations. 4to, $2.00.

Fruit Culture.

By J. CHEAL, F.R.H.S. Illustrated. 16mo, 75 cents.

Just Published. 12mo, cloth, $2.60.

A New English Grammar.

Logical and Historical. By HENRY SWEET, M.A., Ph.D., LL.D. Part I. Introduction, Phonology, and Accidence. 12mo, cloth, $2.60.

Second Edition, greatly enlarged, $1.50.

Silver in Europe.

By S. DANA HORTON. Second Edition, greatly enlarged. 12mo, cloth, $1.50.

*** *Purchasers of books are invited to apply for Macmillan & Co.'s New Catalogue of books by American authors, which will be mailed free to any address.*

MACMILLAN & CO., 112 Fourth Avenue, New York.

Single Numbers, 75 cents. Yearly Subscription, $3.00.

BOSTON AND NEW YORK.

HOUGHTON, MIFFLIN & CO., PUBLISHERS.

NEW PUBLICATIONS.

DARWIN AND AFTER DARWIN.

An Exposition of the Darwinian Theory and a Discussion of Post-Darwinian Questions. By GEORGE JOHN ROMANES, M.A., LL.D., F.R.S.

I.

THE DARWINIAN THEORY.

Prof. Romanes says: "This work is devoted to the general theory of organic evolution as this was left by the stupendous labors of Darwin, and as on this account it is likely to prove of more service to general readers than to professed naturalists, I have carefully avoided assuming even the most elementary knowledge of natural science on the part of those to whom the exposition is addressed."

The subject is treated under the following heads: Classification; Morphology; Embryology; Palaeontology; Geographical Distribution; The Theory of Natural Selection; Evidences of the Theory; Criticisms of the Theory; The Theory of Sexual Selection, and Concluding Remarks.

460 pp.; 125 Illustrations; Cloth; Postpaid for $2.00.

THE LOST MANUSCRIPT

A Novel. By GUSTAV FREYTAG. A new edition in one volume, 953 pages, long primer, 5x7¾ in. bound in cloth, $1.00.

"A magnificent exposition of soul-life is offered in a classic romance by Gustav Freytag. The book opens delightful suggestions in psychological development and philosophical inquiry. . . . The translation is stilted and formal but exceedingly correct, and the book is intensely interesting. Freytag is one of the most forcible romancers of the times, and in 'The Lost Manuscript' he stands upon graven tablets of the ages and spins a web of gold that binds archaic, ethical problems and mystic influences to modern science and immediate existence."—*The Daily News, Chicago.*

HOMILIES OF SCIENCE.

By Dr. PAUL CARUS. Cloth, gilt top, 320 pages. $1.50

"These brief essays, chiefly upon religious thought and practical ethics, first appeared as editorials in *The Open Court*, a remarkably strong and original Chicago publication devoted to advanced thought. While these essays are opposed to some of the teachings of dogmatic Christianity, they are full of the spirit of the highest Christian morality, and are not in any true sense antagonistic to religious faith. They are constructive rather than destructive."—*Review of Reviews.*

The Open Court Publishing Co.
169–175 La Salle St., Chicago.

Charles Scribner's Sons'

NEW BOOKS.

The Colonial Era.

By Prof. GEORGE P. FISHER, D.D., of Yale. With Maps. *The American History Series.* 12mo, $1.25.

Prof. Fisher's work is the first in a series of four, which together will give a compact, graphic history of the American people from the earliest discoveries to the present time. The other volumes will be by Prof. SLOANE of Princeton, General FRANCIS A. WALKER, and Prof. BURGESS of Columbia.

"We know of no other work which in the compass of a single volume offers so complete and satisfactory a conspectus of the subject, and we have, therefore, no hesitation in commending this book."—*M. W. Hazeltine, in the N. Y. Sun.*

China Collecting in America.

By ALICE MORSE EARLE, author of "The Sabbath in Puritan New England." With 75 illustrations. Square 8vo, $3.00.

"It can scarcely fail to excite delight. It is written in an easy, chatty manner that makes it wholly attractive, It is a handsome volume of real and permanent value."—*Boston Saturday Evening Gazette.*

The Old South:

Essays Social and Political. By THOMAS NELSON PAGE. 12mo, with portrait, $1.25.

CONTENTS:—The Old South—Authorship in the South before the War—Life in Colonial Virginia—Social Life in Virginia before the War—Two Old Colonial Places—The Old Virginia Lawyer—The South's Need of a History—The Negro Question.

"They are admirably written, and contain a vast deal of information most charmingly conveyed."—*Boston Beacon.*

Reflections of a Married Man.

By ROBERT GRANT. 12mo, cloth, $1.00; paper, 50 cents.

Mr. Grant's humorous satire, which has attracted such favorable notice while appearing in *Scribner's Magazine*, is now ready in book form. "It has all those delicate shadings and the humorous charm," says the Boston *Budget*, "that made the fame of the 'Confessions of a Frivolous Girl.'"

Res Judicatae.

Papers and Essays. By AUGUSTINE BIRRELL. 16mo, $1.

Mr. Birrell's essays, which are written in the same charming vein as his "Obiter Dicta," relate to Richardson, Gibbon, Cowper, Borrow, Newman, Matthew Arnold, Lamb's Letters, Sainte-Beuve, "Authors in Court," etc., etc.

A Tramp Across the Continent.

By CHARLES F. LUMMIS. 12mo, $1.25.

"The book is a remarkable one, both for the unique circumstances with which it deals and for the delightfully straightforward, unpretentious manner in which it is written."—*Boston Beacon.*

The Elements of Logic, Theoretical and Practical.

By Prof. JAMES H. HYSLOP, of Columbia College. Crown 8vo, $2.00.

*** *Sold by all booksellers, or sent postpaid, by*

BUSINESS LAW.

A Manual for Schools and Colleges and for Every-Day Use. By A. R. WEED, of the Boston Bar.

"No rule of law is perhaps better established than that no one is excused because of his ignorance of the law. It would certainly seem necessary, therefore, that young men about to engage in business should know something of the responsibilities they are to assume and of the rights they may acquire. The aim of this little book is to meet this need with a brief and simple statement of the common principles of the laws which govern business."—*Preface.*

Deer Park and Oakland
ON THE CREST OF THE ALLEGHANIES,
3,000 Feet Above Tide-Water.
SEASON OPENS JUNE 22, 1802.

JUNE 22, 1892.

These famous mountain resorts, situated at the summit of the Alleghanies, and directly upon the main line of the Baltimore and Ohio Railroad, have the advantage of its splendid vestibuled express-train service both east and west, and are therefore readily accessible from all parts of the country. All Baltimore and Ohio trains stop at Deer Park and Oakland during the season.

Electric lights have been introduced throughout the houses and grounds; Turkish and Russian baths and large swimming pools provided for ladies and gentlemen; suitable grounds for lawn-tennis; bowling-alleys and billiard-rooms are here; fine riding and driving-horses, carriages, mountain-wagons, tally-ho coaches, etc., are kept for hire; in short, all the necessary adjuncts for the comfort, health, or pleasure of patrons.

Rates, $60, $75, and $90 a month, according to location

ALL COMMUNICATIONS should be addressed to GEORGE De SHIELDS, Manager Baltimore and Ohio Hotels, Cumberland, Md., up to June 10, after that date, either Deer Park or Oakland, Garrett County, Md.

The 1892 Model **Remington Typewriter**

Presents many points of improvement which will readily commend themselves to all users.

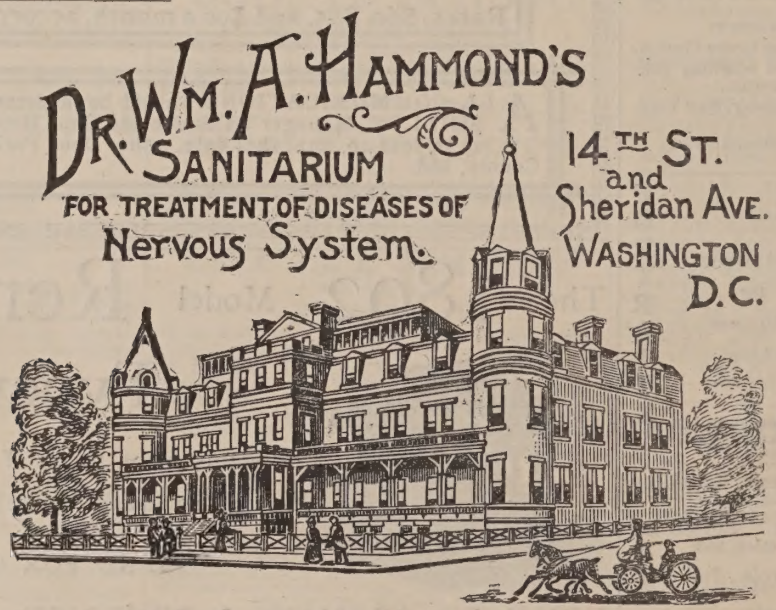
BUFFALO LITHIA WATER.

NATURE'S GREAT REMEDY FOR EXCESS OF URIC ACID IN THE BLOOD.

ITS ESPECIAL VALUE IN NERVOUS PROSTRATION AND OTHER NERVOUS DISEASES COMPLICATED WITH LITHEAMIA. IN SUCH CASES IT ACCOMPLISHES ASTONISHING RESULTS, AFTER A FAILURE OF THE CARBONATE OF LITHIA, THE PHOSPHATE OF AMMONIA, AND OTHER SO-CALLED SOLVENTS OF URIC ACID.

IT EVIDENTLY THEN POSSESSES SOME EXTRAORDINARY VIRTUE APART FROM THAT ASCRIBED TO LITHIA.



Note Relative to the Buffalo Lithia Water, by Wm. A. Hammond, M.D., Surgeon-General U. S. Army (retired), formerly Professor of Diseases of the Mind and Nervous System, University of New York.

[IN AN ARTICLE WIDELY COPIED INTO THE LEADING MEDICAL JOURNALS IN THE COUNTRY:]

"There is a point in relation to the therapeutical efficacy of the BUFFALO LITHIA WATER which has not as yet, I think, received sufficient attention. It is well known that many cases of diseases of the NERVOUS SYSTEM are complicated with LITHEAMIA, and that unless this condition is removed a cure is very often retarded, and not infrequently entirely prevented. It is quite commonly the case that in CEREBRAL CONGESTION producing INSOMNIA, NERVOUS PROSTRATION, resulting from overmental work or much emotional disturbance, and in epilepsy (to say nothing of many cases of insanity) an excess of URIC ACID in the blood is often observed. This state appears to be altogether independent of the character of the food, for no matter how careful the physician may be in regard to the diet of his patient, the LITHEAMIC condition continues. I have tried to overcome this persistence by the use of phosphate of ammonia and other so-called solvents for uric acid, but without notable effect.

"Several years ago, however, I began to treat such cases with BUFFALO LITHIA WATER with a result that was as astonishing to me as it was beneficial to the patient, so that now in all cases of nervous diseases under my charge in which there is an excess of URIC ACID in the blood, I use the BUFFALO LITHIA WATER in large quantities. By this I mean that I do not have the patient drink merely a tumbler or two in the course of the day, but that I flood him, so to speak, with the water, making him drink a gallon, or even more, in the twenty-four hours. By this course the urine after a few days ceases to deposit uric acid crystals on standing, the morbid irritability of the patient disappears, the tongue becomes clean, the wandering pains in the head are abolished, and the system is rendered much more amenable to the special treatment which may be necessary for the cure of the disease from which the patient suffers.

"I have tried CARBONATE OF LITHIA dissolved in water in various proportions, BUT IT CERTAINLY DOES NOT, in cases to which I refer, have the same effect as BUFFALO LITHIA WATER.

"WASHINGTON, D. C., January 25, 1892."

Gout, Rheumatic Gout, Rheumatism, Stone of the Bladder, Renal Calculi, Bright's Disease of the Kidneys, Neuralgias, Nervous Prostration, Various forms of Dyspepsia, etc., etc., have their origin in an excess of Uric Acid in the Blood. It goes, then, without saying that Buffalo Lithia Water is a powerful remedial agent in these maladies.

SPRINGS OPEN FOR GUESTS JUNE 1.

Public Library Jan 27 1893

SOME NEW BOOKS FROM

THE INLAND PRESS.

The American Government, National and State.

By B. A. HINSDALE, Professor of the Science and the Art of Teaching in the University of Michigan; formerly President of Hiram College, and later Supt. of Public Instruction, Cleveland, O.; author of "The Old Northwest," "Schools and Studies," and editor of the "Works of James A. Garfield." Cloth, 454 pages; price, $1.50.

"SENATE CHAMBER, WASHINGTON, April 29, 1892.
"Prof. B. A. Hinsdale.—My Dear Sir: I have received your book, 'The American Government,' which you were kind enough to send me, and have examined it sufficiently to know its merits. It contains a vast deal of information which few have time to gather, and will be a very useful and convenient book of reference for editors, lawyers, and for political speakers, and for teachers and educators. I hope it may have a large circulation.
"Very truly yours, JOHN SHERMAN."

"ANN ARBOR, Michigan, May 2, 1892.
"I have examined Hinsdale's 'American Government' with some care, and find it, as I expected, a very careful and scholarly piece of work. It contains a vast amount of information, and seems to me to be, on the whole, an admirable treatise on the Constitution and its practical interpretation.
"A. C. MCLAUGHLIN,
"Professor of American History, Univ. of Mich."

Outlines of a Critical Theory of Ethics.

By JOHN DEWEY, Professor of Philosophy in the University of Michigan. Cloth, 253 pages; price, $1.50.

"BOWDOIN COLLEGE, BRUNSWICK, Me.
"For five years I have been trying to teach Ethics as the science of self-realization on the lines laid down by Aristotle, Hegel, Green, and Bradley. The works of these writers are too difficult for beginners. The attempt to teach this doctrine by criticism of opposing systems is confusing to a college class. And the method of lectures is always unsatisfactory in dealing with the elements of a subject. Dewey's 'Outlines' seems to set forth the essential points of this line of thought in a way that will enable a class to get hold of them. Teachers who are already fairly familiar with the Ethics of Idealism will find this book an admirable summary of the problems to be discussed, and a suggestive outline of the logical order of ethical study. I shall use it with my class.
"Very truly yours, WM. DE W. HYDE,
"President Bowdoin College."

A Planisphere and Key to the Planets until 1901.

By MARK W. HARRINGTON, Chief of the United States Weather Bureau, late Professor of Astronomy in the University of Michigan; price, carefully wrapped and postage paid, $1.10; express, $1.00.

"ANN ARBOR, Mich., May 3, 1892.
"I wish to acknowledge, with thanks, the receipt of the planisphere you were so kind as to send me a few days ago.
"I am very much pleased with it for several reasons, among which may be mentioned the key for finding the planets, the alignments in the constellations, the omission of the mythological figures, the compact and convenient form, and the cheapness.
"I shall recommend its adoption in the High School. I hope it will have the sale its merits deserve.
"J. MONTGOMERY, Ph.D.,
"Instructor in Chemistry and Astronomy, Ann Arbor High School."

"ANN ARBOR HIGH SCHOOL,
"ANN ARBOR, Mich., May 17, 1892.
"The Planisphere by Prof. Harrington is an exceedingly convenient map of the stars, including the positions of the planets.
"It is always ready for use and is easily read. Some such chart of the heavens is indispensable in reading much of the best literature extant, especially sacred and classic literature. I shall recommend the Planisphere to our classes in the Æneid.
"W. S. PERRY, Supt. Public Instruction."

Æsthetics; Its Problems and Literature.

By FRED N. SCOTT, Assistant Professor of Rhetoric in the University of Michigan. Paper, 40 pages; price, 25 cents.

An exceptionally valuable reference book for people interested in the subject of Æsthetics.

The Principles of Style; Topics and References, with a Prefatory Essay.

By FRED N. SCOTT, Assistant Professor of Rhetoric in the University of Michigan. (Interleaved.) Paper, price 75 cents.

Paragraph Writing, with Appendices on Newspaper "Style" and Proof Reading.

By FRED N. SCOTT, Assistant Professor of Rhetoric in the University of Michigan, and JOSEPH V. DENNEY, Associate Professor of Rhetoric in the University of Ohio. Paper, price 50 cents.

A Text-Book of General Descriptive Chemistry.

By PAUL C. FREER, Ph.D., Professor of General Chemistry and Director of the Laboratory of General Chemistry in the University of Michigan. (In press; will be ready July 1.) Cloth, price $3.00.

This work is designed as a text-book for colleges, and as a reference book in high schools. The instruction in General Chemistry in the University of Michigan will, in the future, be planned in conformity with the method adopted in this book. It is intended to fill the vacant space between the small elementary volumes and the voluminous advanced text-books or manuals now in use.

In preparing the work, the author has endeavored to present the science of chemistry, not as a series of disjointed facts to be laboriously memorized, but rather as an organized entity, the various parts of which are interdependent. With this end in view, the descriptive portion of the work has been reduced to the smallest practicable size, in order to make room for that part which is more theoretic in its character, although all data necessary for the identification and study of the more important chemical compounds have been introduced. In an appendix will be found a number of laboratory notes. All of the methods detailed in these have been verified by the author's own experience. The book is embellished by a large number of new and fine engravings. In preparing these, care has been taken only to illustrate perfectly practical apparatus.

Select Methods in Quantitative Analysis.

By B. W. Cheever, A.M., M.D., University of Michigan. Cloth, price $2.00.

Practical Astronomy.

By W. W. CAMPBELL, Astronomer in Lick Observatory, Mt. Hamilton, Cal.; formerly Instructor in Astronomy in the University of Michigan. Cloth, 168 pages; price, $1.50; also bound in leather for field use, price, $2.00.

"LICK OBSERVATORY, UNIVERSITY OF CALIFORNIA,
"MOUNT HAMILTON, Cal., April 21, 1892.
"I have carefully examined Prof. Campbell's Handbook of Practical Astronomy and I regard it as an admirable text-book for University and Engineering students. There has long been a need for just such a treatise which should be complete in itself, and which should also serve as an introduction to more elaborate works; and the Handbook precisely meets the want. A student who has mastered it will find himself admirably prepared to go further and he will have nothing to unlearn. If his theoretical work stops with this book he will yet have a mastery of all the practical parts of Astronomy which are necessary to the Engineer.
"I am very truly yours, EDWARD S. HOLDEN,
"Director of the Lick Observatory."

Logarithmic and Other Mathematical Tables.

By WILLIAM J. HUSSEY, Sometime Assistant in the Nautical Almanac Office; Acting Director of the Observatory at Ann Arbor, and Instructor in Astronomy in the University of Michigan; Assistant Professor of Astronomy (elect) in the Leland Stanford Junior University, Palo Alto, California. Second edition revised and enlarged. Cloth, 158 pages, price $1.00.

"OHIO UNIVERSITY, ATHENS, Ohio, Nov. 7, 1891.
"Prof. W. J. Hussey. My Dear Sir: The copy of your Tables kindly sent me has just been received.
"I like the whole collection so much that I shall use them in my classes. You are to be specially praised for the convenient arrangement you have succeeded in making. It is just what is needed.
"I shall recommend your Tables wherever I have opportunity. Yours truly,
"WILLIAM HOOVER, Prof. of Mathematics."

"ANN ARBOR, Mich., May 11, 1892.
"I have examined carefully Prof. W. J. Hussey's 'Logarithmic and other Mathematical Tables,' and desire to say that I am much pleased with them. The general arrangement, in connection with the admirable auxiliary tables of proportional parts on the margins of the pages, greatly facilitate rapid and accurate computation. I recommend them to my students in Trigonometry and Algebra in preference to all other tables with which I am now familiar. Very truly, L. D. WINES,
"Instructor in Higher Mathematics in the Ann Arbor High School."

The Theory of Substitutions and its Applications to Algebra.

By Dr. EUGEN NETTO, Professor of Mathematics in the University of Giessen. Revised by the Author, and Translated from the German, with his permission, by F. N. Cole, Assistant Professor of Mathematics in the University of Michigan. Cloth, 301 pages; price, $3.00.

The Nation, May 12, 1892—"Every mathematician who proposes to carry his studies beyond the college curriculum will be glad to learn that Prof. F. N. Cole has published a translation of Netto's well-known 'Theory of Substitutions.' If not a great classic it is a standard treatise; and the student who is not thoroughly familiar with its contents (which can nowhere else be so conveniently mastered) will find himself put to a serious inconvenience in reading many a recent German memoir. The present edition has been extensively revised and altered by the author, so that it is better than the German original—not to speak of the comfort of reading mathematics in our clear and concise language."

The Mathematical Theories of Planetary Motions.

By Dr. OTTO DZIOBEK, Privatdocent at the Royal Technical High School of Berlin—Charlottenburg; Translated from the German by Mark W. Harrington, Chief of the United States Weather Bureau; late Professor of Astronomy in the University of Michigan. Translation revised by the author. (In press; will be ready July 1.) Cloth, price, $3.50.

History of the University of Michigan.

By E. M. FARRAND. Cloth, 300 pages; price, $1.00.

"Miss Farrand's volume gives an excellent idea of life and work in the University."—*R. C. Davis, Librarian University of Michigan.*

Any of the above books will be sent postpaid on receipt of price by the Publishers,

WILLIAM R. JENKINS

851-853 6e AVENUE, NEW YORK coin de 48e rue.

Catalogue envoyé franco sur demande.

Educational.

CONNECTICUT, Greenwich.

ACADEMY AND HOME FOR TEN Boys.—67th year of Academy, 13th of Home. Preparation for College or Business. Absolutely healthful location and genuine home, with refined surroundings.
Gymnasium. References required.
J. H. ROOT, Principal.

CONNECTICUT, Pomfret Centre.

THE MISSES VINTON'S SCHOOL for Girls will reopen Wednesday, October 7. Number limited.

CONNECTICUT, Waterbury.

ST. MARGARET'S DIOCESAN School.—Advent term, eighteenth year, opens Sept. 21, 1892. The Rev. Francis T. Russell, M.A., Rector. Miss Mary R. Hillard, Principal.

DELAWARE, Wilmington, Franklin Street.

THE MISSES HEBB'S ENGLISH, French, and German Boarding and Day School for young ladies and girls reopens Sept. 22, 1891.

KENTUCKY, Shelbyville.

SCIENCE HILL, AN ENGLISH AND Classical School for Girls. Oldest in the South. First-class in all its appointments. Prepares for Wellesley. W. T. POYNTER.

MARYLAND, Annapolis.

ST. JOHN'S COLLEGE—103d Session commences Sept. 16. Eight Departments. Buildings heated by steam. Excellent Preparatory School attached. Terms moderate. Special rates and scholarships for sons of the clergy. For Catalogue address the President. THOMAS FELL, LL.D., Ph.D.

MARYLAND, Baltimore, 1214 Eutaw Place.

MISS RANDOLPH'S SCHOOL, LO- cated in the most beautiful part of the city, opens Sept. 21, with a very able corps of teachers. Students prepared for college. Principal, Mrs. A. L. Armstrong.

MARYLAND, Baltimore, 122-124 West Franklin St

THE EDGEWORTH BOARDING AND Day School for Girls, Mrs. H. P. LEFEBVRE, Principal. 30th year. Reopens Thursday, Sept. 22, 1892.

MARYLAND, Catonsville,

ST TIMOTHY S FRENCH, GERMAN, and English Boarding School for Young Ladies reopens September 22, 1892. Principals—
Miss M. C. CARTER and Miss S. R. CARTER.

MASSACHUSETTS, Amherst.

MRS. W F. STEARNS'S HOME School for Young Ladies reopens September 21, 1892.

MASSACHUSETTS, Boston, 593 Boylston Street.

CHAUNCY HALL SCHOOL (64th Year), For Boys and Girls.—Preparation for the Mass. Institute of Technology is a specialty. Reference is made to the Institute Faculty. The location of the school building, on Copley Square, is especially attractive and is very near the Institute.
Preparation also for College (with or without Greek) and for business. Special students received.

MASSACHUSETTS, Boston, 17 Blagden Street.

MISS CLAGETT'S BOARDING AND Day School for Girls reopens Oct. 3. Pupils prepared for college. References: the Rt. Rev. Phillips Brooks, Boston; Mrs. Louis Agassiz, Cambridge; Gen. F. A. Walker, Pres. Inst. of Technology, Boston.

MASSACHUSETTS, Boston.

BOSTON UNIVERSITY Law School. Address the Dean.
EDMUND H. BENNETT, LL.D.

MASSACHUSETTS, Cambridge, Larch Street.

HOME FOR BOYS—DR. ABBOT AD- mits not more than four boys into his family, to fit for college or educate privately. Separate tuition, with best of care in all respects. Charming location, with fine tennis court. F. E. ABBOT, Ph.D.

MASSACHUSETTS, Cambridge, 8 Garden St.

THE BROWNE AND NICHOLS School for Boys.—Tenth year opens Sept. 28. Admission examinations June 25, Sept. 27. Four boys received for summer work at Land's End, Rockport, Mass. Send for circular.

MASSACHUSETTS, Cambridge, 20 Mason Street.

THE CAMBRIDGE SCHOOL. (Private—for Girls.)

MASSACHUSETTS, Cambridge, 5 Hilliard St.

J. H. LEE TUTOR FOR HARVARD. —Two students received for the summer at Canandaigua Lake, N. Y.

MASSACHUSETTS, Concord.

CONCORD HOME SCHOOL.—25 BOYS prepared for college, scientific school, or business. All the advantages of family life combined with best mental and physical training. Buildings new and according to latest models. 75 acres of ground.
JAMES S. GARLAND, Master.

MASSACHUSETTS, Duxbury.

POWDER POINT SCHOOL—PRE- pares for Mass. Inst. of Tech., Hauvard, or Business. Laboratories. Individual teaching. The 22 boys are members of the family. Elementary classes for young boys. F. B. KNAPP, S. B.

MASSACHUSETTS, Greenfield.

PROSPECT HILL SCHOOL FOR GIRLS. —Twenty-third Year. Prepares for College. Also Science, Art, and Music.
JAMES C. PARSONS, Principal.

MASSACHUSETTS, Lexington.

H. E. HOLT'S NORMAL MUSIC School and Institute of Vocal Harmony. For teachers of vocal music. Ninth annual session from Aug. 2d to 20th. Send for circulars. Address
Mrs. H. E. HOLT, Sec.

MASSACHUSETTS, Lowell.

ROGERS HALL SCHOOL.—PRE- pares for Bryn Mawr, Smith, Wellesley, and Vassar. ELIZA P. UNDERHILL, Principal.

MASSACHUSETTS, Plymouth.

MR. KNAPP'S HOME SCHOOL FOR Boys.—12 boys; 25th year. H. B. LEARNED (Harv.), Head Master; H. W. ROYAL (Harv.), Asst. Master. Mrs. KNAPP, Prin.

MASSACHUSETTS, Quincy.

ADAMS ACADEMY — BOARDING and Preparatory School for Boys. Second term now in progress. For all particulars address
WILLIAM EVERETT, Ph.D.

MASSACHUSETTS, South Hadley.

MOUNT HOLYOKE SEMINARY and College offers College Courses with degrees, and Seminary Course with diploma. Laboratories, Cabinets, Art Gallery, Library. 56th year opens Sept. 15, 1892. Board and tuition $200 a year.
Mrs. E. S. MEAD, Prest.

MASSACHUSETTS, Springfield.

MR AND MRS. JOHN McDUFFIE'S School for Girls. Formerly Miss Howard's.

MASSACHUSETTS, Worcester.

THE HIGHLAND MILITARY ACA- DEMY. 37th year. Classical, Scientific, Business, Preparatory Depts. Gymnasium. Strict discipline. Home care. J. A. SHAW, A.M., Head Master.

MASSACHUSETTS, Worcester.

MRS. THROOP'S SCHOOL FOR Young Ladies and Children.—College Preparatory or Special Courses. Reopens Sept. 28, 1892.

MASSACHUSETTS, Worcester.

JOHN W. DALZELL'S PRIVATE School for boys, 66 West St.—Prepares for College or Scientific School. Send for Catalogue.

MICHIGAN, Orchard Lake.

MICHIGAN MILITARY ACADEMY. —A thoroughly equipped College Preparatory School, abreast of the most progressive Eastern Academies.
Catalogue sent upon application.

MINNESOTA, Faribault.

ST. MARY'S HALL—TWENTY-SE- venth year opens Sept. 15, 1892. Terms $350 per year. Rt. Rev. H. P. WHIPPLE, D.D., LL.D., Rector; Miss ELLA F. LAWRENCE, Principal. No extra charge for French or German. Thirteen experienced Professors and Teachers. Two efficient Matrons. For admission address St. Mary's Hall.

NEW JERSEY, Bridgeton.

SEVEN GABLES.
Mrs. Westcott's boarding school for young ladies.
Gymnasium—Military Drill.

NEW JERSEY, Morristown.

ST. HILDA'S SCHOOL.—SUMMER Session begins July 1. Terms from $60 to $75. SCHOOL YEAR begins Sept. 26. Circulars on application.

NEW JERSEY, Mount Holly.

MOUNT HOLLY ACADEMY FOR Boys.—Special Summer Session begins June 13. Circulars. Rev. J. J. COALE, A.M. (Princeton), Prin.

NEW JERSEY, Trenton.

DUPUY SCHOOL FOR BOYS.—A school for boys backward in their studies. Terms, $500. No extras. Only six boarding pupils.
EDWARD D. MONTANYE, Master.

NEW YORK, Albany.

ST. AGNES SCHOOL.—UNDER THE direction of Bishop Doane. 22d year. Full courses of study from Kindergarten through Harvard course for Women. 36 instructors. For Catalogue, address St. Agnes School.

NEW YORK, Long Island, Garden City.

ST. PAUL'S SCHOOL — PREPARES for the best Colleges, Scientific Schools, and Business. Fifteen masters. Thoroughly equipped laboratories and gymnasium. Military drill under U. S. Army Officer CHARLES STURTEVANT MOORE, A.B (Harv.), Head Master.

NEW YORK, Geneva.

DELANCEY SCHOOL FOR GIRLS.— For circulars address Miss M. S. SMART, Prin.

NEW YORK, Manlius.

ST. JOHN'S MILITARY SCHOOL.— Civil Engineering, Classical, Commercial, Special, and Preparatory Courses. Under Visitation of War Department and Regents of University of N. Y. Summer session begins June 20. Regular session Sept. 15. Rt. Rev. F. D. HUNTINGTON, Prest.
Lt.-Col. WM. VERBECK, Supt.

NEW YORK CITY, 109 West 54th St.

WORKINGMAN'S SCHOOL U R W. of the Society for Ethical Culture.—A limited number of pay pupils will be taken; tuition fee $60 and $100. Course of instruction: All the usual English branches, Manual Training, Freehand Drawing and Modelling, Science teaching German, Vocal Music, and Gymnastics in all classes. Full graded course, including Kindergarten. In the Normal Training Department for Kindergarteners, students will receive regular instruction in Psychology, History of Education, Art, Vocal Music, and Science, in addition to the training in Kindergarten methods proper; the full course covers two years. School opens Sept. 12. Applications received now at the school. ☞ M. P. E. GROSZMANN, Superintendent.

Educational.

NEW YORK CITY, 6 West 48th Street.

MISS SPENCE'S BOARDING AND Day School for Girls. Primary, Academic, and College Preparatory Courses. Special students admitted. No more than eight pupils constitute any class.

NEW YORK CITY, Riverside Drive, 85th and 86th Streets.

THE MISSES ELY'S SCHOOL FOR Girls.—(Formerly of Columbia Heights, Brooklyn.)

NEW YORK CITY, 32 and 34 East 57th St.

MISS PEEBLES AND MISS THOMPSON'S Boarding and Day School for Girls reopens Thursday, October 6, 1892.

NEW YORK CITY, 55 West 47th St.

MISS GIBBONS' SCHOOL FOR GIRLS, SARAH H. EMERSON, Principal, will reopen September 28. A few boarding pupils taken.

NEW YORK, Kingston-on-Hudson.

GOLDEN HILL PREPARATORY School for Boys. JOHN M. CROSS, A.M., Principal.

NEW YORK, Niagara Falls, Suspension Bridge.

DE VEAUX.—A PROGRESSIVE School under the military system. A fitting school for boys. Well equipped, well endowed; fine grounds, $400 a year.
REGINALD HEBER COE, President.

NEW YORK, Tarrytown-on-Hudson.

IRVING INSTITUTE.—PREPARES for College or Business. Summer session June 19. Reopens Sept. 14; 38th year. Principal, J. M. FURMAN.

NEW YORK, Tivoli-on-Hudson.

TRINITY SCHOOL—LOCATION and surroundings unsurpassed. Equipment complete. Gymnasium, drill hall, bowling alleys, etc. Thorough preparation for college, scientific schools, or business. JAMES STARR CLARK, D.D., Rector.

NORTH CAROLINA, Asheville.

BINGHAM SCHOOL—ESTABLISHED in 1793.—Maj. R. Bingham, A.M., LL.D., Supt. Lieut. John Little, U.S.A., Prof. Military Science and Tactics.
"Bingham School stands preëminent among Southern Schools for boys, and ranks with the best in the Union."—*United States Bureau of Education.*

OHIO, Cincinnati, Lawrence and Third Streets.

BARTHOLOMEW ENGLISH AND Classical Home and Day School for Young Ladies. Thorough Courses in Ancient and Modern languages, Science and Mathematics. Certificate admits to College. G. K. BARTHOLOMEW, Ph.D.

OHIO, Cincinnati.

MISS ARMSTRONG'S SCHOOL FOR Girls, Liddesdale Place, Avondale. Family limited. Circulars sent on application.

OHIO, Cleveland.

COLLEGE FOR WOMEN OF WESTern Reserve University possesses the best facilities and conditions for higher education. Information gladly given. President CHARLES F. THWING.

PENNSYLVANIA, Bryn Mawr, 10 miles from Philada.

BRYN MAWR COLLEGE, A COLLEGE for Women, offers graduate and undergraduate courses in Sanskrit, Greek, Latin, Mathematics, English, Anglo-Saxon, French, Old French, Italian, Spanish, German, including Gothic and Old High German, Celtic, Hebrew, History, Political Science, Physics, Chemistry, Biology, and lectures on Philosophy. Gymnasium, with Dr. Sargent's apparatus complete. Fellowships (value $500) in Greek, English, Latin, Mathematics, History, and Biology. For Program, address as above.

PENNSYLVANIA, Bryn Mawr.

MISS BALDWIN'S DAY, BOARDing, and College Preparatory School for Girls reopens Sept. 28. For circular address
Miss FLORENCE BALDWIN.

PENNSYLVANIA, Philadelphia, Germantown, 202, 204, 335 W. Chelten Ave.

MISS MARY E. STEVENS' BOARDing and Day School.—24th year. "Approved" by Bryn Mawr College. The Bryn Mawr entrance examinations are held in the school by an examiner from the college. School certificate admits to Vassar.

PENNSYLVANIA, Philadelphia, Germantown.

GERMANTOWN ACADEMY.—ESTablished 1760. Eight boarding pupils taken.
WM. KERSHAW, Ph.D.

PENNSYLVANIA, Philadelphia, 1350 Pine St.

MISS ANABLE'S English, French, and German Boarding and Day School. 44th year.

PENNSYLVANIA, Ogontz.

CHELTENHAM MILITARY ACADEmy.—On the summit of the Chelten Hills, near Philadelphia, Bound Brook route to New York. Commodious buildings and extensive grounds. Attendance limited to 60 boys. $550 per year: no extras.
JOHN CALVIN RICE, A.M., Principal.

PENNSYLVANIA, Philadelphia, Chestnut Hill.

MRS. COMEGYS AND MISS BELL'S English, French, and German Boarding-School for young ladies reopens Sept. 28, 1891.
Students prepared for college. Ample grounds for outdoor exercise.

VIRGINIA, Abingdon.

MARTHA WASHINGTON COLLEGE and Conservatory of Music.—Next session opens Sept. 8, 1892. Send for Catalogue.
Rev. S. N. BARKER, Pres.

Educational.

PRINCETON SUMMER SCHOOL.—A summer school for conditioned men and for men preparing for college examinations in September will open at Princeton, N. J., Aug. 1st, 1892. For information, address G. McF. GALT, Secretary Princeton Preparatory School.

THE BOSTON SCHOOL OF ORATORY. —The Leading School of Expression in America. First to teach the system of Delsarte. Send for catalogue. MOSES TRUE BROWN, M.A., Boston, Mass.

Teachers, etc.

A THOROUGHLY EDUCATED MUsician, Harvard graduate, pupil of best American teachers, now in Munich under Rheinberger, wishes a position next season as director of music in a college, coeducational preferred. Piano, organ, rudiments of singing, all branches of musical theory, chorus training. Five years' experience; good references. Address "MUSICA,"
Care John J. Henry, 115 Federal St., Boston.

BOYS COACHED FOR COLLEGE, AT Mont Vernon, the Bethlehem of southern New Hampshire, fifty miles from Boston. A limited number of boys, during the months of June, July, and August, will be prepared for the autumn examinations. Address JOHN B. WELCH, A.M., Principal McCollom Institute, Mont Vernon, N. H.

A LADY GRADUATE OF CORNELL University, of five years' experience in teaching, desires summer employment. Will do tutoring or act as governess. Mathematics a specialty, but can do general teaching. References given. Address
"CORNELL," care of *Nation.*

A CLERGYMAN LIVING IN A PLEAsant suburb of Boston, assisted by two Harvard students of high rank, wishes to receive into his home two or more young gentlemen to prepare for the September examination. Tennis, canoeing, baseball. Address J. K. W., 25 Beacon Street, Boston.

A GRADUATE STUDENT (YALE) of experience in tutoring would tutor for the summer. Recommended by Prof. H. P. Wright, Dean of Yale University. Address C. C. BUSHNELL, 38 S. M., Yale, New Haven, Conn.

[*Educational continued on page v.*]

Some of Ginn & Co.'s New Books.

ANABASIS DICTIONARY.

Illustrated Dictionary to Xenophon's Anabasis, with groups of words etymologically arranged. By JOHN WILLIAMS WHITE, Professor of Greek, and MORRIS H. MORGAN, Assistant Professor of Greek and Latin, Harvard University. Price, $1.35.

This Dictionary has also been issued bound with Goodwin & White's Anabasis and notes, and has received the highest praise of scholars and teachers.

JOHN TETLOW, *Headmaster Girls' High and Latin Schools, Boston:* "I have examined it with steadily increasing interest and satisfaction. It has been a surprise and a delight to me to find it so rich in illustrative and illuminating material of every sort. If all special vocabularies were like this, there could be and would be no question as to their title to supersede the lexicon as a speedy and trustworthy guide to the full interpretation of an author's meaning."

HARVARD STUDIES IN CLASSICAL PHILOLOGY.

VOLUME III.

Edited by a Committee of the Classical Instructors of Harvard University. Price, $1.50.

CONTENTS: The Date of Cylon—By John Henry Wright. Catullus and the Phaselus of his Fourth Poem—By Clement Lawrence Smith. On the Homeric Caesura and the Close of the Verse as related to the Expression of Thought—By Thomas D. Seymour. On the Notion of Virtue in the Dialogues of Plato, with particular reference to those of the First Period and to the Third and Fourth Books of the Republic—By William A. Hammond. Notes.

A PRIMER OF ENGLISH VERSE.

Chiefly in its Æsthetic and Organic Character. By HIRAM CORSON, LL.D., Professor of English Literature in Cornell University. Price, $1.10.

Designed to introduce the student to the æsthetic and organic character of English verse—to cultivate his susceptibility to verse as an inseparable part of poetic expression.

O. F. EMERSON, *Professor of English, Cornell University:* "It is a great addition to all previous books on Poetics, and it introduces to a wholly new field. Prof. Corson has stated better than any one else the real power of poetry, and this book should, for that reason, be in the hands of general readers as well as teachers of literature."

BUSINESS BOOK-KEEPING.

HIGH SCHOOL EDITION.

Including Single and Double Entry. By GEORGE E. GAY, Principal of High School, Malden, Mass. Illustrated. Price, $1.55.

The distinctive feature of this work is indicated by its title. It is based upon business methods aud prepares for business work. The Grammar School Edition, comprising Single Entry only, is ready.

C. A. & F. H. BURDETT, *Principals Burdett Business College, Boston, Mass.:* "We have examined it thoroughly and find it a most practical work, the subjects all following in natural sequence. Mr. Gay has the happy faculty, as well as the practical knowledge, of presenting modern book-keeping in a great variety of transactions and current forms."

LANGUAGE LESSONS AND GRAMMAR LESSONS.

Hints for Language Lessons and Plans for Grammar Lessons. By Dr. J. A. MACCABE, Principal of Government Normal School, Ottawa, Canada. Price, 35 cents.

This is a book with a very practical and direct purpose, and, though small, will be found of great value.

Sent by mail, postpaid, on receipt of the prices given above.

Popular Studies of Nineteenth Century Poets.

By J. MARSHALL MATHER. In 12mo, cloth, $1.00.

*** Simple studies on Wordsworth, Shelley, Coleridge, Byron, Hood, Tennyson, and Browning, tending to create a wider interest in the poet and his works.

Now ready in 12mo, cloth, $1.00.

John Ruskin; His Life and Teaching.

By J. MARSHALL MATHER. *Third edition, revised.*

This volume is not a criticism, but simply an outline of Ruskin's life and teaching, intended for those who purpose a careful study of his works.

"Mr. Mather's book, with its careful and sympathetic analysis of Ruskin's works, and its clear and concise exposition of his philosophy of art, education, and life, is a volume of the most helpful sort."—*The Dial.*

In the "Cavendish Library," in one volume, crown 8vo, cloth, gilt top, $1.50.

Leigh Hunt as Poet and Essayist.

Being the choicest passages from his works, selected and edited, with a biographical introduction, by CHARLES KENT.

"In the charming grace and learning of his essays, Leigh Hunt occupies a sunny spot midway between Addison and Lang. No writer of his day was more steeped in ancient and modern lore."—*The Critic.*

In the Chandos Classics. 12mo, blue linen, white title label, 75 cents; or Roxburghe style, cloth, gilt top, $1.00.

Horace: The Odes, Epodes, Satires, and Epistles.

Translated by the most eminent scholars and poets, including Ben Jonson, Milton, Dryden, Lytton, Conington, Sir Theodore Martin, and others.

"Delightful Horace! Full of wit and genius, of an amiable nature, of a cheerful and contented temper, what wonder that succeeding generations have delighted to keep fresh his memory."—*Public Opinion.*

Deer Park and Oakland

ON THE CREST OF THE ALLEGHANIES,

3,000 Feet Above Tide-Water.

SEASON OPENS JUNE 22, 1892.

JUNE 22, 1892.

These famous mountain resorts, situated at the summit of the Alleghanies, and directly upon the main line of the Baltimore and Ohio Railroad, have the advantage of its splendid vestibuled express-train service both east and west, and are therefore readily accessible from all parts of the country. All Baltimore and Ohio trains stop at Deer Park and Oakland during the season.

Electric lights have been introduced throughout the houses and grounds; Turkish and Russian baths and large swimming pools provided for ladies and gentlemen; suitable grounds for lawn-tennis; bowling-alleys and billiard-rooms are here; fine riding and driving-horses, carriages, mountain-wagons, tally-ho coaches, etc., are kept for hire; in short, all the necessary adjuncts for the comfort, health, or pleasure of patrons.

Rates, $60, $75, and $90 a month, according to location

ALL COMMUNICATIONS should be addressed to GEORGE De SHIELDS, Manager Baltimore and Ohio Hotels, Cumberland, Md., up to June 10, after that date, either Deer Park or Oakland, Garrett County, Md.

ETHNOLOGY IN FOLK-LORE.

By GEORGE LAWRENCE GOMME, F.S.A., President of the Folklore Society, etc. The fourth volume in the Modern Science Series, edited by Sir John Lubbock, Bart., F.R.S. 12mo. Cloth, $1.00.

This book is an attempt to ascertain and set forth the principles upon which folklore may be classified, in order to arrive at some of the results which should follow its study, giving the subject the importance it deserves in connection with researches in ethnology.

"The value of folklore as a record of social development has been, to a certain extent, recognized by scholars, but Mr. Gomme is the first to attempt a systematic investigation of the ethnological elements that in his hands are sources of rather astonishing results."—*Boston Beacon.*

Part VI. of Volume III. now ready.

A TREATISE ON CHEMISTRY.

By Sir H. E. ROSCOE, F.R.S., and C. SCH[illegible]EMMER, F.R.S., Professor of Chemistry in the Victoria University, Owens College, M[illegible]ter. 8vo. Cloth, $3.00.

The previously published parts of this import[illegible]k are: Vol. I., Non-Metallic Elements, $5.00; Vol. II., Metals, in two parts, $6.00: Vol. III., The C[illegible]y of the Hydrocarbons and their Derivatives, in five parts, $22.00. The present issue (Part VI.) co[illegible]he subject of Volume III.

"One of the best treatises in our language."—*Iron.*

"It is difficult to praise too highly the selection of mate[illegible]d their arrangement, or the wealth of illustrations which explain and adorn the text."—*London Aca[illegible]*

Public Library 1st 97 393

NEW EDITION—FOURTEENTH Y[illegible]

APPLETONS' DICTIONARY OF NEW YORK AND ITS VICINITY.

An Alphabetically Arranged Index to all Places, Societies, Institutions, Amusements, etc. With Maps and Illustrations. Revised annually. 16mo. Paper, 30 cents; flexible cloth, 60 cents.

"One could scarcely find the facts he would desire to know more tersely and clearly given."—*Chicago Inter-Ocean.*

"Needs no fresh praise."—*N. Y. Evening Post.*

"One of the most useful, compact, *multum in parvo* volumes that can be imagined."—*Boston Commercial Bulletin.*

MEN, MINES, AND ANIMALS IN SOUTH AFRICA.

By Lord RANDOLPH S. CHURCHILL. With Portrait, Sixty-five Illustrations, and a Map. 8vo, 337 pages. Cloth, $5.00.

"The subject matter of the book is of unsurpassed interest to all who either travel in new countries, to see for themselves the new civilizations, or follow closely the experiences of such travellers. And Lord Randolph's eccentricities are by no means such as to make his own reports of what he saw in the new States of South Africa any the less interesting than his active eyes and his vigorous pen naturally make them."—*Brooklyn Eagle.*

"Lord Randolph Churchill's pages are full of diversified adventures and experience, from any part of which interesting extracts could be collected. . . . A thoroughly attractive book."—*London Telegraph.*

"Provided with amusing illustrations, which always fall short of caricature, but perpetually suggest mirthful entertainment."—*Philadelphia Ledger.*

"The work is not only interesting, but highly instructive, and contains a large amount of most valuable information."—*New York Journal of Commerce.*

A QUEEN OF CURDS AND CREAM.

By DOROTHEA GERARD, author of 'Orthodox,' etc., and joint author of 'A Sensitive Plant' and 'Reata.' No. 94, Town and Country Library. 12mo. Paper, 50 cents; cloth, $1.00.

"The dramatic interest of 'Orthodox' reaches a really magnificent climax."—*London Academy.*

"A 'Sensitive Plant' is one of the most interesting novels that have appeared for some time. . . . A charming story that at once wins the reader's attention."—*Boston Traveller.*

THE CHRONICLES OF MR. BILL WILLIAMS.

(Dukesborough Tales.) By RICHARD MALCOLM JOHNSTON, author of 'Widow Guthrie,' 'The Primes and Their Neighbors,' etc. No. 93, Town and Country Library. 12mo. Paper, 50 cents; cloth, with Portrait of the Author, $1.00.

"A new and revised edition of Richard Malcolm Johnston's 'Dukesborough Tales' is to be published soon by D. Appleton & Co. Those who delight in the Colonel's homely and winning stories of Georgia life will be glad to know that Mr. Bill Williams, the quaintest of his characters, is to be the hero of the collection. The six 'Tales' which most brightly present Mr. Bill to an admiring world will fill the volume."—*New York Tribune.*

"A delightful originality characterizes these stories, which may take a high rank in our native fiction that depicts the various phases of the national life. Their humor is equally genuine and keen, and their pathos is delicate and searching."—*Boston Saturday Evening Gazette.*

For sale by all booksellers; or will be sent by mail on receipt of price by the publishers.

D. APPLETON & CO., 1, 3, and 5 Bond St., New York.

SCHERMERHORN'S TEACHERS' Agency. Oldest and best known in U. S. Established 1855. 3 East 14th St., N. Y.

[*Educational continued on page v.*]

MACMILLAN & CO.'S NEW BOOKS.

Published June 14. Third Edition, Revised and Corrected Throughout. 5 vols., 8vo, $20.00.

THE DIALOGUES OF PLATO.

Translated into English, with Analyses and Introductions,

By B. JOWETT, M.A.

Master of Balliol College, Regius Professor of Greek in the University of Oxford, Doctor of Theology of the University of Leyden, LL.D. of the Universities of Edinburgh and Cambridge.

In five volumes. Revised and Corrected Throughout. With Marginal Analyses and other additions, and an Index of Subjects and Proper Names. Third Edition. 8vo, cloth, gilt top, $20.00.

THE LIFE AND LETTERS of CHARLES SAMUEL KEENE of "Punch,"

By GEORGE SOMES LAYARD. With Portrait and numerous reproductions of the artist's Sketches. Royal 8vo, $8.00.

Fourth Edition. Now Ready in 1 vol., Cloth, $1.00.

THE HISTORY OF DAVID GRIEVE.

By MRS. HUMPHRY WARD, author of "Robert Elsmere," etc., etc. Fourth edition. In one volume, 12mo, cloth, gilt, $1.00. Also the Library Edition, printed in larger type, on better paper. 2 vols., 12mo, cloth, in box, $3.00.

"Mrs. Ward with her 'Robert Elsmere' and 'David Grieve' has established with extraordinary rapidity an enduring reputation as one who has expressed what is deepest and most real in the thought of the time. . . . They are dramas of the time vitalized by the hopes, fears, doubts, and despairing struggles after higher ideals which are swaying the minds of men and women of this generation. . . . It is because every thoughtful man can recognize in David Grieve a living brother-man of his time and generation, of the common clay, and with the same restless, informing, and ennobling spirit, that the author writes with masterly power."—*New York Tribune.*

F. MARION CRAWFORD'S NEW NOVEL. THIRD EDITION. NOW READY. CLOTH, $1.00.

THE THREE FATES.

By F. MARION CRAWFORD, author of 'The Witch of Prague,' etc. 12mo, cloth, $1.00.

"We do not know of any one to-day who can make his men and women talk love more naïvely and sweetly than does Mr. Crawford. Tenderness and delicacy are at their best, and every now and then there are passages of true passion. 'The Three Fates' is a delightful bit of fiction—very elaborate as to facts, for there are many, well cut and polished—and we deem it among the cleverest romances of this season."—*N. Y. Times.*

Now Ready. In the new Uniform Edition of F. MARION CRAWFORD'S *Novels. Published monthly:*

A TALE OF A LONELY PARISH. 12mo, cloth, $1.00.

SARACINESCA. 12mo, cloth, $1.00.

Just Published. A New Book by Mr. WILLIAM WINTER.

SHADOWS OF THE STAGE.

By WILLIAM WINTER. Uniform with the new edition of 'Shakespeare's England.' 18mo, cloth, 75 cents.

BY THE SAME AUTHOR.

SHAKESPEARE'S ENGLAND.

A New and Revised Edition. 18mo, cloth, gilt, 75 cents.

"The book is delightful reading. . . . It is a delicious view of England which this poet takes. It is indeed the noble, hospitable, merry, romance-haunted England of our fathers—the England which we know of in song and story."—*Scribner's Monthly.*

GRAY DAYS AND GOLD. 18mo, cloth, 75 cents.

WANDERERS. 18mo, cloth, 75 cents.

A New Volume of Poems by RUDYARD KIPLING.

BALLADS AND BARRACK-ROOM BALLADS.

By RUDYARD KIPLING, author of 'Life's Handicap,' 'Plain Tales from the Hills,' etc. 12mo, cloth, $1.25.

"It is distinguished by other and higher qualities which we should not have expected from his prose, or the prose of any living English writer, they are so purely poetical, so admirable, so noble, so exquisite."—*Richard Henry Stoddard in the Mail and Express.*

Just Published. A New Novel. 12mo, cloth. $1.50.

CALMIRE.

12mo, cloth. $1.50.

"Of the ability of the work, of its learning, its audacity, its subtle dialectics, and its literary charm there can be no question. It wooes and delights, even where it does not convince."—*Philadelphia Bulletin.*

Now Ready. A New Book by Dr. DuBose, Professor of Exegesis in the University of the South.

THE SOTERIOLOGY OF THE NEW TESTAMENT.

By WILLIAM PORCHER DUBOSE, M.A., S.T.D., Professor of Exegesis in the University of the South. 12mo, $1.50.

LONGMANS, GREEN & CO.'S LIST.

PERSIA AND THE PERSIAN QUESTION.

By the Hon. GEORGE N. CURZON, M.P., author of 'Russia in Central Asia and the Anglo-Russian Question.'

With 9 Maps, 43 Plates, and 53 Illustrations in the text, 2 vols, 8vo., $12.00.

ST. JAMES'S GAZETTE.—"Mr. Curzon's Persia will at once rank as the standard work on the subject. . . . His statesmanlike impartiality and breadth of view are not less remarkable than his learning, his industry, and his lucid faculty of exposition and arrangement."

MORNING POST.—"Mr. Curzon's book is attractive both to the student of history and the politician; it furnishes plenty of lively reading, as well as an abundance of valuable information, and it may fairly be regarded as the standard work on a country whose future is inextricably bound up with that of our Indian Empire."

STANDARD.—"This work embodies all that is known, and nearly everything that is knowable about modern Persia. . . . It is full of the charm of sincere and circumstantial narration. . . . The illustrations alone would leave a lively image of life in the most Oriental of Oriental lands."

TIMES.—"The author is a charming travelling companion for any one who wishes not only to enjoy himself as a tourist, but also to be comprehensively instructed in the past history, present condition, and future prospects of the regions traversed. Certainly no one who has made the journey with such a guide will regret having undertaken it."

MEMOIRS OF THE VERNEY FAMILY

DURING THE CIVIL WAR.

Compiled from the Letters and illustrated by the Portraits at Claydon House, Bucks. By FRANCES PARTHENOPE VERNEY. With a Preface by S. R. GARDINER, M.A., LL.D. With 28 Plates (23 Portraits), Woodcuts, and Facsimile. 2 vols., medium 8vo, gilt top, $12.00.

"The present day and posterity will thank Lady Verney for having rescued from the wainscotted gallery at the top of the house the materials which give us a charming story, and which help to make some of the most thrilling years of England's national life as real and as present to us as if, like Faust, we were privileged to go back for centuries, and being of the present to live and move with the past."—*Daily News.*

GEOFFREY DE MANDEVILLE.

A Study of the Anarchy. By J. H. ROUND, M.A., author of 'The Early Life of Anne Boleyn; a Critical Essay.' With Facsimile of Charter Creating Geoffrey De Mandeville Earl of Essex. 8vo, pp. xii-461, gilt top, $5.00.

Mr. Round treats his subject with great learning and acumen."—*Times.*

ELISABETH FARNESE. "The Termagant of Spain."

By EDWARD ARMSTRONG, M.A., Fellow of Queen's College, Oxford. 8vo, pp. xxiv-415, $5.00.

SECRET SERVICE UNDER PITT.

By W. J. FITZPATRICK, F.S.A., Knight of St. Gregory the Great; Hon. Member of the Royal Academy of Arts, Dublin; M.R.I.A.; author of 'Correspondence of Daniel O'Connell, with Notices of his Life and Times,' 'Ireland before the Union,' &c. 8vo, $4.50.

"This book may be commended alike for its historical importance and for its intrinsic interest. . . . Mr. Fitzpatrick clears up some long-standing mysteries with great sagacity, and by means of his minute and profound knowledge of documents, persons, and events succeeds in illuminating some of the darkest passages in the history of Irish conspiracy, and of the treachery so constantly associated with it. On almost every page he throws an authentic and instructive light on the darker sides of the Irish history with which he is dealing."—*Times.*

ENGLAND AND ROME:

A History of the Relations between the Papacy and the English State and Church, from the Norman Conquest to the Revolution of 1688. By T. DUNBAR INGRAM, LL.D., Barrister-at-Law. 8vo. $4.50.

"There is much learning and historical research in Dr. T. DUNBAR INGRAM's 'England and Rome,' and the subject is full of interest."—*Times.*

"Gives a very clear and concise view of the relations between England and Rome, and it does this in a way that cannot fail to be both helpful and interesting to the student of history."—*Aberdeen Free Press.*

NEW BOOK BY H. RIDER HAGGARD.

NADA THE LILY.

(Copyright Edition.)

With 23 Illustrations by C. H. M. Kerr. Crown 8vo. By H. RIDER HAGGARD. $1.00.

"No more complete picture of savage life has ever been presented to the world. . . . There are scenes in this book which seem destined to be preserved when the time itself and the people are quite forgotten. Such is the story of the Great 'Ingomboco' when Chaka slays the false and lying wizards and witches. The discomfiture of the Prophets of Baal is not more full of wonder and of terror. . . . This is, to our mind, the best book, the most sustained, the most powerful, the truest book, that Mr. Rider Haggard has yet produced."—*Saturday Review.*

NEW BOOK BY F. ANSTEY.

THE TRAVELLING COMPANIONS.

A Story in Scenes (Reprinted from *Punch*). By F. ANSTEY, Author of "Vice Versa," &c. With 26 Illustrations by J. Bernard Partridge. Small 4to. $1.75.

For sale by all Booksellers. Sent on receipt of price by the Publishers,

LONGMANS, GREEN & CO., 15 East 16th St., New York.

TRAVEL

"A serial of which two volumes have been published, composed of reprints, either in full or abridged, of papers which have appeared in a variety of periodicals and books. The personal element gives a special flavor to this serial, and the editor has a keen scent for the interesting, as well as a good faculty for leaving out the superfluous. The English Lakes, Vallombrosa, the Engadine, Lake George, Quebec, the Black Forest, the Pyrenees, Heidelberg, the White Mountains, are among the subjects treated. The editor has annotated the text judiciously and sparingly."—*Atlantic Monthly.*

THE THIRD VOLUME

just published, contains 37 chapters, as follows:

MONT DORE, THE STELVIO, CAP D'ANTIBES, URBINO, ALONG THE SEINE, BIRKENFELD AND IDAR, THE EASTERN APENNINES, NIAGARA, RHINELAND, HEIDELBERG TO NÜRNBERG, LAGO MAGGIORE, LAKE OF LUGANO, LAKE OF COMO, LAKE GARDA, BERNER OBERLAND, TEUTOBERGER FOREST, ROCCABRUNA, LOCH MAREE, APPENZELL, ST. PAUL DU VAR, CHÂTEAUX OF TOURAINE, PYRÉNÉES, CAPRI, LOWER BRITTANY, CONSTANZ TO INNSBRÜCK, CHAMONIX TO VERNAYEZ, SUABIAN ALP, LANGUEDOC, RAMBLES ABOUT STUTTGART, AMALFI, CORSICA, IN ALSACE, MARTIGNY TO CHAMONIX, SIEBENGEBIRGE, INTERLAKEN TO AOSTA.

"A series of monographs, selected from periodicals, of recent and older date, and descriptive of places notable for natural beauty or historic event. Sixty-five of these sketches have now been bound into two neat volumes. With slight exception they all relate to European localities. The editor has shown good taste in the compilation, to which he has evidently given much time and thought. The papers are bright and entertaining, and characterized by that airiness of style and felicity of expression which lend to the descriptions and bits of adventure interspersed a peculiar charm, and make the volumes most delightful companions, either at the winter fireside, or by the summer sea. There is, of course, everything that is needed in the way of an index."—*Critic.*

Price per volume, bound in light gray cloth, $2.25.

The contents of the three volumes have also been arranged by countries in four Parts, bound in flexible cloth, price $1.25 per volume. The Parts ready are FRANCE, GERMANY, ITALY, and SWITZERLAND. The last-named contains the following chapters:

WENGERN ALP, BATHS OF LEUK, TIROL, LAKES OF BRIENZ AND THUN, TARASP, ENGELBERG, ZERMATT, LAKE OF ZURICH, SCHAFFLOCH, WIESEN, VAL MAGGIA, LAKE LEMAN, HEIDEN, LAKES OF SAVOIE, LOCARNO TO RHONE, HEADWATERS OF THE RHINE, STELVIO, BERNER OBERLAND, APPENZELL CONSTANCE TO INNSBRÜCK, CHAMONIX TO VERNAYEZ, MARTIGNY TO CHAMONIX, INTERLAKEN TO AOSTA, MEYRINGEN TO DOMO D'OSSOLA.

"This publication is not an easy one to describe, and is wholly beyond criticism. . . . These selections compose the two volumes before us. They are a museum of miscellanea, interesting to the traveller who is endowed with intellectual curiosity. The only drawback on their use en route is their miscellaneous character, a drawback which disappears when the journey is done and the well-seasoned traveller, at home by his family fireplace, wishes to refresh his memories, renew his experiences, or to add to his own personal discoveries. Readers of both classes will find this publication, especially as bound in a permanent form, an invaluable aid in bringing to their notice the best, freshest, and most interesting illustrations which have been published on the field of travel, whether at home or abroad."—*The Independent.*

HIGHER ENGLISH.
A Primer of English Verse. By
HIRAM CORSON, Professor of English Literature in Cornell University. 12mo, cloth, iv+232 pages. By mail, postpaid, $1.10.
The leading purpose of this volume is to introduce the student to the æsthetic and organic character of English Verse—to cultivate his susceptibility to verse as an inseparable part of poetic expression.
Edward S. Joynes, Professor in South Carolina College, Columbia: "I have examined the book with care and with pleasure. It is excellent—alike instructive for students and suggestive for the mature reader—is, indeed, in every way worthy of its distinguished author."

Ben Jonson's Timber. Schelling. 90 cents.
Sidney's Defense of Poesy. Cook. 90 cents.

READY THIS WEEK:
YOUNG PEOPLE'S SONG BOOK.
By CHARLES E. WHITING. A Music Reader for graded and ungraded schools, containing easy exercises in nine keys, to be practiced in connection with the study of the rudiments. The elements are so plain that the regular school-teacher can teach successfully without the assistance of a professional music-teacher. A great variety of one, two, three, and four-part songs, anthems, hymn tunes, patriotic songs, and old familiar songs are given.

MACMILLAN & Co.'s NEW BOOKS.

NOW READY: A NEW NOVEL

BY RUDYARD KIPLING AND WOLCOTT BALESTIER.

THE NAULAHKA.

A Story of West and East. With Rhymed Chapter Headings. 12mo, cloth, gilt, $1.50.

By RUDYARD KIPLING.

BALLADS AND BARRACK-ROOM BALLADS. 12mo, cloth, $1.25.

*** 'Ballads and Barrack-Room Ballads,' Mr. Kipling's new volume of verse, in addition to the poems contained in 'Barrack-Room Ballads,' also includes a number of ballads now published for the first time and not included in any other collection of Mr. Kipling's Poems. 'Ballads and Barrack-Room Ballads' is issued only with the imprint of Macmillan & Co.

PLAIN TALES FROM THE HILLS. New Edition. 12mo, cloth, $1.00.

LIFE'S HANDICAP. STORIES OF MINE OWN PEOPLE. 12mo, cloth, $1.00.

F. MARION CRAWFORD'S NEW NOVEL.

Third Edition. Now Ready. Cloth, $1.00.

THE THREE FATES.

By F. MARION CRAWFORD, author of 'The Witch of Prague,' etc. 12mo, cloth, $1.00.

"We do not know of any one to-day who can make his men and women talk love more naïvely and sweetly than does Mr. Crawford. Tenderness and delicacy are at their best, and every now and then there are passages of true passion. 'The Three Fates' is a delightful bit of fiction—very elaborate as to facts, for there are many, well cut and polished—and we deem it among the cleverest romances of this season."—*N. Y. Times.*

Fourth Edition. Now Ready in 1 vol., Cloth, $1.00.

THE HISTORY OF DAVID GRIEVE.

By MRS. HUMPHRY WARD, author of 'Robert Elsmere,' etc., etc. Fourth edition. In one volume, 12mo, cloth, gilt, $1.00. Also the Library Edition, printed in larger type, on better paper. 2 vols., 12mo, cloth, in box, $3.00.

"'Robert Elsmere' and 'David Grieve' are dramas of the time vitalized by the hopes, fears, doubts, and despairing struggles after higher ideals which are swaying the minds of men and women of this generation."—*New York Tribune.*

NEW BOOKS BY MR. WILLIAM WINTER.

SHADOWS OF THE STAGE.

By WILLIAM WINTER. Uniform with the new edition of 'Shakespeare's England.' 18mo, cloth, 75 cents.

BY THE SAME AUTHOR.

GRAY DAYS AND GOLD.

New and Revised Edition. 18mo, cloth, gilt, 75 cents.

"This book, which is intended as a companion to 'Shakespeare's England,' relates to the gray days of an American wanderer in the British Islands, and to the gold of thought and fancy that can be found there. Mr. Winter's graceful and meditative style in his English sketches has recommended his earlier volume upon (Shakespeare's) England to many readers, who will not need urging to make the acquaintance of this companion book, in which the traveller guides us through the quiet and romantic scenery of the mother country with a mingled affection and sentiment of which we have had no example since Irving's day."—*The Nation.*

SHAKESPEARE'S ENGLAND. A New and Revised Edition. 18mo, cloth, gilt, 75 cents.

WANDERERS. 18mo, cloth, 75 cents.

Just Published. A New Novel. 12mo, cloth. $1.50.

CALMIRE.

12mo, cloth. $1.50.

"It is a powerful piece of fiction; the greatest novel, in many respects, that has appeared within the decade. Read this book. For in it you will find all that can possibly be said against Christianity, in a popular way and without subtile indirection or cunning reserve. Moreover, as a mere love story, this novel has that charm of blended romance and realism, that captivating verisimilitude, and that nameless power to haunt one with its shame-tinged sorrow and happiness which testify unmistakably of genius."—*N. Y. Independent.*

THE LIFE AND LETTERS of CHARLES SAMUEL KEENE of "Punch."

By GEORGE SOMES LAYARD. With Portrait and numerous reproductions of the artist's sketches. Royal 8vo, $8.00.

THE AUTOBIOGRAPHY OF AN ENGLISH GAMEKEEPER

(JOHN WILKINS).

Edited by ARTHUR H. BYNG and STEPHEN M. STEPHENS. With Illustrations. 12mo, $2.00.

"The record of a simple outdoor life full of adventures and apt in knowledge of game, dogs, and so on, there is a fund of enjoyment in the 'Autobiography of an English Gamekeeper."—*R. H. Stoddard in the Mail and Express.*

ADVENTURE SERIES, NEW VOLUME.

MISSING FRIENDS.

Being the Adventures of a Danish Emigrant in Queensland, 1871–1880. With Illustrations, large 12mo, $1.50.

Just Published. Third Edition. 5 Vols., $20.00.

The Dialogues of Plato.

Translated into English. With Analysis and Introductions. By B. JOWETT, M.A. Third Edition. 5 vols., Revised and Corrected throughout. 8vo, gilt top, $20.00.

Just Published. With Maps. 8vo, $2.00.

The Barren Ground of Northern Canada.

By WARBURTON PIKE. With Maps. 8vo, cloth, $2.00.

The Livery Companies of the City of London.

Their origin, character, development, and social and political importance. By W. CAREW HAZLITT. With 2 colored Plates and numerous Illustrations. Super Royal 8vo, $10.50.

Lancaster and York.

A Century of English History, A. D. 1399–1485. By JAMES H. RAMSAY of Banff, Bart. With Maps and Illustrations. 8vo, 2 vols., $9.00.

Lancashire.

Brief Historical and Descriptive Notes. By LEO H. GRINDON, author of 'Manchester Flora,' 'Manchester Banks and Bankers.' 12mo. With many Illustrations. $2.00.

The Atlantic Ferry.

Its Ships, Men, and Working. By ARTHUR J. MAGINNIS, Member of the Institute of Naval Architects. Numerous Illustrations, Maps, and Plans. 12mo, $2.00.

Animal Coloration.

An account of the principal facts and theories relative to the Colours and Markings of Animals. By FRANK E. BEDDARD, M.A., F.R.S.E. Colored Plates and Woodcuts. 8vo, $3.50.

A New Book by Professor MASSON.

Edinburgh Sketches and Memories.

By DAVID MASSON, Professor of English Literature in the University of Edinburgh. 8vo, $3.75.

JERRY. By S. B. ELLIOT. $1.25.

"A really fresh, vigorous, and highly interesting story."—*N. Y. Tribune.*

HENRY HOLT & CO., N. Y.

The Aladdin Oven.

Invented by Edward Atkinson, LL.D., Ph.D.

It cooks the breakfast by night and the dinner by day. It bakes, roasts, simmers, stews, braises, and broils. With one quart of kerosene oil burned in a common round wick lamp, forty pounds of bread, meats, and vegetables can be perfectly cooked in three charges in eight hours; onions, custard, fish, and meat at the same time without taint or loss of flavor.

One testimonial says, "The cooking is perfect and the fuel-cost scarcely anything, while the ease and comfort of the cook give a calm, benign, religious tone to the temper, unattainable under the cook-stove reign."

"The Science of Nutrition and the Art of Cooking in the Aladdin Oven," by Edward Atkinson, is published by Clark W. Bryan & Co., Springfield, Mass. Price in cloth, 75 cents; in leatherette, 50 cents. Orders may be directed to them.

The Aladdin Ovens are manufactured by Kenrick Brothers, Brookline, Mass., Sole Agents. Catalogue and Price-List will be sent by mail on request. Ovens can be seen in operation at the New England Kitchens, 142 Pleasant Street, Boston, and 341 Hudson Street, New York.

THE MASTERS OF WOOD ENGRAVING.

By W. J. LINTON.

Two Hundred and Twenty-nine Pages of Text, with nearly Two Hundred Cuts interspersed, mostly on India Paper, and Forty-eight unbacked page Subjects.

The Edition is limited to 500 Copies on special paper, folio, 16¼ by 12 inches, signed and numbered, at $50 net.

100 Copies, Large Paper, folio, 29 by 15 inches, signed and numbered, at $100 net. Certain Plates (too large for the whole to be printed in the Smaller Edition) are here given in their entirety, and in addition is given Dürer's 'Triumphal Car of Maximilian,' measuring 7 feet 4 inches, with a height of 18 inches.

ATHENÆUM.

"A magnificent volume, admirable for printing, binding, and typography, and most admirable for illustrations, from both ancient and modern examples, printed with great skill and care, and immensely superior to those generally used in books of the sort and somewhat boldly called facsimiles. Not a page without interest and extreme pleasure and profit."

PORTFOLIO.

"The history of the art by an expert of experts. If any one be competent to teach the true merits of wood-engraving it is Mr. W. J. Linton. Well filled with letterpress. Mr. Linton has absolute knowledge of his subject."

ENGLISH ILLUSTRATED MAGAZINE.

"Mr. Linton's crowning achievement as a historian of wood-engraving. The most luxurious thing of its kind that has yet been produced. Unquestionably the one authoritative treatise by the greatest living master."

"The weary brain requires some nerve sustaining element as food."—HERBERT SPENCER.

Crosby's Vitalized Phosphites.

The vital principle of animal and vegetable life isolated from the ox brain and wheat germ.

The loss of memory, the tired and exhausted feeling, the dull, unrefreshed sleep, or nervous sleeplessness, brain weariness, depressed vitality, are simply the brain and nervous system calling for their necessary food. In this condition the Vitalized Phosphites give great relief. It restores the true protagon, the brain phosphoid, increases brain and nerve power by specially feeding the nerve centres. It reinvigorates brain and body.

For thirty years endorsed by leading physicians, and the world's best brain-workers. Formula on the label. Pamphlet free to those who write for it. Druggists or by mail, $1.00. 56 West 25th St., New York.

None genuine without signature. ☞ F. Crosby Co.

TWO NOTEWORTHY BOOKS ABOUT COLUMBUS.

Christopher Columbus,

And How he Received and Imparted the Spirit of Discovery. By JUSTIN WINSOR, editor of 'The Narrative and Critical History of America.' With Portraits and Maps. *Fourth Edition.* 8vo, $4.00.

"Dr. Winsor's attractive work embodies the latest and most authoritative conclusions on the subject which the best European and American research and scholarship have reached."—*Dr. W. F. Poole.*

"It is *the* Columbus book of this Columbian year."—*Dr. J. Max Hark, Chancellor of the Pennsylvania Chautauqua.*

The Discovery of America,

With some account of Ancient America and the Spanish Conquest. By JOHN FISKE. With a steel Portrait, many Maps, and other Illustrations. Seventh Thousand. 2 vols., crown 8vo, gilt top, $4.00.

"The book is not at all confined to an account of the work of Columbus and his successors, although that account is, no doubt, the most interesting, and will be the most popular part of it."—*New York Times.*

"In wealth of maps, diagrams, explanatory notes, references to authorities, thorough literary equipment, and charm of style, this book is worthy of the author's great fame."—*The Critic (N. Y.).*

HAVE NOW READY:

The Story of the Byzantine Empire. By C. W. C. OMAN, author of 'War in the Middle Ages.' (No. XXXIII. in the Story of the Nations Series.) 12mo, fully illustrated, $1.50; half leather, gilt top, $1.75.

"Mr. Oman is undoubtedly one of our coming historians. . . . He has given us in a most attractively written volume a history of no little importance and of interest . . . He has treated a complicated subject in a most admirable manner. The publishers' part of the work has been well done."—*John Bull.*

Modern Punctuation. By W. B. DICKSON. A Book for Stenographers, Typewriter Operators, and Business Men. With hints to letter-writers, one hundred suggestions to typewriter operators, list of common abbreviations with definitions, and a complete vocabulary of business and technical terms, with spaces for writing in the shorthand equivalents. 75c.

Cardiac Outlines. For the Use of Clinical Clerks and Practitioners; and First Principles in the Physical Examination of the Heart, for the Beginner. By WILLIAM EWART, M.D., Cantab., F.R.C.P.; Physician to St. George's Hospital, London; Clinical Lecturer and Teacher of Practical Medicine in the Medical School of St. George's Hospital, &c., &c. With 62 illustrations. 16mo. $1.50.

The Life of George Mason of VIRGINIA, 1726–1792. Edited by KATE MASON ROWLAND. Including his Speeches, Public Papers and Correspondence, with an introduction by Gen. FITZHUGH LEE. 2 vols., 8vo, with portrait of Mason and fac simile of the Bill of Rights, $8.00.

"Mason's great labors may not be as widely established in the public mind as those of some others of the same period, because he persistently declined public positions in the Federal councils, where his conspicuous talents would easily have kept him in the front rank of public knowledge and esteem. In the hearts of the students of his country's history, his name and fame occupy a place second to none."—*Extract from the Introduction.*

*** Notes on New Books, Vol. II., No. I., and Prospectus of the Story of the Nations Series, sent on application.

GERMAN HOME.
Frau Amélie Bartels, 1 Leibnitzstrasse, Wolfenbüttel, will receive a few American gentlemen into her home. Finest German, beautiful walks; 15 minutes from Brunswick by hourly trains. Very near the Harz Mountains. Moderate terms. For details, address L. E. LAPHAM, Ithaca, N. Y.

"Every one should read this little book."—*Athenæum.*

Charles Scribner's Sons'

NEW PUBLICATIONS.

The Wrecker.

By ROBERT LOUIS STEVENSON and LLOYD OSBOURNE. With 12 full-page illustrations. Cloth, 12mo, $1.25.

While appearing serially in *Scribner's Magazine*, Mr. Stevenson's spirited romance of the South Seas has proved to be of absorbing interest, full of thrilling incidents, and told with all the brilliancy of style and rapidity of movement of which the author is the master. The story will rival the author's most successful romances in popularity.

The Bull Calf, and Other Tales

By A. B. FROST. Oblong 12mo, $1.00.

Mr. Frost's new volume of caricatures promises to surpass his famous "Stuff and Nonsense" in popularity. It consists of ten series of drawings, which form a most amusing gallery of character studies, and which represent his art at its very best.

Conversations and Correspondence with Carlyle

By SIR CHARLES GAVAN DUFFY. 12mo, $1.75.

"One of the most entertaining and satisfactory contributions to Carlyle literature that have yet been made."—*London Saturday Review.*

Norway and the Norwegians.

By C. F. KEARY. 12mo, $1.50.

Mr. Keary's book is historical, social, and literary rather than descriptive, its purpose being to supply the information which the guide-books lack, but which all intelligent visitors to and students of Norway want.

The Teaching of Jesus.

By Prof. HENRICH WENDT, D.D., Professor of Theology, Heidelberg. Translated by the Rev. JOHN WILSON. In two volumes, 8vo; vol. 1 now ready, $2.50 *net.*

Dr. Wendt gives, in this important work, an authentic, complete, unmixed exposition of the historical elements of the teaching of Jesus.

*** *Sold by all booksellers, or sent postpaid, by*

GROVER CLEVELAND.

THE WRITINGS AND SPEECHES OF GROVER CLEVELAND.

Selected and Edited with an Introduction by

GEORGE F. PARKER.

With Portrait. Popular Edition. 1 Volume, 8vo, Cloth, with a Complete Index, $2.50.

Edition de Luxe, on large paper, limited to 200 numbered copies. Bound in half leather, gilt top, etc. Price, $6.00.

Thoughtful members of all political parties will take a deep interest in this volume, as representing the public career of one of the greatest political leaders of our time. Many of the documents, letters, and speeches constitute, in fact, an important part of the recent history of the country.

ZOLA'S GREATEST NOVEL.

THE DOWNFALL.

(LA DÉBÂCLE.)

A STORY OF THE FRANCO-PRUSSIAN WAR.

By EMILE ZOLA.

Paper, 50 cents; Extra Cloth, Laid Paper, with Eight Illustrations, $1.50.

A new story from Émile Zola has always been a sensation. But now when a book is presented that deals with war and its devastation in the masterly style of a Zola an enormous success is assured. Rapid action and startling detail are given with all the vivid imagination possessed by this great writer, and the reader is held spellbound from commencement to finish.
